(a) Secondary rootlets, when the general appearance of the sweetpotatoes in the container is materially injured or when individual sweetpotatoes are badly affected.

(b) Sprouts, when more than 10 percent of the sweetpotatoes have sprouts more than three-fourths of an inch long.

(c) Cuts, bruises, or scars which materially affect the appearance or keeping quality of the individual sweetpotato or the general appearance of the sweetpotatoes in the container, or which cannot be removed without a loss of more than 5 percent of the total weight of the sweetpotato including the peel covering the defective area.

(d) Growth cracks which are unhealed, or those which have developed to such an extent as to materially affect the appearance or keeping quality of the individual sweetpotato or the general appearance of the sweetpotatoes in the container.

(e) Scurf (soil stain), when the general appearance of the sweetpotatoes in the container is materially injured or the individual sweetpotato is badly stained. An individual sweetpotato is badly stained when more than 25 percent in the aggregate of the surface is affected by solid light brown discoloration. Speckled types of scurf, or lighter or darker shades of discoloration caused by scurf may be allowed over a greater or lesser area provided that no discoloration caused by scurf may affect the appearance of the sweetpotato to a greater extent than the 25 percent mentioned above.

(f) Soil rot or pox, when it materially affects the appearance of the individual sweetpotato.

(g) Wireworm, grass root or similar injury when any hole, or sweetpotatoes ranging in size from 6 to 8 ounces, is longer than ¾ inch or when the aggregate length of all holes is more than 1¼ inches. Smaller sweetpotatoes shall have lesser amounts and larger sweetpotatoes may have greater amounts: *Provided*, That the removal of the injury by proper trimming does not cause the appearance of such sweetpotatoes to be injured to a greater extent than that caused by the proper trimming of such injury permitted on a 6 to 8 ounce sweetpotato.

§ 51.1613 *Diameter.* "Diameter" means the greatest dimension of the sweetpotato measured at right angles to the longitudinal axis.

§ 51.1614 *One type.* "One type" means that the sweetpotatoes in the container have the same type of flesh, and do not show an extreme range in color of the skin. For example, dry type sweetpotatoes shall not be mixed with those of the semimoist or moist type in the same container and deep red or purple skinned sweetpotatoes shall not be mixed with those of a yellow or reddish copper color in the same container.

§ 51.1615 *Fairly smooth.* "Fairly smooth" means that the sweetpotato is not prominently veined and is reasonably free from defects which cause roughness to such an extent as to materially injure the appearance of the individual sweetpotato or the general appearance of the sweetpotatoes in the container.

§ 51.1616 *Slightly misshapen.* "Slightly misshapen" means that the sweetpotatoes are so curved, crooked, constricted or otherwise misshapen that the appearance of the individual sweetpotato or the general appearance of the sweetpotatoes in the container is materially but not seriously affected.

§ 51.1617 *Serious damage.* "Serious damage" means any injury or defect, not including badly misshapen sweetpotatoes, which seriously affects the appearance, or the edible or keeping quality of the individual sweetpotato or the general appearance of the sweetpotatoes in the container, or which cannot be removed without a loss of more than 10 percent of the total weight of the sweetpotato including peel covering the defective area. Any black rot or other decay, except soil rot, shall be considered as serious damage (see paragraph (d) of this section). Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Dirt, when the general appearance of the sweetpotatoes in the container is seriously affected by dirt or other foreign matter.

(b) Cuts, bruises, or scars which seriously affect the appearance or keeping quality of the individual sweetpotato or the general appearance of the sweetpotatoes in the container, or which cannot be removed without a loss of more than 10 percent of the total weight of the sweetpotato including the peel covering the defective area.

(c) Growth cracks which are unhealed, or those which have developed to such an extent as to seriously affect the appearance or keeping quality of the individual sweetpotato or the general appearance of the sweetpotatoes in the container.

(d) Soil rot or pox, when it seriously affects the appearance of the sweetpotato or causes a loss of more than 10 percent, by weight, of the sweetpotato including the peel covering the defective area.

(e) Wireworm, grass root or similar injury when any hole, on sweetpotatoes ranging in size from 6 to 8 ounces, is longer than 1¼ inches or when the aggregate length of all holes is more than 2 inches. Smaller sweetpotatoes shall have lesser amounts and larger sweetpotatoes may have greater amounts: *Provided*, That the removal of the injury by proper trimming, does not cause the appearance of such sweetpotatoes to be injured to a greater extent than that caused by proper trimming of such injury permitted on a 6 to 8 ounce sweetpotato.

SUBPART—UNITED STATES STANDARDS FOR SHALLOTS (BUNCHED)

GRADES

§ 51.1630 *U. S. No. 1.* U. S. No. 1 shall consist of shallots of similar varietal characteristics, which are fairly well formed, firm, young and tender, well trimmed, fairly clean, free from decay, and from damage caused by seedstems, foreign material, disease, insects, mechanical or other means. The tops shall be fresh, of good green color, and free from damage caused by broken or bruised leaves.

(a) Unless otherwise specified, the overall length (roots excepted) of the shallots shall not exceed 22 inches and the shallots shall be not less than one-fourth of an inch or more than three-fourths of an inch in diameter.

(b) Tolerance for defects: In order to allow for variations, other than size, incident to proper grading and handling, not more than a total of 10 percent, by count, of the shallots in any lot may fail to meet the requirements of this grade, but not more than 5 percent shall be allowed for defects causing serious damage, including not more than 2 percent for shallots affected by decay.

(c) Tolerance for size: Not more than a total of 10 percent, by count, of the shallots in any lot may fail to meet the requirements as to the specified length, minimum diameter, or maximum diameter, but not more than 5 percent shall be allowed for any one of the requirements for size.

§ 51.1631 *U. S. No. 2.* U. S. No. 2 shall consist of shallots which are not badly misshapen, and which are fairly firm, fairly young and tender, fairly well trimmed, fairly clean, free from decay and from serious damage caused by seedstems, foreign material, disease, insects, mechanical or other means. The tops shall be fresh, of fairly good green color, and free from serious damage caused by broken or bruised leaves.

(a) Unless otherwise specified, the minimum size of the shallots shall be not less than one-fourth of an inch in diameter.

(b) Tolerance for defects: In order to allow for variations, other than size, incident to proper grading and handling, not more than a total of 10 percent, by count, of the shallots in any lot may fail to meet the requirements of this grade, including not more than 2 percent for shallots affected by decay.

(c) Tolerance for size: Not more than a total of 10 percent, by count, of the shallots in any lot may fail to meet the requirements of the specified minimum or maximum diameter, but not more than 5 percent shall be allowed for either of the requirements for size.

UNCLASSIFIED

§ 51.1632 *Unclassified.* Unclassified shall consist of shallots which are not graded in conformity with either of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

SIZE; BUNCHES

§ 51.1633 *Size.* The following terms and definitions are provided for describing the diameters of any lot:

"Small" means less than ⅜ inch.
"Medium" means ⅜ to ⅝ inch, inclusive.
"Large" means over ⅝ inch.

§ 51.1634 *Standard bunches.* (a) Bunches shall be fairly uniform in size and the shallots in the individual bunches shall also be of fairly uniform size. The weight of the bunches shall be not less than 4 pounds per dozen bunches. The weight of the bunched shallots shall be determined after they have been wet and shaken or drained to remove excess water.

(b) In order to allow for variations incident to proper bunching, not more than 10 percent, by count, of the bunches in any lot may fail to meet the requirements for standard bunches.

APPLICATION OF TOLERANCES

§ 51.1635 *Application of tolerances.* (a) The contents of individual containers in the lot, based on sample inspection, are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified:

(1) When a tolerance is 10 percent or more, individual containers in any lot shall have not more than one and one-half times the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any container.

(2) When a tolerance is less than 10 percent, individual containers in any lot shall have not more than double the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any container.

DEFINITIONS

§ 51.1636 *Similar varietal characteristics.* "Similar varietal characteristics" means that the shallots shall be generally of one type, as stiff-leaved or broad-leaved type.

§ 51.1637 *Fairly well formed.* "Fairly well formed" means that the shallot is not more than slightly curved, crooked, or otherwise slightly misshapen and does not show more than slight bulb formation.

§ 51.1638 *Firm.* "Firm" means that the edible portion of the shallot is not soft.

§ 51.1639 *Well trimmed.* "Well trimmed" means that the shallots are separated so that not more than two are attached together; that the individual bulbs are not broken above the point of root attachment and are practically free from dead, discolored or slick outer skins. Fresh, clean, loose skins which do not materially affect the appearance of the individual shallot or the bunch are permitted. The tops of shallots are sometimes clipped (pinched) back to remove discolored or otherwise injured leaves. An individual plant shall be considered as well trimmed when only the tips of the leaves have been clipped back. However, a plant or a lot shall not be considered as well trimmed when more than half of the leaves have been clipped back to the extent that the appearance of the plant, or the lot as a whole is materially injured.

§ 51.1640 *Fairly clean.* "Fairly clean" means that the appearance of the shallot is not materially injured by dirt.

§ 51.1641 *Damage.* "Damage" means any injury or defect which materially affects the appearance or edible or shipping quality.

(a) Seedstems. A shallot with a seedstem shall be considered as damaged if the seedstem has been broken at a point other than at the top, or is coarse, fibrous, hollow or soft, or has separated naturally from the sheath or skin. Shallots often show flower buds while the seedstem is still tender. Such shallots are not objectionable if the flower buds have been removed, or if present, are not noticeably protruding; however, a shallot with a seedstem which, after the flower bud has been removed, exceeds the length of the longest leaves of the plant, shall be considered as damaged.

§ 51.1642 *Fresh.* "Fresh" means that the tops are not withered or badly wilted.

§ 51.1643 *Good green color.* "Good green color" means that the tops have a normal green color characteristic of healthy plants. A slight discoloration of the extreme tips is not objectionable.

§ 51.1644 *Diameter.* "Diameter" means the greatest dimension of the shallot taken at right angles to the longitudinal axis. If the shallots are attached together only at the base (not enclosed in a single parchment-like sheath or skin) they shall be considered as separate shallots when determining size.

§ 51.1645 *Not badly misshapen.* "Not badly misshapen" means that the shallot is not badly curved or crooked and does not show excessive bulb formation.

§ 51.1646 *Fairly firm.* "Fairly firm" means that the edible portion of the shallot is not more than slightly soft.

§ 51.1647 *Fairly young and tender.* "Fairly young and tender" means that the shallot is not tough, stringy, or advanced to the stage where the neck is flabby.

§ 51.1648 *Fairly well trimmed.* "Fairly well trimmed" means that the shallots are separated so that not more than three are attached together; that the individual bulbs are not broken above the point of root attachment and are reasonably free from dead, discolored, or slick outer skins. Fresh, fairly clean, loose skins which do not seriously affect the appearance of the individual shallot or the bunch are permitted. An individual plant with all the tops clipped (pinched) back shall be considered as "fairly well trimmed" provided that not more than half of the leaves have been clipped (pinched) back to less than 8 inches in length.

§ 51.1649 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the appearance, or the edible or shipping quality.

(a) Seedstems which are excessively coarse or fibrous shall be considered as serious damage.

(b) Badly broken or badly bruised tops shall be considered as serious damage.

§ 51.1650 *Fairly good green color.* "Fairly good green color" means that the tops are pale or yellowish green or otherwise slightly discolored.

SUBPART—UNITED STATES STANDARDS FOR SWEETPOTATOES FOR CANNING

GRADES

§ 51.1660 *U. S. No. 1.* U. S. No. 1 consists of sweetpotatoes of similar type which are firm, fairly well shaped, free from soft rot, black rot, cull material, freezing injury, scald, cork or other internal discoloration, and free from damage caused by dry rot other than black rot, other diseases, bruises, cuts, growth cracks, pithiness, wireworm, weevil, other insects, stringiness, sunburn, mechanical or other means.

(a) Unless otherwise specified, each sweetpotato shall be not more than 9 inches in length, or more than 2 inches in diameter or less than 1½ inches in diameter. (See § 51.1663.)

§ 51.1661 *U. S. No. 2.* U. S. No. 2 consists of sweetpotatoes of similar type which are firm, not badly misshapen, free from soft rot, black rot, cull material, freezing injury, scald, and free from serious damage caused by dry rot other than black rot, other diseases, bruises, cuts, cork or other internal discoloration, growth cracks, pithiness, wireworm, weevil, other insects, stringiness, sunburn, mechanical or other means.

(a) Unless otherwise specified, each sweetpotato shall be not more than 9 inches in length, or more than 2¼ inches in diameter or less than 1¼ inches in diameter. (See § 51.1663.)

CULLS

§ 51.1662 *Culls.* Culls consists of sweetpotatoes which fail to meet the requirements of either U. S. No. 1 or U. S. No. 2 grades.

TOLERANCES

§ 51.1663 *Tolerances.* In the application of these standards, it is assumed that in most instances sellers will not sort their sweetpotatoes into separate lots of U. S. No. 1 and U. S. No. 2 grades before delivery to the buyer. In such cases there is no need for tolerances. If the contract between the buyer and seller calls for the delivery of lots containing only one grade, such as U. S. No. 1 or U. S. No. 2, or a combination of U. S. No. 1 and U. S. No. 2 grades, then unless otherwise specified, a tolerance of 10 percent, by weight, shall be allowed for sweetpotatoes which fail to meet the requirements of the grade, other than for size and cull material: *Provided*, That, not more than one-fifth of this amount, or 2 percent, shall be allowed for sweetpotatoes affected by soft rot or black rot. In addition, not more than 2 percent, by weight, shall be allowed for cull material. An additional tolerance of 10 percent, by weight, shall be allowed for sweetpotatoes which fail to meet the specified size requirements: *Provided*, That, not more than one-half of this amount, or 5 percent, shall be allowed for sweetpotatoes below the specified minimum diameter.

DEFINITIONS

§ 51.1664 *Similar type.* "Similar type" means that the sweetpotatoes have the same type of flesh and that the flesh of the sweetpotatoes does not show material variation in color. For example, dry type shall not be mixed with moist type and white fleshed varieties shall not be mixed with yellow- or orange-fleshed varieties.

§ 51.1665 *Firm.* "Firm" means that the sweetpotato is not soft, flabby or excessively shriveled.

§ 51.1666 *Fairly well shaped.* "Fairly well shaped" means that the sweetpotato is not materially curved, crooked, constricted, grooved, flattened, or otherwise materially misshapen for canning purposes.

§ 51.1667 *Cull material.* "Cull material" means pieces of sweetpotatoes, vines, root crowns, sprouts, secondary rootlets, loose dirt, adhering caked dirt or other foreign matter. Sweetpotatoes with attached vines, root crowns, sprouts, secondary rootlets, and adhering caked dirt shall not be scored against U. S. No. 1 or U. S. No. 2 grades, but such vines, root crowns, sprouts, secondary rootlets, and adhering caked dirt shall be removed from the sweetpotato and scored as cull material.

§ 51.1668 *Damage.* "Damage" means any injury or defect which materially affects the edible or canning quality, or which cannot be removed in the ordinary process of trimming without a loss of more than 5 percent of the total weight of the sweetpotato, including peel covering the defective area.

§ 51.1669 *Badly misshapen.* "Badly misshapen" means that the sweetpotato is so curved, crooked, grooved, constricted, flattened, or otherwise misshapen that, in the ordinary process of trimming, a waste of over 10 percent, by weight, is incurred in excess of that which would occur if the sweetpotato were perfect.

§ 51.1670 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the edible or canning quality, or which cannot be removed in the ordinary process of trimming without a loss of more than 10 percent of the total weight of the sweetpotato, including peel covering the defective area.

§ 51.1671 *Diameter.* "Diameter" means the greatest dimension of the sweetpotato measured at right angles to the longitudinal axis.

SUBPART—UNITED STATES STANDARDS FOR SWEETPOTATOES FOR DICING OR PULPING

GRADES

§ 51.1685 *U. S. No. 1.* U. S. No. 1 consists of sweetpotatoes of similar type which are firm, not badly misshapen, free from soft rot, black rot, cull material, freezing injury, scald, cork or other internal discoloration, and free from damage, caused by dry rot other than black rot, other diseases, bruises, cuts, growth cracks, pithiness, wireworm, weevil, other insects, stringiness, sunburn, mechanical or other means. (See §§ 51.1688 and 51.1689.)

§ 51.1686 *U. S. No. 2.* U. S. No. 2 consists of sweetpotatoes of similar type which are firm, free from soft rot, black rot, cull material, freezing injury, and free from serious damage caused by dry rot other than black rot, other diseases, bruises, cuts, cork or other internal discoloration, growth cracks, pithiness, scald, wireworm, weevil, other insects, stringiness, sunburn, mechanical or other means. (See §§ 51.1688 and 51.1689.)

CULLS

§ 51.1687 *Culls.* Culls consists of sweetpotatoes which fail to meet the requirements of either U. S. No. 1 or U. S. No. 2 grades.

SIZE

§ 51.1688 *Size.* The minimum or the minimum and maximum sizes for the foregoing grades may be specified by agreement between buyer and seller. Size shall be stated in terms of diameter.

TOLERANCES

§ 51.1689 *Tolerances.* In the application of these standards, it is assumed that in most instances sellers will not sort their sweetpotatoes into separate lots of U. S. No. 1 and U. S. No. 2 grades before delivery to the buyer. In such cases there is no need for tolerances. If the contract between buyer and seller calls for the delivery of lots containing only one grade, such as U. S. No. 1 or U. S. No. 2, or a combination of U. S. No. 1 and U. S. No. 2 grades, then unless otherwise specified, a tolerance of 10 percent, by weight, shall be allowed for sweetpotatoes which fail to meet the requirements of the grade, other than for size and cull material: *Provided*, That, not more than one-fifth of this amount, or 2 percent, shall be allowed for sweetpotatoes affected by soft rot or black rot. In addition, not more than 2 percent, by weight, shall be allowed for cull material. An additional tolerance of 15 percent, by weight, shall be allowed for sweetpotatoes which fail to meet the specified size requirements: *Provided*, That, not more than one-third of this amount, or 5 percent, shall be allowed for sweetpotatoes below the specified minimum diameter.

DEFINITIONS

§ 51.1690 *Similar type.* "Similar type" means that the sweetpotatoes have the same type of flesh and that the flesh of the sweetpotatoes does not show material variation in color. For example, dry type shall not be mixed with moist type and white-fleshed varieties shall not be mixed with yellow- or orange-fleshed varieties.

§ 51.1691 *Firm.* "Firm" means that the sweetpotato is not soft, flabby or excessively shriveled.

§ 51.1692 *Badly misshapen.* "Badly misshapen" means that the sweetpotato is so curved, crooked, grooved, constricted, flattened, or otherwise misshapen that, in the ordinary process of trimming, a waste of over 10 percent, by weight, is incurred in excess of that which would occur if the sweetpotato were perfect.

§ 51.1693 *Cull material.* "Cull material" means pieces of sweetpotatoes, vines, root crowns, sprouts, secondary rootlets, loose dirt, adhering caked dirt or other foreign matter. Sweetpotatoes with attached vines, root crowns, sprouts, secondary rootlets, and adhering caked dirt shall not be scored against U. S. No. 1 or U. S. No. 2 grades, but such vines, root crowns, sprouts, secondary rootlets, and adhering caked dirt shall be removed from the sweetpotato and scored as cull material.

§ 51.1694 *Damage.* "Damage" means any injury or defect which materially affects the edible or processing quality, or which cannot be removed in the ordinary process of trimming without a loss of more than 10 percent of the total weight of the sweetpotato, including peel covering the defective area.

§ 51.1695 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the edible or processing quality, or which cannot be removed in the ordinary process of trimming without a loss of more than 25 percent of the total weight of the sweetpotato, including peel covering the defective area.

§ 51.1696 *Diameter.* "Diameter" means the greatest dimension of the sweetpotato measured at right angles to the longitudinal axis.

SUBPART—UNITED STATES STANDARDS FOR RASPBERRIES FOR PROCESSING

GRADES

§ 51.1710 *U. S. No. 1.* U. S. No. 1 consists of raspberries of similar varietal characteristics which are well colored and which are free from cores, mold or decay, and from dried and distinctly immature berries and from damage caused by overmaturity, crushing, shriveling, dirt, or other foreign matter, hail, sunscald, wind-whips and other scars, moisture, birds, disease, insects, discoloration, mechanical or other means.

(a) In order to allow for variations incident to proper handling, not more than a total of 5 percent, by weight, of the raspberries in any lot may fail to meet the requirements of this grade: *Provided*, That, not more than one-fifth of this amount, or 1 percent, shall be allowed for raspberries affected by mold or decay, or which are seriously damaged by insects.

§ 51.1711 *U. S. No. 2.* U. S. No. 2 consists of raspberries which meet the requirements for U. S. No. 1 grade except for the increased tolerances for defects specified as follows:

(a) In order to allow for variations incident to proper handling, not more than a total of 10 percent, by weight, of the raspberries in any lot may fail to meet the requirements of this grade: *Provided*, That, not more than one-fifth of this amount, or 2 percent, shall be allowed for raspberries affected by mold or decay, or which are seriously damaged by insects.

UNCLASSIFIED

§ 51.1712 *Unclassified.* Unclassified consists of raspberries which have not been classified in accordance with either of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

DEFINITIONS

§ 51.1713 *Similar varietal characteristics.* "Similar varietal characteristics" means that the raspberries are of the same general color. For example, black raspberries shall not be mixed with red or purple raspberries and red raspberries shall not be mixed with black or purple raspberries.

§ 51.1714 *Well colored.* "Well colored" means that the whole surface of the berry has a bright, practically uniform, typical color characteristic of a mature berry for the variety.

§ 51.1715 *Mold.* "Mold" means any surface mold that is plainly visible to the naked eye.

§ 51.1716 *Dried.* "Dried" means appreciably lacking in juice. Dried berries are excessively seedy and often shriveled.

§ 51.1717 *Distinctly immature.* "Distinctly immature" means that the berries are red, whitish, or green in the case of types or varieties which are characteristically purple or black, when well ripened; and that the berries are pinkish, whitish or green in the case of types or varieties which are characteristically red, when well ripened.

§ 51.1718 *Damage.* "Damage" means any injury or defect which materially affects the appearance or the processing quality of the raspberries. The following shall be considered as damage:

(a) Overmaturity, when the berry is leaking; when collapse or softness of the entire berry occurs; when a noticeable number of the drupelets of the berry have lost the bright luster characteristic of well colored berries; or when the epidermal hairs between the drupelets have become discolored.

(b) Crushing, when more than one-fourth of the drupelets of the berry have been crushed.

(c) Shriveling, when the berry is materially shriveled as evidenced by drying or undevelopment of more than one-fourth of the drupelets of the berry.

(d) Dirt, when it cannot be removed from the berry in the ordinary washing process.

§ 51.1719 *Seriously damaged by insects.* "Seriously damaged by insects" means the presence of one or more insects on the raspberry.

SUBPART—UNITED STATES STANDARDS FOR SPINACH LEAVES (FRESH)

GRADES

§ 51.1730 *U. S. Extra No. 1.* "U. S. Extra No. 1" shall consist of spinach leaves of similar varietal characteristics which are fairly clean, well trimmed, free from coarse stalks, seedstems, seedbuds, crowns and roots, sandburs or other kinds of burs, decay, and from damage caused by clusters of leaves, wilting, discoloration, freezing, foreign material, disease, insects, mechanical or other means.

(a) In order to allow for variations incident to proper grading and handling, not more than 5 percent, by count, of any lot may fail to meet the requirements of this grade, including not more than 1 percent for spinach leaves which are affected by decay.

§ 51.1731 *U. S. No. 1.* "U. S. No. 1" shall consist of spinach leaves of similar varietal characteristics which are well trimmed, free from coarse stalks, seedstems, seedbuds, crowns and roots, sandburs, or other kinds of burs, decay, and from damage caused by clusters of leaves, wilting, discoloration, freezing, dirt, or other foreign material, disease, insects, mechanical or other means.

(a) In order to allow for variations incident to proper grading and handling, not more than 10 percent, by count, of any lot may fail to meet the requirements of this grade, including not more than 1 percent for spinach leaves which are affected by decay.

§ 51.1732 *U. S. Commercial.* "U. S. Commercial" shall consist of spinach leaves of similar varietal characteristics which are well trimmed, free from coarse stalks, seedstems, seedbuds, crowns and roots, sandburs, or other kinds of burs, decay, and from damage caused by clusters of leaves, wilting, discoloration, freezing, dirt or other foreign material, disease, insects, mechanical or other means.

(a) In order to allow for variations incident to proper grading and handling, not more than 20 percent, by count, of any lot may fail to meet the requirements of this grade, including not more than 1 percent for spinach leaves which are affected by decay.

APPLICATION OF TOLERANCES

§ 51.1733 *Application of tolerances.* The contents of individual containers in the lot, based on sample inspection, are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified:

(a) When a tolerance is 10 percent, or more, individual containers in any lot shall have not more than one and one-half times the tolerance specified.

(b) When a tolerance is less than 10 percent, individual containers in any lot shall have not more than double the tolerance specified.

DEFINITIONS

§ 51.1734 *Similar varietal characteristics.* "Similar varietal characteristics" means that the spinach shall be generally of one type, as crinkly leaf type, or flat leaf type. No mixture of varieties shall be permitted which materially affects the appearance of the lot.

§ 51.1735 *Well trimmed.* "Well-trimmed" means that the leafstems or petioles are not excessively long in relation to the size of the leafblades.

§ 51.1736 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the individual leaves or of the lot as a whole.

SUBPART—UNITED STATES CONSUMER STANDARDS FOR FRESH SPINACH LEAVES

GRADES

§ 51.1750 *U. S. Grade A.* U. S. Grade A shall consist of spinach leaves of sim-

ilar varietal characteristics which are fresh, clean, well trimmed, and of reasonably good green color, and which are free from coarse stalks, seedstems, seedbuds, crowns and roots, sandburs or other kinds of burs, soft rot and from damage caused by clusters of leaves, leaf stems without blades, discoloration, freezing, foreign material, disease, insects, mechanical or other means. Spinach on the shown face shall be reasonably representative in size and quality of the contents of the container.

(a) Incident to proper grading and handling not more than 5 percent, by weight, of the spinach in any lot may be small pieces of leaves, not more than 5 percent of the spinach leaves may be damaged by clusters, and not more than 3 percent may fail to meet the remaining requirements of the grade, including not more than 1 percent for serious damage: *Provided*, That no tolerance shall be permitted for sandburs or other kinds of burs.

§ 51.1751 *U. S. Grade B.* U. S. Grade B shall consist of spinach leaves which meet the requirements for U. S. Grade A, except that they shall be reasonably clean, and except for the increased tolerances for defects specified in paragraph (a) of this section.

(a) Incident to proper grading and handling, not more than 10 percent, by weight, of the spinach in any lot may be small pieces, not more than 10 percent of the spinach leaves may be damaged by clusters, and not more than 5 percent may fail to meet the remaining requirements of the grade, including not more than 2 percent for serious damage: *Provided*, That no tolerance shall be permitted for sandburs or other kinds of burs.

OFF-GRADE

§ 51.1752 *Off-Grade spinach leaves.* Spinach leaves which fail to meet the requirements of either of the grades in §§ 51.1750 and 51.1751 shall be Off-Grade spinach leaves.

DEFINITIONS

§ 51.1753 *Similar varietal characteristics.* "Similar varietal characteristics" means that the spinach leaves shall be generally of one type, as crinkly leaf type or flat leaf type. No mixture of varieties shall be permitted which materially affects the appearance of the lot.

§ 51.1754 *Fresh.* "Fresh" means that the leaves are not more than slightly wilted.

§ 51.1755 *Clean.* "Clean" means that the spinach does not show more than a trace of grit, sand, dirt, silt, muck or other similar water insoluble, inorganic material.

§ 51.1756 *Well trimmed.* "Well trimmed" means that the leaf stems or petioles are not excessively long in relation to the size of the leaf blades.

§ 51.1757 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or the edible, shipping or keeping quality of the individual leaves or of the lot as a whole. The following defects or any combination of defects the seriousness of which exceeds the amount allowed for any one defect shall be considered as damage:

(a) Clusters, when there are more than 3 leaves attached, except that clusters of heart leaves with any number of leaves shall not be considered as damage, provided the length of the longest leaf in the cluster is not over 3 inches.

(b) Leaf stems, without blades attached, when present to such an extent as to materially affect the appearance of the lot, or when the individual stem is damaged.

(c) Discoloration, when the appearance of the leaf is materially affected. Heart leaves which are yellow or partially blanched shall not be considered as damage by discoloration.

(d) Mechanical damage, when the leaf is very badly crushed, torn or broken. (Owing to the many necessary handlings in the harvesting, icing, shipping, sorting, washing, and packing operations in preparing spinach for consumer use some leaves are crushed, torn or broken but only those leaves which are very badly crushed, torn or broken shall be considered as damaged by mechanical means.)

§ 51.1758 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the appearance, or the edible, shipping or keeping quality of the individual leaves or of the lot as a whole. The following defects shall be considered as serious damage:

(a) Badly discolored leaves.

(b) Leaves severely affected by mildew or white rust.

(c) Leaves on which insects are present, or leaves which are seriously damaged by insects.

(d) Leaves which are affected by soft rot.

(e) Weeds, grass or pieces thereof, and other extraneous matter.

§ 51.1759 *Reasonably clean.* "Reasonably clean" means that the spinach is reasonably free from grit, sand, dirt, silt, muck and other similar water insoluble, inorganic material.

SUBPART—UNITED STATES STANDARDS FOR TANGERINES

GENERAL

§ 51.1770 *General.* (a) The tolerances for the standards are on a container basis. However, individual packages in any lot may vary from the specified tolerances as stated below, provided the averages for the entire lot, based on sample inspection, are within the tolerances specified.

(b) For packages which contain more than 10 pounds and a tolerance of 10 percent or more is provided, individual packages in any lot shall have not more than one and one-half times the tolerance specified. For packages which contain more than 10 pounds and a tolerance of less than 10 percent is provided, individual packages in any lot shall have not more than double the tolerance specified except that at least one decayed or very seriously damaged fruit may be permitted in any package.

(c) For packages which contain 10 pounds or less, individual packages in any lot are not restricted as to the percentage of defects except that not more than one fruit which is decayed or very seriously damaged shall be allowed in any package.

GRADES

§ 51.1771 *U. S. Fancy.* U. S. Fancy shall consist of tangerines which are mature, firm, and well-formed; free from soft bruises, bird pecks, unhealed skin-breaks, and decay; free from damage by ammoniation, creasing, dryness or mushy condition, green spots or oil spots, pitting, scale, sprouting, sprayburn, sunburn, unsightly discoloration, buckskin, melanose, scars, scab, dirt or other foreign materials, disease, insects, mechanical or other means.

(a) Each fruit in this grade shall be highly colored.

(b) In this grade not more than $\frac{1}{10}$ of the surface in the aggregate of each fruit may have a light shade of brown discoloration caused by rust mite, or an equivalent in appearance to this amount when the fruit is discolored by any cause. (See § 51.1778.)

§ 51.1772 *U. S. No. 1.* U. S. No. 1 shall consist of tangerines which are mature, firm and well-formed; free from soft bruises, bird pecks, unhealed skin-breaks, and decay; free from damage by ammoniation, creasing, dryness or mushy condition, green spots or oil spots, pitting, scale, sprouting, sprayburn, sunburn, unsightly discoloration, buckskin, melanose, scars, scab, dirt or other foreign materials, disease, insects, mechanical or other means.

(a) Each fruit of this grade shall be fairly well colored.

(b) In this grade not more than one-third of the surface in the aggregate of each fruit may have a light shade of brown discoloration caused by rust mite, or an equivalent in appearance to this amount when the fruit is discolored by any cause. (See § 51.1778.)

§ 51.1773 *U. S. No. 1 Bronze.* The requirements for this grade are the same as for U. S. No. 1 except for discoloration. In this grade at least 75 percent, by count, of the fruit shall show some discoloration, and more than 20 percent, by count, of the fruit shall have more than one-third of the surface of each fruit affected with bronzed russeting: *Provided*, That no discoloration that exceeds the amount allowed in the U. S. No. 1 grade shall be permitted unless such discoloration is caused by thrip or wind scars, or rust mite. (See § 51.1778.)

§ 51.1774 *U. S. No. 2.* U. S. No. 2 shall consist of tangerines which are mature, fairly firm, and fairly well-formed; free from soft bruises, bird pecks, unhealed skin-breaks and decay; free from serious damage by ammoniation, creasing, dryness of mushy condition, green spots or oil spots, pitting, scale, sprouting, sprayburn, sunburn, unsightly discoloration, buckskin, melanose, scars, scab, dirt or other foreign materials, disease, insects, mechanical or other means.

(a) Each fruit of this grade shall be reasonably well colored.

(b) In this grade not more than two-thirds of the surface in the aggregate of each fruit may be affected with light brown discoloration, or may have the equivalent to this amount in appearance when the fruit has lighter or darker shades of discoloration. (See § 51.1778.)

§ 51.1775 *U. S. No. 2 Russet.* The requirements for this grade are the same as for U. S. No. 2 except that more than 20 percent, by count, of the fruits shall have in excess of two-thirds of the surface in the aggregate affected with light brown discoloration. (See § 51.1778.)

§ 51.1776 *U. S. No. 3.* U. S. No. 3 shall consist of tangerines which are mature, not flabby and not seriously lumpy; which are free from unhealed bird pecks, unhealed skin-breaks and decay; free from very serious damage by bruises, ammoniation, creasing, dryness or mushy condition, pitting, scale, sprouting, sprayburn, sunburn, unsightly discoloration, melanose, scars, scab, dirt or other foreign materials, disease, insects, mechanical or other means. (See § 51.1779.)

TOLERANCES

§ 51.1777 *Tolerances.* In order to allow for variations incident to proper grading and handling in each of the foregoing grades, the tolerances set forth in §§ 51.1778 and 51.1779 are provided as specified.

§ 51.1778 *U. S. Fancy; U. S. No. 1; U. S. No. 1 Bronze; U. S. No. 2 and U. S. No. 2 Russet.* Not more than a total of 10 percent, by count, of the fruit in any container may be below the requirements of the grade other than for discoloration but not more than 5 percent shall be allowed for very serious damage other than by dryness or mushy condition and not more than one-half of 1 percent shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay enroute or at destination. In addition, not more than a total of 10 percent, by count, of the fruit in any container may not meet the requirements relating to discoloration but not more than 2 percent shall be allowed for serious damage by unsightly discoloration.

§ 51.1779 *U. S. No. 3.* Not more than a total of 15 percent, by count, of the fruit in any container may be below the requirements of this grade but not more than 5 percent shall be allowed for defects other than dryness or mushy condition, and not more than 1 percent shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay enroute or at destination.

STANDARD PACK

§ 51.1780 *Standard pack.* (a) The tangerines in each container shall be packed in accordance with recognized methods. Each container shall be well filled and properly marked to indicate the size of the fruit. When the figures used to indicate size of the fruit vary from the actual number of tangerines in the container, as in the case of fractional parts of boxes, the figures indicating size shall be followed by the letter "s" or the word "size," as, for example, "210s," or "210 size." Containers which are not so marked shall not be regarded as meeting requirements of "standard pack."

(b) Fruit in each container shall be of a size not less than the minimum diameters specified below for the various packs. Packs other than those listed shall have a minimum size not less than that specified for the nearest count.

DIAMETER IN INCHES

| Pack: | *Minimum* |
|---|---|
| 100 | $2^{15}/_{16}$ |
| 120 | $2^{11}/_{16}$ |
| 150 | $2^{8}/_{16}$ |
| 176 | $2^{6}/_{16}$ |
| 210 | $2^{4}/_{16}$ |
| 246 | $2^{2}/_{16}$ |
| 294 | 2 |

(c) In order to allow for variations incident to proper sizing, not more than 10 percent, by count, of the fruit in any container may be below the minimum size for the count as specified above.

DEFINITIONS

§ 51.1781 *Firm.* "Firm" means that the flesh is not soft and the fruit is not badly puffy, and that the skin has not become materially separated from the flesh of the tangerine.

§ 51.1782 *Well-formed.* "Well-formed" means that the fruit has the characteristic tangerine shape and is not deformed.

§ 51.1783 *Damage.* "Damage" means any defect or blemish which more than slightly affects the appearance, or edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as damage:

(a) Ammoniation, when not occurring as speck-type similar to melanose: *Provided*, That no ammoniation shall be permitted that detracts from the appearance of the individual fruit to a greater extent than the amount of discoloration allowed for the grade.

(b) Creasing, when it materially affects the appearance or shipping quality of the fruit.

(c) Dryness or mushy condition, when mushy or distinctly dry to a depth of more than one-eighth inch in all segments at the stem end, or the equivalent of this amount, by volume, of mushy condition or dryness when occurring in any portion of the fruit.

(d) Green spots or oil spots, when the appearance is affected to a greater extent than 10 green spots caused by scale, each of which is approximately one-eighth inch in diameter.

(e) Pitting, when materially affecting the appearance or shipping quality of the individual fruit.

(f) Scale, when occurring as a blotch which averages more than three-eighths inch in diameter or any scale that detracts from the appearance of the individual fruit to a greater extent than a three-eighths inch blotch. "Blotch" refers to actual scale and not the discolored area caused by scale.

(g) Sprayburn, when causing the skin to become hard or when it materially affects the appearance of the fruit.

(h) Sunburn, when causing the skin to become hard or when it materially affects the appearance of the fruit.

(i) Unsightly discoloration, when the color or the pattern, or a combination of color and pattern, causes the fruit to have an unattractive appearance.

(j) Buckskin, when it detracts from the appearance of the fruit to a greater extent than the amount of discoloration allowed for the grade.

(k) Melanose, when not small smooth speck-type, or any speck-type that detracts from the appearance of the fruit to a greater extent than the amount of discoloration allowed in the grade. Melanose that exceeds the amount allowed in the U. S. No. 1 grade is not permitted in the U. S. No. 1 Bronze grade.

(l) Scars, when not smooth, or when causing any noticeable depression or when detracting from the appearance of the fruit to a greater extent than the amount of discoloration allowed for the grade.

(m) Scab, when not smooth, or when it affects shape or when it detracts from the appearance of the fruit to a greater extent than the amount of discoloration allowed for the grade. Scab injury that exceeds the amount allowed in the U. S. No. 1 grade is not permitted in the U. S. No. 1 Bronze grade.

§ 51.1784 *Highly colored.* "Highly colored" means that the ground color of each fruit is a deep tangerine color with practically no trace of yellow color.

§ 51.1785 *Discoloration.* "Discoloration" includes discoloration caused by rust mite, melanose, scars, scab, or any other means. Shades of discoloration which blend with the ground color of the fruit may be allowed on a larger area than that specified in the grade for light brown discoloration, and shades of discoloration which are more in contrast with the ground color shall be restricted to a lesser area, provided no discoloration may affect the appearance to a greater extent than the amount of light brown discoloration specified for the grade. Tangerines which show discoloration caused by melanose, scab, or any cause other than by thrip, or wind scars, or by rust mite shall not be permitted in the U. S. No. 1 Bronze grade when such discoloration exceeds the amount allowed in the U. S. No. 1 grade. (See § 51.1787.)

§ 51.1786 *Fairly well colored.* "Fairly well colored" means that each fruit may have not over one inch of green color in the aggregate and the remainder of the surface shall show a good tangerine color with some portion of the surface showing a reddish tangerine blush.

§ 51.1787 *Bronzed russeting.* "Bronzed russeting" means russeting caused by thrip, or wind scars, or by rust mite or similar russeting which is not readily distinguishable from that caused by rust mite. Discolorations caused by melanose, scab, etc., are not considered as "bronzed russeting" within the meaning of these standards but are regarded as defects when they exceed the amounts permitted in the U. S. No. 1 grade and are not permitted in the U. S. No. 1 Bronze grade.

§ 51.1788 *Fairly firm.* "Fairly firm" means that the flesh may be slightly soft but is not bruised or badly puffy, and that the skin has not become seriously separated from the flesh of the tangerine.

§ 51.1789 *Fairly well-formed.* "Fairly well-formed" means that the fruit may not have the shape characteristic of the variety but that it is not badly deformed.

§ 51.1790 *Serious damage.* "Serious damage" means any defect or blemish which seriously affects the appearance, or edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as serious damage:

(a) Ammoniation, when scars are cracked, or dark and aggregating more than one-half inch in diameter or when light-colored and aggregating more than 1 inch in diameter.

(b) Creasing, when it causes the skin to be seriously weakened.

(c) Dryness or mushy condition, when mushy or distinctly dry to a depth of more than one-quarter inch in all segments at the stem end, or the equivalent of this amount, by volume, of mushy condition or dryness when occurring in any portion of the fruit.

(d) Green spots or oil spots, when the appearance is affected to a greater extent than 25 green spots, caused by scale, each of which is approximately one-eighth inch in diameter.

(e) Pitting, when seriously affecting the appearance or shipping quality of the fruit.

(f) Scale, when occurring as a blotch which averages more than one-half inch in diameter, or any scale that detracts from the appearance of the fruit to a greater extent than a one-half inch blotch. "Blotch" refers to actual scale and not the discoloration caused by scale.

(g) Sprayburn, when it has caused the skin to become hard, or when it seriously affects the appearance of the fruit.

(h) Sunburn, when it has caused the skin to become hard, or when it seriously affects the appearance of the fruit.

(i) Unsightly discoloration, when the color or the pattern, or a combination of both, causes the fruit to have a distinctly unattractive appearance.

(j) Buckskin, when it detracts from the appearance of the fruit to a greater extent than the amount of discoloration allowed for the grade.

(k) Melanose, when badly caked and aggregating more than ½ inch in diameter or when lightly caked and aggregating more than 1 inch in diameter, or when unsightly or when it detracts from the appearance of the fruit to a greater extent than the amount of discoloration allowed for the grade.

(l) Scars, when not fairly smooth, or when causing any materially depressed areas, or when detracting from the appearance to a greater extent than the amount of discoloration allowed for the grade. Scars which are not fairly smooth, or which are materially depressed, are not permitted in either U. S. No. 2 or U. S. No. 2 Russet grades.

(m) Scab, when not fairly smooth, or when it materially affects the shape of the fruit, or when it detracts from the appearance to a greater extent than the maximum amount of discoloration allowed for the grade.

§ 51.1791 *Reasonably well colored.* "Reasonably well colored" means that a good yellow or reddish tangerine color shall predominate over the green color on at least one-half of the fruit surface in the aggregate, and that each fruit shall show practically no lemon color.

§ 51.1792 *Very serious damage.* "Very serious damage" means any defect or blemish which very seriously affects the appearance, or edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as very serious damage:

(a) Ammoniation, when scars are badly cracked, or when dark and aggregating more than 1 inch in diameter, or when light-colored and detracting from the appearance of the fruit to a greater extent than 1 inch of dark ammoniation.

(b) Creasing, when causing the skin to be seriously weakened.

(c) Dryness or mushy condition, when mushy or distinctly dry to a depth of more than one-quarter inch in all segments at the stem end or the equivalent of this amount, by volume, of mushy condition or dryness when occurring in any portion of the fruit.

(d) Pitting, when it very seriously affects the appearance or the shipping quality of the fruit.

(e) Scale, when it very seriously affects the appearance of the fruit.

(f) Sprayburn, when it very seriously affects the appearance of the fruit.

(g) Sunburn, when it very seriously affects the appearance of the fruit.

(h) Unsightly discoloration, when the fruit has a very objectionable appearance caused by any means. The color or the pattern of the discoloration, or a combination of both, or a combination of defects may cause the fruit to have a very unsightly appearance.

(i) Melanose, when caked to the extent that the appearance of the fruit is very seriously affected.

(j) Scars, when so deep, rough, or so unsightly that the appearance of the fruit is very seriously injured.

(k) Scab, when it causes the fruit to be very seriously injured.

§ 51.1793 *Cull.* A cull is a fruit which does not meet the requirements of U. S. No. 3 grade.

SUBPART—UNITED STATES STANDARDS FOR FLORIDA TANGERINES

GRADES

§ 51.1810 *U. S. Fancy.* U. S. Fancy consists of tangerines which are mature, firm, and well formed, and which are free from soft bruises, bird pecks, unhealed skin-breaks, and decay, and free from damage caused by ammoniation, creasing, dryness or mushy condition, green spots or oil spots, pitting, scale, sprouting, sprayburn, sunburn, unsightly discoloration, buckskin, melanose, scars, scab, dirt or other foreign materials, disease, insects, or mechanical or other means.

(a) Each fruit in this grade shall be highly colored.

(b) In this grade not more than one-tenth of the fruit surface, in the aggregate, may have a light shade of brown discoloration caused by rust mite, or an equivalent of this amount in appearance when the fruit is discolored by any cause. (See § 51.1819.)

§ 51.1811 *U. S. No. 1.* U. S. No. 1 consists of tangerines which are mature, firm, and well formed, and which are free from soft bruises, bird pecks, unhealed skin-breaks, and decay, and free from damage caused by ammoniation, creasing, dryness or mushy condition, green spots or oil spots, pitting, scale, sprouting, sprayburn, sunburn, unsightly discoloration, buckskin, melanose, scars, scab, dirt or other foreign materials, disease, insects, or mechanical or other means.

(a) Each fruit in this grade shall be fairly well colored.

(b) In this grade not more than one-third of the fruit surface, in the aggregate, may have a light shade of brown discoloration caused by rust mite, or an equivalent of this amount in appearance when the fruit is discolored by any cause. (See § 51.1819.)

§ 51.1812 *U. S. No. 1 Bronze.* The requirements for this grade are the same as for U. S. No. 1 except for discoloration. In this grade at least 75 percent, by count, of the fruits shall show some discoloration, and more than 20 percent, by count, of the fruits shall have more than one-third of their surface affected with bronzed russeting: *Provided*, That no discoloration that exceeds the amount allowed in the U. S. No. 1 grade shall be permitted unless such discoloration is caused by thrip, wind scars, or rust mite. (See § 51.1819.)

§ 51.1813 *U. S. No. 1 Russet.* The requirements for this grade are the same as for U. S. No. 1 except for discoloration. In this grade at least 75 percent, by count, of the fruits shall show some discoloration, and more than 20 percent, by count, of the fruits shall have more than one-third of their surface affected with discoloration. (See § 51.1819.)

§ 51.1814 *U. S. No. 2.* U. S. No. 2 consists of tangerines which are mature, fairly firm, and fairly well formed, and which are free from soft bruises, bird pecks, unhealed skin-breaks, and decay, and free from serious damage caused by ammoniation, creasing, dryness or mushy condition, green spots or oil spots, pitting, scale, sprouting, sprayburn, sunburn, unsightly discoloration, buckskin, melanose, scars, scab, dirt or other foreign materials, disease, insects, or mechanical or other means.

(a) Each fruit in this grade shall be reasonably well colored.

(b) In this grade not more than two-thirds of the fruit surface, in the aggregate, may be affected with light brown discoloration, or may have the equivalent of this amount in appearance when the fruit has lighter or darker shades of discoloration. (See § 51.1819.)

§ 51.1815 *U. S. No. 2 Russet.* The requirements for this grade are the same as for U. S. No. 2 except that more than 20 percent, by count, of the fruits shall have in excess of two-thirds of their surface, in the aggregate, affected with light brown discoloration. (See § 51.1819.)

§ 51.1816 *U. S. No. 3.* U. S. No. 3 consists of tangerines which are mature, not flabby and not seriously lumpy, and which are free from unhealed bird pecks, unhealed skin-breaks, and decay, and free from very serious damage caused by bruises, ammoniation, creasing, dryness or mushy condition, pitting, scale, sprouting, sprayburn, sunburn, unsightly discoloration, melanose, scars, scab, dirt or other foreign materials, disease, insects, or mechanical or other means. (See § 51.1820.)

UNCLASSIFIED

§ 51.1817 *Unclassified.* Unclassified consists of tangerines which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

TOLERANCES

§ 51.1818 *Tolerances.* In order to allow for variations incident to proper grading and handling in each of the foregoing grades, the tolerances set forth in §§ 51.1819 and 51.1820 are provided as specified.

§ 51.1819 *U. S. Fancy; U. S. No. 1; U. S. No. 1 Bronze; U. S. No. 1 Russet; U. S. No. 2 and U. S. No. 2 Russet.* Not more than a total of 10 percent, by count, of the fruits in any lot may fail to meet the requirements of the grade other than for discoloration, but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage other than that caused by dryness or mushy condition, and not more than one-twentieth of the tolerance, or one-half of 1 percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. In addition, not more than a total of 10 percent, by count, of the fruits in any lot may not meet the requirements relating to discoloration but not more than 2 percent shall be allowed for serious damage by unsightly discoloration.

§ 51.1820 *U. S. No. 3.* Not more than a total of 15 percent, by count, of the fruits in any lot may fail to meet the requirements of this grade, but not more than one-third of this amount, or 5 percent, shall be allowed for defects other than that caused by dryness or mushy condition, and not more than one-fifteenth of the tolerance, or 1 percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2 percent, or a total of not more than 3 percent shall be allowed for decay en route or at destination.

APPLICATION OF TOLERANCES

§ 51.1821 *Application of tolerances to individual packages.* (a) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified for the grade.

(1) For packages which contain more than 10 pounds and a tolerance of 10 percent or more is provided, individual packages in any lot shall have not more than one and one-half times the tolerance specified. For packages which contain more than 10 pounds and a tolerance of less than 10 percent is provided, individual packages in any lot shall have not more than double the tolerance specified, except that at least one decayed or very seriously damaged fruit may be permitted in any package.

(2) For packages which contain 10 pounds or less, individual packages in any lot are not restricted as to the percentage of defects, except that not more than one fruit which is decayed or very seriously damaged shall be allowed in any package.

STANDARD PACK

§ 51.1822 *Standard pack.* (a) The tangerines in each container shall be packed in accordance with recognized methods. Each container shall be well filled and properly marked to indicate the size of the fruit. When the figures used to indicate size of fruit vary from the actual number of tangerines in the container, as in the case of fractional parts of boxes, the figures indicating size shall be followed by the letter "s" or the word "size", as, for example, "210's", or "210 size." Containers which are not so marked shall not be regarded as meeting requirements of "standard pack."

(1) Fruit in each container shall be of a size not less than the minimum diameters specified in Table I for the various packs. Packs other than those listed shall have a minimum diameter not less than that specified for the nearest count.

TABLE I

[Diameter in inches]

| Pack: | Minimum |
|---|---|
| 100 | 2 15/16 |
| 120 | 2 11/16 |
| 150 | 2 5/16 |
| 176 | 2 1/16 |
| 210 | 2 1/16 |
| 246 | 2 1/16 |
| 294 | 2 |

(2) In order to allow for variations incident to proper sizing, not more than 10 percent, by count, of the fruits in any lot may be below the minimum size for the count as specified in Table I of this paragraph.

DEFINITIONS

§ 51.1823 *Mature.* "Mature" means the same as that term is set forth for tangerines in §§ 601.21 and 601.22, chapter 26492, Florida Statutes, known as the Florida Citrus Code of 1949.

§ 51.1824 *Firm.* "Firm" means that the flesh is not soft and the fruit is not badly puffy, and that the skin has not become materially separated from the flesh of the tangerine.

§ 51.1825 *Well formed.* "Well formed" means that the fruit has the characteristic tangerine shape and is not deformed.

§ 51.1826 *Damage.* "Damage" means any defect which more than slightly affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Ammoniation, when it is not speck-type similar to melanose, provided that no ammoniation shall be permitted that detracts from the appearance of the individual fruit to a greater extent than the amount of discoloration allowed for the grade;

(b) Creasing, when it materially affects the appearance or shipping quality of the fruit;

(c) Dryness or mushy condition, when mushy or distinctly dry to a depth of more than one-eighth inch in all segments at the stem end, or the equivalent of this amount, by volume, of mushy condition or dryness when occurring in any portion of the fruit;

(d) Green spots or oil spots, when the appearance is affected to a greater extent than 10 green spots caused by scale, each of which is equivalent to the area of a circle one-eighth inch in diameter;

(e) Pitting, when materially affecting the appearance or shipping quality of the individual fruit;

(f) Scale, when occurring as a blotch and the aggregate area exceeds the area of a circle three-eighths inch in diameter, or any scale that detracts from the appearance of the individual fruit to a greater extent than the area permitted for a blotch. "Blotch" refers to actual scale and not the discolored area caused by scale;

(g) Sprayburn, when causing the skin to become hard or when it materially affects the appearance of the fruit;

(h) Sunburn, when causing the skin to become hard or when it materially affects the appearance of the fruit;

(i) Unsightly discoloration, when the color or the pattern, or a combination of color and pattern, causes the fruit to have an unattractive appearance;

(j) Buckskin, when it detracts from the appearance of the fruit to a greater extent than the amount of discoloration allowed for the grade;

(k) Melanose, when not small smooth speck-type, or any speck-type that detracts from the appearance of the fruit to a greater extent than the amount of discoloration allowed in the grade. Melanose that exceeds the amount allowed in the U. S. No. 1 grade is not permitted in the U. S. No. 1 Bronze grade;

(l) Scars, when not smooth, or when causing any noticeable depression, or when detracting from the appearance of the fruit to a greater extent than the amount of discoloration allowed for the grade; and,

(m) Scab, when not smooth, or when it affects shape, or when it detracts from the appearance of the fruit to a greater extent than the amount of discoloration

allowed for the grade. Scab injury that exceeds the amount allowed in the U. S. No. 1 grade is not permitted in the U. S. No. 1 Bronze grade.

§ 51.1827 *Highly colored.* "Highly colored" means that the ground color of each fruit is a deep tangerine color with practically no trace of yellow color.

§ 51.1828 *Discoloration.* "Discoloration" includes discoloration caused by rust mite, melanose, scars, scab, or any other means. Shades of discoloration which blend with the ground color of the fruit may be allowed on a larger area than that specified in the grade for light brown discoloration, and shades of discoloration which are more in contrast with the ground color shall be restricted to a lesser area, provided no discoloration may affect the appearance to a greater extent than the amount of light brown discoloration specified for the grade. Tangerines which show discoloration caused by melanose, scab, or any cause other than by thrip, wind scars, or by rust mite shall not be permitted in the U. S. No. 1 Bronze grade when such discoloration exceeds the amount allowed in the U. S. No. 1 grade. (See § 51.1830.)

§ 51.1829 *Fairly well colored.* "Fairly well colored" means that the fruit may have green color which does not exceed the aggregate area of a circle 1 inch in diameter and that the remainder of the surface shows a good tangerine color with some portion of the surface showing a reddish tangerine blush.

§ 51.1830 *Bronzed russeting.* "Bronzed russeting" means russeting caused by thrip, wind scars, or by rust mite, or similar russeting which is not readily distinguishable from that caused by rust mite. Discoloration caused by melanose, scab, etc. are not considered as "bronzed russeting" within the meaning of these standards but are regarded as defects when they exceed the amounts permitted in the U. S. No. 1 grade and are not permitted in the U. S. No. 1 Bronze grade.

§ 51.1831 *Fairly firm.* "Fairly firm" means that the flesh may be slightly soft but is not bruised or badly puffy, and that the skin has not become seriously separated from the flesh of the tangerine.

§ 51.1832 *Fairly well formed.* "Fairly well formed" means that the fruit may not have the shape characteristic of the variety but that it is not badly deformed.

§ 51.1833 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Ammoniation, when scars are cracked, or when dark and the aggregate area exceeds the area of a circle one-half inch in diameter, or when light colored and the aggregate area exceeds the area of a circle 1 inch in diameter;

(b) Creasing, when it causes the skin to be seriously weakened;

(c) Dryness or mushy condition, when mushy or distinctly dry to a depth of more than one-fourth inch in all segments at the stem end, or the equivalent of this amount, by volume, of mushy condition or dryness when occurring in any portion of the fruit;

(d) Green spots or oil spots, when the appearance is affected to a greater extent than 25 green spots, caused by scale, each of which is equivalent to the area of a circle one-eighth inch in diameter;

(e) Pitting, when seriously affecting the appearance or shipping quality of the fruit;

(f) Scale, when occurring as a blotch and the aggregate area exceeds the area of a circle one-half inch in diameter, or any scale that detracts from the appearance of the fruit to a greater extent than the area permitted for a blotch. "Blotch" refers to actual scale and not the discoloration caused by scale;

(g) Sprayburn, when it has caused the skin to become hard, or when it seriously affects the appearance of the fruit;

(h) Sunburn, when it has caused the skin to become hard, or when it seriously affects the appearance of the fruit;

(i) Unsightly discoloration, when the color or the pattern, or a combination of both, causes the fruit to have a distinctly unattractive appearance;

(j) Buckskin, when it detracts from the appearance of the fruit to a greater extent than the amount of discoloration allowed for the grade;

(k) Melanose, when badly caked and the aggregate area exceeds the area of a circle one-half inch in diameter, or when lightly caked and the aggregate area exceeds the area of a circle 1 inch in diameter, or when unsightly, or when it detracts from the appearance of the fruit to a greater extent than the amount of discoloration allowed for the grade;

(l) Scars, when not fairly smooth, or when causing any materially depressed areas, or when detracting from the appearance to a greater extent than the amount of discoloration allowed for the grade. Scars which are not fairly smooth, or which are materially depressed, are not permitted in either U. S. No. 2 or U. S. No. 2 Russet grades; and,

(m) Scab, when not fairly smooth, or when it materially affects the shape of the fruit, or when it detracts from the appearance to a greater extent than the maximum amount of discoloration allowed for the grade.

§ 51.1834 *Reasonably well colored.* "Reasonably well colored" means that a good yellow or reddish tangerine color shall predominate over the green color on at least one-half of the fruit surface in the aggregate, and that each fruit shall show practically no lemon color.

§ 51.1835 *Very serious damage.* "Very serious damage" means any defect which very seriously affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as very serious damage:

(a) Ammoniation, when scars are badly cracked, or when dark and the aggregate area exceeds the area of a circle 1 inch in diameter, or when light colored and it detracts from the appearance of the fruit to a greater extent than the area permitted for dark ammoniation;

(b) Creasing, when causing the skin to be seriously weakened;

(c) Dryness or mushy condition, when mushy or distinctly dry to a depth of more than one-fourth inch in all segments at the stem end, or the equivalent of this amount, by volume, of mushy condition or dryness when occurring in any portion of the fruit;

(d) Pitting, when it very seriously affects the appearance or the shipping quality of the fruit;

(e) Scale, when it very seriously affects the appearance of the fruit;

(f) Sprayburn, when it very seriously affects the appearance of the fruit;

(g) Sunburn, when it very seriously affects the appearance of the fruit;

(h) Unsightly discoloration, when the fruit has a very objectionable appearance caused by any means. The color or the pattern of the discoloration, or a combination of both, or a combination of defects may cause the fruit to have a very unsightly appearance;

(i) Melanose, when caked to the extent that the appearance of the fruit is very seriously affected;

(j) Scars, when so deep, rough, or unsightly that the appearance of the fruit is very seriously injured; and,

(k) Scab, when it causes the fruit to be very seriously injured.

§ 51.1836 *Diameter.* "Diameter" means the greatest dimension measured at right angles to a line from stem to blossom end of the fruit.

## SUBPART—UNITED STATES STANDARDS FOR FRESH TOMATOES

### GRADES

§ 51.1855 *U. S. No. 1.* U. S. No. 1 consists of tomatoes of similar varietal characteristics which are mature, but not overripe or soft, which are well developed, fairly well formed, fairly smooth, and which are free from decay and freezing injury, and free from damage caused by dirt, bruises, cuts, sunscald, sunburn, puffiness, catfaces, growth cracks, scars, disease, insects, hail or mechanical or other means.

(a) *Tolerances.* In order to allow for variations incident to proper grading and handling the following tolerances shall be permitted:

(1) At shipping point (or in shipments from Mexico when inspected at points of entry into the United States) not more than a total of 10 percent, by count, for tomatoes in any lot, which fail to meet the requirements of this grade: *Provided*, That not more than one-half of this amount, or 5 percent, shall be allowed for defects causing serious damage, and including in this latter amount not more than 1 percent for tomatoes which are soft or affected by decay; and,

(2) En route or at destination, not more than a total of 15 percent, by count, for tomatoes in any lot which fail to meet the requirements of this grade: *Provided*, That included in this amount not more than the following percentages shall be allowed for the defects listed:

5 percent for tomatoes which are soft or affected by decay;

10 percent for tomatoes which are damaged by shoulder bruises or by discolored or sunken scars on any parts of the tomatoes; and,

10 percent for tomatoes otherwise defective, except that not more than one-half of this amount, or 5 percent, shall be allowed for defects causing serious damage.

§ 51.1856 *U. S. Combination.* U. S. Combination consists of a combination of U. S. No. 1 and U. S. No. 2 tomatoes: *Provided*, That at least 60 percent, by count, meet the requirements of U. S. No. 1 grade.

(a) Tolerances. In order to allow for variations incident to proper grading and handling the following tolerances shall be permitted:

(1) At shipping point (or in shipments from Mexico when inspected at points of entry into the United States) not more than a total of 10 percent, by count, for tomatoes in any lot, which fail to meet the requirements of the U. S. No. 2 grade: *Provided*, That not more than one-tenth of this amount, or 1 percent, shall be allowed for tomatoes which are soft or affected by decay; and,

(2) En route or at destination, not more than a total of 15 percent, by count, for tomatoes in any lot, which fail to meet the requirements of the U. S. No. 2 grade: *Provided*, That included in this amount not more than the following percentages shall be allowed for the defects listed:

5 percent for tomatoes which are soft or affected by decay;

10 percent for tomatoes which are seriously damaged by shoulder bruises or by discolored or sunken scars on any parts of the tomatoes; and,

10 percent for tomatoes otherwise defective.

(b) No part of any tolerance shall be allowed to reduce for the lot as a whole the percentage of U. S. No. 1 tomatoes required in the combination but individual containers shall have not less than 50 percent which meet the requirements of U. S. No. 1 grade: *Provided*, That the entire lot contains not less than 60 percent U. S. No. 1 grade.

§ 51.1857 *U. S. No. 2.* U. S. No. 2 consists of tomatoes of similar varietal characteristics which are mature, but not overripe or soft, which are not badly misshapen, and which are free from decay, unhealed cuts, freezing injury, and free from serious damage caused by dirt, bruises, sunscald, sunburn, puffiness, catfaces, growth cracks, scars, disease, insects, hail or mechanical or other means.

(a) *Tolerances.* In order to allow for variations incident to proper grading and handling the following tolerances shall be permitted:

(1) At shipping point (or in shipments from Mexico when inspected at points of entry into the United States) not more than a total of 10 percent, by count, for tomatoes in any lot, which fail to meet the requirements of this grade: *Provided*, That not more than one-tenth of this amount, or 1 percent, shall be allowed for tomatoes which are soft or affected by decay; and,

(2) En route or at destination, not more than a total of 15 percent, by count, for tomatoes in any lot, which fail to meet the requirements of this grade: *Provided*, That included in this amount not more than the following percentages shall be allowed for the defects listed:

5 percent for tomatoes which are soft or affected by decay;

10 percent for tomatoes which are seriously damaged by shoulder bruises or by discolored or sunken scars on any parts of the tomatoes; and,

10 percent for tomatoes otherwise defective.

### UNCLASSIFIED

§ 51.1858 *Unclassified.* Unclassified consists of tomatoes which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no grade has been applied to the lot.

### SIZE

§ 51.1859 *Size requirements.* (a) Tomatoes when packed in Los Angeles lugs, or when packed in other types of containers and the size is specified according to the size arrangements customarily used in Los Angeles lugs, shall be within the ranges of diameters specified below, except when designated as "Irregular Sizing".

| Los Angeles lug size requirements [1] | Minimum diameter | Maximum diameter |
|---|---|---|
| | *Inches* | *Inches* |
| 4 x 4 | 3 5/8 | 3 15/16 |
| 4 x 5 | 3 | 3 1/16 |
| 5 x 5 | 2 11/16 | 3 0/16 |
| 5 x 6 | 2 5/16 | 2 13/16 |
| 6 x 6 | 2 6/8 | 2 14/16 |
| 6 x 7 | 2 4/16 | 2 10/16 |
| 7 x 7 | 2 | 2 2/16 |
| 7 x 8 | 1 13/16 | 2 1/16 |

[1] Size arrangements not listed in the above table but which meet the diameter requirements for one of the above Los Angeles lug size arrangements may be certified as meeting Los Angeles lug size requirements for the specified size: *Provided*, That there shall not be a variation of more than 2 tomatoes in a layer between the two size arrangements, except that a variation of not more than 4 tomatoes in a layer shall be permitted in sizes smaller than 6 x 7. For example, a 4–4 x 6 offset pack has 24 tomatoes per layer and should be sized in accordance with the diameter requirements for 5 x 5 which has 25 tomatoes per layer. A 4–5 x 9 diagonal pack has 40 or 41 tomatoes per layer and should be sized in accordance with the requirements for 6 x 7 which has 42 tomatoes per layer.

(b) In determining compliance with the above size arrangements the measurement for minimum diameter shall be the largest diameter of the tomato measured at right angles to a line from the stem end to the blossom end. The measurement for maximum diameter shall be the smallest dimension of the tomato determined by passing the tomato through a round opening in any position.

(c) In lieu of specifying size according to the Los Angeles lug size arrangements, the size of tomatoes in any type container may be specified in terms of minimum diameter or in terms of minimum and maximum diameters expressed in whole inches, or whole inches and not less than sixteenth inch fractions thereof, in accordance with the facts, without reference to Los Angeles lug size arrangements. Such minimum diameter, or minimum and maximum diameters, shall be the largest diameter of the tomato measured at right angles to a line from the stem end to the blossom end.

(d) In order to allow for variations incident to proper sizing, not more than a total of 10 percent, by count, of the tomatoes in any lot may be smaller than the specified minimum diameter, or larger than the specified maximum diameter.

### APPLICATION OF TOLERANCES

§ 51.1860 *Application of tolerances.* (a) The contents of individual containers in the lot, based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified:

(1) When a tolerance is 10 percent or more, individual containers in any lot shall have not more than one and one-half times the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any container; and,

(2) When a tolerance is less than 10 percent, individual containers in any lot shall have not more than double the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any container.

### U. S. STANDARD PACKS

§ 51.1861 *U. S. Standard Packs.* "U. S. Standard Packs" apply only to tomatoes packed in Los Angeles lugs and shall be designated according to the arrangement in the top layer of the lug, as 5 x 5, 5 x 6, etc., in accordance with the facts. The tomatoes in all layers shall have a uniform type of arrangement, for example, square, offset or diagonal except as provided in the description of U. S. Straight Pack. The tomatoes shall be fairly tightly packed and, unless otherwise specified, the net weight of the tomatoes in the lug shall be not less than 30 pounds. The terms set forth in §§ 51.1862 to 51.1866 shall be used to describe U. S. Standard Packs in lugs.

§ 51.1862 *U. S. Straight Pack.* When specified as "U. S. Straight Pack" the tomatoes shall meet the size requirements for the Los Angeles lug size specified, and all layers in any lug shall have the same number of tomatoes: *Provided*, That when an offset or a diagonal arrangement of tomatoes is used, a variation of not more than one tomato shall be permitted in different layers. For example, in a 5 x 5 pack the tomatoes in each layer shall be packed 5 rows wide with 5 tomatoes in each row. In a 4–5 x 9 diagonal pack the tomatoes shall be packed alternately 4 and 5 to the row the short way of the lug with 9 such rows in the layer and with either 40 or 41 tomatoes in each layer. When designated as "U. S. Straight Square-Offset Pack" or "U. S. Straight Square-Diagonal Pack" the top layer shall be packed with a square arrangement and all lower

layers with either an offset or a diagonal arrangement and there may be a variation of not more than one tomato between the top layer and any of the lower layers. Not more than one tomato shall be placed in a wrapper.

§ 51.1863 *U. S. Extra Row Pack.* When specified as "U. S. Extra Row Pack" the tomatoes shall meet the size requirements for the Los Angeles lug size specified, and the lower layers shall not contain more than one additional row one way of the lug. For example, in a 5 x 5 pack, the tomatoes in the lower layers may be packed 5 x 6 but not 6 x 6 or 5 x 7. Not more than one tomato shall be placed in a wrapper.

§ 51.1864 *U. S. Bridge Pack.* When specified as "U. S. Bridge Pack" the tomatoes shall meet the size requirements for the Los Angeles lug size specified, and a part of one additional layer of tomatoes shall be packed in the lug and the remaining tomatoes in the lower layers shall not contain more than one additional row one way of the lug than is contained in the top layer. Not more than one tomato shall be placed in a wrapper.

§ 51.1865 *U. S. Double Wrap Pack.* When specified as "U. S. Double Wrap Pack" the tomatoes shall meet the size requirements for the Los Angeles lug size specified, and the tomatoes in the top layer shall be packed with not more than one tomato in a wrapper and the lower layer or layers shall be packed with not more than two tomatoes in a wrapper.

§ 51.1866 *U. S. Double Wrap Bridge Pack.* When specified as "U. S. Double Wrap Bridge Pack" the tomatoes shall meet the size requirements for the Los Angeles lug size specified, and the tomatoes in the top layer shall be packed with not more than one tomato in a wrapper and the lower layer or layers shall be packed with not more than two tomatoes in a wrapper: *Provided*, That part of one additional layer which may have either one or two tomatoes in a wrapper shall be packed in the lug.

§ 51.1867 *Tolerances for pack.* In order to allow for variations incident to proper packing, not more than 10 percent, by count, of the containers in any lot may not meet the requirements for Standard Pack: *Provided*, That when there are two or more size arrangements in any lot, not more than 20 percent of the lugs in any one size arrangement may not meet the requirements for Standard Pack: *Provided further*, That the average for the lot does not exceed 10 percent.

§ 51.1868 *Irregular pack.* Lugs of tomatoes which are not packed in accordance with any of the foregoing methods of packing may be designated as "Irregular Pack."

DEFINITIONS

§ 51.1869 *Similar varietal characteristics.* "Similar varietal characteristics" means that the tomatoes are alike as to firmness of flesh and shade of color (for example, soft fleshed early maturing varieties are not mixed with firm fleshed midseason or late varieties, or bright red varieties mixed with varieties having a purplish tinge).

§ 51.1870 *Mature.* "Mature" means that in two or more seed cavities the contents have developed a jelly-like consistency and the seeds are well developed.

§ 51.1871 *Well developed.* "Well developed" means that the tomato shows normal growth. Tomatoes which are ridged and peaked at the stem end, contain dry tissue, and usually open spaces, are not considered well developed.

§ 51.1872 *Fairly well formed.* "Fairly well formed" means that the tomato is not decidedly kidney-shaped, lopsided, elongated, angular or otherwise deformed.

§ 51.1873 *Fairly smooth.* "Fairly smooth" means that the tomato is not conspicuously ridged or rough.

§ 51.1874 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Cuts which are not shallow, not well healed or more than $\frac{1}{2}$ inch in length;

(b) Puffy tomatoes: These tomatoes are usually angular and flat sided. They are damaged if the open space in one or more locules materially affects the appearance when the tomato is cut through the center at right angles to a line running from the stem to the blossom end;

(c) Catfaces: These are irregular, dark, leathery scars at the blossom end of the fruit. Such scars damage the tomato when they are rough or deep, or when channels extend into the locule, or when they are fairly smooth and the area exceeds that of a circle $\frac{1}{2}$ inch in diameter on a $2\frac{1}{2}$ inch tomato. Smaller tomatoes shall have lesser areas of fairly smooth catfaces and larger tomatoes may have greater areas: *Provided*, That such catfaces do not affect the appearance of the tomatoes to a greater extent than that caused by fairly smooth catfaces which are permitted on a $2\frac{1}{2}$ inch tomato;

(d) Growth cracks (ruptures or cracks radiating from or concentric to the stem scar) when not well healed, when materially affecting the appearance of the fruit or when any one radiating crack extends more than $\frac{1}{2}$ inch beyond the stem scar; and

(e) Scars (except catfaces) when the aggregate area exceeds that of a circle $\frac{3}{8}$ inch in diameter on a tomato $2\frac{1}{2}$ inches in diameter. Smaller tomatoes shall have lesser areas of scars and larger tomatoes may have greater areas: *Provided*, That such scars do not affect the appearance of the tomatoes to a greater extent than that caused by scars which are permitted on a $2\frac{1}{2}$-inch tomato.

§ 51.1875 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Tomatoes which are soft or affected by decay;

(b) Fresh holes or cuts, or any holes or cuts through the tomato wall;

(c) Tomatoes showing any effects of freezing;

(d) Puffiness if open space in two or more locules seriously affects the appearance when the tomato is cut through the center at right angles to a line running from stem to the blossom end; and,

(e) Fruit actually infested with worms.

§ 51.1876 *Badly misshapen.* "Badly misshapen" means that the tomato is decidedly kidney-shaped, lopsided, elongated, angular or otherwise badly deformed.

SUBPART—UNITED STATES CONSUMER STANDARDS FOR FRESH TOMATOES

GENERAL

§ 51.1900 *General.* These standards apply only to field-grown tomatoes and not to tomatoes grown in greenhouses.

GRADES

§ 51.1901 *U. S. Grade A.* U. S. Grade A shall consist of tomatoes of similar varietal characteristics which are mature and are at least turning (see § 51.1904), but are not overripe or soft; which are well developed, at least fairly well formed, fairly smooth, free from soft rot, freezing injury, and from damage caused by dirt, bruises, cuts, shriveling, sunscald, sunburn, puffiness, catfaces, growth cracks, scars, dry rot, other diseases, insects, hail, or mechanical or other means. Tomatoes on the shown face shall be reasonably representative in size and quality of the contents of the container. (See § 51.1903.)

(a) Incident to proper grading and handling, except for maturity, not more than 5 percent, by count, of the tomatoes in any lot may fail to meet the requirements of the grade, including not more than 1 percent for tomatoes which are affected by soft rot.

§ 51.1902 *U. S. Grade B.* U. S. Grade B shall consist of tomatoes of similar varietal characteristics which are mature and are at least turning (see § 51.1904), but are not overripe or soft, and not badly misshapen; which are free from soft rot, freezing injury, and from serious damage caused by dirt, bruises, cuts, shriveling, sunscald, sunburn, puffiness, catfaces, growth cracks, scars, dry rot, other diseases, insects, hail, or mechanical or other means. Tomatoes on the shown face shall be reasonably representative in size and quality of the contents of the container. (See § 51.1903.)

(a) Incident to proper grading and handling, except for maturity, not more than 5 percent, by count, of the tomatoes in any lot may fail to meet the requirements of the grade, including not more than 1 percent for tomatoes which are affected by soft rot.

SIZE AND MATURITY CLASSIFICATION

§ 51.1903 *Size classification.* The following terms may be used for describing the size of the tomatoes in any lot:

| | |
|---|---|
| *Small* Under 3 oz. | *Medium* 3 to 6 oz., inc. |
| *Large* Over 6 to 10 oz., inc. | *Very large* Over 10 oz. |

(a) The tomatoes may also be classed in terms of combinations of the above sizes, as "Small to Medium," "Medium to Large," "Small to Very Large," etc., in accordance with the facts.

(b) Incident to proper sizing, not more than 10 percent, by count, of the tomatoes in any lot may vary from the size specified.

§ 51.1904 *Maturity classification.* Tomatoes which are characteristically red when ripe, but are not overripe or soft, may be classified for maturity as follows:

(a) Turning, when at least some part of the surface of the tomato, but less than one-half of the surface in the aggregate, is covered with pink color.

(b) Pink, when the tomato shows from one-half to three-fourths of the surface in the aggregate covered with pink or red color.

(c) Hard ripe, when the tomato shows three-fourths or more of the surface in the aggregate covered with pink or red color.

(d) Firm ripe, when the tomato shows three-fourths or more of the surface in the aggregate covered with red color characteristic of reasonably well ripened tomatoes.

(e) Incident to proper maturity determination, not more than a total of 10 percent, by count, of the tomatoes in any lot may fail to meet the maturity specified: *Provided*, That not more than 5 percent shall be allowed for tomatoes which are immature or are overripe or soft.

OFF-GRADE

§ 51.1905 *Off-Grade tomatoes.* Tomatoes which fail to meet the requirements of either of the foregoing grades shall be Off-Grade tomatoes.

DEFINITIONS

§ 51.1906 *Similar varietal characteristics.* "Similar varietal characteristics" means that the tomatoes are alike as to color, i. e., bright red varieties shall not be mixed with varieties which have a purplish tinge.

§ 51.1907 *Mature.* "Mature" means that the tomato has reached the stage of development which will insure a proper completion of the ripening process.

§ 51.1908 *Well developed.* "Well developed" means that the tomato shows normal growth. Tomatoes which are ridged and peaked at the stem end, contain dry tissue and usually open spaces, are not considered well developed.

§ 51.1909 *Fairly well formed.* "Fairly well formed" means that the tomato is not decidedly kidney-shaped, lopsided, elongated, angular, or otherwise deformed.

§ 51.1910 *Fairly smooth.* "Fairly smooth" means that the tomato is not conspicuously ridged or rough.

§ 51.1911 *Damaged.* "Damaged" means any defect which materially affects the appearance, or edible, shipping or keeping quality of the tomatoes. Any one of the following defects or any combination thereof, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Cuts which are not shallow, not well healed, or when more than $\frac{1}{2}$ inch in length.

(b) Puffiness if the open space in one or more locules materially affects the appearance when the tomato is cut through the center at right angles to a line running from the stem to the blossom end.

(c) Catfaces: These are irregular, dark, leathery scars at the blossom end of the fruit. Such scars damage the tomato when they are rough or deep, or when channels extend into the locule, or when they are fairly smooth and greater in area than a circle $\frac{3}{8}$ inch in diameter on a $2\frac{1}{2}$ inch tomato. Smaller tomatoes shall have lesser areas of fairly smooth catfaces and larger tomatoes may have greater areas, provided that such catfaces do not affect the appearance of the tomatoes to a greater extent than that caused by fairly smooth catfaces which are permitted on a $2\frac{1}{2}$ inch tomato.

(d) Growth cracks: These are ruptures or cracks radiating from the stem scar, or concentric to the stem scar. They damage the tomato when not well healed, or when more than $\frac{1}{2}$ inch in length measured from the margin of the stem scar; except that very narrow, well healed cracks concentric to the stem scar shall not be considered as damage unless they are so numerous as to damage the appearance of the fruit.

(e) Scars (except catfaces), when dark colored and shallow and aggregating more than $\frac{1}{4}$ inch in diameter on a tomato $2\frac{1}{2}$ inches in diameter, or lighter colored shallow scars covering a greater area when they detract from the appearance to a greater extent than a dark-colored, shallow scar $\frac{1}{4}$ inch in diameter. Smaller tomatoes shall have lesser areas of scars and larger tomatoes may have greater areas: *Provided*, That such scars do not affect the appearance of the tomatoes to a greater extent than that caused by scars which are permitted on a $2\frac{1}{2}$-inch tomato. A scar which penetrates the wall of the tomato shall be considered as damage.

(f) Dry rot such as dry type Macrosporium or Phoma, when the spot is not adjacent to the stem scar, or when adjacent to the stem scar and more than $\frac{3}{16}$ inch in diameter.

§ 51.1912 *Badly misshapen.* "Badly misshapen" means that the tomato is so badly deformed that its appearance is seriously affected.

§ 51.1913 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or edible, shipping, or keeping quality of the tomatoes. Any one of the following defects or any combination thereof, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Soft ripe tomatoes or tomatoes affected by soft rot.

(b) Fresh holes or cuts, or any holes or cuts through the tomato wall, or healed cuts which seriously affect the appearance of the tomato.

(c) Tomatoes showing any effects of freezing.

(d) Puffiness which causes the tomato to be distinctly light in weight.

(e) Growth cracks, when not well healed, or when so extensive, deep or discolored that the appearance of the tomato is seriously affected.

(f) Scars (except catfaces), when dark colored and shallow and aggregating more than $\frac{1}{2}$ inch in diameter on a tomato $2\frac{1}{2}$ inches in diameter, or lighter colored, shallow scars covering a greater area when they detract from the appearance to a greater extent than a dark-colored, shallow scar $\frac{1}{2}$ inch in diameter. Smaller tomatoes shall have lesser areas of scars and larger tomatoes may have greater areas: *Provided*, That such scars do not affect the appearance of the tomatoes to a greater extent than that caused by scars which are permitted on a $2\frac{1}{2}$ inch tomato.

(g) Dry rot such as dry type Macrosporium or Phoma, when the spot is not adjacent to the stem scar, or when adjacent to the stem scar and more than $\frac{1}{4}$ inch in diameter.

(h) Fruit actually infested with worms.

SUBPART—UNITED STATES STANDARDS FOR GREEN TOMATOES FOR PROCESSING

GRADES

§ 51.1930 *U. S. No. 1.* U. S. No. 1 shall consist of tomatoes which are green in color, fairly firm, free from decay, stems and worms, and are free from damage caused by growth cracks, worm holes, scars, catfaces, sunburn, sunscald, freezing, disease, or mechanical or other means. (See § 51.1933.)

§ 51.1931 *U. S. No. 2.* U. S. No. 2 shall consist of tomatoes which do not meet the requirements of the foregoing grade, but are green in color, and are free from worms, and from damage caused by worm holes, and which are free from serious damage by any cause. (See § 51.1933.)

CULLS

§ 51.1932 *Culls.* Culls are tomatoes which fail to meet the requirements of either of the foregoing grades.

SIZE

§ 51.1933 *Minimum size.* The minimum size may be fixed by agreement between buyer and seller. Tomatoes below the specified minimum size shall be classed as culls.

DEFINITIONS

§ 51.1934 *Green in color.* "Green in color" means that the surface of the tomato shows no pink or red color.

§ 51.1935 *Damage.* "Damage" means any injury which cannot be removed in the ordinary process of trimming without a loss of more than 10 percent, by weight, of the tomato in excess of that which would occur if the tomato were perfect. The following shall be considered damage:

(a) Worm holes, when the injury has penetrated beneath the outer wall of the

tomato to the extent that the injury has damaged the tomato for processing.

§ 51.1936 *Serious damage.* "Serious damage" means any injury which cannot be removed in the ordinary process of trimming without a loss of more than 20 percent, by weight, of the tomato in excess of that which would occur if the tomato were perfect.

SUBPART—UNITED STATES STANDARDS FOR CURRANTS FOR PROCESSING

GRADES

§ 51.1950 *U. S. No. 1.* U. S. No. 1 consists of currants of similar type which are not separated from the stems and which are well colored, free from mold and decay and free from damage resulting from being distinctly immature overmature, crushed, dried and shriveled, and free from damage caused by leaves or pieces of leaves, dirt or other foreign matter, disease, insects, mechanical or other means.

(a) In order to allow for variations incident to proper handling, not more than a total of 10 percent, by weight, of the currants in any lot may fail to meet the requirements of this grade: *Provided* That not more than one-tenth of this amount, or 1 percent, shall be allowed for currants affected by mold or decay or which are seriously damaged by insects.

§ 51.1951 *U. S. No. 2.* U. S. No. 2 consists of currants which meet the requirements for U. S. No. 1 grade except for the increased tolerances for defects specified as follows:

(a) In order to allow for variations incident to proper handling, not more than a total of 20 percent, by weight, of the currants in any lot may fail to meet the requirements of this grade: *Provided,* That not more than one-tenth of this amount, or 2 percent, shall be allowed for currants affected by mold or decay or which are seriously damaged by insects.

APPLICATION OF TOLERANCES

§ 51.1952 *Application of tolerances and determination of grade.* The tolerances for the preceding grades are to be applied to the entire lot. Scoring of defects shall be on a bunch basis except that the percentage of loose berries shall be calculated on the basis of weight and added to the percentage of other defects.

UNCLASSIFIED

§ 51.1953 *Unclassified.* Unclassified consists of currants which have not been classified in accordance with either of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

DEFINITIONS

§ 51.1954 *Similar type.* "Similar type" means that the currants are similar in color. For example, red varieties shall not be mixed with white varieties.

§ 51.1955 *Well colored.* "Well colored" means that the berries show the color characteristic of well ripened currants for the type or variety.

§ 51.1956 *Mold.* "Mold" means any surface mold that is plainly visible to the naked eye.

§ 51.1957 *Damage.* "Damage" means any injury or defect which materially affects the appearance or the processing quality of the currants. The following shall be considered as damage:

(a) Distinctly immature, when the currants are of a light pink, whitish, or green color in the case of varieties which are characteristically red when well ripened, or when the currants are greenish color in the case of types or varieties which are characteristically white in color when well ripened.

(b) Overmature, when the currants have advanced to the stage where the berries are soft, leaking and are dull in appearance.

(c) Dried and shriveled, when the berries are appreciably lacking in juice and are "wrinkled" and have a "raisined" appearance.

§ 51.1958 *Seriously damaged by insects.* "Seriously damaged by insects" means that there is present one or more insects on the bunch.

SUBPART—UNITED STATES STANDARDS FOR WATERMELONS

GRADES

§ 51.1970 *U. S. No. 1.* U. S. No. 1 shall consist of watermelons of similar varietal characteristics which are mature but not over-ripe, fairly well formed, and free from sunscald, decay, anthracnose and from damage caused by other disease, whiteheart, sunburn, hollow heart, hail, insects, or mechanical or other means. (See § 51.1975.)

(a) In order to allow for variations incident to proper grading and handling, not more than a total of 10 percent, by count, may be below the requirements of this grade but not more than one-half of this tolerance, or 5 percent, may be badly misshapen or seriously damaged by any means, and not more than 1 percent shall be allowed for decay.

§ 51.1971 *U. S. Commercial.* U. S. Commercial shall consist of watermelons which meet all requirements of U. S. No. 1 except for anthracnose spots. In this grade each watermelon shall be free from damage by anthracnose. (See § 51.1975.)

(a) In order to allow for variations incident to proper grading and handling, not more than a total of 10 percent, by count, may be below the requirements of this grade but not more than one-half of this tolerance, or 5 percent, may be badly misshapen or seriously damaged by any means, and not more than 1 percent shall be allowed for decay.

§ 51.1972 *U. S. No. 2.* U. S. No. 2 shall consist of watermelons of similar varietal characteristics which are mature but not over-ripe; which are not badly misshapen and which are free from sunscald, decay, and from serious damage caused by whiteheart, sunburn, hollow heart, hail, anthracnose or other disease, insects or mechanical or other means. (See § 51.1975.)

(a) In order to allow for variations incident to proper grading and handling, not more than a total of 10 percent, by count, may be below the requirements of this grade but not more than 1 percent shall be allowed for decay.

§ 51.1973 *U. S. No. 3.* U. S. No. 3 shall consist of watermelons of similar varietal characteristics which are mature but not over-ripe, free from sunscald, soft decay, and from serious damage by whiteheart or any other defect which seriously affects the internal quality of the watermelon. (See § 51.1975.)

(a) In order to allow for variations incident to proper grading and handling, not more than a total of 10 percent, by count, may be below the requirements of this grade but not more than 1 percent shall be allowed for soft decay.

UNCLASSIFIED

§ 51.1974 *Unclassified.* Unclassified shall consist of watermelons which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

SIZE

§ 51.1975 *Size.* (a) Where the size of watermelons is stated in terms of average weight, unless otherwise specified, the melons in any lot averaging less than 30 pounds shall not vary more than 4 pounds below the stated average, and the melons in any lot averaging 30 pounds or more shall not vary more than 6 pounds below the stated average. Size may also be stated in terms of minimum weight. (See Table of Weights.)

TABLE OF WEIGHTS

| Average weight | Minimum weight (unless otherwise specified) | Tolerance permitted for melons below the minimum weight |
|---|---|---|
| | | *Percent* |
| 20 | 16 | 5 |
| 22 | 18 | 5 |
| 24 | 20 | 5 |
| 26 | 22 | 5 |
| 28 | 24 | 5 |
| 30 | 24 | 5 |
| 32 | 26 | 5 |
| 34 | 28 | 5 |
| 36 | 30 | 5 |
| 38 | 32 | 5 |
| 40 | 34 | 5 |
| 42 | 36 | 5 |

(b) In order to allow for variations, incident to proper sizing, not more than 5 percent, by count, of the watermelons in any lot may be below the minimum size requirements.

DEFINITIONS

§ 51.1976 *Mature.* "Mature" means having reached the stage of development at which the melon is at least fairly sweet.

§ 51.1977 *Fairly well formed.* "Fairly well formed" means having the characteristic shape but not necessarily the perfect type of the variety.

§ 51.1978 *Not badly misshapen.* "Not badly misshapen" means that the melons are not bottlenecks or gourdnecks, but may be tapered at the ends or slightly constricted.

§ 51.1979 *Free from damage.* "Free from damage" means that the melons are not injured to an extent readily apparent upon examination. Melons showing a greenish yellow sunburned spot not larger than 9 square inches shall not be considered as damaged, but melons showing sunburn in excess of this amount, or which show any pronounced golden yellow color which detracts from the appearance to a greater extent than the 9 square inches of greenish yellow sunburn allowed shall be regarded as damaged.

§ 51.1980 *Free from damage by anthracnose.* "Free from damage by anthracnose" means that each melon may have not more than 5 anthracnose spots which are not cracked or sunken below the contour of the surface of the melon.

§ 51.1981 *Serious damage.* "Serious damage" means any injury which affects the edible quality of the melon or which detracts materially from its appearance. Melons showing sunscald are regarded as seriously damaged. Melons showing not more than 15 anthracnose spots which are not cracked or sunken below the regular surface contour of the melon shall not be considered as seriously damaged.

SUBPART—UNITED STATES STANDARDS FOR FILBERTS IN THE SHELL

GRADES

§ 51.1995 *U. S. No. 1.* U. S. No. 1 shall consist of filberts in the shell which are of similar type, well formed, dry, clean and bright, free from blanks, broken or split shells, and which are free from damage caused by stain, adhering husks, or other means. The kernels shall be reasonably well developed, not badly misshapen, free from rancidity, decay, mold, insect injury, and free from damage caused by shriveling, discoloration, or other means. In addition, the filberts shall meet the requirements of one of the following sizes as specified for round type and long type varieties:

(a) *Sizes for round type varieties.* (1) Jumbo means filberts which will not pass through a round opening $^{50}/_{64}$ inch in diameter.

(2) Large means filberts which will not pass through a round opening $^{50}/_{64}$ inch in diameter, but will pass through a round opening $^{50}/_{64}$ inch in diameter.

(3) Medium means filberts which will not pass through a round opening $^{46}/_{64}$ inch in diameter but will pass through a round opening $^{50}/_{64}$ inch in diameter.

(4) Small means filberts which will pass through a round opening $^{47}/_{64}$ inch in diameter.

(b) *Sizes for long type varieties.* (1) Jumbo means filberts which will not pass through a round opening $^{47}/_{64}$ inch in diameter.

(2) Large means filberts which will not pass through a round opening $^{41}/_{64}$ inch in diameter, but will pass through a round opening $^{48}/_{64}$ inch in diameter.

(3) Medium means filberts which will not pass through a round opening $^{31}/_{64}$ inch in diameter, but will pass through a round opening $^{45}/_{64}$ inch in diameter.

(4) Small means filberts which will pass through a round opening $^{35}/_{64}$ inch in diameter.

TOLERANCES

§ 51.1996 *Tolerances.* In order to allow for variations incident to proper grading and handling, the following tolerances shall be permitted:

(a) Ten percent, by count, for filberts which fail to meet the grade requirements, other than for type and size: *Provided,* That not more than 5 percent shall be allowed for blanks, and not more than 5 percent shall be allowed for rancid, decayed, or moldy filberts, or those which have insect injury, including not more than 3 percent for insect injury;

(b) Ten percent, by count, for filberts which are of a different type;

(c) Twelve percent, by count, for filberts which fail to meet the size requirements for the size specified, but not more than five-sixths of this amount, or 10 percent shall be allowed for filberts which pass through the smallest opening required for the size specified.

§ 51.1997 *Application of the tolerances and determination of the grade.* The tolerances for the grade are applied to the entire lot, and a composite sample shall be taken for determining the grade. However, any container or group of containers in which the filberts are found to be materially inferior to those in the majority of the containers shall be considered a separate lot.

In determining the grade of a lot of filberts, all of the nuts in the sample shall first be examined for size and then for external defects. The same nuts are then cracked and examined for internal defects. The nuts must meet both size and quality requirements in order to meet the grade.

UNCLASSIFIED

§ 51.1998 *Unclassified.* Lots of filberts which have not been classified in accordance with § 51.1995 shall be designated as "unclassified." The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

DEFINITIONS

§ 51.1999 *Similar type.* "Similar type" means that the filberts in each container are of the same general type and appearance. For example, nuts of the round type shall not be mixed with those of the long type in the same container.

§ 51.2000 *Well formed.* "Well formed" means that the filberts are not materially misshapen.

§ 51.2001 *Dry.* "Dry" means that the shell is free from surface moisture and that the shells and kernels combined do not contain more than 10 percent moisture.

§ 51.2002 *Clean and bright.* "Clean and bright" means that the individual filbert or the lot as a whole is practically free from adhering dirt and other foreign matter and that the shells have characteristic color.

§ 51.2003 *Blank.* "Blank" means a filbert which contains no kernel or which has a kernel that fills less than one-fourth of the capacity of the shell.

§ 51.2004 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or edible or shipping quality of the individual filbert or of the lot as a whole. Any one of the following defects or any combination of defects, the seriousness of which exceeds the maximum allowed for any one of these defects shall be considered as damage:

(a) Stains which are very dark and materially affect the appearance of the individual nut.

(b) Adhering husk, when covering more than 5 percent of the surface in the aggregate.

(c) Shriveling, when the kernel is materially shrunken, leathery or tough.

(d) Discoloration, when the appearance of the individual kernel is materially affected by black discoloration.

§ 51.2005 *Reasonably well developed.* "Reasonably well developed" means that the kernel fills at least one-half or more of the capacity of the shell.

§ 51.2006 *Badly misshapen.* "Badly misshapen," when the kernel is so malformed that the appearance is materially affected.

§ 51.2007 *Rancidity.* "Rancidity" means that the kernel is noticeably rancid to the taste. An oily appearance is not always an indication of rancidity. Unless the nut is noticeably rancid to the taste it shall not be considered as damaged.

§ 51.2008 "Decay" means that the kernel is putrid or decomposed.

§ 51.2009 *Moldy.* "Moldy" means any visible growth of mold either on the kernel or inside the shell.

§ 51.2010 *Insect injury.* "Insect injury" means that the insect or frass is present, or that there is visible evidence of insect damage to the kernel.

SUBPART—UNITED STATES STANDARDS FOR BLUEBERRIES FOR PROCESSING

GENERAL

§ 51.2025 *General.* These standards apply to species of the genus Vaccinium which contain numerous small seeds that are barely noticeable and not to the true huckleberries of the genus Gaylussacia which contain 10 large seeds with bony coverings.

GRADES

§ 51.2026 *U. S. No. 1.* U. S. No. 1 shall consist of blueberries which internally are free from worms, and are free from other kinds of berries, clusters, large stems, leaves and other foreign material, distinctly immature berries, and free from damage caused by visible mold and decay, shriveling, dirt, overmaturity, or other means.

(a) In order to allow for variations incident to proper handling, the following tolerances shall be permitted for grade defects in a half-pint cup sample:

(b) Not more than a total of 5 leaves and other foreign material, not more than a total of 20 distinctly immature berries, clusters and large stems, and not more than 3 berries other than blueberries. No tolerance shall be allowed for large pieces of foreign material.

§ 51.2027 *U. S. No. 2.* U. S. No. 2 shall consist of blueberries which meet all the requirements of U. S. No. 1 grade except that the blueberries shall be free from serious damage caused by shriveling, overmaturity, and except for the increased tolerances specified in this section.

(a) In order to allow for variations incident to proper handling, the following tolerances shall be permitted for grade defects in a half-pint cup sample:

(1) Not more than a total of 15 leaves and other foreign material, not more than a total of 40 distinctly immature berries, clusters and large stems, and not more than 5 berries other than blueberries. No tolerance shall be allowed for large pieces of foreign material.

§ 51.2028 *U. S. No. 3.* U. S. No. 3 shall consist of blueberries which meet all the requirements of U. S. No. 1 grade except that the blueberries shall be free from serious damage caused by overmaturity and from very serious damage caused by shriveling and except for the increased tolerances specified in this section.

(a) In order to allow for variations incident to proper handling, the following tolerances shall be permitted for grade defects in a half-pint cup sample:

(1) Not more than a total of 20 leaves and other foreign material, not more than a total of 70 distinctly immature berries, clusters and large stems, and not more than 12 berries other than blueberries. No tolerance shall be allowed for large pieces of foreign material.

UNCLASSIFIED

§ 51.2029 *Unclassified.* Unclassified shall consist of blueberries which have not been classified in accordance with the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

DEFINITIONS

§ 51.2030 *Other kinds of berries.* "Other kinds of berries" means bunchberries, cranberries, or any other berries not of the genus Vaccinium.

§ 51.2031 *Clusters.* "Clusters" means three or more cap-stems, with or without berries, attached to a main stem. Cap-stems are those small stems by means of which the individual berry is attached to the main stem.

§ 51.2032 *Large stems.* "Large stems" means stems other than cap-stems which are over ¼ inch in length.

§ 51.2033 *Other foreign material.* "Other foreign material" means sticks, stones, moss or other extraneous material except dirt and leaves.

§ 51.2034 *Distinctly immature berries.* "Distinctly immature berries" means that the berries are green, or whitish due to immaturity.

§ 51.2035 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or the processing quality of the blueberries. The following shall be considered as damage:

(a) Shriveling, when more than one-fourth of the blueberries in any lot, by volume, are badly wilted, withered or shriveled.

(b) Dirt, when it cannot be removed from the blueberries in the ordinary washing process.

(c) Overmaturity, when the appearance and processing quality of the lot of blueberries is materially affected by berries which have a dull appearance and are sticky from leaking berries.

§ 51.2036 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the appearance, or the processing quality of the blueberries. The following shall be considered as serious damage:

(a) Shriveling, when more than one-third of the blueberries in any lot, by volume, are badly wilted, withered or shriveled.

(b) Overmaturity, when the appearance and processing quality of the lot of blueberries is seriously affected by blueberries which have a dull appearance and are sticky from leaking berries.

§ 51.2037 *Very serious damage caused by shriveling.* "Very serious damage caused by shriveling" means that more than one-half of the blueberries in any lot, by volume, are badly wilted, withered or shriveled.

SUBPART—UNITED STATES CONSUMER STANDARDS FOR BRUSSELS SPROUTS

GRADES

§ 51.2050 *U. S. Grade A.* U. S. Grade A shall consist of Brussels sprouts which are well colored and not withered or burst and which are firm, clean, well trimmed, and free from soft rot and seedstems, and free from damage caused by discoloration, freezing, disease, insects, or mechanical or other means. Brussels sprouts on the shown face shall be reasonably representative in size and quality of the contents of the container.

(a) The diameter of each Brussels sprout shall be not less than 1 inch.

(b) Incident to proper grading and handling, not more than 5 percent, by weight, of the Brussels sprouts in any lot may be smaller than the specified minimum diameter. In addition, not more than 5 percent, by weight, of the Brussels sprouts may fail to meet the remaining requirements of the grade, including not more than 1 percent for Brussels sprouts affected by soft rot.

§ 51.2051 *U. S. Grade B.* U. S. Grade B shall consist of Brussels sprouts which are fairly well colored and not withered, puffy or burst and which are clean, well trimmed and free from soft rot and seedstems and free from serious damage caused by discoloration, freezing, disease, insects, or mechanical or other means. Brussels sprouts on the shown face shall be reasonably representative in size and quality of the contents of the container.

(a) The diameter of each Brussels sprout shall be not less than 1 inch.

(b) Incident to proper grading and handling, not more than 5 percent, by weight, of the Brussels sprouts in any lot may be smaller than the specified minimum diameter. In addition, not more than 5 percent, by weight, of the Brussels sprouts may fail to meet the remaining requirements of the grade, including not more than 1 percent for Brussels sprouts affected by soft rot.

OFF-GRADE

§ 51.2052 *Off-Grade Brussels sprouts.* Brussels sprouts which fail to meet the requirements of either of the foregoing grades shall be Off-Grade Brussels sprouts.

DEFINITIONS

§ 51.2053 *Well colored.* "Well colored" means that the Brussels sprouts have a yellowish green or darker green color characteristic of well-grown Brussels sprouts.

§ 51.2054 *Firm.* "Firm" means that the Brussels sprout is fairly compact but may yield slightly to moderate pressure.

§ 51.2055 *Clean.* "Clean" means that the Brussels sprout is practically free from dirt and other foreign matter.

§ 51.2056 *Well trimmed.* "Well trimmed" means that the butt of the sprout is fairly smoothly and closely trimmed at the point of attachment of the outer leaves and that the sprout does not have more than 2 wrapper leaves which do not enfold the sprout fairly tightly more than two-thirds the distance from the base to the top.

§ 51.2057 *Seedstems.* "Seedstems" means Brussels sprouts which have seedstalks showing or in which the formation of seedstalks has plainly begun.

§ 51.2058 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or the edible, shipping or keeping quality of the Brussels sprout.

§ 51.2059 *Diameter.* "Diameter" means the greatest dimension measured at right angles to a line running from the stem to the apex of the sprout.

§ 51.2060 *Fairly well colored.* "Fairly well colored" means that the Brussels sprouts shall not be lighter than whitish green color.

§ 51.2061 *Puffy.* "Puffy" means that the Brussels sprout is very light in weight in proportion to its size or has excessive air spaces in the central portion.

§ 51.2062 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the appearance or the edible, shipping or keeping quality of the Brussels sprout.

SUBPART—UNITED STATES STANDARDS FOR ALMONDS IN THE SHELL

GRADES

§ 51.2075 *U. S. No. 1.* U. S. No. 1 consists of almonds in the shell which are of similar varietal characteristics, clean, fairly bright, fairly uniform in color, which are free from loose hulls, pieces of shells, chaff and foreign material and free from damage caused by discoloration, adhering hulls, broken shells, or other means. The kernels shall be well dried, free from decay, rancidity, insect injury, and free from damage caused by mold, gum, shriveling, brown spot, or other means.

(a) Unless otherwise specified, the minimum thickness of the almond shall be not less than 25/64 of an inch.

(b) In order to allow for variations incident to proper grading and handling, the following tolerances shall be permitted:

(1) *For external defects.* Ten percent, by count (except that loose hulls, chaff, pieces of shells and foreign material shall be determined by weight), for almonds which fail to meet the requirements of the grade, other than for variety and size: *Provided*, That not more than 2 percent, by weight, shall be allowed for loose hulls, chaff, pieces of shells and foreign material, including not more than one-half of this amount, or 1 percent, that will pass through a screen with 21/64 inch round openings;

(2) *For dissimilar varieties.* Five percent, by count, including not more than one-fifth of this amount, or 1 percent, for bitter almonds mixed with sweet almonds;

(3) *For size.* Five percent, by count, for almonds which fail to meet the size requirements; and,

(4) *For internal defects.* Ten percent, by count, for almonds which fail to meet the grade requirements: *Provided*, That, not more than one-half of this amount, or 5 percent, shall be allowed for kernels affected by decay, rancidity, insect injury and damage by mold.

§ 51.2076 *U. S. No. 1 Mixed.* U. S. No. 1 Mixed consists of almonds in the shell which meet the requirements of U. S. No. 1 grade, except that the varieties are mixed, but may include not more than 1 percent of bitter almonds mixed with sweet almonds.

§ 51.2077 *U. S. No. 2.* U. S. No. 2 consists of almonds in the shell which meet the requirements of U. S. No. 1 grade, except that an additional tolerance of 20 percent shall be allowed for discoloration.

§ 51.2078 *U. S. No. 2 Mixed.* U. S. No. 2 Mixed consists of almonds in the shell which meet the requirements of the U. S. No. 2 grade, except that the varieties are mixed, but may include not more than 1 percent of bitter almonds mixed with sweet almonds.

UNCLASSIFIED

§ 51.2079 *Unclassified.* Unclassified consists of almonds which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

APPLICATION OF TOLERANCES

§ 51.2080 *Application of tolerances and determination of the grades.* The tolerances for the foregoing grades are to be applied to the entire lot, and a composite sample shall be taken for determining the grade. However, any container or group of containers in which the almonds are found to be materially inferior to those in the majority of the containers shall be considered a separate lot.

(a) In determining the grade of a lot of almonds, the percentage of loose hulls, pieces of shells, chaff and foreign material is first determined on the basis of weight. Then a stated number of nuts is counted out (depending upon the size of the lot) from the composite sample. These almonds are next examined for size, dissimilar varieties and external defects. The same nuts are then cracked and examined for internal defects.

DEFINITIONS

§ 51.2081 *Similar varietal characteristics.* "Similar varietal characteristics" means that the almonds are similar in shape and are reasonably uniform in degree of hardness of the shells. For example, hard-shelled varieties shall not be mixed with semi-soft-shelled, soft-shelled and paper-shelled varieties; and semi-soft-shelled varieties shall not be mixed with soft-shelled and paper-shelled varieties; and soft-shelled varieties shall not be mixed with paper-shelled varieties. Likewise, bitter almonds shall not be mixed with sweet almonds.

§ 51.2082 *Clean.* "Clean" means that the individual almond is practically free from dirt and other foreign matter.

§ 51.2083 *Fairly bright.* "Fairly bright" means that the almonds show good characteristic color.

§ 51.2084 *Fairly uniform color.* "Fairly uniform color" means that the shells do not show excessive variation in color.

§ 51.2085 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the almonds. Any one of the following defects or any combination thereof, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Discoloration which is distinctly gray to black, when affecting more than one-eighth of the surface of the shell in the aggregate, but normal color variations, such as reddish or brown between varieties, and within some varieties, are not to be considered as discoloration;

(b) Adhering hulls, when covering more than 5 percent of the shell surface in the aggregate;

(c) Broken shells, when a portion of the shell is missing or fractured to the extent that moderate pressure will cause the kernel to become dislodged;

(d) Mold, when affecting the kernel, except when white or grayish in color and easily rubbed off with the fingers;

(e) Gum, when a film of shiny, resinous appearing substance covers more than one-eighth of the surface of the kernel;

(f) Shriveling, when the kernel is excessively thin for its size, or when materially withered, shrunken, leathery, tough or partially developed: *Provided*, That, partially developed kernels are not considered damaged if more than three-fourths of the pellicle is filled with meat; and,

(g) Brown spot on the kernel, either single or multiple, when the affected area is more than the equivalent of a circle one-eighth inch in diameter.

§ 51.2086 *Well dried.* "Well dried" means that the kernel is firm and brittle and not pliable or leathery.

§ 51.2087 *Decay.* "Decay" means that the kernel is putrid or decomposed.

§ 51.2088 *Rancidity.* "Rancidity" means that the kernel is noticeably rancid to the taste.

§ 51.2089 *Insect injury.* "Insect injury" means that the insect, web, or frass is present or there is visible evidence of insect injury.

§ 51.2090 *Thickness.* "Thickness" means the greatest distance between the two flat surfaces of the shell. The minimum thickness shall be determined by passing the almonds through slotted openings with sufficient length to permit the almonds to go through lengthwise.

SUBPART—UNITED STATES STANDARDS FOR SHELLED ALMONDS

GRADES

§ 51.2105 *U. S. Fancy.* U. S. Fancy consists of shelled almonds which are of similar varietal characteristics, whole, clean, well dried, which are free from decay, rancidity, insect injury, foreign material, doubles, split and broken kernels, particles and dust, and which are free from injury caused by chipped and scratched kernels, and free from damage caused by mold, gum, shriveling, brown spot, or other means. (See §§ 51.2114 and 51.2115.)

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) *For dissimilar varieties.* 5 percent, including not more than one-fifth of this amount, or 1 percent, for bitter almonds mixed with sweet almonds;

(2) *For doubles.* 3 percent;

(3) *For kernels injured by chipping or scratching.* 5 percent;

(4) *For foreign material.* Two-tenths of 1 percent (0.20%);

(5) *For particles and dust.* One-tenth of 1 percent (0.10%); and,

(6) *For other defects.* 2 percent, including not more than one-half of this amount, or 1 percent, for serious damage.

§ 51.2106 *U. S. Extra No. 1.* U. S. Extra No. 1 consists of shelled almonds which are of similar varietal characteristics, whole, clean, well dried, which are free from decay, rancidity, insect injury, foreign material, doubles, split and broken kernels, particles and dust, and which are free from damage caused by chipped and scratched kernels, mold, gum, shriveling, brown spot, or other means. (See §§ 51.2114 and 51.2115.)

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) *For dissimilar varieties.* 5 percent, including not more than one-fifth of this amount, or 1 percent, for bitter almonds mixed with sweet almonds;

(2) *For doubles.* 5 percent;

(3) *For kernels damaged by chipping or scratching.* 5 percent;

(4) *For foreign material.* Two-tenths of 1 percent (0.20%);

(5) *For particles and dust.* One-tenth of 1 percent (0.10%); and,

(6) *For other defects.* 4 percent, including not more than three-eighths of this amount, or 1½ percent, for serious damage.

§ 51.2107 *U. S. No. 1.* U. S. No. 1 consists of shelled almonds which are of similar varietal characteristics, whole, clean, well dried, which are free from decay, rancidity, insect injury, foreign material, doubles, split or broken kernels, particles and dust, and which are free from damage caused by chipped and scratched kernels, mold, gum, shriveling, brown spot, or other means. (See §§ 51.2114 and 51.2115.)

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) *For dissimilar varieties.* 5 percent, including not more than one-fifth of this amount, or 1 percent, for bitter almonds mixed with sweet almonds;

(2) *For doubles.* 15 percent;

(3) *For kernels damaged by chipping or scratching.* 10 percent;

(4) *For foreign material.* Two-tenths of 1 percent (0.20%);

(5) *For particles and dust.* One-tenth of 1 percent (0.10%); and,

(6) *For other defects.* 5 percent, including not more than three-tenths of this amount, or 1½ percent, for serious damage.

§ 51.2108 *U. S. Select Sheller Run.* U. S. Select Sheller Run consists of shelled almonds which are of similar varietal characteristics, whole, clean, well dried, which are free from decay, rancidity, insect injury, foreign material, doubles, split and broken kernels, particles and dust, and which are free from damage caused by chipped and scratched kernels, mold, gum, shriveling, brown spot, or other means. (See §§ 51.2114 and 51.2115.)

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) *For dissimilar varieties.* 5 percent, including not more than one-fifth of this amount, or 1 percent, for bitter almonds mixed with sweet almonds;

(2) *For doubles.* 15 percent;

(3) *For kernels damaged by chipping and scratching.* 15 percent;

(4) *For foreign material.* Two-tenths of 1 percent (0.20%);

(5) *For particles and dust.* One-tenth of 1 percent (0.10%);

(6) *For split and broken kernels.* 5 percent: *Provided,* That not more than two-fifths of this amount, or 2 percent, shall be allowed for pieces which will pass through a round opening $\frac{29}{64}$ inch in diameter; and,

(7) *For other defects.* 3 percent, including not more than two-thirds of this amount, or 2 percent, for serious damage.

§ 51.2109 *U. S. Standard Sheller Run.* U. S. Standard Sheller Run consists of shelled almonds which are of similar varietal characteristics, whole, clean, well dried, which are free from decay, rancidity, insect injury, foreign material, doubles, split and broken kernels, particles and dust, and which are free from damage caused by chipped and scratched kernels, mold, gum, shriveling, brown spot, or other means. (See §§ 51.2114 and 51.2115.)

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) *For dissimilar varieties.* 5 percent, including not more than one-fifth of this amount, or 1 percent, for bitter almonds mixed with sweet almonds;

(2) *For doubles.* 25 percent;

(3) *For kernels damaged by chipping and scratching.* 20 percent;

(4) *For foreign material.* Two-tenths of 1 percent (0.20%);

(5) *For particles and dust.* One-tenth of 1 percent (0.10%);

(6) *For split and broken kernels.* 15 percent: *Provided,* That not more than one-third of this amount, or 5 percent, shall be allowed for pieces which will pass through a round opening $\frac{29}{64}$ inch in diameter; and,

(7) *For other defects.* 3 percent, including not more than two-thirds of this amount, or 2 percent, for serious damage.

§ 51.2110 *U. S. No. 1 Whole and Broken.* U. S. No. 1 Whole and Broken consists of shelled almonds which are of similar varietal characteristics, clean, well dried, which are free from decay, rancidity, insect injury, foreign material, doubles, particles and dust, and which are free from damage caused by mold, gum, shriveling, brown spot, or other means.

(a) In this grade not less than 30 percent, by weight, of the kernels shall be whole. Doubles shall not be considered as whole kernels in determining the percentage of whole kernels.

(b) Unless otherwise specified, the minimum diameter shall be not less than $\frac{20}{64}$ of an inch. (See §§ 51.2114 and 51.2115.)

(c) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) *For dissimilar varieties.* 5 percent, including not more than one-fifth of this amount, or 1 percent, for bitter almonds mixed with sweet almonds;

(2) *For doubles.* 35 percent;

(3) *For foreign material.* Three-tenths of 1 percent (0.30%);

(4) *For particles and dust.* One-tenth of 1 percent (0.10%);

(5) *For undersize.* 5 percent; and,

(6) *For other defects.* 5 percent, including not more than three-fifths of this amount, or 3 percent, for serious damage.

§ 51.2111 *U. S. No. 1 Pieces.* U. S. No. 1 Pieces consists of shelled almonds which are not bitter, which are clean, well dried, which are free from decay, rancidity, insect injury, foreign material, particles and dust, and which are free from damage caused by mold, gum, shriveling, brown spot, or other means.

(a) Unless otherwise specified, the minimum diameter shall be not less than $\frac{5}{64}$ of an inch. (See §§ 51.2114 and 51.2115.)

(b) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) *For bitter almonds mixed with sweet almonds.* 1 percent;

(2) *For foreign material.* Three-tenths of 1 percent (0.30%);

(3) *For particles and dust.* 1 percent; and,

(4) *For other defects.* 5 percent, including not more than three-fifths of this amount, or 3 percent, for serious damage.

§ 51.2112 *Mixed varieties.* Any lot of shelled almonds consisting of a mixture of two or more dissimilar varieties which meet the other requirements of any of the grades of U. S. No. 1, U. S. Select Sheller Run, U. S. Standard Sheller Run, U. S. No. 1 Whole and Broken may be designated as: "U. S. No. 1 Mixed;" "U. S. Select Sheller Run Mixed;" "U. S. Standard Sheller Run Mixed;" or "U. S. No. 1 Whole and Broken Mixed," respectively; but no lot of any of these grades may include more than 1 percent of bitter almonds mixed with sweet almonds.

UNCLASSIFIED

§ 51.2113 *Unclassified.* Unclassified consists of shelled almonds which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

SIZE

§ 51.2114 *Size requirements.* The size may be specified in terms of range in count of whole almond kernels per ounce or in terms of minimum, or minimum and maximum diameter. When a range in count is specified, the whole kernels shall be fairly uniform in size, and the average count per ounce shall be within the range specified. Doubles and broken kernels shall not be used in determining counts. Permissible count ranges per ounce are shown below but a narrower or wider range may be specified: *Provided,* That the kernels are fairly uniform in size.

| *Count range per ounce* |
|---|
| 16 to 18, inclusive. |
| 18 to 20, inclusive. |
| 20 to 22, inclusive. |
| 22 to 24, inclusive. |
| 23 to 25, inclusive. |
| 24 to 26, inclusive. |
| 26 to 28, inclusive. |
| 27 to 30, inclusive. |
| 30 to 34, inclusive. |
| 36 to 40, inclusive. |
| 40 to 50, inclusive. |
| 50 and smaller. |

TOLERANCES

§ 51.2115 *Tolerances for size.* (a) When a range is specified as, for example, "18/20," no tolerance for counts above or below the range shall be allowed.

(1) When the minimum, or minimum and maximum, diameters are specified, a total tolerance of not more than 10 percent, by weight, may fail to meet the specified size requirements: *Provided,* That not more than one-half of this amount or 5 percent, may be below the minimum size specified.

§ 51.2116 *Application of tolerances.* The tolerances for the grades are to be applied to the entire lot, and a composite sample shall be taken for determining the grade. However, any container or group of containers in which the almonds are found to be materially inferior to those in the majority of the containers shall be considered a separate lot.

DEFINITIONS

§ 51.2117 *Similar varietal characteristics.* "Similar varietal characteristics" means that the kernels are similar in shape and appearance. For example, long types shall not be mixed with short types, or broad types mixed with narrow types, and bitter almonds shall not be mixed with sweet almonds. Color of the kernels shall not be considered, since there is often a marked difference in color of kernels of the same variety.

§ 51.2118 *Whole.* "Whole" means that there is less than one-eighth of the kernel chipped off or missing, and that the general contour of the kernel is not materially affected by the missing part.

§ 51.2119 *Clean.* "Clean" means that the kernel is practically free from dirt and other foreign substance.

§ 51.2120 *Well dried.* "Well dried" means that the kernel is firm and brittle, and not pliable or leathery.

§ 51.2121 *Decay.* "Decay" means that the kernel is putrid or decomposed.

§ 51.2122 *Rancidity.* "Rancidity" means that the kernel is noticeably rancid to the taste.

§ 51.2123 *Insect injury.* "Insect injury" means that the insect, web, or frass is present or there is visible evidence of insect injury.

§ 51.2124 *Foreign material.* "Foreign material" means pieces of shell, hulls or other foreign matter.

§ 51.2125 *Doubles.* "Doubles" means kernels that develop in shells containing two kernels. One side of a double kernel is flat or concave.

§ 51.2126 *Split or broken kernels.* "Split or broken kernels" means seven-eighths or less of complete whole kernels but which will not pass through a round opening $\frac{25}{64}$ of an inch in diameter.

§ 51.2127 *Particles and dust.* "Particles and dust" means fragments of almond kernels or other material which will pass through a round opening $\frac{13}{64}$ of an inch in diameter.

§ 51.2128 *Injury.* "Injury" means any defect which more than slightly affects the appearance of the individual almond, or the general appearance of the lot. The following shall be considered as injury:

(a) Chipped and scratched kernels, when the general appearance of the lot is more than slightly affected, or when the affected area or an individual kernel aggregates more than the equivalent of a circle one-eighth inch in diameter.

§ 51.2129 *Damage.* "Damage" means any defect which materially affects the appearance of the individual kernel, or the general appearance of the lot, or the edible or shipping quality of the almonds. Any one of the following defects or combination thereof, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as damage:

(a) Chipped and scratched kernels, when the general appearance of the lot is materially affected, or when the affected area on an individual kernel aggregates more than the equivalent of a circle one-quarter inch in diameter;

(b) Mold, when affecting the kernel, except when white or grayish in color and easily rubbed off with the fingers;

(c) Gum, when a film of shiny, resinous appearing substance covers more than one-eighth of the surface of the kernel;

(d) Shriveling, when the kernel is excessively thin for its size, or when materially withered, shrunken, leathery, tough or partially developed, provided that partially developed kernels are not considered damaged if more than three-fourths of the pellicle is filled with meat; and,

(e) Brown spot on the kernel, either single or multiple, when the affected area aggregates more than the equivalent of a circle one-eighth inch in diameter.

§ 51.2130 *Serious damage.* "Serious damage" means any defect which makes a kernel or piece of kernel unsuitable for human consumption, and includes decay, rancidity, insect injury and damage by mold.

§ 51.2131 *Diameter.* "Diameter" means the greatest dimension of the kernel, or piece of kernel at right angles to the longitudinal axis. Diameter shall be determined by passing the kernel, or piece of kernel through a round opening.

§ 51.2132 *Fairly uniform in size.* "Fairly uniform in size" means that, in a representative sample, the weight of 10 percent, by count, of the largest whole kernels shall not exceed 1.70 times the weight of 10 percent, by count, of the smallest whole kernels.

SUBPART—UNITED STATES STANDARDS FOR SAWDUST PACK GRAPES (EUROPEAN OR VINIFERA TYPE)[1]

GRADES

§ 51.2150 *U. S. Fancy Sawdust Pack Grapes.* U. S. Fancy Sawdust Pack Grapes consists of bunches of well developed grapes of one variety which are well matured, fairly uniform in appearance and well colored. The berries shall be firm, firmly attached to capstems and shall not be weak, shriveled at capstems, shattered, split, crushed or wet, and shall be free from decay, waterberry, sunburn and Almeria Spot, and free from damage caused by scarring, discoloration, heat, mildew, other diseases, freezing, insects or mechanical or other means.

(a) *Bunches.* The bunches shall be fairly well filled but not excessively tight. They shall also be free from injury caused by shot berries, dried berries or other defective berries or by the trimming away of defective berries and they shall weigh not less than one-half pound.

(b) *Stems.* The stems shall be mature, well developed and strong, shall not be dry and brittle, shall be free from mold and free from damage caused by mildew or freezing. The Emperor variety shall have stems which are distinctly yellowish-green or yellow at time of packing.

(c) *Size of berries.* Not less than 90 percent, by count, of the berries, exclusive of shot berries and dried berries, on each bunch shall have a minimum diameter as indicated by varieties as follows:

Ribier and Cardinal: $\frac{12}{16}$ of an inch.
Tokay: $\frac{11}{16}$ of an inch.
Almeria: $\frac{9}{16}$ of an inch.
Thompson Seedless and Black Monukka: $\frac{7}{16}$ of an inch.
Other varieties: $\frac{10}{16}$ of an inch.

(d) *Tolerances.* In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 5 percent for bunches which fail to meet the requirements for minimum diameter of berries;

(2) 5 percent for bunches which weigh less than one-half pound;

(3) 10 percent for bunches which fail to meet the color requirements;

(4) 5 percent for bunches which fail to meet the requirements for maturity of stems and color of stems; and,

(5) 5 percent for bunches and berries which fail to meet the remaining requirements of this grade, other than for maturity and uniformity of appearance, including therein not more than 3 percent for shattered berries and also including therein not more than one-half of 1 percent for berries which are seriously damaged or affected by decay.

(e) There is no tolerance specified in this grade for grapes which fail to meet the maturity requirements. However, no lot shall be considered as failing to meet these requirements because the sample of grapes from one container tests below the required percentage of soluble solids.

§ 51.2151 *U. S. No. 1 Sawdust Pack Grapes.* U. S. No. 1 Sawdust Pack Grapes consists of bunches of well developed grapes of one variety which are mature and fairly well colored. The berries shall be firm, firmly attached to capstems and shall not be weak, shriveled at capstems, shattered, split, crushed or wet, and shall be free from decay, waterberry, sunburn and Almeria Spot, and free from damage caused by scarring, discoloration, heat, mildew, other diseases, freezing, insects or mechanical or other means.

(a) *Bunches.* The bunches shall not be straggly. They shall be free from damage caused by shot berries, dried berries or other defective berries or by the trimming away of defective berries and they shall weigh not less than one-half pound.

[1] These standards shall be applicable only to grapes properly packed in sawdust or granulated cork, and not to so-called "semi-sawdust packs" which are cushioned and/or covered with sawdust.

(b) *Stems.* The stems shall be well developed and strong, shall not be dry and brittle and shall be free from mold and free from damage caused by mildew or freezing.

(c) *Size of berries.* Not less than 90 percent, by count, of the berries, exclusive of shot berries and dried berries, on each bunch shall have a minimum diameter as indicated by varieties as follows:

Ribier, Tokay, and Cardinal: 1 1/16 of an inch.
Almeria: 9/16 of an inch.
Thompson Seedless and Black Monukka: 7/16 of an inch.
Other varieties: 10/16 of an inch.

(d) *Tolerances.* In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 5 percent for bunches which fail to meet the requirements for minimum diameter of berries;

(2) 10 percent for bunches which weigh less than one-half pound;

(3) 10 percent for bunches which fail to meet the color requirements; and,

(4) 5 percent for bunches and berries which fail to meet the remaining requirements of this grade, other than for maturity, including therein not more than one-half of 1 percent for berries which are seriously damaged or affected by decay.

(e) There is no tolerance specified in this grade for grapes which fail to meet the maturity requirements. However, no lot shall be considered as failing to meet these requirements because the sample of grapes from one container tests below the required percentage of soluble solids.

UNCLASSIFIED

§ 51.2152 *Unclassified.* Unclassified consists of grapes which have not been classified in accordance with either of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards, but is provided as a designation to show that no grade has been applied to the lot.

APPLICATION OF TOLERANCES

§ 51.2153 *Application of tolerances to individual packages.* (a) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified for the grade:

(1) For a tolerance of 10 percent or more, individual packages in any lot may contain not more than one and one-half times the tolerance specified; and,

(2) For a tolerance of less than 10 percent, individual packages in any lot may contain not more than double the tolerance specified, except that for shattered berries and wet berries not more than one-tenth of the packages may contain more than double the tolerance specified.

DEFINITIONS

§ 51.2154 *Well developed grapes.* "Well developed grapes" means grapes which are not abnormally small for the variety.

§ 51.2155 *One variety.* "One variety" means that the grapes show similar varietal characteristics.

§ 51.2156 *Well matured.* "Well matured" means that the juice from 10 percent, by weight, of whole bunches of grapes in the container, which appear to be least mature, shall test not less than 17 percent soluble solids, as determined by the Balling or Brix scale hydrometer, except that the Tokay variety shall test not less than 18 percent, the Thompson Seedless variety shall test not less than 19 percent and the Malaga and Muscat varieties shall test not less than 20 percent.

§ 51.2157 *Fairly uniform in appearance.* "Fairly uniform in appearance" means that not more than one-tenth of the containers in any lot may show sufficient variation in color or size of berries to materially detract from the appearance of the contents of the individual container.

§ 51.2158 *Well colored.* "Well colored" means in the case of:

(a) "Black varieties" that each bunch shall have not less than 95 percent, by count, of berries showing characteristic color. Purple to black shall be considered characteristic color for the varieties Malvoise, Rose of Peru, Black Prince and Black Hamburg; reddish-purple to black shall be considered characteristic color for Cornichon and Black Monukka. Ribier grape berries shall be considered as showing characteristic color when at least 60 percent of the surface is purple to black color, not reddish-purple;

(b) "Red varieties" that each bunch of the Tokay variety shall have not less than 60 percent, by count, and other red varieties shall have not less than 75 percent, by count, of berries which show at least 60 percent of the surface with good characteristic color: *Provided*, That the appearance of the bunch shall not be appreciably injured by very dark berries. Light or cherry red and dark red, but not light pink or very dark or purplish-red, are considered good characteristic color for the red varieties, excepting that any color ranging from light red through purple shall be considered good characteristic color for the Cardinal variety; and,

(c) White varieties: There are no color requirements for the white varieties.

§ 51.2159 *Firm.* "Firm" means that the berry is reasonably turgid and does not yield more than slightly to moderate pressure.

§ 51.2160 *Weak.* "Weak" means that the berry is relatively low in sugar content, has inferior flavor and usually is watery, translucent and somewhat soft to the touch.

§ 51.2161 *Shriveled at capstem.* "Shriveled at capstem" means that the berry shows more than slight wrinkling of the skin surrounding the capstem.

§ 51.2162 *Shattered.* "Shattered" means that the berry is separated from the bunch and may or may not have the capstem attached.

§ 51.2163 *Wet.* "Wet" means that the grapes are wet from moisture from crushed, leaking or decayed berries or from rain. Grapes which are moist from dew or other moisture condensation such as that resulting from removing grapes from a refrigerator car or cold storage to a warmer location shall not be considered as wet.

§ 51.2164 *Decay.* "Decay" means any soft breakdown of the flesh or skin of the berry resulting from bacterial or fungus infection. Slight surface development of green mold (Cladosporium) shall not be considered decay.

§ 51.2165 *Waterberry.* "Waterberry" means a watery, soft or flabby condition of the berries. Affected berries are low in sugar content, have tender skins and are easily crushed. This is an advanced or more pronounced stage of the condition referred to as "weak."

§ 51.2166 *Sunburn.* "Sunburn" means injury to the berry caused by direct exposure to the sun, including "sulphur burn", occurring as a sunken and usually discolored and dried area on the exposed surface.

§ 51.2167 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the individual berry, the appearance of the bunch as a whole, or the shipping quality of the stems.

(a) Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage to the individual berry:

(1) Scarring such as that caused by thrip, mildew, rubs and similar injuries when materially affecting the appearance of the berry;

(2) Discoloration when any light brown, tan or darker discoloration of the skin materially affects the appearance of the berry: *Provided*, That "sunkissed" berries of the white Malaga variety which show discoloration of amber or light brown color shall not be considered as damaged. "Buckskin" berries of the Tokay variety, and similar injury to other varieties, shall be considered as damaged by discoloration;

(3) Heat when the flesh of the berry is affected;

(4) Mildew when active powdery mildew is present;

(5) Freezing when the berry is frozen or when the flesh of the berry is affected by freezing; and,

(6) Insects when any insect is present or there is visible evidence of insect injury, when mealybug residue or aphis honeydew are present, or when the appearance is materially affected by the presence of leafhopper residue.

(b) The following shall be considered as damage to stems:

(1) Mildew when active powdery mildew is present on the stems, or when scars caused by this disease constrict or weaken any part of the main or lateral stems; and,

(2) Freezing when the stems are frozen or the capstems are swollen or dried, or when the main or lateral stems are water-soaked and limp, or dried, as a result of freezing.

§ 51.2168 *Fairly well filled.* "Fairly well filled" means that the berries are reasonably closely spaced on main and lateral stems and that the bunch is not very loose or stringy.

§ 51.2169 *Excessively tight.* "Excessively tight" means that the berries are so closely wedged together that when the stem is fresh, the bunch is solid and the appearance is materially affected by berries on the lower portions being distinctly distorted from normal shape.

§ 51.2170 *Injury to the bunch.* "Injury to the bunch" means any defect which more than slightly affects the appearance of the bunch.

§ 51.2171 *Shot berries.* "Shot berries" means very small berries resulting from insufficient pollination, usually seedless in those varieties which normally develop seeds. These berries may be entirely green and hard and are designated as "immature shot berries". They may mature and color uniformly with the normal berries on the bunch and are then designated as "mature shot berries".

§ 51.2172 *Dried berries.* "Dried berries" means berries which are dry and shriveled to the extent that practically no moisture is present.

§ 51.2173 *Well developed and strong.* "Well developed and strong" means that the main and lateral stems are firm, fibrous and pliable, and are not distinctly immature or spindly or threadlike at time of packing.

§ 51.2174 *Diameter.* "Diameter" means the greatest dimension of the berry measured at right angles to a line running from the stem to the blossom end.

§ 51.2175 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the grapes and includes berries which are split, crushed, wet, affected by decay or waterberry, or damaged by heat or freezing, except that raisining grapes that are cracked or split, and grapes which show healed cracks at the blossom end shall not be considered as seriously damaged.

§ 51.2176 *Mature.* "Mature" means that the juice from 10 percent, by weight, of whole bunches of grapes in the container, which appear to be least mature, shall test not less than 17 percent soluble solids, as determined by the Balling or Brix scale hydrometer, except that the varieties Emperor, Gros Colman, Pierce Isabella, Olivette Blanche, Rish Baba, Red Malaga, Cardinal, Ribier, Khalili, Dizmar and varieties similar to or synonymous with the above, shall test not less than 16 percent, and except that Muscat varieties shall test not less than 18 percent.

§ 51.2177 *Fairly well colored.* "Fairly well colored" means in the case of:

(a) "Black varieties" that each bunch shall have not less than 85 percent, by count, of berries showing characteristic color, except that in the varieties Ribier, Rose of Peru, Black Prince, Black Hamburg, and Black Monukka each bunch shall have not less than 75 percent, by count, of berries showing characteristic color. Purple to black shall be considered characteristic color for the varieties Malvoise, Rose of Peru, Black Prince and Black Hamburg; reddish-purple to black shall be considered characteristic color for Cornichon and Black Monukka. Ribier grape berries shall be considered as showing characteristic color when at least 60 percent of the surface is purple to black color, not reddish-purple;

(b) "Red varieties" that each bunch of the Tokay variety shall have not less than 45 percent, by count, and other red varieties shall have not less than 60 percent, by count, of berries which show at least 60 percent of the surface with characteristic color. Light pink, red, dark red or purple are considered characteristic color for the red varieties. (There are no color requirements for the Pink Thompson Seedless variety, Sultanina Rose); and,

(c) White varieties: There are no color requirements for the white varieties.

§ 51.2178 *Straggly.* "Straggly" means that the berries are so widely spaced on main and lateral stems that the bunch is distinctly open or very stemmy or stringy in structure.

SUBPART—UNITED STATES STANDARDS FOR EGGPLANT

GRADES

§ 51.2190 *U. S. Fancy.* U. S. Fancy consists of eggplants of similar varietal characteristics, which are well colored, firm, clean, well shaped, and which are free from decay and worm holes and free from injury caused by scars, freezing, disease, insects, or mechanical or other means.

§ 51.2191 *U. S. No. 1.* U. S. No. 1 consists of eggplants of similar varietal characteristics, which are fairly well colored, firm, clean, fairly well shaped, and which are free from decay and worm holes and free from damage caused by scars, freezing, disease, insects, or mechanical or other means.

§ 51.2192 *U. S. No. 2.* U. S. No. 2 consists of eggplants which are firm and which are free from decay and free from serious damage caused by freezing, disease, insects, or mechanical, or other means.

UNCLASSIFIED

§ 51.2193 *Unclassified.* Unclassified consists of eggplants which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no grade has been applied to the lot.

TOLERANCES

§ 51.2194 *Tolerances.* In order to allow for variations incident to proper grading and handling, other than for size, not more than 10 percent, by count, in any lot shall be permitted for eggplants which fail to meet the requirements of the grade, including therein not more than 1 percent for decay.

APPLICATION OF TOLERANCES

§ 51.2195 *Application of tolerances to individual packages.* (a) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified for the grade:

(1) For a tolerance of 10 percent or more, individual packages in any lot may contain not more than one and one-half times the tolerance specified, except that when the package contains 15 specimens or less, individual packages may contain not more than double the tolerance specified; and,

(2) For a tolerance of less than 10 percent, individual packages in any lot may contain not more than double the tolerance specified: *Provided*, That at least one specimen which does not meet the requirements shall be allowed in any one package.

SIZE REQUIREMENTS

§ 51.2196 *Size requirements.* (a) The size of eggplants may be specified in terms of count, minimum diameter, or a range in diameter in the container. Eggplants packed as U. S. Fancy or U. S. No. 1 grade shall be reasonably uniform in size, except when a range in diameter is specified.

(b) In order to allow for variations incident to proper sizing, not more than 5 percent, by count, of the eggplants in any lot may be below any specified minimum diameter and not more than 5 percent may be above any specified maximum diameter.

DEFINITIONS

§ 51.2197 *Similar varietal characteristics.* "Similar varietal characteristics" means that the eggplants in any lot are similar in type, color, and character of growth.

§ 51.2198 *Well colored.* "Well colored" means that the eggplant has a uniform good color characteristic for the variety over practically the entire surface.

§ 51.2199 *Firm.* "Firm" means that the eggplant is not soft, flabby or shriveled.

§ 51.2200 *Clean.* "Clean" means that the eggplant is practically free from dirt or other foreign matter.

§ 51.2201 *Well shaped.* "Well shaped" means that the eggplant has the normal shape characteristic of the variety, except that the shape may be slightly irregular, provided the appearance of the eggplant is not more than slightly affected.

§ 51.2202 *Injury.* "Injury" means any defect which more than slightly affects the appearance, or the edible or shipping quality of the eggplant. The following defect, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as injury:

(a) Scars when they are slightly rough or when they are fairly smooth and more than slightly affect the appearance, shape or color of the eggplant.

§ 51.2203 *Fairly well colored.* "Fairly well colored" means that the eggplant has a fairly good color characteristic for the variety, except that streaks of green

color which do not materially affect the appearance shall be permitted.

§ 51.2204 *Fairly well shaped.* "Fairly well shaped" means that the eggplant may be slightly abnormal in shape but not to an extent that the appearance is materially affected.

§ 51.2205 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the eggplant. The following defect, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Scars when they are rough or materially cracked, or when they materially affect the appearance, shape or color of the eggplant.

§ 51.2206 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the eggplant.

§ 51.2207 *Diameter.* "Diameter" means the greatest dimension of the eggplant measured at right angles to the longitudinal axis.

SUBPART—UNITED STATES STANDARDS FOR CUCUMBERS

GRADES

§ 51.2220 *U. S. Fancy.* U. S. Fancy consists of cucumbers which are well colored, well formed, not overgrown and which are fresh, firm, and free from decay, sunscald and from injury caused by scars and from damage caused by yellowing, sunburn, dirt or other foreign material, freezing, mosaic or other disease, insects, mechanical or other means. (See § 51.2226.)

(a) The maximum diameter of each cucumber shall be not more than 2⅜ inches and the length of each cucumber shall be not less than 6 inches. (See § 51.2226.)

§ 51.2221 *U. S. No. 1.* U. S. No. 1 consists of cucumbers which are fairly well colored, fairly well formed, not overgrown and which are fresh, firm, and free from decay, sunscald and from damage caused by scars, yellowing, sunburn, dirt or other foreign material, freezing, mosaic or other disease, insects, mechanical or other means. (See § 51.2226.)

(a) Unless otherwise specified, the maximum diameter of each cucumber shall be not more than 2⅜ inches and the length of each cucumber shall be not less than 6 inches. (See § 51.2226.)

§ 51.2222 *U. S. No. 1 Small.* U. S. No. 1 Small consists of cucumbers which meet all requirements for the U. S. No. 1 grade except for size. The diameter of each cucumber shall be not less than 1½ inches or larger than 2 inches. There are no requirements for length. (See § 51.2226.)

§ 51.2223 *U. S. No. 1 Large.* U. S. No. 1 Large consists of cucumbers which meet all requirements for the U. S. No. 1 grade except for size. The minimum diameter of each cucumber shall be not less than 2¼ inches and unless otherwise specified, the length of each cucumber shall be not less than 6 inches. There are no requirements for maximum diameter or maximum length. (See § 51.2226.)

§ 51.2224 *U. S. No. 2.* U. S. No. 2 consists of cucumbers which are moderately colored, not badly deformed, not overgrown and which are fresh, firm, free from decay and free from damage caused by freezing, sunscald and from serious damage caused by scarring, yellowing, sunburn, dirt or other foreign material, mosaic or other disease, insects, mechanical or other means. (See § 51.2226.)

(a) Unless otherwise specified, the maximum diameter of each cucumber shall be not more than 2⅜ inches and the length of each cucumber shall be not less than 5 inches. (See § 51.2226.)

UNCLASSIFIED

§ 51.2225 *Unclassified.* Unclassified consists of cucumbers which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no grade has been applied to the lot.

TOLERANCES

§ 51.2226 *Tolerances.* (a) In order to allow for variations incident to proper grading and handling, the following tolerances shall be permitted:

(1) *For defects.* 10 percent, by count, in any lot, for cucumbers which fail to meet the requirements of the grade, including therein not more than 1 percent for decay; and

(2) *For off-size.* 10 percent, by count, in any lot, for cucumbers which fail to meet the length and diameter requirements, including therein not more than one-half thereof, or 5 percent, for cucumbers which fail to meet the requirements for minimum diameter, and not more than one-half thereof, or 5 percent, for cucumbers which fail to meet the requirements for maximum diameter.

APPLICATION OF TOLERANCES

§ 51.2227 *Application of tolerances.* (a) The contents of individual packages in the lot based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified for the grade:

(1) For a tolerance of 10 percent or more, individual packages in any lot may contain not more than one and one-half times the tolerance specified, except that when the package contains 15 specimens or less, individual packages may contain not more than double the tolerance specified; and,

(2) For a tolerance of less than 10 percent, individual packages in any lot may contain not more than double the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any package.

DEFINITIONS

§ 51.2228 *Well colored.* "Well colored" means that not less than three-fourths of the surface of the cucumber is of a medium green or darker color, and that at least a light green color extends to the blossom end on one side of the cucumber.

§ 51.2229 *Well formed.* "Well formed" means that the cucumber is practically straight and not more than very slightly constricted or more than moderately tapered or pointed.

§ 51.2230 *Overgrown.* "Overgrown" means that the cucumber has developed beyond the best stage for slicing. It usually yields to slight pressure of the thumb. The seeds are tough and fibrous, and the pulp in the seed cavity is usually watery or jellylike. In more advanced cases, pithy streaks may be found in the flesh of the cucumber.

§ 51.2231 *Injury caused by scars.* "Injury caused by scars" means scars which aggregate more than the area of a circle ⅜ inch in diameter on a cucumber 6 inches in length. Larger cucumbers may have greater areas, provided that such scars do not affect the appearance of the cucumber to a greater extent than that caused by scars which are permitted on a 6 inch cucumber.

§ 51.2232 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the cucumbers. The following defect, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Scars when aggregating more than the area of a circle ⅝ inch in diameter on a cucumber 6 inches in length. Smaller cucumbers shall have lesser areas of scars and larger cucumbers may have greater areas, provided that such scars do not affect the appearance of the cucumbers to a greater extent than that caused by scars which are permitted on a 6 inch cucumber.

§ 51.2233 *Diameter.* "Diameter" means the greatest dimension of the cucumber measured at right angles to the longitudinal axis, exclusive of "warts."

§ 51.2234 *Fairly well colored.* "Fairly well colored" means that not less than two-thirds of the surface of the cucumber is of a medium green or darker color, and that at least a light green color extends to within one-half inch of the blossom end. White color shall be permitted over the blossom end of the cucumber.

§ 51.2235 *Fairly well formed.* "Fairly well formed" means that the cucumber may be moderately curved but not deeply constricted, not extremely tapered or pointed and not otherwise misshapen.

§ 51.2236 *Moderately colored.* "Moderately colored" means that at least one-half of the surface of the cucumber is of a light green or darker color.

§ 51.2237 *Badly deformed.* "Badly deformed" means that the cucumber is so badly curved, constricted, tapered or otherwise so badly misshapen that the appearance is seriously affected.

§ 51.2238 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the cucumbers.

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

SUBPART B—UNITED STATES STANDARDS[1]

GRADES OF CONCENTRATED ORANGE JUICE FOR MANUFACTURING[2]

On July 4, 1953, a notice of proposed rule making was published in the FEDERAL REGISTER (18 F. R. 3912) regarding the issuance of proposed United States Standards for Grades of Concentrated Orange Juice for Manufacturing. After consideration of all data, views, and arguments presented, including the proposals set forth in the aforesaid notice, the following United States Standards for Grades of Concentrated Orange Juice for Manufacturing are hereby promulgated under the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act, 1954 (Pub. Law 156, 83d Cong., approved July 28, 1953):

§ 52.490 *Concentrated orange juice for manufacturing*—(a) *Product description.* Concentrated orange juice for manufacturing is the concentrated product obtained from sound, mature fruit of the sweet orange group (Citrus sinensis) and Mandarin group (Citrus reticulata), except tangerines. The fruit is prepared by sorting and by washing prior to extraction of the juice and the extracted juice is concentrated. The concentrated orange juice is processed in accordance with good commercial practice; and may or may not require processing by heat or subsequent refrigeration to secure preservation of the product but is not the product which is considered "frozen concentrated orange juice." The finished product does not contain any additives except that cold-pressed oil to standardize flavor and chemical preservatives permissible under provisions of the Federal Food, Drug, and Cosmetic Act may have been added.

(1) The Brix value of the finished concentrate shall be not less nor more than the following for the respective dilution factor of canned concentrated orange juice for manufacturing:

| Dilution factor | Brix value of the finished concentrate | |
|---|---|---|
| | Minimum Brix value | Maximum Brix value |
| | *Degrees* | *Degrees* |
| 1 plus 2 | 41.5 | 44.0 |
| 1 plus 3 | 50.0 | 53.0 |
| 1 plus 5 | 57.8 | 61.2 |
| 1 plus 6 | 60.2 | No limit |

(2) Concentrated orange juice for manufacturing of other dilution factors between "1 plus 3" to "1 plus 6" or more than "1 plus 6" shall result in a Brix (upon reconstitution as prescribed by the processor or as prescribed by the label on the container, if labeled) of not less than 11.7 degrees.

(b) *Grades of concentrated orange juice for manufacturing.* (1) "U. S. Grade A for Manufacturing" or "U. S. Fancy for Manufacturing" is the quality of concentrated orange juice which reconstitutes properly and of which the reconstituted juice possesses a reasonably good color; is practically free from defects; possesses a reasonably good flavor; and scores not less than 85 points when scored in accordance with the scoring system outlined in this section.

(2) "U. S. Grade C for Manufacturing" or "U. S. Standard for Manufacturing" is the quality of concentrated orange juice which reconstitutes properly and of which the reconstituted juice possesses a fairly good color; is fairly free from defects; possesses a fairly good flavor; and scores not less than 70 points when scored in accordance with the scoring system outlined in this section.

(3) "Substandard for Manufacturing" is the quality of concentrated orange juice that fails to meet the requirements of U. S. Grade C for Manufacturing or U. S. Standard for Manufacturing.

(c) *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container be filled with concentrated orange juice as full as practicable without impairment of quality.

(d) *Ascertaining the grade.* The grade of concentrated orange juice for manufacturing is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and flavor. The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | *Points* |
|---|---|
| (1) Color | 20 |
| (2) Absence of defects | 40 |
| (3) Flavor | 40 |
| Total score | 100 |

(e) *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

(1) *Color.* (i) Concentrated orange juice of which the reconstituted juice possesses a reasonably good color may be given a score of 17 to 20 points. "Reasonably good color" means that the color is a reasonably good yellow to yellow-orange color typical of properly processed and properly concentrated orange juice and is reasonably free from browning due to scorching, oxidation, caramelization, or other causes.

(ii) If the reconstituted juice possesses a fairly good color, a score of 14 to 16 points may be given. Concentrated orange juice that falls into this classification shall not be graded above U. S. Grade C for Manufacturing or U. S. Standard for Manufacturing, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the orange juice may be slightly amber or very light in color and may show evidence of slight browning but is not off-color.

(iii) Concentrated orange juice that fails to meet the requirements of subdivision (ii) of this subparagraph may be given a score of 0 to 13 points and shall not be graded above Substandard for Manufacturing, regardless of the total score for the product (this is a limiting rule).

(2) *Absence of defects.* The factor of absence of defects refers to the degree of freedom from seeds and portions thereof, from excessive juice cells, from pulp, and from other defects.

(i) "Pulp" means particles of membrane, core, and peel.

(ii) Concentrated orange juice of which the reconstituted juice is practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that there may be present:

(*a*) Small seeds or portions thereof that are of such size that they could pass through round perforations not exceeding ⅛ inch in diameter, provided such seeds or portions thereof do not materially affect the appearance or drinking quality of the juice;

(*b*) Juice cells and pulp that do not materially affect the appearance or drinking quality of the juice; and

(*c*) Other defects that are not more than slightly objectionable.

(iii) If the reconstituted juice is fairly free from defects, a score of 28 to 33 points may be given. Concentrated orange juice that falls into this classification shall not be graded above U. S. Grade C for Manufacturing or U. S. Standard for Manufacturing, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that there may be present:

(*a*) Small seeds or portions thereof that are of such size that they could pass through round perforations not exceeding ⅛ inch in diameter, provided such seeds or portions thereof do not seriously affect the appearance or drinking quality of the juice;

(*b*) Juice cells and pulp that do not seriously affect the appearance or drinking quality of the juice; and

(*c*) Other defects that are not materially objectionable.

(iv) Concentrated orange juice that fails to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 27 points and shall not be graded above Substandard for Manufacturing, regardless of the total score for the product (this is a limiting rule).

(3) *Flavor.* (i) Concentrated orange juice of which the reconstituted juice possesses a reasonably good flavor may be given a score of 34 to 40 points. "Reasonably good flavor" means that the flavor is typical of reconstituted concen-

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

[2] The requirements of these standards shall not excuse failure to comply with applicable State laws and regulations.

trated orange juice from properly processed and concentrated orange juice; that the flavor may range from high acidity to low acidity; is practically free from traces of scorching, caramelization, oxidation, or terpene; and is free from off-flavors of any kind. To score not less than 34 points the concentrated orange juice shall meet the following requirement: The ratio of the Brix value to acid is not less than 8 to 1 nor more than 18 to 1.

(ii) If the reconstituted juice possesses a fairly good flavor, a score of 28 to 33 points may be given. Concentrated orange juice that falls into this classification shall not be graded above U. S. Grade C for Manufacturing or U. S. Standard for Manufacturing, regardless of the total score for the product (this is a limiting rule). "Fairly good flavor" means a normal flavor for reconstituted concentrated orange juice; and that the flavor may range from high acidity to low acidity, may have a slightly caramelized or slightly oxidized flavor or may possess traces of terpene but is free from off-flavors of any kind. To score not less than 28 points concentrated orange juice shall meet the following requirement: the ratio of the Brix value to acid is not less than 8 to 1 nor more than 21 to 1.

(iii) If the concentrated orange juice fails to meet the requirements of subdivision (ii) of this subparagraph, a score of 0 to 27 points may be given. Concentrated orange juice that falls into this classification shall not be graded above Substandard for Manufacturing, regardless of the total score for the product (this is a limiting rule).

(f) *Explanation of terms and analyses.* (1) "Reconstituted juice" means the product obtained by mixing thoroughly one part by volume of the canned concentrated orange juice with a stated volume of water. For example, a dilution factor of "1 plus 6" means that to one part by volume of concentrated orange juice 6 parts by volume of water are added to produce a reconstituted juice. Distilled water is used in reconstituting the product for testing flavor.

(2) "Reconstitution as declared" means any defined reconstitution, such as in labeling: For example, "this can (46 oz.) made up to 10 quarts" means a "1 plus 5.95" concentrate.

(3) "Reconstitutes properly" means that the reconstituted juice shows no material separation of colloidal or suspended matter after standing four (4) hours at a temperature of not less than 68 degrees Fahrenheit in a clear glass tube or cylinder (such as a 50 ml. graduated cylinder).

(4) "Acid" means the percent by weight of acid (calculated as anhydrous citric acid) in concentrated orange juice and is determined by titration with standard sodium hydroxide solution using phenolphthalein as indicator.

(5) "Brix value" of the concentrate is the refractometric sucrose value determined in accordance with the International Scale of Refractive Indices of Sucrose Solutions and to which the applicable correction for acid is added. (See Table I for corrections.)

TABLE I—CORRECTIONS FOR OBTAINING BRIX VALUE[1]

| Citric acid, anhydrous (percent by weight) | Correction to be added to refractometer sucrose value to obtain degree Brix value | Citric acid, anhydrous (percent by weight) | Correction to be added to refractometer sucrose value to obtain degree Brix value |
|---|---|---|---|
| 2.0 | 0.39 | 3.6 | 0.70 |
| 2.2 | .43 | 3.8 | .74 |
| 2.4 | .47 | 4.0 | .78 |
| 2.6 | .51 | 4.2 | .81 |
| 2.8 | .54 | 4.4 | .85 |
| 3.0 | .58 | 4.6 | .89 |
| 3.2 | .62 | 4.8 | .93 |
| 3.4 | .66 | 5.0 | .97 |

[1] Source: "Refractometric Determination of Soluble Solids in Citrus Juices," by J. W. Stevens and W. E. Baier, from the Analytical Edition of Industrial and Engineering Chemistry, vol. II, p. 447, Aug. 15, 1939.

(6) The "Brix" of reconstituted juice, as applicable, means the degree Brix of the properly reconstituted juice when tested with a Brix hydrometer calibrated at 20 degrees C. (68 degrees F.). If used in testing juice at a temperature other than 20 degrees C. (68 degrees F.) the applicable temperature correction shall be made to the reading of the scale as prescribed in the Official Methods of Analysis of the Association of Official Agricultural Chemists. The degrees Brix of the reconstituted juice may be determined by any other method which gives equivalent results.

(g) *Tolerances for certification of officially drawn samples.* (1) When certifying samples that have been officially drawn and which represent a specific lot of concentrated orange juice for manufacturing the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, with respect to those factors which are scored:

(i) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

(ii) None of the containers falls more than 4 points below the minimum score for the grade indicated by the average of such total scores;

(iii) None of the containers falls more than one grade below the grade indicated by the average of such total scores:

(iv) The average score of all containers for any factor subject to a limiting rule is within the score range of that factor for the grade indicated by the average of the total scores of the containers comprising the sample; and

(2) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

(h) *Score sheet for concentrated orange juice for manufacturing.*

| | |
|---|---|
| Size and kind of container | ---- |
| Container mark or identification | ---- |
| Label (including reconstitution factor) | ---- |
| Liquid measure (fluid ounces) | ---- |
| Net weight | ---- |
| Brix value of concentrate (corrected for acid) | ---- |

## PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

### SUBPART B—UNITED STATES STANDARDS[1]

### GRADES OF CANNED CONCENTRATED ORANGE JUICE[2]

On July 4, 1953, a notice of proposed rule making was published in the FEDERAL REGISTER (18 F. R. 3914) regarding a proposed revision of the United States Standards for Grades of Canned Concentrated Orange Juice. After consideration of all data, views, and arguments including the proposals set forth in the aforesaid notice, the following revised United States Standards for Grades of Canned Concentrated Orange Juice are hereby promulgated under the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act, 1954 (Pub. Law 156, 83d Cong., approved July 28, 1953):

§ 52.491 *Canned concentrated orange juice.* Canned concentrated orange juice is the concentrated product obtained from sound, mature fruit of the sweet orange group (Citrus sinensis) and Mandarin group (Citrus reticulata), except tangerines. The fruit is prepared by sorting and by washing prior to extraction of the juice; the extracted juice is concentrated; and single strength orange juice extracted from sorted and washed fruit may or may not be admixed to the concentrate. The canned concentrated orange juice is processed in accordance with good commercial practice and is sufficiently processed by heat to assure preservation of the product in hermetically sealed containers.

(a) *Styles of canned concentrated orange juice*—(1) *Style I, without sweetening ingredient added.* (i) The Brix value of the finished concentrate shall be not less nor more than the following for the respective dilution factor of canned concentrated orange juice:

| Dilution factor | Brix value of the finished concentrate | |
|---|---|---|
| | Minimum Brix value | Maximum Brix value |
| | *Degrees* | *Degrees* |
| 1 plus 1 | 22.5 | 24.0 |
| 1 plus 2 | 32.4 | 34.4 |
| 1 plus 3 | 41.5 | 44.0 |
| 1 plus 4 | 50.0 | 53.0 |
| 1 plus 5 | 57.8 | 61.2 |
| 1 plus 6 | 65.2 | 68.8 |

(ii) Canned concentrated orange juice of any other dilution factors between "1 plus 1" to less than "1 plus 6," shall result in a Brix (upon reconstitution as prescribed by the processor or as prescribed by the label on the container, if labeled) of not less than 11.7 degrees.

(2) *Style II, with sweetening ingredient added.* (i) The Brix value of the finished concentrate exclusive of added sweetening ingredient and the Brix value of the finished concentrate including added sweetening ingredient shall be not less nor more than the following, as applicable, for the respective dilution factor of canned concentrated orange juice:

| Dilution factor | Brix value of the finished concentrate exclusive of added sweetening ingredients | Brix value of the finished concentrate including added sweetening ingredients | |
|---|---|---|---|
| | Minimum Brix value | Minimum Brix value | Maximum Brix value |
| | *Degrees* | *Degrees* | *Degrees* |
| 1 plus 1 | 21.6 | 22.7 | 26.9 |
| 1 plus 2 | 31.1 | 32.7 | 38.4 |
| 1 plus 3 | 40.0 | 42.0 | 49.0 |
| 1 plus 4 | 48.1 | 50.5 | 58.6 |
| 1 plus 5 | 55.8 | 58.3 | 67.5 |
| 1 plus 6 | 63.0 | 65.8 | 75.7 |

(ii) Canned concentrated orange juice of any other dilution factors between "1 plus 1" to less than "1 plus 6" shall have had a Brix exclusive of any added sweetening ingredient (upon reconstitution as prescribed by the processor or as prescribed by the label on the container, if labeled) of not less than 11.3 degrees; and the finished canned concentrated orange juice shall result in a Brix including any added sweetening ingredient (upon reconstitution as prescribed by the processor or as prescribed by the label on the container, if labeled) of not less than 11.9 degrees nor more than 14.2 degrees.

(b) *Grades of canned concentrated orange juice.* (1) "U. S. Grade A" or "U. S. Fancy" is the quality of canned concentrated orange juice which reconstitutes properly and of which the reconstituted juice possesses an appearance reasonably characteristic of fresh orange juice; possesses a good color; is practically free from defects; possesses a good flavor; and scores not less than 85 points when scored in accordance with the scoring system outlined in this section.

(2) "U. S. Grade C" or "U. S. Standard" is the quality of canned concentrated orange juice which reconstitutes properly and of which the reconstituted juice possesses a fairly good color; is fairly free from defects; possesses a fairly good flavor; and scores not less than 70 points when scored in accordance with the scoring system outlined in this section.

(3) "Substandard" is the quality of canned concentrated orange juice that fails to meet the requirements of U. S. Grade C or U. S. Standard.

(c) *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container be filled with concentrated orange juice as full as practicable without impairment of quality.

(d) *Ascertaining the grade.* The grade of canned concentrated orange juice is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and flavor. The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| (1) Color | 20 |
| (2) Absence of defects | 40 |
| (3) Flavor | 40 |
| Total score | 100 |

(e) *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

(1) *Color.* (i) Canned concentrated orange juice of which the reconstituted juice possesses a good color may be given a score of 17 to 20 points. "Good color" means that the color is a good yellow to yellow-orange color typical of properly processed orange juice and is free from browning due to scorching, oxidation, caramelization, or other causes.

(ii) If the reconstituted juice possesses a fairly good color, a score of 14 to 16 points may be given. Canned concentrated orange juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the orange juice may be slightly amber or very light in color and may show evidence of slight browning, but is not off-color.

(iii) Canned concentrated orange juice that fails to meet the requirements of subdivision (ii) of this subparagraph may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(2) *Absence of defects.* The factor of absence of defects refers to the degree of freedom from seeds and portions thereof, from excessive juice cells, from pulp, from recoverable oil, and from other defects.

(i) "Pulp" means particles of membrane, core and peel.

(ii) Canned concentrated orange juice of which the reconstituted juice is practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that there may be present:

(*a*) Small seeds or portions thereof that are of such size that they could pass through round perforations not exceeding $\frac{1}{8}$ inch in diameter, provided such seeds or portions thereof do not materially affect the appearance or drinking quality of the juice;

(*b*) Juice cells and pulp that do not materially affect the appearance or drinking quality of the juice; and

(*c*) Other defects that are not more than slightly objectionable. To score in this classification the canned concentrated orange juice shall contain at least a trace of recoverable oil but not more than 0.0024 milliliter per degree Brix value per 100 grams of the concentrate.

(iii) If the reconstituted juice is fairly free from defects, a score of 28 to 33 points may be given. Canned concentrated orange juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that there may be present:

(*a*) Small seeds or portions thereof that are of such size that they could pass through round perforations not exceeding $\frac{1}{8}$ inch in diameter, provided such seeds or portions thereof do not seriously affect the appearance or drinking quality of the juice;

(*b*) Juice cells and pulp that do not seriously affect the appearance or drinking quality of the juice; and

(*c*) Other defects that are not materially objectionable. To score in this classification the canned concentrated orange juice may contain recoverable oil of not more than 0.003 milliliter per degree Brix value per 100 grams of the concentrate.

(iv) Canned concentrated orange juice that fails to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 27 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(3) *Flavor.* (i) Canned concentrated orange juice of which the reconstituted juice possesses a good flavor may be given a score of 34 to 40 points. "Good

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

[2] The requirements of these standards shall not excuse failure to comply with applicable State laws and regulations.

flavor" means that the flavor is a distinct orange juice flavor typical of reconstituted orange juice from properly processed and concentrated orange juice; is free from traces of scorching, caramelization, oxidation, or terpene; and is free from off-flavors of any kind. To score not less than 34 points the canned concentrated orange juice shall meet the following requirements for the respective style:

*Style I, without sweetening ingredient added.* The ratio of the Brix value to acid is not less than 11.5 to 1 nor more than 18 to 1.

*Style II, with sweetening ingredient added.* The ratio of the Brix value to acid is not less than 12 to 1 nor more than 15 to 1.

(ii) If the reconstituted juice possesses a fairly good flavor, a score of 28 to 33 points may be given. Canned concentrated orange juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good flavor" means that the flavor is a normal flavor for reconstituted canned concentrated orange juice and may have a slightly caramelized or slightly oxidized flavor but is free from off-flavors of any kind. To score not less than 28 points canned concentrated orange juice shall meet the following requirements for the respective style:

*Style I, without sweetening ingredient added.* The ratio of Brix value to acid is not less than 9.5 to 1 nor more than 20 to 1.

*Style II, with sweetening ingredient added.* The ratio of Brix value to acid is not less than 10 to 1 nor more than 15 to 1.

(iii) If the canned concentrated orange juice fails to meet the requirements of subdivision (ii) of this subparagraph, a score of 0 to 27 points may be given. Canned concentrated orange juice that falls into this classification shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(f) *Explanation of terms and analyses.* (1) "Reconstituted juice" means the product obtained by mixing thoroughly one part by volume of the canned concentrated orange juice with a stated volume of water. For example, a dilution factor of "1 plus 3" means that to 1 part by volume of canned concentrated orange juice 3 parts by volume of water are added to produce a reconstituted juice. Distilled water is used in reconstituting the product for testing flavor.

(2) "Reconstitution as declared" means any defined reconstitution, such as in labeling: for example, "6 fluid ounces—makes 1 quart" means a "1 plus 4.33" concentrate.

(3) "Reconstitutes properly" means that the reconstituted juice shows no material separation of colloidal or suspended matter after standing four (4) hours at a temperature of not less than 68 degrees Fahrenheit in a clear glass tube or cylinder (such as a 50 ml. graduated cylinder).

(4) "Acid" means the percent by weight of acid (calculated as anhydrous citric acid) in canned concentrated orange juice and is determined by titration with standard sodium hydroxide solution using phenolphthalein as indicator.

(5) "Brix value" of the concentrate is the refractometricsucrose value determined in accordance with the International Scale of Refractive Indices of Sucrose Solutions and to which the applicable correction for acid is added. (See Table I for corrections.)

TABLE 1—CORRECTIONS FOR OBTAINING BRIX VALUE [1]

| Citric acid, anhydrous (percent by weight) | Correction to be added to refractometer sucrose value to obtain degree Brix value | Citric acid, anhydrous (percent by weight) | Correction to be added to refractometer sucrose value to obtain degree Brix value |
|---|---|---|---|
| 2.0 | 0.39 | 3.6 | 0.70 |
| 2.2 | .43 | 3.8 | .74 |
| 2.4 | .47 | 4.0 | .78 |
| 2.6 | .51 | 4.2 | .81 |
| 2.8 | .54 | 4.4 | .85 |
| 3.0 | .58 | 4.6 | .89 |
| 3.2 | .62 | 4.8 | .93 |
| 3.4 | .66 | 5.0 | .97 |

[1] Source: "Refractometric Determination of Soluble Solids in Citrus Juices," by J. W. Stevens and W. E. Baier, from the Analytical Edition of Industrial and Engineering Chemistry, vol. II, p. 447, Aug. 15, 1939.

(6) The "Brix" of reconstituted juice, as applicable, means the degrees Brix of the properly reconstituted juice when tested with a Brix hydrometer calibrated at 20 degrees C. (68 degrees F.). If used in testing juice at a temperature other than 20 degrees C. (68 degrees F.) the applicable temperature correction shall be made to the reading of the scale as prescribed in the Official Methods of Analysis of the Association of Official Agricultural Chemists. The degrees Brix of the reconstituted juice may be determined by any other method which gives equivalent results.

(7) "Recoverable oil" is determined by the following method:

(i) *Equipment.* Oil separatory trap similar to either of those illustrated in Figure 1 [1] or Figure 2.[1]

Gas burner or hotplate.
Ringstand and clamps.
Rubber tubing.
3-liter narrow-neck flask.

(ii) *Procedure.* Exactly 400 grams of the concentrate mixed with water to approximately two liters are placed in a 3-liter flask. Close the stopcock, place distilled water in the graduated tube, run cold water through the condenser from the bottom to top, and bring the solution to a boil. Boiling is continued for one hour at the rate of approximately 50 drops per minute.

By means of the stopcock, lower the oil into the graduated portion of the separatory trap, remove the trap from the flask, allow it to cool, and record the amount of oil recovered.

The number of milliliters of oil recovered divided by 4 equals the volume of recoverable oil per 100 grams of concentrate. To determine compliance with minimum or maximum allowances, as applicable, for recoverable oil, the volume of recoverable oil per 100 grams of concentrate divided by the Brix value of the concentrate equals the volume of recoverable oil per degree Brix value per 100 grams of concentrate.

(g) *Tolerances for certification of officially drawn samples.* (1) When certifying samples that have been officially drawn and which represent a specific lot of canned concentrated orange juice the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, with respect to those factors which are scored:

(i) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

(ii) None of the containers falls more than 4 points below the minimum score for the grade indicated by the average of such total scores;

(iii) None of the containers falls more than one grade below the grade indicated by the average of such total scores;

(iv) The average score of all containers for any factor subject to a limiting rule is within the score range of that factor for the grade indicated by the average of the total scores of the containers comprising the sample; and

(2) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

(h) *Score sheet for canned concentrated orange juice.*

## Chapter VIII—Production and Marketing Administration (Sugar Branch), Department of Agriculture

### Subchapter B—Sugar Requirements and Quotas

[Sugar Reg. 813, Amdt. 7]

### PART 813—SUGAR QUOTAS AND PRORATIONS OF QUOTA DEFICITS

#### 1953 DETERMINATION AND PRORATION OF AREA DEFICIT

*Basis and purpose.* This amendment is issued pursuant to the Sugar Act of 1948, as amended, for the purpose of prorating a deficit which is hereby determined in the quota for the Domestic Beet Area for sugar to be marketed in the continental United States in 1953. Section 204 (a) of the act provides that the Secretary shall from time to time determine whether any domestic area, the Republic of the Philippines, or Cuba will be unable to market its quota. If he so finds with respect to the Domestic Beet Area, the quotas for other domestic areas and Cuba are required to be revised by prorating to such areas an amount of sugar equal to any deficit so determined on the basis of their existing quotas.

The Sugar Act provides that the quota for any domestic area, the Republic of the Philippines, Cuba, or other foreign countries as established under the provisions of section 202 shall not be reduced by reason of any determination of a deficit and makes the proration of any such deficit in a domestic area and Cuba to other such areas able to supply the additional sugar a mere mathematical computation.

In order to afford sellers of sugar in affected areas an adequate opportunity to market the additional sugar authorized by this amendment, and thereby protect the interest of consumers, it is essential that this amendment be made effective immediately. Therefore, it is hereby determined and found that compliance with the notice, procedure and effective date requirements of the Administrative Procedure Act is unnecessary, impracticable and contrary to the public interest and the amendment herein shall become effective when published in the FEDERAL REGISTER.

By virtue of the authority vested in the Secretary of Agriculture by the Sugar Act of 1948, as amended (61 Stat. 922, as amended by 65 Stat. 318, 7 U. S. C. Sup., 1100) and the Administrative Procedure Act (60 Stat. 237) paragraphs (a) and (b) of Sugar Regulation 813, as amended (17 F. R. 11158; 18 F. R. 2127, 4399, 4759, 5589, 5707, 6607) are hereby amended to read as follows:

§ 813.43 *Determination and proration of area deficits*—(a) *Deficit in quota for the Domestic Beet Sugar Area.* It is hereby determined, pursuant to subsection (a) of section 204 of the act, that for the calendar year 1953 the Domestic Beet Sugar Area will be unable by an amount of 180,000 short tons of sugar, raw value, to market the quota established for that area in § 813.41.

(b) *Proration of deficit in quota for the Domestic Beet Sugar Area.* An amount of sugar equal to the deficit determined in paragraph (a) of this section is hereby prorated, pursuant to subsection (a) of section 204 of the act, as follows:

| Area; | Additional quota, in terms of short tons, raw value |
|---|---|
| Mainland cane sugar | 17,291 |
| Hawaii | 36,382 |
| Puerto Rico | 37,351 |
| Virgin Islands | 415 |
| Cuba | 88,561 |

*Statement of bases and considerations.* The highest distribution of sugar during November and December of the last five years was 266,000 short tons, raw value. This was in 1950, out of a record crop of over 2,000,000 tons. Average 1948–52 marketings during those two months amounted to approximately 227,000 tons. Therefore, it appears that distribution of beet sugar during the calendar year 1953 will range between 1,590,000 and 1,630,000 tons. Latest data on marketings indicate that the total will probably not exceed 1,620,000 tons. This amounts to an additional quota deficit for this area of 80,000 short tons, raw value. A deficit of 100,000 tons in the quota for this area has previously been determined. This deficit is prorated to the domestic areas and Cuba in proportion to their existing quotas.

(Sec. 403, 61 Stat. 932; 7 U. S. C. Sup. 1153. Interprets or applies sec. 204, as amended, 61 Stat. 925; 7 U. S. C. Sup. 1114)

Done at Washington, D. C., this 6th day of November 1953. Witness my hand and the seal of the Department of Agriculture.

[SEAL] EZRA TAFT BENSON,
*Secretary of Agriculture.*

[F. R. Doc. 53-9551; Filed, Nov. 10, 1953; 8:54 a. m.]

### Subchapter G—Determination of Proportionate Shares

[Sugar Determination 857.6]

### PART 857—SUGARCANE; PUERTO RICO

#### 1953–54 CROP

Pursuant to the provisions of section 302 of the Sugar Act of 1948, as amended (herein referred to as "act"), the following determination is hereby issued:

§ 857.6 *Proportionate shares for sugarcane farms in Puerto Rico for the 1953–54 crop*—(a) *Farm proportionate share.* A proportionate share shall be established for the farm, as constituted November 1, 1953, in terms of sugar, 96° basis, in the manner provided in this paragraph and such share shall be used on that basis until converted to its raw value equivalent in accordance with paragraph (b) of this section for the purpose of computing the payment for the farm.

(1) *Farm bases.* A base shall be established for each farm from which sugarcane was marketed (or processed) for the extraction of sugar or liquid sugar from any of the 1947–48, 1948–49, 1949–50, 1950–51, and 1951–52 crops (herein referred to as the "base period") by adding (i) 40 percent of the highest production of sugar, raw value, from sugarcane marketed (or processed) from the farm from any crop in the base period and (ii) 60 percent of the result obtained by dividing by 4 the total production of sugar, raw value, for the farm for the other 4 years of the base period.

(2) *Old farms*—(i) *Farms with bases in excess of 400 hundredweight.* The proportionate share for any farm having a farm base in excess of 400 hundredweight, as established under subparagraph (1) of paragraph (a) of this section, shall be the larger of 400 hundredweight or the amount determined by multiplying such base by the applicable percentage in the following table:

| Number of crops produced in the base period: | Percentage |
|---|---|
| 5 | 89 |
| 4 | 94 |
| 3 | 100 |
| 2 | 109 |
| 1 | 125 |

(ii) *Farms with bases not in excess of 400 hundredweight.* The proportionate share for any farm having a farm base not in excess of 400 hundredweight, as established under subparagraph (1) of paragraph (a) of this section, shall be the base: *Provided*, That for any such farm having production in only one year of the base period, the proportionate share shall be 125 percent of the base, and for any such farm having production in only two years of the base period, the proportionate share shall be 109 percent of the base.

(iii) *Farms having production in 1952–53 crop year only.* The proportionate share for any farm having production in the 1952–53 crop year only shall be 50 percent of the 1953–54 crop production on the farm, as estimated by the Caribbean Area Office of the Production and Marketing Administration.

(iv) *Minimum proportionate shares.* Notwithstanding the foregoing, the minimum proportionate share for any old farm shall be the larger of 200 hundredweight or the 1952–53 proportionate share for the farm as adjusted pursuant to the appeals provision applicable to that crop: *Provided*, That the 1952–53 adjusted share may be modified for the 1953–54 crop to the extent determined equitable by the Caribbean Area PMA Committee (herein referred to as "Committee").

(3) *New farms.* The proportionate share for any farm from which sugarcane is marketed (or processed) for the extraction of sugar or liquid sugar in the 1953–54 crop year for the first time since the 1946–47 crop year shall be 200 hundredweight.

(4) *Transfer of farm bases.* The farm base established or which would

have been established for any land which is removed from sugarcane production because of acquisition by purchase or lease by any Federal, Insular, or other agency having a right of eminent domain shall be available for use in providing an equitable farm base for land owned, purchased, or leased by the owner of the land so acquired by any of such agencies. Upon application to the Area Office, within five years from the date of such acquisition, any such owner shall be entitled to a farm base for any other land owned, purchased, or leased by him equal to the farm base which would have been established for such other land, plus the farm base which would have been established for the land so acquired: *Provided*, That neither the farm base nor the combined farm bases shall exceed the production capacity for the farm so owned, purchased, or leased as determined by the Committee.

(5) *Tolerances.* The requirements of section 301 (b) of the act with respect to the amount of sugarcane grown and marketed (or processed) from the farm shall be deemed to have been met if the amount of sugar recovered therefrom does not exceed the proportionate share for such farm by more than the applicable tolerance in the table below: *Provided*, That any amount of sugar within the applicable tolerance shall be excluded in computing the amount of sugar on which payment is made with respect to such farm under section 302 (a) of the act.

[Short tons of sugar, 96° basis]

| Proportionate shares: | Tolerance |
|---|---|
| Not more than 15 | 1.0 |
| More than 15 but not more than 25 | 1.5 |
| More than 25 but not more than 40 | 2.0 |
| More than 40 but not more than 65 | 2.5 |
| More than 65 but not more than 100 | 3.0 |
| More than 100 but not more than 150 | 3.5 |
| More than 150 but not more than 300 | 4.0 |
| More than 300 but not more than 750 | 4.5 |
| More than 750 | (1) |

[1] 5.0 or ¼ of 1 percent of the proportionate share, whichever is larger.

(6) *Delegation.* Farm bases and farm proportionate shares shall be established by the Director of the Caribbean Area Office of the Production and Marketing Administration (herein referred to as "Director"), in accordance with this determination and instructions issued by the Assistant Administrator for Production, PMA.

(7) *Appeals.* A producer of sugarcane who believes that the proportionate share established for his farm pursuant to this determination is inequitable may, not later than 60 days after notice thereof is issued, file an appeal in writing with the Committee. The Committee may adjust such proportionate share by an amount deemed to be equitable, after consideration of the interest of such producer as related to the interests of all other producers, and shall notify such producer of its decision in writing as soon as practicable. If a producer is dissatisfied with the decision of the Committee, he may appeal in writing to the Director of the Sugar Branch, Production and Marketing Administration, U. S. Department of Agriculture, Washington 25, D. C., who may make such adjustment in the proportionate share as he deems necessary and his decision shall be final.

(b) *Sugar for payment.* For the purpose of determining payments pursuant to Title III of the act, the proportionate share established in accordance with this determination and the amount of sugar recoverable, 96° basis, from sugarcane of the 1953–54 crop marketed from the farm shall be converted to raw value on the basis of the average polarization of the sugar produced from 1953–54 crop sugarcane at the mill or mills where the sugarcane was processed. Such conversion shall be made in accordance with section 101 (h) of the act.

(c) *Share tenant and share cropper protection.* In addition to compliance with the proportionate share for the farm in accordance with this determination, eligibility for payment of any producer of sugarcane shall be subject to the following conditions:

(1) That the number of share tenants or share croppers engaged in the production of sugarcane of the 1953–54 crop on the farm shall not be reduced below the number so engaged with respect to the previous crop, unless such reduction is approved by the Director; and

(2) That such producer shall not have entered into any leasing or cropping agreement for the purpose of diverting to himself or any other producer any payments to which share tenants or share croppers would be entitled if their leasing or cropping agreements for the previous crop were in effect.

STATEMENT OF BASES AND CONSIDERATIONS

*Sugar act requirements.* Section 301 (b) of the act provides as a condition for payment to producers, that there shall not have been marketed (or processed) an amount (in terms of planted acreage, weight or recoverable sugar content) of sugarcane grown on the farm and used for the production of sugar or liquid sugar in excess of the proportionate share for the farm, as determined by the Secretary, of the total quantity of sugarcane required to be processed to enable the area to meet the quota (and provide a normal carryover inventory) as estimated by the Secretary for such area for the calendar year during which the larger part of the sugar or liquid sugar from such crop normally would be marketed.

Section 302 (a) of the act provides that the amount of sugar with respect to which payment may be made shall be the amount of sugar commercially recoverable from the sugarcane grown on the farm and marketed (or processed) not in excess of the proportionate share for the farm.

Section 302 (b) provides that in determining the proportionate share for a farm the Secretary may take into consideration the past production on the farm of sugarcane marketed (or processed) for the extraction of sugar or liquid sugar and the ability to produce such sugarcane, and that the Secretary shall, insofar as practicable, protect the interests of new producers and small producers, and the interests of producers who are cash tenants, share tenants, or share croppers.

*General.* Pursuant to the foregoing provisions of the act, compliance with proportionate shares is required as one of the conditions for payment. Restrictive proportionate shares are authorized when the indicated sugar supply of an area exceeds the quantities needed to fill the quotas and provide a normal carryover inventory for such area.

In July 1952, when restrictions were imposed on the 1952–53 Puerto Rican crop, it appeared that carryover stocks into 1953 would approximate 335,000 tons. Due primarily to proration of deficits from other domestic areas during the latter part of 1952, the carryover was 250,000 tons. This carryover, together with the 1952–53 crop production of 1,182,000 tons, resulted in total 1953 supplies of 1,432,000 tons. Marketings under the increased mainland quota effective in 1953 and a deficit proration from the beet sugar area, and the sale of approximately 70,000 tons for use under foreign assistance programs of the U. S. Government leaves a prospective carryover into 1954 of 150,000 tons. Although a smaller carryover would be advantageous, it is not believed that a reduction should be accomplished by reducing the 1953–54 production below the sum of the mainland and anticipated local quotas.

*Situation indicated for 1954.* In light of the production prospects in other domestic areas, it now appears that deficit prorations to Puerto Rico in 1954, if any, will be small. Therefore, Puerto Rico's marketing opportunities for 1954 will closely approximate the sum of its mainland and local consumption quotas. Accordingly, this determination is designed to restrict the 1953–54 production to such sum. This production, together with the carryover into 1954, will enable the area to meet its 1954 quotas and provide a normal carryover into 1955.

*Public hearing.* In view of the importance of sugar production to the Puerto Rican economy and the effect of marketing restrictions, an informal public hearing was held in San Juan on August 12, 1953, to obtain the views of interested persons. In announcing the hearing on July 17, 1953, the Department suggested a method for establishing 1953–54 proportionate shares. This plan was presented and explained at the hearing by Department representatives. The hearing was attended by approximately 100 persons, eight of whom presented testimony. In addition, several briefs were submitted subsequently. While there was general concurrence with the method suggested by the Department, recommendations to modify certain provisions were presented. These related to small farms, minimum proportionate shares and to the proration of deficits in farm shares within mill areas. There appeared to be general agreement among those testifying at the hearing that the 1953–54 production should not be less than the sum of the Puerto Rican quotas and that the resulting carryover should be regarded as normal under the circumstances.

*Determination.* The basic adjustment factor of 0.89 was determined by subtracting the estimated 1953–54 production of sugar, raw value, resulting from the provisions relating to small farms, new farms, minimum shares and appeal adjustments from the total of the 1953–54 mainland and local quotas plus an allowance for probable deficits of marketings within individual farm shares, dividing the result by the total bases of the farms subject to the adjustment factor, and by converting the quotient to a 96° sugar basis.

The base period and the formula for establishing farm bases for the 1953–54 crop are the same as for the 1952–53 crop. The proportionate share for any new farm will be 200.0 hundredweight of sugar. The minimum proportionate share for any farm having a base will be 200.0 hundredweight. The minimum proportionate share for any farm without a base, but on which sugarcane was harvested in the 1952–53 crop season, will be the larger of 200.0 hundredweight or 50 percent of the estimated 1953–54 crop production on the farm. Moreover, if the 1952–53 proportionate share for any farm was adjusted under the appeals provision applicable to that crop, the 1953–54 proportionate share for such farm will be the same as the adjusted 1952–53 share unless other provisions result in a greater share or the Committee modifies the adjusted proportionate share.

While the proportionate shares for certain farms will be established pursuant to the minimum share provision, the shares for other old farms will be established as follows. The proportionate share for any farm having a base in excess of 400.0 hundredweight and production in all five years of the base period will be the larger of 400.0 hundredweight or the amount computed by applying the adjustment factor of 0.89 to such farm base. Since 1952–53 crop production has not been included in the base period, the adjustment factors to be applicable to farms with bases in excess of 400.0 hundredweight which did not have production in all of the years of the base period have been established so so as to give consideration to the 1952–53 production. For farms having production in only one, two, three or four years of the base period, the shares are to be computed by multiplying their farm bases (not production) by 125, 109, 100 and 94 percent, respectively. This will result in shares ranging from 50 percent of one year's production for farms having production in only one year of the base period to 94 percent of the farm bases for farms having 4 years of production in the base period. For example, for a farm having production in only one year of the base period, for which the farm base will be established at 40 percent of the one year's production and for which the proportionate share otherwise would be established at 35.6 percent of such production by use of the basic factor of 89 percent, the share will be established at 125 percent of the base, equaling 50 percent of such production. The proportionate share for any farm having a base not in excess of 400.0 hundredweight will be the farm base. For farms falling within this size group on which there was production in only one or two years of the base period, the proportionate shares will also reflect consideration for the 1952–53 crop production.

Certain persons who testified at the hearing proposed that only those farms with bases of 200.0 hundredweight or less should be exempted from adjustment and that the proposal of the Department to establish the proportionate share for any old farm at not less than 60 percent of the estimated 1953–54 production be modified substantially and made applicable only to farms on which production was started in 1952–53. The recommendations were made on the grounds that most growers should share in the restrictions and that farms with less than 5 years of production in the base period should not benefit unduly at the expense of other farms. However, almost two-thirds of the sugarcane farms in Puerto Rico produce less than 400.0 hundredweight each and they account for only about 6 percent of the total production. Accordingly, the exemption from adjustment of all farms producing less than 400.0 hundredweight will have a minor effect on the shares of the larger farms. In lieu of providing for a minimum share of 60 percent of the estimated 1953–54 production for all old farms, as originally proposed by the Department, provision has been made for the modification of the shares which would otherwise accrue to short-record farms and for minimum 50 percent shares for farms which were new farms under the 1952–53 program.

The proration of deficits in 1952–53 farm shares within mill areas resulted in inequities among producers. The 1952–53 procedure restricted the adjustments to producers within the mill area where the deficit occurred and in certain cases permitted such producers to harvest their entire crops, while producers in other mill areas were limited to their original proportionate shares. It appears that greater equity will result from an apportionment in the initial shares of an amount to offset the estimated total farm deficits for the 1953–54 crop. The increase in the basic adjustment factor from 87.65 percent for the 1952–53 crop to 89 percent for the 1953–54 crop results primarily from an allowance for such a deficit and increases proportionately the shares for farms throughout the Island.

Provision has been made for the consideration by the Committee of appeals for adjustments in proportionate shares as well as for further appeals to the Department. The provisions of the 1952–53 crop determination relating to marketing tolerances and share tenant and share cropper protection remain unchanged from the previous determination.

It is believed that this determination provides an equitable basis for establishing proportionate shares for the 1953–54 Puerto Rican sugarcane crop. Accordingly, I hereby find and conclude that the foregoing determination will effectuate the applicable provisions of the act.

(Sec. 403, 61 Stat. 932; 7 U. S. C. Sup. 1153 Interprets or applies sec. 302, 61 Stat. 930; 7 U. S. C. Sup. 1132)

Issued this 6th day of November 1953.

## Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

PART 955—GRAPEFRUIT GROWN IN ARIZONA; IN IMPERIAL COUNTY, CALIFORNIA; AND IN THAT PART OF RIVERSIDE COUNTY, CALIFORNIA, SITUATED SOUTH AND EAST OF THE SAN GORGONIO PASS

DETERMINATION RELATIVE TO EXPENSES AND FIXING OF RATE OF ASSESSMENT FOR 1953–1954 FISCAL PERIOD

On October 14, 1953, notice of proposed rule making was published in the FEDERAL REGISTER (18 F. R. 6547) regarding the expenses and rate of assessment for the 1953–1954 fiscal period under Marketing Agreement No. 96, as amended, and Order No. 55, as amended (7 CFR Part 955) regulating the handling of grapefruit grown in the State of Arizona; in Imperial County, California; and in that part of Riverside County, California, situated south and east of the San Gorgonio Pass. This regulatory program is effective pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.). After consideration of all relevant matters presented, including the proposals set forth in the aforesaid notice which were submitted by the Administrative Committee (established pursuant to the amended marketing agreement and order), it is hereby found and determined that:

§ 955.207 *Expenses and rate of assessment for the 1953–1954 fiscal period.* (a) The expenses necessary to be incurred by the Administrative Committee, established pursuant to the provisions of the amended marketing agreement and order (§§ 955.1 to 955.80), for its maintenance and functioning during the fiscal period beginning August 1, 1953, will amount to $19,000.00; and the rate of assessment to be paid by each handler who first ships grapefruit shall be one and one-quarter cents ($0.0125) per standard box of fruit shipped by such handler as the first handler thereof during the said fiscal period. Such rate of assessment is hereby fixed as each such handler's pro rata share of the aforesaid expenses.

(b) As used in this section, "handler," "ship," "fruit," "fiscal period," and "standard box" shall each have the same meaning as is given to each such term in said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 6th day of November 1953, to be effective 30

days after the date of publication hereof in the FEDERAL REGISTER.

[SEAL] JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

[F. R. Doc. 53-9546; Filed, Nov. 10, 1953; 8:52 a. m.]

---

PART 994—PECANS GROWN IN GEORGIA, ALABAMA, FLORIDA, MISSISSIPPI, AND SOUTH CAROLINA

GRADE AND SIZE REGULATION

Notice of proposed rule making with respect to an amendment of the existing regulation (16 F. R. 10801; 7 CFR, 1952 Rev., 994.102) on the basis of grades and sizes of unshelled pecans that may be handled pursuant to Marketing Agreement No. 111 and Order No. 94, regulating the handling of pecans grown in Georgia, Alabama, Florida, Mississippi, and South Carolina (7 CFR, 1952 Rev., Part 994), was published in the FEDERAL REGISTER of October 22, 1953 (18 F. R. 6721). Said marketing agreement and order are effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

In said notice, it was proposed to modify the presently effective grade and size regulation to permit handling for inshell distribution of lots of the Mahan variety of pecans which meet the requirements of U. S. Commercial grade, and an opportunity was afforded all interested persons to submit to the Department written data, views, or arguments for consideration prior to issuance of the final rule. The only document received in this connection, during the time specified in the notice, was a letter from a member of the pecan industry expressing the view that the proposed change should be made.

After consideration of all relevant matters, the existing grade and size regulation (16 F. R. 10801; 7 CFR, 1952 Rev., 994.102) is hereby amended to read as follows:

§ 994.102 *Grade and size regulation.* (a) In lieu of the initial grade and size regulation contained in § 994.4 (c) of the marketing agreement and order, no person shall handle, except as provided in § 994.4 (e) of the marketing agreement and order, any unshelled pecans:

(1) Unless such pecans have a count per pound of less than 91 nuts, and the 10 smallest nuts in a representative 100 nut sample weigh at least 1.5 ounces;

(2) In addition, meet requirements of the U. S. Commercial grade as established in the U. S. Standards for Pecans in the Shell (16 F. R. 5669), to read, as modified for the purposes of this grade and size regulation with respect to the minimum percentage of kernels required to meet the requirements of the U. S. No. 1 grade and the maximum tolerance for kernels which may be very seriously damaged, as set forth in subparagraph (3) of this paragraph: *Provided*, That pecans of the Mahan variety shall be required only to meet the requirements of the U. S. Commercial grade, as set forth in the aforesaid U. S. Standards for Pecans in the Shell, including the tolerances set forth therein;

(3) The pecans, other than those of the Mahan variety, shall consist of pecans in the shell which shells are free from serious damage caused by stains or adhering hulls, split, broken or punctured shells, loose hulls or other foreign material or other means. At least 75 percent, by count, of the pecans in any lot shall have kernels which meet the requirements of the U. S. No. 1 grade; and the remainder shall have kernels which are well cured, free from rancidity, mold, decay, insect injury, and from serious damage caused by shriveling, leanness, discoloration, or other means. In order to allow for variations incident to proper grading and handling, the following tolerances for pecans other than those of the Mahan variety shall be permitted:

(i) For external defects (defects of the shell) not more than 10 percent, by count, for pecans which fail to meet the requirements of the grade; and

(ii) For internal defects (defects of the kernel) not more than 15 percent, by count, for pecans which fail to meet the requirements of the grade: *Provided*, That no more than three-fifths of this amount, or 9 percent, shall be allowed for kernels which are very seriously damaged. No part of any tolerance shall be allowed to reduce, for the lot, the 75 percent of kernels required to meet the U. S. No. 1 grade.

It is hereby found that good cause exists for making this administrative rule effective upon its publication in the FEDERAL REGISTER, instead of waiting 30 days after such publication, for the reasons that: (1) It is desirable that the rule be made effective prior to, or as soon as practicable after, the handling of 1953 crop pecans begins; (2) the handling of such pecans has already begun in some districts in the five-State area covered by the regulation; and (3) compliance with this rule is a relaxation of the present regulation in respect to the Mahan variety of pecans, and will not make it necessary for handlers to make any advance preparation of a special nature.

(Sec. 5, 49 Stat. 31, as amended; 7 U. S. C. and Sup. 608c)

Issued at Washington, D. C., this 6th day of November 1953, to become effective upon publication of this document in the FEDERAL REGISTER.

S. R. SMITH,
*Director,*
*Fruit and Vegetable Branch.*

[F. R. Doc. 53-9549; Filed, Nov. 10, 1953; 8:53 a. m.]

## TITLE 5—ADMINISTRATIVE PERSONNEL

### Chapter I—Civil Service Commission

PART 6—EXCEPTIONS FROM THE COMPETITIVE SERVICE

MISCELLANEOUS AMENDMENTS

Effective upon publication in the FEDERAL REGISTER, subparagraph (8) of § 6.323 (a) is amended, subparagraph (17) is added to § 6.312 (a), and § 6.336 (a) is added as set out below.

§ 6.312 *Department of Commerce*—(a) *Office of the Secretary.* * * *

(17) One Deputy Assistant Secretary of Commerce for Domestic Affairs.

§ 6.323 *Department of Health, Education, and Welfare*—(a) *Office of the Secretary.* * * *

(8) Two confidential secretaries to the Under Secretary.

§ 6.336 *Railroad Retirement Board*—(a) One administrative (confidential) assistant to the Chairman.

(R. S. 1753, sec. 2, 22 Stat. 403; 5 U. S. C. 631, 633. E. O. 10440, March 31, 1953, 18 F. R. 1823)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] WM. C. HULL,
*Executive Assistant.*

## TITLE 14—CIVIL AVIATION

### Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

[Supp. 2]

PART 40—SCHEDULED INTERSTATE AIR CARRIER CERTIFICATION AND OPERATION RULES

OPERATING LIMITATIONS

The purpose of this supplement is to set forth CAA policies regarding performance operating limitations for aircraft in the transport category. The following policies are hereby adopted.

§ 40.70–2 *Accuracy of data (CAA policies which apply to § 40.70 (b)).* The charts and data prepared by the air carrier for use of flight and operations personnel should be prepared with sufficient accuracy and clarity that the gross weight and runway length values for specific operating conditions can be reproduced within a tolerance of one-half of one percent by an independent recheck.

§ 40.70–3 *Temperature accountability (CAA policies which apply to § 40.70 (c)).* The maximum permissible weight for a given take-off should be equal to the lowest of three values determined separately by consideration of (a) accelerate-stop, (b) take-off and climb out to a 50-foot height and (c) the obstacle clearance condition. The established temperature accountability correction factors appearing in the Airplane Flight Manuals are applied to the take-off weights determined by the accelerate-stop and climb out to a 50-foot height. These values may be used individually or in combination, i. e., if a runway is considerably longer than is required to meet the accelerate-stop and climb out to 50 foot requirements at standard temperature, then at temperatures higher than standard, take-off weight need not be reduced as long as additional runway length is available. When the temperature reaches a value at which no additional runway length remains, then a reduction in weight would be necessary. These factors do not apply to weights determined by obstacle clearance considerations. If the take-off weight at standard temperature is limited by obstruction clearance rather than by the climb out to 50 feet or by the accelerate-stop distance, a weight reduction need not be made for temperatures higher than standard until the temperatures reach a high enough value to use up the existing runway between that used for standard temperature (limited to less than the full runway because of obstacles) and the actual length.

§ 40.71–1 *Weight limitations (CAA policies which apply to § 40.71).* The limitations imposed by § 40.71 take into account only one operating variable, i. e., the elevation of the airport to be used as it affects the weight of the aircraft during take-off or landing. Other operating variables, such as runway length, gradient, wind and temperature, are considered in other sections of this part. Compliance with this section does not present a particular problem since the Airplane Flight Manual provides performance data for airports over a wide range of elevations. However, most manuals do not provide data for operations at airports below sea level. Section 40.71 should not be construed as prohibiting operations from airports below sea level, since sea level data in the Airplane Flight Manual, being conservative, may be applied to such airports.

§ 40.72–1 *Take-off limitations to provide for engine failure (CAA policies which apply to § 40.72)*—(a) *Take-off flight path.* Figure 1 is a pictorial representation of the relationship required between the dimensions of an airport and its surroundings, and the performance of the airplane. It illustrates the take-off flight path defined by the airworthiness requirements.

(b) *Airport data.* Complete data concerning the airport dimensions and characteristics, such as runway lengths, runway gradients, obstruction heights and location, airport elevation, and the nature and condition of airport areas other than paved runways from which take-offs might be made, are necessary for the determination of permissible take-off weights. The most nearly complete and satisfactory source of such data is the series of Airport Obstruction Plans prepared by the U. S. Department of Commerce Coast and Geodetic Survey. However, their Airport Obstruction Plan series does not yet completely cover the airports used by air carrier operators of Transport Category airplanes, and in addition, the Obstruction Plans do not present any data showing the nature or condition of runway surfaces or other airport areas suitable for use in take-off and landing. Furthermore, the Obstruction Plans necessarily contain data which may be several months old and which may not completely conform to the existing obstructions. Therefore, it may be necessary, for the air carrier operator, to supplement its data with information obtained from other sources. However, gross weight data calculated on the basis of such data should be rechecked or recalculated as soon as appropriate data from the Coast and Geodetic Survey becomes available.

(c) *Runways.* (1) Normally, only paved runways will be approved for use in take-off. However, in some cases there may be a defined rectangular area hereinafter designated as a stopway at the end of a runway in the direction of take-off, selected and approved as a suitable area, in which the aircraft can be stopped after an interrupted take-off. The stopway should have the same width as the runway it augments. The stopway should be so prepared or constructed as to enable the aircraft to come to a stop on it without hazard at the operating speeds that might be expected in this area after an interrupted take-off. If it is desired to use a stopway to meet the "climb to a 50-foot height" requirement, the stopway should be suitable for the aircraft to traverse it at take-off speeds without hazard.

(2) In all cases the take-off should be assumed to begin on the paved runway and not on an unpaved area. No allowance need be made for the length of the airplane in determining what should be considered to be the proper point for beginning the take-off. Limitations established by the airport operator may make it necessary to stipulate that the beginning of the take-off area be at some point down the runway from the actual end of the paving.

(d) *Turns to avoid obstructions.* (1) Section 40.72 provides that after reaching a height of 50 feet, the aircraft may be turned with a bank not exceeding 15° to comply with the obstruction clearance criteria. Only one turn to a definite heading should be considered in detailing the take-off path.

(2) The radius of turn resulting from a banked turn of 15° may be determined from the following formula:

Radius of turn $= V^2 \times 0.25$ feet
where $V$ = climb speed in m. p. h., TAS

For example: At a climb speed of 120 m. p. h., the radius of turn for a 15° banked turn would be,

$$120 \times 120 \times 0.25 = 3600 \text{ feet}$$

The effects of wind in altering a flight path need not be considered unless they are large (¼ climb speed) and the angle of turn is more than 45° from the runway heading.

(e) *Effects of runway gradient.* (1) The gradient effect on the ground run may be calculated from the following formula:

$$S_G = S\left[\frac{1}{1-\left(\frac{2\,S\,g\,\sin a}{V_2^2}\right)}\right]$$

where
$S_G$ = length of ground run with gradient.
$S$ = length of ground run without gradient.
$g$ = acceleration of gravity = 32.2 (ft./sec.²).
$V_2$ = climb out speed, feet per second, True Air Speed.
$a$ = angle of grade with horizontal, uphill +, downhill −.

(2) The above formula is based on several simplifying assumptions, i. e., that a uniform grade exists, that the airplane is accelerated uniformly throughout the ground run, and that the speed $V_2$ may be used where the difference between $V_1$ and $V_2$ is not large. None of these assumptions may be exactly correct, but the errors introduced by making such assumptions are small provided the airplane acceleration and the actual point-to-point grade do not depart from the average values of those quantities by any great amount.

(3) The effect of gradient during the climb-out should be determined by comparing the airplane rate of climb with the change in runway elevation, to determine first the weight or wind condition at which the airplane clears the end of the runway and all obstacles by an actual 50 feet and second, that the airplane clears all points on the runway after take-off.

(4) For purposes of simplification in calculating the effect of runway gradient on the take-off flight path, an average gradient consisting of the difference in elevation of the two ends of the runway divided by the runway length may be used, provided that no intervening point on the runway lies more than 5 feet above or below a straight line joining the two ends of the runway. In this case, the gradient effects on the acceleration portion of the take-off flight path and for the accelerate-stop portion may be presented together in simple chart form without introducing excessive errors. However, the actual gradient should be used for the climb-out segments of the flight path and in no case should the gradient be greater than the first segment climb.

(5) In those cases in which intermediate points on the runway depart more than five feet from the mean line, the gradient effects on the acceleration portions, the deceleration portion, and the climb portion of the flight path should be computed separately. An average gradient may be assumed for the ground run portion of the problem because the error resulting therefrom is so small that a more rigorous treatment is not justified, provided a truly representative gradient is chosen. Where there are no reversals or significant changes in the runway slope during the ground run, the average may be taken to be the difference in elevation between the starting point and the point of attaining take-off climb speed, $V_2$, divided by the distance between the two points. However, if the gradient is not essentially constant, an average gradient should be assumed that more nearly parallels the high-speed portion of the acceleration run, since the gradient has a greater effect on the distance traversed at high speed. The average gradient selected in this way will usually serve for determining gradient effects on the acceleration distance in either the take-off flight path or the accelerate-stop distance. An average gradient should be determined in the same way in determining the gradient effects on the stopping distance, while the actual gradient should be determined in checking the climb segment to the 50-foot point.

(6) The operator may take advantage of the favorable effect of a downhill gradient on the take-off flight path, if he wishes, but the unfavorable effect of such a gradient on the stopping distance should be accounted for in all cases.

(f) *Effects of wind.* (1) Section 40.72 permits the use of 50 percent of the headwind component and requires consideration of 150 percent of any tailwind component. The effect of wind on runway requirements can be determined by use of the following equation:

(i) For all headwind components, and tailwind components of 10 m. p. h. or less.

$$S_w = S\left(\frac{V_2 - V_w}{V_2}\right)^{1.85}$$

where

$S_w$ = runway required with wind
$S$ = runway required, zero wind
$V_2$ = take-off safety speed (m. p. h.)
$V_w$ = + (0.5 × headwind component) or, − (1.5 × tailwind component)

(ii) If tailwind components in excess of 10 m. p. h. are approved, the equation will be:

$$S_w = S\left(\frac{V_2 - V_w}{V_2}\right)^2$$

Alternately, the exponent can be that which is determined to be appropriate to the separation of deceleration characteristics of the airplane type, as applicable.

(2) For steady wind conditions, the wind velocity and direction will be used in computing the effective headwind and tailwind components, and the maximum gust velocity and most unfavorable direction will be used in computing the crosswind component.

§ 40.76–1 *Special en route limitations (CAA policies which apply to § 40.76).* No attempt is made to classify specific types of navigational facilities as acceptable or unacceptable for the purposes of § 40.76, but each case will be examined on its own merits. In general, however, the facility should be of a type that gives the pilot a continuous fix of his position with an error of not more than two miles, or a continuous on-course indication with an error of not more than two miles, or a continuous indication of the bearing and distance of the obstacle from the airplane, with an accuracy adequate to allow the pilot to turn away from the obstacle with ample clearance. Any mechanical or electrical facilities that are to be acceptable should be thoroughly reliable regardless of weather or other operating conditions. Such considerations apply only for IFR operations.

§ 40.77–1 *Landing distance limitations; airport of destination (CAA policies which apply to § 40.77).* (a) Section 40.77 establishes two major considerations in determining the permissible landing weight at the airport of destination. The first is that the aircraft weight will be such on arrival that it can be landed within 60 percent of the effective landing length of the most favorable (normally the longest) runway in still air. This maximum weight for an airport aircraft configuration, once established, remains constant and cannot be exceeded, regardless of wind conditions.

(b) The second is that consideration be given to the maximum weight that will be permitted due to the necessity of using another runway because of the probable wind condition, ground handling characteristics of the aircraft, landing aids, etc. This consideration may result in a lower gross weight than permitted in paragraph (a) of this section, in which case, dispatch must be based on this lesser weight.

(c) The probable wind referred to in paragraph (b) of this section, is the wind forecasted to exist at the time of arrival.

(d) If the forecast conditions are such that consideration of the requirements in § 40.77 (b) would preclude a landing at the intended destination, the aircraft may be dispatched if an alternate airport is designated which permits compliance with § 40.78.

(e) (1) If a flight has been properly dispatched, but arrives at the destination with a weight higher than anticipated due to unexpected wind conditions or fuel consumption, § 40.77 (b) should not be construed as prohibiting a landing at the overweight condition, provided the crosswind and/or tailwind operating limitations are not exceeded.

(2) If conditions are such that the crosswind and/or tailwind limitations will be exceeded, the flight must proceed to its alternate, if one has been named to meet the requirements of § 40.77 (b). However, if an alternate was not provided, and upon arrival the wind conditions were such that the crosswind and/or tailwind limitations would be exceeded, the pilot should exercise the authority granted him in § 40.360 (a).

(f) For application of the wind components as allowed in § 40.77 (b), refer to § 40.72–1 (g).

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply secs. 601, 604, 52 Stat. 1007, 1010, 49 U. S. C. 551, 554)

This supplement shall become effective January 1, 1954. However, under Special Regulation 393A, published on October 1, 1953, in 18 F. R. 6258, the Administrator may, upon application, amend the operations specifications of an air carrier coming under the provisions of Part 40, effective January 1, 1954, to authorize such air carrier to operate, prior to January 1, 1954, in compliance with selected provisions of Part 40, effective January 1, 1954, in lieu of the equivalent provision of presently effective Parts 40 and 61.

[SEAL] S. A. KEMP,
*Acting Administrator of Civil Aeronautics.*

[F. R. Doc. 53-9507; Filed, Nov. 10, 1953; 8:45 a. m.]

## Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 65]

### PART 608—DANGER AREAS

#### ALTERATION

The danger area alteration appearing hereinafter has been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and is adopted to become effective when indicated in order to promote safety of the flying public. Since a military function of the United States is involved, compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act is not required.

Part 608 is amended as follows:

In § 608.29, an Otis Air Force Base, Falmouth, Massachusetts, temporary area is added to read:

| Name and location | Description by geographical coordinates | Designated altitudes | Time of designation | Using agency |
|---|---|---|---|---|
| OTIS AIR FORCE BASE (Falmouth). | Within a 250 nautical mile radius of Otis Air Force Base, Falmouth, Mass., excluding that portion lying outside the boundary of the United States, and excluding that portion lying beyond the 3 nautical mile limit of the shoreline. | 26,000 feet MSL to unlimited. (NOTE: Military aircraft will be operating without lights between such altitudes.) | Dusk to dawn, commencing on the following dates: Nov. 7, 8, 11, 13, 14, 16, 17, 19, 20, 24, 30, 1953. | Otis AFB, Falmouth, Mass. |

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective on November 7, 1953.

[SEAL] F. B. LEE,
*Administrator of Civil Aeronautics.*

[F. R. Doc. 53-9503; Filed, Nov. 6, 1953; 4:10 p. m.]

[Amdt. 49]

### PART 610—MINIMUM EN ROUTE IFR ALTITUDES

#### MISCELLANEOUS AMENDMENTS

The minimum en route IFR altitudes appearing hereinafter have been coordinated with interested members of the industry in the regions concerned insofar as practicable. The altitudes are adopted without delay in order to provide for safety in air commerce. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 610 is amended as follows:

1. Section 610.102 *Amber civil airway No. 2* is amended to eliminate:

| From— | To— | Minimum altitude |
|---|---|---|
| Umiat, Alaska (LFR). | Point Barrow, Alaska (LFR).[1] | 2,500 |

[1] 11,000'—Minimum crossing altitude at Point Barrow (LFR), Southeast-bound.

# TITLE 26—INTERNAL REVENUE

## Chapter I—Internal Revenue Service, Department of the Treasury

### Subchapter A—Income and Excess Profits Taxes

[T. D. 6047]

### PART 7—TAXATION PURSUANT TO TREATIES

#### SUBPART—CANADA

#### WITHHOLDING REGULATIONS WITH RESPECT TO U. S.-CANADA INCOME TAX CONVENTION

Release or refund of excess tax withheld, and exemption from, or reduction in rate of, withholding under sections 143 and 144 of the Internal Revenue Code in the case of residents of Canada and of corporations organized under the laws of Canada, as affected by the income tax convention and protocol between the United States and Canada proclaimed by the President of the United States of America on June 17, 1942, and amended by the supplementary convention between such Governments proclaimed by the President on November 29, 1951.

On August 6, 1953, there was published in the FEDERAL REGISTER (18 F. R. 4620) a notice of proposed rule making containing withholding regulations with respect to the income tax convention between the United States and Canada, signed March 4, 1942, as modified and supplemented by the supplementary convention between such Governments, signed June 12, 1950. No objection to the rules proposed having been received, the regulations set forth below are hereby adopted:

Sec.
7.45 Introductory.
7.46 Dividends.
7.47 Interest.
7.48 Copyright royalties.
7.49 Natural resource royalties, real property rentals, salaries, wages, emoluments, etc.
7.50 Pensions and life annuities.
7.51 Exempt organizations.
7.52 Release of excess tax withheld at source.
7.53 Addressee not actual owner.
7.54 Return of tax withheld and information to be furnished in ordinary course.
7.55 Beneficiaries of a domestic estate or trust.
7.56 Refund of excess tax withheld prior to 1954.
7.57 Prior regulations.

AUTHORITY: §§ 7.45 to 7.57 issued under 53 Stat. 32, 467; 26 U. S. C. 62, 3791.

§ 7.45 *Introductory.* (a) The income tax convention and protocol between the United States and Canada, signed March 4, 1942, and proclaimed by the President of the United States on June 17, 1942, as modified and supplemented by the supplementary convention between such Governments, signed June 12, 1950, and proclaimed by the President on November 29, 1951, referred to in this subpart as the convention, provides in part as follows, effective for taxable years beginning on or after January 1, 1951:

* * * * *

ARTICLE VI A

Pensions (including Government pensions) and life annuities derived from within one of the contracting States by a resident of the other contracting State shall be exempt from taxation in the former State.

* * * * *

ARTICLE X

Income derived from sources within one of the contracting States by a religious, scientific, literary, educational, or charitable organization of the other contracting State shall be exempt from taxation in the State from which the income is derived if, within the meaning of the laws of both contracting States, such organization would have been exempt from income tax.

ARTICLE XI

1. The rate of income tax imposed by one of the contracting States, in respect of income derived from sources therein, upon individuals residing in, or corporations organized under the laws of, the other contracting State, and not having a permanent establishment in the former State, shall not exceed 15 percent for each taxable year.

2. Notwithstanding the provisions of paragraph 1 of this Article, income tax in excess

of 5 percent shall not be imposed by one of the contracting States in respect of dividends paid by a subsidiary corporation organized under the laws of such State, or of a political subdivision thereof, to a parent corporation organized under the laws of the other contracting State, or of a political subdivision thereof: Provided, however, That this paragraph shall not apply if the competent authority in the former State is satisfied that the corporate relationship between the two corporations has been arranged or is maintained primarily with the intention of taking advantage of this paragraph.

3. Notwithstanding the provisions of Article XXII of this Convention, paragraph 1 or paragraph 2, or both, of this Article, may be terminated without notice on or after the termination of the three-year period beginning with the effective date of this Convention by either of the contracting States imposing a rate of income tax in excess of the rate of 15 percent prescribed in paragraph 1 or in excess of the rate of 5 percent prescribed in paragraph 2.

• • • • •

ARTICLE XII

1. Dividends and interest paid by a corporation organized under the laws of Canada to a recipient, other than a citizen or resident of the United States of America or a corporation organized under the laws of the United States of America, shall be exempt from all income taxes imposed by the United States of America.

2. Dividends and interest paid by a corporation organized under the laws of the United States of America whose business is not managed and controlled in Canada to a recipient, other than a resident of Canada or a corporation whose business is managed and controlled in Canada, shall be exempt from all taxes imposed by Canada.

• • • • •

ARTICLE XIII A

1. A resident or corporation organized under the laws of Canada deriving from sources within the United States of America rentals from real property may elect for any taxable year to be subject to the tax imposed by the United States of America on a net basis as if such resident or corporation were engaged in trade or business within the United States of America through a permanent establishment therein during such taxable year.

2. Rentals from real property derived from sources within Canada by an individual or corporation resident in the United States of America shall receive tax treatment by Canada not less favorable than that accorded under Section 99, The Income Tax Act, as in effect on the date on which this Article goes into effect.

• • • • •

ARTICLE XIII C

Royalties for the right to use copyrights or in respect of the right to produce or reproduce any literary, dramatic, musical, or artistic work (but not inclusive of rents or royalties in respect of motion picture films) derived from sources within one of the contracting States by a resident or corporation or other entity of the other contracting State not engaged in trade or business in the former State through a permanent establishment shall be exempt from tax imposed by such former State.

• • • • •

ARTICLE XVIII

The competent authorities of the two contracting States may prescribe regulations to carry into effect the present Convention within the respective States and rules with respect to the exchange of information.

The competent authorities of the two contracting States may communicate with each other directly for the purpose of giving effect to the provisions of the present Convention.

• • • • •

ARTICLE XIX

With a view to the prevention of fiscal evasion, each of the contracting States undertakes to furnish to the other contracting State, as provided in the succeeding Articles of this Convention, the information which its competent authorities have at their disposal or are in a position to obtain under its revenue laws in so far as such information may be of use to the authorities of the other contracting State in the assessment of the taxes to which this Convention relates.

The information to be furnished under the first paragraph of this Article, whether in the ordinary course or on request, may be exchanged directly between the competent authorities of the two contracting States.

ARTICLE XX

1. The competent authorities of the United States of America shall forward to the competent authorities of Canada as soon as practicable after the close of each calendar year the following information relating to such calendar year:

The names and addresses of all persons whose addresses are within Canada and who derive from sources within the United States of America dividends, interest, rents, royalties, salaries, wages, pensions, annuities, or other fixed or determinable annual or periodical profits and income, showing the amount of such profits and income in the case of each addressee.

• • • • •

ARTICLE XXI

1. If the Minister in the determination of the income tax liability of any person under any of the revenue laws of Canada deems it necessary to secure the cooperation of the Commissioner, the Commissioner may, upon request, furnish the Minister such information bearing upon the matter as the Commissioner is entitled to obtain under the revenue laws of the United States of America.

• • • • •

ARTICLE XXII

This Convention and the accompanying Protocol which shall be considered to be an integral part of the Convention shall be ratified and the instruments of ratification shall be exchanged at Washington as soon as possible.

This Convention and Protocol shall become effective on the first day of January 1941. They shall continue effective for a period of three years from that date and indefinitely after that period, but may be terminated by either of the contracting States at the end of the three-year period or at any time thereafter provided that, except as otherwise specified in the case of Article XI, at least six months prior notice of termination has been given, the termination to become effective on the first day of January following the expiration of the six-month period.

• • • • •

PROTOCOL

At the moment of signing the Convention for the avoidance of double taxation, and the establishment of rules of reciprocal administrative assistance in the case of income taxes, this day concluded between the United States of America and Canada, the undersigned plenipotentiaries have agreed upon the following provisions and definitions:

1. The taxes referred to in this Convention are:

(a) For the United States of America: the Federal income taxes, including surtaxes, and excess-profits taxes.

(b) For Canada: the Dominion income taxes, including surtaxes, and excess-profits taxes.

2. In the event of appreciable changes in the fiscal laws of either of the contracting States, the Governments of the two contracting States will consult together.

3. As used in this Convention:

(a) The terms "person," "individual" and "corporation", shall have the same meanings, respectively, as they have under the revenue laws of the taxing State or the State furnishing the information, as the case may be;

(b) The term "enterprise" includes every form of undertaking, whether carried on by an individual, partnership, corporation or any other entity;

(c) The term "enterprise of one of the contracting States" means, as the case may be, "United States enterprise" or "Canadian enterprise";

(d) The term "United States enterprise" means an enterprise carried on in the United States of America by an individual resident in the United States of America, or by a corporation, partnership or other entity created or organized in or under the laws of the United States of America, or of any of the States or Territories of the United States of America;

(e) The term "Canadian enterprise" is defined in the same manner mutatis mutandis as the term "United States enterprise";

(f) The term "permanent establishment" includes branches, mines and oil wells, farms, timber lands, plantations, factories, workshops, warehouses, offices, agencies and other fixed places of business of an enterprise, but does not include a subsidiary corporation. The use of substantial equipment or machinery within one of the contracting States at any time in any taxable year by an enterprise of the other contracting State shall constitute a permanent establishment of such enterprise in the former State for such taxable year.

When an enterprise of one of the contracting States carries on business in the other contracting State through an employee or agent established there, who has general authority to contract for his employer or principal or has a stock of merchandise from which he regularly fills orders which he receives, such enterprise shall be deemed to have a permanent establishment in the latter State.

The fact that an enterprise of one of the contracting States has business dealings in the other contracting State through a commission agent, broker or other independent agent or maintains therein an office used solely for the purchase of merchandise shall not be held to mean that such enterprise has a permanent establishment in the latter State.

4. The term "Minister", as used in this Convention, means the Minister of National Revenue of Canada or his duly authorized representative. The term "Commissioner", as used in this Convention, means the Commissioner of Internal Revenue of the United States of America, or his duly authorized representative. The term "competent authority", as used in this Convention, means the Commissioner and the Minister and their duly authorized representatives.

5. The term "United States of America", when used in a geographical sense, includes only the States, the Territories of Alaska and Hawaii, and the District of Columbia. The term "Canada" when used in a geographical sense means the Provinces, the Territories and Sable Island.

6. The term "subsidiary corporation" as used in Article XI of this Convention means a corporation 95 percent of whose shares (other than Directors' qualifying shares) having full voting rights are beneficially

owned by another corporation, provided that (except in the case of a corporation the chief business of which is the making of loans) ordinarily not more than one-quarter of the gross income of such subsidiary corporation is derived from interest and dividends other than interest and dividends received from its subsidiary corporations.

7. (a) The term "rentals and royalties" referred to in Article II of this Convention shall include rentals or royalties arising from leasing real or immovable, or personal or movable property or from any interest in such property, including rentals or royalties for the use of, or for the privilege of using, patents, copyrights, secret processes and formulae, goodwill, trade marks, trade brands, franchises and other like property;

(b) The term "interest", as used in this Convention, shall include income arising from interest-bearing securities, public obligations, mortgages, hypothecs, corporate bonds, loans, deposits and current accounts;

(c) the term "dividends", as used in this Convention, shall include all distributions of the earnings or profits of corporations.

8. The term "pensions" referred to in Article VI A of this Convention means periodic payments made in consideration for services rendered or by way of compensation for injuries received.

9. The term "life annuities" referred to in Article VI A of this Convention means a stated sum payable periodically at stated times, during life, or during a specified number of years, under an obligation to make the payments in consideration of a gross sum or sums paid by the recipient or under a contributory retirement plan.

10. The term "permanent establishment" as used in Article XI of this Convention, shall not be deemed to include an office used solely for the purchase of merchandise.

11. The provisions of the present Convention shall not be construed to restrict in any manner any exemption, deduction, credit or other allowance accorded by the laws of one of the contracting States in the determination of the tax imposed by such State.

12. The citizens of one of the contracting States residing within the other contracting State shall not be subjected to the payment of more burdensome taxes than the citizens of such other State.

• • • • •

(b) As used in this subpart, any term defined in the convention shall have the meaning so assigned to it; any term not so defined shall have the meaning which such term has under the Internal Revenue Code.

§ 7.46 *Dividends*—(a) *General.* (1) The rate of United States income tax upon dividends derived from sources within the United States and received in taxable years beginning on or after January 1, 1951, by a nonresident alien (including a nonresident alien individual, fiduciary, and partnership) who is a resident of Canada, or by a corporation organized under the laws of Canada, shall not exceed 15 percent of the gross amount thereof for each taxable year under the provisions of Article XI of the convention if such alien or corporation at no time during the taxable year in which such dividends are derived has a permanent establishment in the United States. As to what constitutes a permanent establishment, see paragraphs (3) (f) and (10) of the protocol.

(2) Thus, if a nonresident alien individual who is a resident of Canada performs personal services within the United States during the taxable year, but has at no time during such year a permanent establishment within the United States, he is entitled to the reduced rate of tax with respect to dividends derived in that year from United States sources, as provided in Article XI of the convention, even though under the provisions of section 211 (b) of the Internal Revenue Code he has engaged in trade or business within the United States during such year by reason of his having rendered personal services therein.

(3) For provisions pertaining to dividends derived from sources within the United States by exempt organizations, see § 7.51.

(b) *Dividends paid by related corporation.* (1) Under the provisions of Article XI (2) of the convention, dividends derived from sources within the United States and paid by a corporation organized under the laws of the United States, or of a political subdivision thereof, to a parent corporation organized under the laws of Canada, or of a political subdivision thereof, which beneficially owns at the time the dividend is paid 95 percent or more of the shares (other than Directors' qualifying shares) of the paying corporation which have full voting rights are, when received in taxable years beginning on or after January 1, 1951, subject to United States income tax at a rate not in excess of 5 percent if (i) ordinarily not more than 25 percent of the gross income of the paying corporation for the three-year period immediately preceding the taxable year in which the dividend is paid consists of dividends and interest (other than dividends and interest received by such paying corporation from its own subsidiary corporations, if any), (ii) the Commissioner of Internal Revenue is satisfied that the relationship between the paying corporation and the parent corporation has not been arranged or maintained primarily with the intention of securing the reduced rate of 5 percent, and (iii) the parent corporation at no time during the taxable year in which such dividends are derived has a permanent establishment in the United States. The condition set forth under subdivision (i) of this subparagraph (relating to the character of the income) shall not apply, however, in the case of a paying corporation the chief business of which is the making of loans.

(2) Any domestic corporation which claims or contemplates claiming that dividends paid or to be paid by it are subject to such rate not in excess of 5 percent shall file the following information with the Commissioner of Internal Revenue as soon as practicable: (i) The date and place of its organization; (ii) the number of outstanding shares of stock of the domestic corporation having voting power and the voting power thereof; (iii) the person or persons beneficially owning such stock of the domestic corporation and their relationship to the Canadian corporation; (iv) the amount of the gross income by years of the domestic corporation for the three-year period immediately preceding the taxable year in which the dividend is paid; (v) the amount of interest and dividends by years included in the gross income of the domestic corporation, and the amount of interest and dividends by years received by such corporation from its own subsidiary corporations, if any; and (vi) the relationship between the domestic corporation and the Canadian corporation deriving the dividend from sources within the United States.

(3) As soon as practicable after such information is filed, the Commissioner will determine whether the dividends concerned fall within the scope of the provisions of Article XI (2) of the convention and may authorize the release or refund of excess tax withheld with respect to dividends which come within such provisions. For additional requirements respecting the refund of excess tax withheld prior to 1954, see § 7.56.

(4) In any case in which the Commissioner has notified the domestic corporation that the dividends fall within the scope of the provisions of Article XI (2) of the convention, the reduced withholding rate of 5 percent, to the extent withholding of United States income tax is required, shall apply to any dividends subsequently paid by such corporation to the Canadian corporation, unless the stock ownership of the domestic corporation, or the character of its income, materially changes; or unless the Commissioner determines that the relationship between the two corporations concerned is being maintained primarily with the intention of securing the reduced rate of tax. In such instance, if such change in stock ownership or character of income occurs, the domestic corporation shall promptly notify the Commissioner of the then existing facts with respect thereto. The continued application of the rate not in excess of 5 percent is also dependent upon the continued fulfillment of subparagraph (1) (iii) of this paragraph.

(c) *Effect of address in Canada on withholding in the case of dividends.* For the purpose of withholding of United States income tax in the case of dividends every nonresident alien (including a nonresident alien individual, fiduciary, and partnership) whose address is in Canada shall be deemed by United States withholding agents to be a nonresident alien who is a resident of Canada not having a permanent establishment in the United States; and every foreign corporation whose address is in Canada shall be deemed by such withholding agents to be a corporation organized under the laws of Canada and not having a permanent establishment in the United States.

(d) *Rate of withholding.* (1) Withholding at source in the case of dividends derived from sources within the United States and paid on or after January 1, 1954, to nonresident aliens (including a nonresident alien individual, fiduciary, and partnership) and to foreign corporations, whose addresses are in Canada, shall be at the rate of 15 percent in every case except that in which, prior to the date of payment of such dividends, (i) the Commissioner of Internal Revenue has notified (a) the domestic corporation (pursuant to paragraph (b) of this section) that such dividends fall within the scope of the provisions of Article XI (2) of the convention or (b) the

withholding agent that the reduced rate of withholding shall not apply, or (ii) the withholding agent has received the letter of notification prescribed in § 7.51 (b).

(2) The preceding provisions of this subpart respecting the application of the reduced withholding rate in the case of dividends paid to nonresident aliens and foreign corporations with addresses in Canada are based upon the assumption that the payee of the dividend is the actual owner of the capital stock from which the dividend is derived and consequently is the person liable to United States income tax upon such dividend. As to action by the recipient who is not the owner of the dividend, see § 7.53.

(3) The rate at which United States tax has been withheld from any dividend paid at any time after the expiration of the thirtieth day after the date on which this subpart is published in the FEDERAL REGISTER to any person whose address is in Canada at the time the dividend is paid shall be shown either in writing or by appropriate stamp on the check, draft, or other evidence of payment, or on an accompanying statement.

(4) In the case of dividends paid on or after January 1, 1951, by a corporation organized under the laws of Canada no withholding of United States income tax is required. See Article XII (1) of the convention.

(e) *Definition of dividend.* Under paragraph 7 (c) of the protocol, the term "dividends", as used in the convention, includes all distributions of the earnings or profits of corporations.

§ 7.47 *Interest*—(a) *General.* (1) The rate of United States income tax upon interest on bonds, securities, notes, debentures, or on any other form of indebtedness, including interest on obligations of the United States, obligations of instrumentalities of the United States, and mortgages and bonds secured by real property, which is derived from sources within the United States and received in taxable years beginning on or after January 1, 1951, by a nonresident alien (including a nonresident alien individual, fiduciary, and partnership) who is a resident of Canada, or by a corporation organized under the laws of Canada, shall not exceed 15 percent of the gross amount thereof for each taxable year under the provisions of Article XI of the convention if such alien or corporation at no time during the taxable year in which such interest is derived has a permanent establishment in the United States. As to what constitutes a permanent establishment, see paragraphs 3 (f) and 10 of the protocol.

(2) For provisions pertaining to interest derived from sources within the United States by exempt organizations, see § 7.51.

(b) *Application of reduced rate at source.* (1) To secure the reduced rate of United States income tax at source in the case of coupon bond interest, the nonresident alien who is a resident of Canada or the corporation organized under the laws of Canada shall for each issue of bonds file Form 1001–C in duplicate when presenting the interest coupons for payment. This form shall be signed by the owner of the interest, trustee, or agent and shall show the name and address of the obligor, the name and address of the owner of the interest, and the amount of the interest. It shall contain a statement that the owner (i) is a resident of Canada, or is a corporation organized under the laws of Canada, and (ii) has no permanent establishment in the United States.

(2) The reduction in the rate of United States income tax contemplated by Article XI of the convention, insofar as it concerns coupon bond interest, is applicable only to the owner of the interest. The person presenting the coupon or on whose behalf it is presented shall, for the purpose of the reduction in tax, be deemed to be the owner of the interest only if he is, at the time the coupon is presented for payment, the owner of the bond from which the coupon has been detached. If the person presenting the coupon or on whose behalf it is presented is not the owner of the bond, Form 1001, and not Form 1001–C, shall be executed.

(3) The original and duplicate of Form 1001–C shall be forwarded by the withholding agent to the District Director of Internal Revenue, Audit Division, Alien Returns Section, Baltimore 2, Maryland, with the quarterly return on Form 1012. See § 39.143–7 of this chapter (Regulations 118). Form 1001–C shall be listed on Form 1012.

(4) For general provisions pertaining to the use, without reference to the provisions of the convention, of ownership certificate, Form 1001, by nonresident aliens and nonresident foreign corporations, see §§ 39.143–4 and 39.143–6 of this chapter.

(5) To secure the reduced rate of United States income tax at source in the case of interest, other than coupon bond interest, the nonresident alien who is a resident of Canada or the corporation organized under the laws of Canada shall file Form 1001–A–C in duplicate with the withholding agent in the United States. This form shall be signed by the owner of the interest, trustee, or agent and shall show the name and address of the obligor and the name and address of the owner of the interest. It shall contain a statement that the owner (i) is a resident of Canada, or is a corporation organized under the laws of Canada, and (ii) has no permanent establishment in the United States.

(6) Form 1001A–C shall be filed with the withholding agent for each successive three-calendar-year period during which such interest is paid. For this purpose, the first such period shall commence with the beginning of the calendar year in which such income is first paid on or after January 1, 1954. Each such form filed with any withholding agent shall be filed not later than 20 days preceding the date of the first payment within each successive period, or, if that is not possible because of special circumstances, as soon as possible after such first payment. Once such a form has been filed in respect of any three-calendar-year period, no additional Form 1001A–C need be filed in respect thereto unless the Commissioner of Internal Revenue notifies the withholding agent that another such form shall be filed by the taxpayer. If, after filing such form, the taxpayer ceases to be eligible for the benefit of Article XI of the convention, he shall promptly notify the withholding agent by letter in duplicate. When any change occurs in the ownership of the interest as recorded on the books of the payer, the reduction in rate of withholding of United States income tax shall no longer apply unless a Form 1001A–C is duly executed and filed with the withholding agent by the new owner of record of such interest.

(7) The duplicate of each Form 1001A–C (and letter) shall be immediately forwarded by the withholding agent to the District Director of Internal Revenue, Audit Division, Alien Returns Section, Baltimore 2, Maryland.

(8) In the case of interest paid on or after January 1, 1951, by a corporation organized under the laws of Canada no withholding of United States income tax is required. See Article XII (1) of the convention.

(c) *Definition of interest.* Under paragraph 7 (b) of the protocol, the term "interest", as used in the convention, includes income arising from interest-bearing securities, public obligations, mortgages, hypothecs, corporate bonds, loans, deposits, and current accounts.

§ 7.48 *Copyright royalties*—(a) *General.* (1) Royalties for the right to use copyrights or in respect of the right to produce or reproduce any literary, dramatic, musical, or artistic work which are derived from sources within the United States and received in taxable years beginning on or after January 1, 1951, by a nonresident alien (including a nonresident alien individual, fiduciary, and partnership) who is a resident of Canada, or by a Canadian corporation or other entity, are exempt from United States tax under the provisions of Article XIII C of the convention if such alien, corporation, or other entity at no time during the taxable year in which such royalties are derived is engaged in trade or business within the United States through a permanent establishment situated therein. Such royalties are, therefore, not subject to the withholding of United States tax at source. As to what constitutes a permanent establishment, see paragraph 3 (f) of the protocol.

(2) The provisions of this section shall have no application to rents or royalties in respect of motion picture films. For provisions pertaining to royalties derived from sources within the United States by exempt organizations, see § 7.51.

(b) *Application of exemption from withholding.* (1) To avoid withholding of United States tax at the source in the case of the royalties to which paragraph (a) of this section is applicable, the nonresident alien who is a resident of Canada, or the Canadian corporation or other entity, shall file Form 1001A–C in duplicate with the withholding agent in the United States. The provisions of § 7.47 (b) relating to the execution, filing, and effective period of such form with respect to interest are equally applicable with respect to the income falling within the scope of this section.

(2) The duplicate of each Form 1001A–C (and letter) shall be immediately forwarded by the withholding agent to the District Director of Internal Revenue, Audit Division, Alien Returns Section, Baltimore 2, Maryland.

§ 7.49 *Natural resource royalties, real property rentals, salaries, wages, emoluments, etc.*—(a) *General.* (1) Under Article XI of the convention the rate of United States income tax imposed upon natural resource royalties, real property rentals, salaries, wages, emoluments, premiums, compensations, remunerations, and other gains, profits, and income (other than gains, profits, and income otherwise exempt from United States income tax under the convention) which are derived from sources within the United States and received in taxable years beginning on or after January 1, 1951, by a nonresident alien (including a nonresident alien individual, fiduciary, and partnership) who is a resident of Canada, or by a corporation organized under the laws of Canada, shall not exceed 15 percent of the gross amount of such items for each taxable year if such alien or corporation at no time during the taxable year in which such items are derived has a permanent establishment in the United States. As to what constitutes a permanent establishment, see paragraphs 3 (f) and 10 of the protocol.

(2) For the application of the reduced rate of United States income tax at source with respect to dividends and interest, see §§ 7.46 and 7.47, respectively. For the application of the exemption from United States tax at source with respect to copyright royalties, pensions, and life annuities, see §§ 7.48 and 7.50, respectively. For provisions pertaining to income derived from sources within the United States by exempt organizations, see § 7.51.

(b) *Application of reduced rate at source.* (1) To secure the reduced rate of United States income tax at source in the case of the items of income to which paragraph (a) of this section is applicable, the nonresident alien who is a resident of Canada or the corporation organized under the laws of Canada shall file Form 1001A–C in duplicate with the withholding agent in the United States. The provisions of § 7.47 (b) relating to the execution, filing, and effective period of such form with respect to interest are equally applicable with respect to the income falling within the scope of this section.

(2) The provisions of this paragraph shall have no application in the case of wages paid to nonresident aliens who are residents of Canada and who enter and leave the United States at frequent intervals. See § 405.102 (g) of this chapter (Regulations 116). The provisions of § 39.143–3 of this chapter (Regulations 118) relating to the allowance of the exemptions under section 25 (b) on a prorated basis, when determining the tax to be withheld at source with respect to remuneration for labor or personal services performed within the United States by a nonresident alien, shall have no application when a Form 1001A–C has been filed with the withholding agent pursuant to this paragraph with respect to such remuneration.

(3) The duplicate of each Form 1001A–C (and letter) shall be immediately forwarded by the withholding agent to the District Director of Internal Revenue, Audit Division, Alien Returns Section, Baltimore 2, Maryland.

§ 7.50 *Pensions and life annuities*—(a) *General.* Private and government pensions, and life annuities, derived from sources within the United States and received in taxable years beginning on or after January 1, 1951, by a nonresident alien individual who is a resident of Canada are exempt from United States tax under the provisions of Article VI A of the convention. Such items of income are, therefore, not subject to the withholding of United States tax at source.

(b) *Application of exemption from withholding.* (1) To avoid withholding of United States tax at source in the case of the items of income to which paragraph (a) of this section is applicable, the nonresident alien individual who is a resident of Canada shall notify the withholding agent by letter in duplicate that such income is exempt from United States tax under the provisions of Article VI A of the convention. The letter of notification shall be signed by the owner of the income, shall show the name and address of both the payer and the owner of the income, and shall contain a statement that the owner, an individual, is neither a citizen nor a resident of the United States but is a resident of Canada.

(2) If such letter is also to be used as authorization for the release, pursuant to § 7.52 (a), of excess tax withheld from such items of income, it shall also contain a statement that the owner was, at the time when the income was received from which the excess tax was withheld, neither a citizen nor a resident of the United States but was a resident of Canada.

(3) This letter shall constitute authorization for the payment of such items of income without withholding of United States tax at source unless the Commissioner of Internal Revenue subsequently notifies the withholding agent that the tax shall be withheld with respect to payments of such items of income made after receipt of such notice. If, after filing a letter of notification, the owner of the income ceases to be eligible for the exemption from United States tax provided by the convention in respect to such income, he shall promptly notify the withholding agent by letter in duplicate. When any change occurs in the ownership of such income as recorded on the books of the payer, the exemption from withholding of United States tax shall no longer apply unless a letter of notification is duly executed and filed with the withholding agent by the new owner of record of such income.

(4) Each letter of notification, or the duplicate thereof, shall be immediately forwarded by the withholding agent to the District Director of Internal Revenue, Audit Division, Alien Returns Section, Baltimore 2, Maryland.

(c) *Definition of pensions and life annuities.* (1) Under paragraph 8 of the protocol, the term "pensions", as used in Article VI A of the convention, means periodic payments made in consideration for services rendered or by way of compensation for injuries received.

(2) Under paragraph 9 of the protocol, the term "life annuities", as used in Article VI A of the convention, means a stated sum payable periodically at stated times, during life, or during a specified number of years, under an obligation to make the payments in consideration of a gross sum or sums paid by the recipient or under a contributory retirement plan.

§ 7.51 *Exempt organizations*—(a) *General.* (1) Income derived from sources within the United States and received in taxable years beginning on or after January 1, 1951, by a religious, scientific, literary, educational, or charitable organization of Canada is exempt from United States tax under the provisions of Article X of the convention if, within the meaning of the laws of both the United States and Canada, such organization would have been exempt from income tax.

(2) Paragraph 11 of the protocol provides that the provisions of the convention shall not be construed to restrict in any manner any exemption, deduction, credit, or other allowance accorded by the laws of one of the contracting States in the determination of the tax imposed by such State. In view of the provisions of such paragraph, the provisions of section 101 of the Internal Revenue Code, relating to exemptions from tax on corporations, apply to every Canadian organization coming within the scope of that section and otherwise qualifying for the exemption granted by Article X of the convention, regardless of whether Canada recognizes such organization as exempt from income taxes imposed by its own laws.

(3) In view of the provisions of subparagraphs (1) and (2) of this paragraph, fixed or determinable annual or periodical income derived from sources within the United States by a nonresident Canadian organization which qualifies for the exemption granted by Article X of the convention is not subject to the withholding of United States tax at source.

(b) *Application of exemption from withholding.* (1) To avoid withholding of United States tax at source in the case of fixed or determinable annual or periodical income derived from sources within the United States, other than coupon bond interest, the nonresident Canadian organization which qualifies for the exemption from United States tax shall notify the withholding agent by letter in duplicate that such income is exempt from United States tax under the provisions of Article X of the convention. The letter of notification shall be signed by the owner of the income, trustee, or agent and shall show the name and address of the obligor and the name and address of the owner of the income.

It shall contain a copy of the determination of the Commissioner of Internal Revenue that such organization is exempt from taxation under Chapter 1, relating to the income tax, of the Internal Revenue Code and a statement that the owner of the income (i) is a Canadian organization and (ii) has at no time during the current taxable year been engaged in trade or business within the United States. This letter shall constitute authorization for the payment of such income to such organization without withholding of United States tax at source.

(2) The provisions of § 7.47 (b) relating to the filing and effective period of Form 1001A–C prescribed in § 7.47 (b) with respect to interest are equally applicable with respect to the letter of notification prescribed in this section.

(3) Each letter of notification, or the duplicate thereof, shall be immediately forwarded by the withholding agent to the District Director of Internal Revenue, Audit Division, Alien Returns Section, Baltimore 2, Maryland.

(4) To avoid withholding of United States tax at source in the case of coupon bond interest, the nonresident Canadian organization which qualifies for the exemption from United States tax granted by Article X of the convention shall inscribe on each copy of the Form 1001–C required by § 7.47 (b) a notation substantially as follows: "As this organization, which is not engaged in trade or business within the United States, has been held to be exempt from taxation under Chapter 1 of the Internal Revenue Code by the Commissioner of Internal Revenue under date of ----------, ---, 19---, the interest on this certificate is not subject to withholding of United States tax." The organization shall give therewith the date of the official letter in which the organization was held to be so exempt.

(5) Form 1001–C, when so used to substantiate an exemption from withholding of United States tax, need not be listed on Form 1012 when forwarded to the District Director pursuant to § 7.47 (b).

(6) To the extent not inconsistent with this section, the provisions of § 7.47 (b) relating to Form 1001 and Form 1001–C are equally applicable under this paragraph.

§ 7.52 *Release of excess tax withheld at source*—(a) *General.* (1) In order to give the convention effective application at the earliest practicable date, the exemptions from, and reductions in the rate of, withholding of United States tax at source granted by this Treasury decision are hereby made effective beginning January 1, 1954, contingent upon compliance with the applicable provisions of §§ 7.46 through 7.51.

(2) In the case of dividends derived from sources within the United States and paid to a nonresident alien (including a nonresident alien individual, fiduciary, and partnership) or to a foreign corporation, whose address at the time of payment was in Canada, if United States income tax at the statutory rate (30 percent as of the date of approval of this subpart) has been withheld from such dividends on or after January 1, 1954, there shall be released (except as provided in paragraphs (b) and (c) of this section) by the withholding agent and paid over to the person from whom it was withheld an amount which is equal to the amount obtained by subtracting 15 percent of such dividends from the tax so withheld.

(3) In the case of every taxpayer whose address at the time of payment was in Canada and who furnishes to the withholding agent Form 1001A–C in accordance with §§ 7.47 (b), 7.48 (b) and 7.49 (b), if United States income tax at the statutory rate (30 percent as of the date of approval of this subpart) or at 15 percent has been withheld on or after January 1, 1954, from the items of income in respect of which such form is prescribed in such sections, there shall be released by the withholding agent and paid over to the person from whom it was withheld:

(i) In the case of copyright royalties and the like, an amount equal to the tax so withheld from such items; and

(ii) In the case of other items of income (other than dividends, pensions, life annuities, and coupon bond interest), an amount which is equal to the amount obtained by subtracting 15 percent of such items in the aggregate from the tax so withheld from such items.

(4) In the case of every taxpayer whose address at the time of payment was in Canada and who furnishes to the withholding agent Form 1001–C clearly marked "Substitute" and executed in accordance with § 7.47 (b), if United States income tax at the statutory rate (28 percent or 30 percent, as the case may be, as of the date of approval of this subpart) has been withheld from coupon bond interest on or after January 1, 1954, there shall be released (except as provided in paragraph (b) of this section) by the withholding agent and paid over to the person from whom it was withheld an amount which is equal to the difference between the amount of such interest multiplied by the higher of such statutory rates (30 percent as of the date of approval of this subpart) and 15 percent of such interest. One such substitute form shall be filed in duplicate with respect to each issue of bonds and will serve with respect to that issue to replace all Forms 1001 previously filed by the taxpayer in the calendar year in which the excess tax was withheld and with respect to which such excess is released.

(5) The original and duplicate of such substitute Form 1001–C shall be forwarded by the withholding agent to the District Director of Internal Revenue, Audit Division, Alien Returns Section, Baltimore 2, Maryland, with the quarterly return on Form 1012. See § 39.143–7 of this chapter. Such substitute Form 1001–C shall be listed on Form 1012.

(6) In the case of every taxpayer whose address at the time of payment was in Canada and who furnishes to the withholding agent the letter of notification prescribed in § 7.50 (b) as authorization for the release of excess tax withheld, if United States tax at the statutory rate (30 percent as of the date of approval of this subpart) or at 15 percent has been withheld on or after January 1, 1954, from government pensions, private pensions, or life annuities, there shall be released by the withholding agent and paid over to the person from whom it was withheld an amount equal to the tax so withheld from such items.

(7) The provisions of this section (other than paragraph (d)) shall have no application to excess tax withheld at source which has been paid by the withholding agent to the district director of internal revenue pursuant to § 39.143–7 of this chapter.

(b) *Exempt organizations.* (1) In the case of every exempt organization whose address at the time of payment was in Canada and which furnishes to the withholding agent a letter of notification in accordance with § 7.51 (b), if United States tax at the statutory rate (30 percent as of the date of approval of this subpart) or at 15 percent has been withheld on or after January 1, 1954, from fixed or determinable annual or periodical income derived from sources within the United States, there shall be released (except in the case of coupon bond interest) by the withholding agent and paid over to the organization from which it was withheld an amount equal to the tax so withheld, if the date on which the Commissioner of Internal Revenue has held such organization to be exempt from taxation under Chapter 1 is not subsequent to the date on which payment of such income was made.

(2) In the case of every exempt organization whose address at the time of payment was in Canada and which furnishes to the withholding agent Form 1001–C clearly marked "Substitute" and executed in accordance with §§ 7.47 (b) and 7.51 (b), if United States tax has been withheld from coupon bond interest on or after January 1, 1954, there shall be released by the withholding agent and paid over to the organization from which it was withheld an amount equal to the tax so withheld, if the date on which the Commissioner of Internal Revenue has held such organization to be exempt from taxation under Chapter 1 is not subsequent to the date on which payment of such interest was made. One such substitute form shall be filed in duplicate with respect to each issue of bonds and will serve with respect to that issue to replace all Forms 1001 previously filed by the taxpayer in the calendar year in which the excess tax was withheld and with respect to which such excess is released.

(3) The original and duplicate of such substitute Form 1001–C shall be forwarded by the withholding agent to the District Director of Internal Revenue, Audit Division, Alien Returns Section, Baltimore 2, Maryland, with the quarterly return on Form 1012. See § 39.143–7 of this chapter. Such substitute Form 1001–C need not be listed on Form 1012.

(c) *Dividends paid by related corporation.* In the case of every domestic corporation receiving notification from the Commissioner of Internal Revenue under the provisions of § 7.46 (b) that dividends paid or to be paid by it fall within the scope of the provisions of Article XI (2) of the convention, if United States income tax in excess of the applicable rate of 5 percent has been withheld on or after January 1, 1954, from dividends which come within the scope of such provisions, the withholding agent shall, if so authorized in such notification, release and pay over to the corporation from which it was withheld the excess tax withheld with respect to such dividends.

(d) *Amounts withheld before 1954.* For provisions respecting the refund of excess tax withheld during the calendar years prior to 1954, see § 7.56.

§ 7.53 *Addressee not actual owner*—(a) *General.* (1) If the recipient in Canada of any dividend from sources within the United States, with respect to which United States income tax at the reduced rate of 15 percent has been withheld at source pursuant to § 7.46 (d), is a nominee or representative through whom such dividend flows to a person other than one described in § 7.46 (a) as being entitled to such reduced rate, such recipient in Canada shall withhold an additional amount of United States income tax equivalent to the United States income tax which would have been withheld if the convention had not been in effect (30 percent of such dividend as of the date of approval of this subpart) minus the 15 percent which has been withheld at the source.

(2) In any case in which a fiduciary or partnership with an address in Canada receives, otherwise than as a nominee or representative, a dividend from sources within the United States with respect to which United States income tax at the reduced rate of 15 percent has been withheld at source pursuant to § 7.46 (d), if a beneficiary of such fiduciary or a partner in such partnership is not entitled to the reduced rate of tax granted by Article XI of the convention, the fiduciary or partnership shall withhold an additional amount of United States income tax with respect to the portion of such dividend included in such beneficiary's share of the distributed or distributable income, or in such partner's distributive share of the income, of such fiduciary or partnership, as the case may be. The amount of the additional tax is to be calculated in the same manner as under subparagraph (1) of this paragraph.

(3) If any amount of United States income tax is released pursuant to § 7.52 (a) by the withholding agent in the United States with respect to a dividend paid to such a person (nominee, representative, fiduciary, or partnership) with an address in Canada, the latter shall also withhold from such released amount any additional amount of United States income tax, otherwise required to be withheld by the provisions of subparagraphs (1) and (2) of this paragraph in respect of such dividend, in the same manner as if at the time of payment of such dividend United States income tax at the rate of only 15 percent had been withheld at source therefrom.

(4) Nothing in this subpart shall be deemed to prevent the application of § 7.511, relating to Canadian withholding agents (Treasury Decision 5532, approved August 23, 1946).

(b) *Returns filed by Canadian withholding agents.* The amounts so withheld by such withholding agents in Canada during the year 1954 and each subsequent calendar year during which the convention is in effect shall be forwarded, after being converted into United States dollars, to the District Director of Internal Revenue, Baltimore 2, Maryland, U. S. A., on or before March 15 of the following year, together with United States return Form 1042 on which shall be listed the names, addresses, and other information required on such form in respect to the persons from whom such additional amounts have been withheld by such agents in Canada.

§ 7.54 *Return of tax withheld and information to be furnished in ordinary course*—(a) *Return of tax withheld.* (1) In addition to making the annual return on Form 1042 prescribed by § 39.143–7 of this chapter, every United States withholding agent shall make and file in duplicate with the district director of internal revenue an information return on Form 1042 Supplement, with respect to Canadian addressees, for the calendar year 1954 and each subsequent calendar year during which the convention is in effect.

(2) There shall be reported on such Form 1042 Supplement all items of fixed or determinable annual or periodical income derived from sources within the United States and paid to nonresident aliens (including nonresident alien individuals, fiduciaries, and partnerships) and to nonresident foreign corporations (including exempt organizations), whose addresses at the time of payment were in Canada, including (i) such items of income as are required to be listed on Form 1042, (ii) such items of income as constitute interest required to be listed on Form 1012, and (iii) such items of income upon which, in accordance with this subpart, no withholding of United States tax is required; except that any of such items which constitute wages subject to withholding of United States tax pursuant to section 1622, Internal Revenue Code, and interest in respect of which Form 1001–C or substitute Form 1001–C has been filed in duplicate with the withholding agent are not required to be reported on such Form 1042 Supplement.

(b) *Information to be furnished in ordinary course.* In compliance with the provisions of Article XIX and XX of the convention the Commissioner of Internal Revenue will transmit to the Minister of National Revenue of Canada, as soon as practicable after the close of the calendar year 1954 and of each subsequent calendar year during which the convention is in effect, the following information relating to such preceding calendar year:

(1) The duplicate copy of each available Form 1042 Supplement filed pursuant to paragraph (a) of this section; and

(2) The duplicate copy of each available ownership certificate, Form 1001–C, filed pursuant to § 7.47 (b) or § 7.51 (b), and substitute Form 1001–C, filed pursuant to § 7.52 (a) or § 7.52 (b), in connection with coupon bond interest.

§ 7.55 *Beneficiaries of a domestic estate or trust.* A nonresident alien who is a resident of Canada and who is a beneficiary of a domestic estate or trust shall be entitled to the exemption from, or reduction in the rate of, United States tax granted by Articles XI, XII, and XIII C of the convention with respect to dividends, interest, copyright royalties, and other gains, profits, and income to the extent such item or items are included in his share of the distributed or distributable income of such estate or trust, provided that he otherwise satisfies the requirements of these respective articles. In order to be entitled in such instance to the exemption from, or reduction in the rate of, withholding of United States tax such beneficiary must otherwise satisfy such requirements and shall, where applicable, execute and submit to the fiduciary of such estate or trust in the United States the Form 1001A–C prescribed in §§ 7.47 (b), 7.48 (b), and 7.49 (b).

§ 7.56 *Refund of excess tax withheld prior to 1954.* (a) If United States income tax withheld at the source prior to 1954 from dividends, interest, copyright royalties and the like, natural resource royalties, real property rentals, salaries, wages, pensions, life annuities, or other gains, profits, and income is in excess of the tax imposed by Chapter 1 (relating to the income tax) of the Internal Revenue Code, as modified by the convention, a claim by the taxpayer for the refund of any overpayment resulting therefrom shall be made under section 322 of the Internal Revenue Code by filing Form 843 together with Form 1040NB, Form 1040B, Form 1120, Form 1120NB, or other appropriate return, whichever is applicable, or with an amended return.

(b) The taxpayer's total gross income from sources within the United States shall be disclosed on the return. In the event that securities are held in the name of a person other than the actual or beneficial owner, the name and address of such person shall be furnished with the claim. There shall also be included in such claim for refund:

(1) A statement that, at the time when the item or items of income were derived from which the excess tax was withheld, (i) the taxpayer was neither a citizen nor a resident of the United States but was a resident of Canada, or, in the case of a corporation, (ii) that the taxpayer was a corporation organized under the laws of Canada; and

(2) A statement that the taxpayer at no time during the taxable year in which such income was derived had a permanent establishment in the United States.

(c) If, however, the taxpayer is an individual who during the taxable year derived from sources within the United States income which consists exclusively of pensions or life annuities entitled to the benefit of Article VI A of the convention, the statement specified in paragraph (b) (2) of this section shall not be required.

(d) If the taxpayer is an exempt organization claiming the benefit of Article X of the convention, the statement

specified in paragraph (b) (2) of this section shall not be required, but such organization shall include with such claim a copy of the Commissioner's determination referred to in § 7.51 (b) and shall indicate whether it was engaged in trade or business within the United States at any time during the taxable year in which the income concerned was derived.

(e) As to additional information required in the case of a Canadian corporation claiming the benefit of the 5 percent rate on dividends paid by a domestic corporation, see § 7.46 (b).

§ 7.57 *Prior regulations.* Except to the extent necessary for the application of § 7.511 (Treasury Decision 5532), the provisions of §§ 7.10 through 7.17 (Treasury Decision 5157, approved June 27, 1942), are hereby superseded as the respective provisions of this subpart become effective.

JUSTIN F. WINKLE,
*Acting Commissioner of Internal Revenue.*

Approved: November 5, 1953.

M. B. FOLSOM,
*Acting Secretary of the Treasury.*

## Subchapter C—Miscellaneous Excise Taxes

[T. D. 6048; Regs. 3]

## PART 182—INDUSTRIAL ALCOHOL

### REQUIREMENTS FOR ALTERNATE OPERATION OF INDUSTRIAL ALCOHOL PLANT AS REGISTERED DISTILLERY OR FRUIT DISTILLERY

In order to conform Regulations 3 (26 CFR Part 182) with the provisions of Regulations 4 (26 CFR Part 183) and 5 (26 CFR Part 184) regarding the procedure for the alternate operation of a registered distillery or fruit distillery as an industrial alcohol plant, Regulations 3 are hereby amended as follows:

PARAGRAPH 1. Wherever the term "supervisor" or "district supervisor" appears in the sections of the regulations revised by this Treasury decision, such term is hereby amended to read "Assistant Regional Commissioner."

PAR. 2. Sections 182.276, 182.277, 182.278 and 182.279 are revoked.

PAR. 3. There is inserted immediately following the headnote "Requirements Governing Alternate Operation of Industrial Alcohol Plant as Registered Distillery or Fruit Distillery", the following new subtitles, sections and citations:

QUALIFICATION FOR INITIAL ALTERNATING OPERATIONS

Sec.
182.279a Where no bonded warehouse or denaturing plant on premises.
182.279b When bonded warehouse or denaturing plant on premises.

SUSPENSION FOR SUBSEQUENT ALTERNATE OPERATIONS

182.279c Requirements.

RESUMPTION FOR SUBSEQUENT ALTERNATE OPERATIONS

182.279d Requirements.

ACTION BY ASSISTANT REGIONAL COMMISSIONER

Sec.
182.279e Approval and disposition of Form 1696.

AUTHORITY: §§ 182.279a to 182.279e issued under 53 Stat. 375, 407; 26 U. S. C. 3176, 3791. Interpret or apply 53 Stat. 358, 365; 26 U. S. C. 3105, 3124. Other statutory provisions interpreted or applied are cited to text in parentheses.

QUALIFICATIONS FOR INITIAL ALTERNATING OPERATIONS

§ 182.279a *Where no bonded warehouse or denaturing plant on premises.* An industrial alcohol plant may be operated alternately for the production of alcohol under this part, the production of distilled spirits under Regulations 4 (Part 183 of this chapter), or the production of brandy under Regulations 5 (Part 184 of this chapter). Where it is desired to conduct alternating operations at an industrial alcohol plant and there is no industrial alcohol bonded warehouse or denaturing plant located on the industrial alcohol plant premises, the successor (incoming) proprietor must first qualify as proprietor of the premises. At the time of the first suspension for the purpose of conducting alternate operations, the outgoing proprietor must discontinue operations and comply with the following requirements:

(a) *Amended application, Form 1431.* File with the Assistant Regional Commissioner an amended application on Form 1431, in triplicate, stating thereon the purpose of the application to be "Temporary discontinuance in order that the industrial alcohol plant may be operated as a registered distillery" (or fruit distillery, as the case may be), and give the date of discontinuance.

(b) *Consent of surety.* File with the Assistant Regional Commissioner a blanket consent of surety, Form 1533, in triplicate, to continue in effect bond Form 1432-A (and Form 1604, if required). Such blanket consent of surety may be filed to cover all such alternate operations and may be executed in the following form:

To continue in effect the said bond (or bonds), whenever operation of the industrial alcohol plant is resumed from time to time, pursuant to application on Form 1696, filed by the principal following suspension of operations as a registered distillery or fruit distillery.

(c) *Materials and unfinished alcohol.* If distilling materials are transferred to the successor, or if unfinished alcohol is to be retained in the industrial alcohol plant pending the resumption of operations as an industrial alcohol plant, comply with the requirements of §§ 182.439 to 182.441. Whenever alternate operations are to be conducted after the first suspension, the procedure prescribed by §§ 182.279c and 182.279d will be followed.

§ 182.279b *When bonded warehouse or denaturing plant on premises.* Where an industrial alcohol bonded warehouse or denaturing plant is located on the industrial alcohol plant premises, the industrial alcohol plant may be operated alternately as an industrial alcohol plant, registered distillery or a fruit distillery upon compliance with the requirements of § 182.279a. The permittee shall designate the plat on file which depicts the entire industrial alcohol plant premises, including the bonded warehouse or denaturing plant, as "Plat A," and file a new plat which will be designated as "Plat B," depicting the bonded warehouse or denaturing plant and any other portion of the industrial alcohol premises not to be operated by the incoming alternate proprietor. The permittee shall also describe in the amended application, Form 1431, the bonded warehouse or denaturing plant and any portion of the industrial alcohol plant premises not to be operated by the incoming proprietor. The description thereof must correspond with the depiction of the premises on Plat B. Whenever alternate operations are to be conducted after the first suspension, the procedure prescribed by §§ 182.279c and 182.279d will be followed.

SUSPENSION FOR SUBSEQUENT ALTERNATE OPERATIONS

§ 182.279c *Requirements.* Where a permittee desires to suspend operations of the industrial alcohol plant preparatory to resumption of operations as a registered distillery or fruit distillery, he must comply with the following requirements:

(a) *Notice of alternate operations.* File Form 1696, through the storekeeper-gauger in charge, with the Assistant Regional Commissioner, giving notice of intention to suspend operations. The form shall be executed and filed in accordance with the various lines on the form and the instructions printed thereon, or issued in respect thereto. Form 1696 shall contain or be verified by a written declaration that it is executed under the penalties of perjury. Operations will be suspended upon approval of the notice by the Assistant Regional Commissioner in accordance with § 182.279e.

(b) *Materials and unfinished alcohol.* If distilling materials are transferred to the successor or if unfinished alcohol is to be retained on the premises pending the resumption of operations as an industrial alcohol plant, comply with the requirements of §§ 182.439 to 182.441.

(63 Stat. 667; 26 U. S. C. 3809)

RESUMPTION FOR SUBSEQUENT ALTERNATE OPERATIONS

§ 182.279d *Requirements.* When a permittee desires to resume operation of the industrial alcohol plant following suspension of operations as a registered distillery or fruit distillery, he must comply with the following requirements:

(a) *Notice of alternate operations.* File Form 1696, through the storekeeper-gauger in charge, with the Assistant Regional Commissioner for authority to resume operations. The notice shall be executed in accordance with the instructions printed on the form, or issued in respect thereto, and otherwise completed as provided in § 182.279c.

(b) *Materials.* If distilling materials are received by transfer from the predecessor, comply with the requirements of §§ 182.440 and 182.441.

(63 Stat. 667; 26 U. S. C. 3809)

ACTION BY ASSISTANT REGIONAL COMMISSIONER

§ 182.279 *Approval and disposition of Form 1696.* Upon receipt of Form 1696, the Assistant Regional Commissioner will, if he finds that the notice may be properly approved, execute the certificate of approval on all copies and distribute of the copies in accordance with the instructions printed on the form, or issued in respect thereto.

PAR. 4. Section 182.423 is amended by adding at the end of the second sentence of the introductory paragraph thereof the following new sentence: "Form 124 will not be required when operations are suspended pursuant to the requirements of §§ 182.279a to 182.279e."

Because the changes made are of a liberalizing character, it is found that it is unnecessary to issue this Treasury decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946.

This Treasury decision shall be effective upon the date of publication in the FEDERAL REGISTER.

[SEAL] JUSTIN F. WINKLE,
*Acting Commissioner of Internal Revenue.*

Approved: November 5, 1953.

M. B. FOLSOM,
*Acting Secretary of the Treasury.*

[T. D. 6049; Regs. 3, 4, 5, 10, 15]

## PART 182—INDUSTRIAL ALCOHOL

## PART 183—PRODUCTION OF DISTILLED SPIRITS

## PART 184—PRODUCTION OF BRANDY

## PART 185—WAREHOUSING OF DISTILLED SPIRITS

## PART 190—RECTIFICATION OF SPIRITS AND WINES

### QUANTITIES OF SPIRITS TO BE WEIGHED IN SCALE TANKS

In order to authorize the use of tank scales having a capacity of more than 2,000 pounds for gauging, for the purpose of taxpayment, spirits in quantities less than twenty per centum of the total capacity of the scales, the following amendments to regulations are hereby adopted:

PARAGRAPH 1. Section 182.64 of Regulations 3 (26 CFR Part 182), as amended by Treasury Decision 5801, approved August 11, 1950, is further amended by inserting immediately after the word "*Provided,*" in the last sentence, the following: "That the weighing of lesser quantities for determination of tax may be authorized by the Assistant Regional Commissioner where the beam of the scale is calibrated in ½ or 1 pound graduations and it is found by actual test that the scales break accurately at such graduations: *Provided further,*".

PAR. 2. Section 183.92 of Regulations 4 (26 CFR Part 183) is amended by inserting immediately after the word "*Provided,*" in the fourth sentence, the following: "That the weighing of lesser quantities for determination of tax may be authorized by the Assistant Regional Commissioner where the beam of the scale is calibrated in ½ or 1 pound graduations and it is found by actual test that the scales break accurately at such graduations: *Provided further,*".

PAR. 3. Section 184.121 of Regulations 5 (26 CFR Part 184) is amended by inserting immediately after the word "Provided," in the fourth sentence, the following: "That the weighing of lesser quantities for determination of tax may be authorized by the Assistant Regional Commissioner where the beam of the scale is calibrated in ½ or 1 pound graduations and it is found by actual test that the scales break accurately at such graduations: *Provided further,*".

PAR. 4. Section 185.110 of Regulations 10 (26 CFR Part 185) is amended as follows:

By inserting immediately after the word "*Provided,*" in the last sentence, the following: "That the weighing of lesser quantities for determination of tax may be authorized by the Assistant Regional Commissioner where the beam of the scale is calibrated in ½ or 1 pound graduations and it is found by actual test that the scales break accurately at such graduations: *Provided further,*".

(53 Stat. 307, 332; 26 U. S. C. 2808, 2873)

PAR. 5. Section 190.116 of Regulations 15 (26 CFR Part 190) is amended as follows:

(A) By striking the colon and the proviso following the phrase "capacity over 50,000 pounds" in the last sentence and inserting in lieu thereof a period.

(B) By adding at the end of the section a new sentence as follows: "Except in the case of scales having a capacity of 2,000 pounds or less, where spirits are to be gauged for taxpayment, not less than twenty percent of the total capacity of the gauging tank scale may be entered into the tank for gauging for determination of the tax: *Provided,* That the weighing of lesser quantities for determination of tax may be authorized by the Assistant Regional Commissioner where the beam of the scale is calibrated in ½ or 1 pound graduations and it is found by actual test that the scales break accurately at such graduations."

(53 Stat. 307, 318; 26 U. S. C. 2808, 2829)

Because the changes made are of a liberalizing character, it is found that it is unnecessary to issue this Treasury decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitations of section 4 (c) of said act.

This Treasury decision shall be effective upon the date of publication in the FEDERAL REGISTER.

(R. S. 161, 53 Stat. 375; 5 U. S. C. 22, 26 U. S. C. 3176. Interpret or apply 53 Stat. 307, 358, 364, 26 U. S. C. 2308, 3105, 3124)

[SEAL] T. COLEMAN ANDREWS,
*Commissioner of Internal Revenue.*

# TITLE 27—INTOXICATING LIQUORS

## Chapter I—Internal Revenue Service, Department of the Treasury

[Regs. 2]

## PART 2—NONINDUSTRIAL USE OF DISTILLED SPIRITS AND WINE

*Preamble.* 1. These regulations, "Regulations No. 2, Nonindustrial Use of Distilled Spirits and Wine" (27 CFR Part 2) are a republication of Regulations No. 2, 1935 Edition (27 CFR Part 2).

2. These regulations consist only of previously approved material but the text has been rearranged and renumbered to conform to the Federal Register Regulations (13 F. R. 5929).

3. This republication of these regulations shall not affect or limit any act done or any liability previously incurred, or any suit, action, or proceeding had or commenced in any civil, administrative, or criminal cause and proceeding prior to the date of republication, nor shall this republication release, acquit, affect, or limit any offense committed in violation of these regulations prior to republication, or any penalty, liability or forfeiture incurred prior to such date.

4. It is found that compliance with the notice and public rule-making procedure of section 4 (a) and the effective date limitations of section 4 (c) of the Administrative Procedure Act (5 U. S. C. 1001, et seq.), and the notice and public hearing requirements of the Federal Alcohol Administration Act (27 U. S. C. 201, et seq.) is unnecessary in connection with the republication of the regulations in this part for the reason that the changes made relate merely to form and not substance.

SUBPART A—SCOPE OF REGULATIONS

Sec.
2.1 Nonindustrial use of distilled spirits and wine.

SUBPART B—DEFINITIONS

2.5 Distilled spirits.
2.6 Wine.

SUBPART C—USES REGARDED AS INDUSTRIAL

2.10 Use of tax-free alcohol.
2.11 Use of denatured alcohol, distilled spirits or wine for beverage use.
2.12 Use of distilled spirits or wine for experimental purposes and in manufacture of non-beverage products.

SUBPART D—USES CLASSED AS NONINDUSTRIAL

2.15 General.
2.16 Distilled spirits in containers of a capacity of one gallon or less.

AUTHORITY: §§ 2.1 to 2.16 issued under 53 Stat. 375; 26 U. S. C. 3176.

SUBPART A—SCOPE OF REGULATIONS

§ 2.1 *Nonindustrial use of distilled spirits and wine.* The regulations in this part specify what uses of distilled spirits and wine are "nonindustrial," as that term is used in section 17 of the Federal Alcohol Administration Act. No procedural requirements are prescribed.

SUBPART B—DEFINITIONS

§ 2.5 *Distilled spirits.* Section 17 (a) of the Federal Alcohol Administration Act defines "distilled spirits" as ethyl alcohol, hydrated oxide of ethyl, spirits of wine, whiskey, rum, brandy, gin, and other distilled spirits, including all dilutions and mixtures thereof, for nonindustrial use.

§ 2.6 *Wine.* Section 17 (a) of the Federal Alcohol Administration Act defines "wine" as (a) wine as defined in section 610 and section 617 of the Revenue Act of 1918 (26 U. S. C. 3036, 3044, 3045), as now in force or hereafter amended, and (b) other alcoholic beverages not so defined, but made in the manner of wine, including sparkling and carbonated wine, wine made from condensed grape must, wine made from other agricultural products than the juice of sound, ripe grapes, imitation wine, compounds sold as wine, vermouth, cider, perry and sake; in each instance only if containing not less than 7 per centum and not more than 24 per centum of alcohol by volume, and if for nonindustrial use.

SUBPART C—USES REGARDED AS INDUSTRIAL

§ 2.10 *Use of tax-free alcohol.* The use of tax-free alcohol by any governmental agency, State or Federal, or any scientific university or college of learning or by any laboratory exclusively in scientific research or by any hospital or sanatorium, is regarded as "industrial," and will be excluded from any application of the term "nonindustrial use."

§ 2.11 *Use of denatured alcohol, distilled spirits or wine.* The use of alcohol or other distilled spirits or wine which has been lawfully denatured or otherwise rendered unfit for beverage use is regarded as "industrial," and will be excluded from any application of the term "nonindustrial use."

§ 2.12 *Use of distilled spirits or wine for experimental purposes and in manufacture of nonbeverage products.* The use of distilled spirits or wine for experimental purposes and in the manufacture of (a) medicinal, pharmaceutical, or antiseptic products, including prescriptions compounded by retail druggists; (b) toilet preparations; (c) flavoring extracts, syrups, or food products; or (d) scientific, chemical, mechanical, or industrial products, provided such products are unfit for beverage use, is regarded as "industrial," and will be excluded from any application of the term "nonindustrial use."

SUBPART D—USES CLASSED AS NONINDUSTRIAL

§ 2.15 *General.* All uses of distilled spirits and wines, except as provided in Subpart C of this part, are regarded as "nonindustrial." Such "nonindustrial" use shall include, but not be limited to, distilled spirits or wine used for beverage purposes, or in the manufacture, rectification, or blending of alcoholic beverages; or in the preparation of food or drink by a hotel, restaurant, tavern, or similar establishment; or for sacramental purposes; or as a medicine.

§ 2.16 *Distilled spirits in containers of a capacity of one gallon or less.* Distilled spirits in containers of a capacity of one wine gallon or less, except anhydrous alcohol and alcohol which may be withdrawn taxfree under the internal revenue laws, will be deemed to be for nonindustrial use.

5. These regulations shall be effective as of October 1, 1953.

[SEAL] JUSTIN F. WINKLE,
*Acting Commissioner of Internal Revenue.*

Approved: November 5, 1953.

M. B. FOLSOM,
*Acting Secretary of the Treasury.*

# TITLE 32—NATIONAL DEFENSE

## Chapter IV—Joint Regulations of the Armed Forces

### Subchapter A—Armed Services Procurement Regulation

PART 406—CONTRACT CLAUSES AND FORMS

SUBPART A—CLAUSES FOR FIXED-PRICED SUPPLY CONTRACTS

MILITARY SECURITY REQUIREMENTS; UTILIZATION OF SMALL BUSINESS CONCERNS

1. Section 406.104-12 is revised, prescribing the use of a uniform Military Security Requirements Clause informing Contractors of security requirements.

§ 406.104-12 *Military security requirements.* Insert the following clause in all contracts which are classified "Top Secret," "Secret," "Confidential," or "Restricted" by a Department, and in any other contracts the performance of which will require access to such classified information or material:

MILITARY SECURITY REQUIREMENTS

(a) The provisions of this clause shall apply to the extent that this contract involves access to security information classified "Top Secret," "Secret," "Confidential," or "Restricted."

(b) The Government shall notify the Contractor of the security classification of this contract and the elements thereof, and of any subsequent revisions in such security classification, by the use of a Security Requirements Check List (DD Form 254) and Appendage thereto (DD Form 254-b).

(c) To the extent the Government has indicated as of the date of this contract or thereafter indicates, security classification under this contract as provided in paragraph (b) above, the Contractor shall safeguard all classified elements of this contract and shall provide and maintain a system of security controls within its own organization in accordance with the requirements of (i) the Department of Defense Industrial Security Manual for Safeguarding Classified Security Information as in effect on date of this contract, which Manual is hereby incorporated by reference and made a part of this contract, (ii) any amendments to said manual required by the demands of national security as determined by the Government and made after the date of this contract notice of which has been furnished to the Contractor by the Contracting Officer, and (iii) those provisions of written agreements entered into by the parties pertaining to the adaptation of the Manual to the Contractor's business.

(d) Designated representatives of the Government responsible for inspection pertaining to industrial security shall have the right to inspect at reasonable intervals the procedures, methods and facilities utilized by the contractor in complying with the requirements of the terms and conditions of this clause. Should the Government, through its authorized representative, determine that the Contractor has not complied with such requirements, the Government shall inform the Contractor in writing of the proper actions to be taken in order to effect compliance with such requirements.

(e) If, subsequent to the date of this contract, the security classifications or requirements under this contract are changed by the Government as provided in this clause and the security costs under this contract are thereby increased or decreased, the contract price shall be subject to an equitable adjustment by reason of such increased or decreased costs. Any equitable adjustment shall be accomplished in the same manner as if such changes were directed under the clause in this contract entitled "Changes."

(f) The Contractor agrees to insert, in all subcontracts hereunder which involve access to classified security information, provisions which shall conform substantially to the language of this clause, including this paragraph (f) but excluding the last sentence of paragraph (e) of this clause.

(g) The Contractor also agrees that it shall determine that any subcontract proposed by it for the furnishing of supplies and services which will involve access to classified security information in the Contractor's custody has been granted an appropriate facility security clearance, which is still in effect, prior to being accorded access to classified security information.

2. Section 406.104-14 changes the name of the "Subcontracting" clause to "Utilization of Small Business Concerns." The substance of the clause is not changed.

§ 406.104-14 *Utilization of small business concerns.* Insert the clause set forth below in all fixed-price supply contracts, in amounts exceeding $5,000, except those contracts entered into with foreign contractors which are to be performed outside of the continental limits of the United States, its territories and possessions:

UTILIZATION OF SMALL BUSINESS CONCERNS

(a) It is the policy of the Government as declared by the Congress to bring about the greatest utilization of small business concerns which is consistent with efficient production.

(b) The Contractor Agrees to accomplish the maximum amount of subcontracting to small business concerns that the Contractor finds to be consistent with the efficient performance of this contract.

(R. S. 161; 5 U. S. C. 22. Interpret or apply 62 Stat. 21; 41 U. S. C. 151-161)

T. P. PIKE,
*Deputy Assistant Secretary of Defense (Supply and Logistics).*

[F. R. Doc. 53-9509; Filed, Nov. 10, 1953; 8:45 a. m.]

PART 407—TERMINATION OF CONTRACTS

SUBPART E—SETTLEMENT OF CONTRACTS TERMINATED FOR CONVENIENCE

AUTHORIZATION FOR SETTLEMENT OF SUBCONTRACTORS TERMINATION PROPOSALS WITHOUT APPROVAL OR RATIFICATION

Section 407.518-6 is amended to extend the authority of prime contractors to settle terminated subcontracts where settlements do not exceed $1,000.

§ 407.518-6 *Authorization for settlement of subcontractors termination proposals under $1,000 without approval or ratification.* (a) The Contracting Officer may, if satisfied with the adequacy of the procedures used by the Contractor in Settling the termination claims (including proposals for retention sale, or other disposal of termination inventory) of its immediate and lower tier sub-Contractors, upon the written request by the Contractor, authorize the Contractor to conclude settlements of his terminated subcontracts, which settlements shall thereupon be reimbursable in accordance with this part and the Termination Clause of the contract, without requiring approval or ratification by the Contracting Officer, subject however to the following conditions and requirements:

(1) The amount of any such subcontract termination settlement does not exceed $1,000, computed in accordance with § 407.202;

(2) Any termination inventory involved has been disposed of in accordance with the procedures set forth in § 407.614, except that screening is not required;

(3) Each such settlement is accompanied by a certificate in the form set forth in § 407.708.

(b) The Contracting Officer granting the above defined authorization to a Contractor shall be responsible for periodically making a selective review of settlements to determine whether the Contractor is making adequate reviews and fair settlements, and whether such authorization shall remain in effect. Whenever the Contracting Officer determines that the Contractor's procedures are not adequate or that improper settlements are being made, he may revoke the authorization by written notice to the Contractor. The revocation of the authority shall take effect only from the date of receipt of written notice by the Contractor.

(c) Any number of separate settlements of $1,000 or less may be made with a single subcontractor. Claims which would normally be included in a single settlement proposal, such as those based on a series of separate orders for the same item under one contract, should be consolidated wherever possible, and must not be divided in such a way as to bring them within the authorization provided for in this section.

(R. S. 161; 5 U. S. C. 22. Interpret or apply 62 Stat. 21; 41 U. S. C. 151-161)

T. P. PIKE,
*Deputy Assistant Secretary of Defense (Supply and Logistics).*

[F. R. Doc. 53-9510; Filed, Nov. 10, 1953; 8:46 a. m.]

PART 409—BONDS AND INSURANCE

Revised Subpart C of Part 409, has been considerably extended and Subparts D through G have been added. The below amendments are effective 60 days from the date of issuance of this revision; however, they may be placed in effect upon receipt hereof.

SUBPART C—INSURANCE; GENERAL

Sec.
409.300 Scope of subpart.
409.301 General.
409.302 Notice of cancellation or change.
409.303 Responsibility for loss of or damage to Government property.
409.304 Insurance against loss of or damage to Government property.
409.305 Procedures to be followed in the event of loss of or damage to Government property.

SUBPART D—INSURANCE UNDER FIXED-PRICE CONTRACTS

409.400 Scope of subpart.
409.401 Policy.
409.402 Government-furnished property.

SUBPART E—INSURANCE UNDER COST-REIMBURSEMENT TYPE CONTRACTS

409.500 Scope of subpart.
409.501 Policy.
409.501-1 Workmen's compensation and employer's liability insurance.
409.501-2 General liability insurance.
409.501-3 Automobile liability insurance.
409.501-4 Aircraft public and passenger liability insurance.
409.501-5 Vessel collision liability and protection and indemnity liability insurance.
409.502 Self-insurance.
409.503 Government property.

SUBPART F—INSURANCE IN CONNECTION WITH FACILITIES CONTRACTS

409.600 Scope of subpart.
409.601 Policy.
409.602 Responsibility for loss or damage to facilities.

SUBPART G—SPECIAL CASUALTY INSURANCE RATING PLANS

409.700 Scope of subpart.
409.701 Purpose of plans.
409.702 Description of plans.
409.703 Use and eligibility for plans.

AUTHORITY: §§ 409.300 to 409.703 issued under sec. 1, 54 Stat. 712, as amended, sec. 201, 55 Stat. 839, 62 Stat. 20; 50 U. S. C. App. 1171, 61, 41 U. S. C. Sup., 151-161. E. O. 9001, Dec. 27, 1941, 6 F. R. 6787, as amended by E. O. 9296, Jan. 30, 1943, 8 F. R. 1429; 3 CFR, 1943 Cum. Supp.

SUBPART C—INSURANCE; GENERAL

§ 409.300 *Scope of subpart.* This subpart sets forth the general principles and policy applicable to insurance under contracts of the Departments for supplies or services.

§ 409.301 *General.* Insurance will be required where (a) it is mandatory by law, (b) it is considered desirable to utilize the facilities and services of the insurance industry, or (c) in special instances it is deemed necessary or desirable in connection with the performance of a contract. The respective Departments may also authorize or require the purchase of insurance where commingling of property or the conditions of the contract make the carrying of insurance reasonably necessary for the protection of the several interests concerned.

§ 409.302 *Notice of cancellation or change.* Where insurance is required by contract provision or in writing by the approving authority, the policies evidencing such insurance shall contain an endorsement to the effect that cancellation or material change in the policies, adversely affecting the interest of the Government in such insurance, shall not be effective unless the written notice as required by the approving authority is given.

§ 409.303 *Responsibility for loss of or damage to Government property.* The responsibility of the Contractor for loss of or damage to Government property in the possession or control of Contractors is set forth in the clause in §§ 412.411, 412.502, and 412.503 of this subchapter.

§ 409.304 *Insurance against loss of or damage to Government Property.* In instances where insurance is required or approved to cover loss of or damage to Government property, such insurance may be provided either by specific insurance policies or by inclusion of such risks in the Contractor's existing insurance policies. In either event, the insurance policies shall make formal disclosure of the Government's interest in the property.

§ 409.305 *Procedures to be followed in the event of loss of or damage to Government property.* Upon the happening of loss of or damage to any Government property, concerning which the Contractor is relieved of responsibility by contract provision, the procedure shall be as prescribed in subparagraph (f) (iii) of the clause in § 412.502 or § 412.503 of this subchapter.

SUBPART D—INSURANCE UNDER FIXED-PRICE CONTRACTS

§ 409.400 *Scope of subpart.* This subpart sets forth the policy of the Departments with respect to insurance under fixed-price contracts for supplies or services.

§ 409.401 *Policy.* Ordinarily the Departments are not concerned with the insurance programs of fixed-price Contractors. However, the Departments

may be concerned with a Contractor's insurance program when special circumstances exist. Examples of special circumstances are (a) where the Contractor is engaged principally in Government work, (b) where the Contractor has a segregated operation which is engaged principally in Government work, (c) where Government-furnished property is involved, (d) where the work is performed within a Government establishment, and (e) where the Government may desire to assume risks for which the Contractor ordinarily obtains commercial insurance.

§ 409.402 *Government-furnished property.* The Contractor's responsibilities for loss of or damage to Government-furnished property under fixed-price contracts are set forth in the clause in § 412.502 of this subchapter.

SUBPART E—INSURANCE UNDER COST-REIMBURSEMENT TYPE CONTRACTS

§ 409.500 *Scope of subpart.* This subpart sets forth the policy of the Departments with respect to insurance under cost-reimbursement type contracts for supplies or services.

§ 409.501 *Policy.* The kinds of insurance listed in this subpart, with limits of liability as prescribed by each respective Department, shall ordinarily be required under cost-reimbursement type contracts and under those subcontracts where the provisions of the prime contract are extended to the subcontract. A program of self-insurance approved by the Department concerned, as provided in § 409.502, may be substituted for any of the kinds of insurance ordinarily required.

§ 409.501–1 *Workmen's compensation and employers' liability insurance.* Compliance with applicable workmen's compensation and occupational disease statutes will be required, and the insurance policy will also include employers' liability coverage, where available. In jurisdictions where all occupational diseases are not compensable under applicable law, insurance for occupational diseases will be required under the employers' liability section of the insurance policy; however, such additional insurance will not be required where contract operations are commingled with the Contractor's commercial operations so that it would be impracticable to require such coverage.

§ 409.501–2 *General liability insurance.* Bodily injury liability insurance will be required on the comprehensive form of policy. Property damage liability insurance will be required only in special circumstances as determined by the Departments concerned. Property damage liability insurance may be approved when the nature of the contract operations warrant its purchase or where they are not separable from the Contractor's commercial operations.

§ 409.501–3 *Automobile liability insurance.* This insurance will be required on the comprehensive form of policy and will provide for bodily injury liability and property damage liability covering the operation of all automobiles used in connection with the performance of the contract.

§ 409.501–4 *Aircraft public and passenger liability insurance.* Where aircraft are used in connection with the performance of the contract, such insurance ordinarily will be considered required coverage.

§ 409.501–5 *Vessel collision liability and protection and indemnity liability insurance.* Where vessels are used in connection with the performance of the contract, such insurance will be required whenever deemed necessary by the Department concerned.

§ 409.502 *Self-insurance.* Qualified programs of self-insurance may be approved where an examination of the program indicates that its application to the cost-reimbursement type contract is in the best interests of the Department.

§ 409.503 *Government property.* The Contractor's responsibilities for loss of or damage to Government property under cost-reimbursement-type contracts are set forth in the clause in § 412.503 of this subchapter.

SUBPART F—INSURANCE IN CONNECTION WITH FACILITIES CONTRACTS

§ 409.600 *Scope of subpart.* This subpart sets forth the policy of the Departments with respect to insurance under contracts for the providing of industrial facilities by the Government for use in the performance of contracts for supplies or services.

§ 409.601 *Policy.* Where industrial facilities are provided by the Government, the Contractor shall be required by the contract during the period of construction, installation, alteration, repair, or use and at any other time as directed by the respective Departments, to insure or otherwise provide approved security for liabilities to employees and third persons in accordance with the requirements set forth in §§ 409.501–1 through 409.501–5.

§ 409.602 *Responsibility for loss or damage to facilities.* Section 412.411 of this subchapter defines the responsibilities of the Contractor for loss or damage to Government facilities. Therefore, facilities contracts shall provide that the Contractor shall not include the cost of insurance in any contract except to the extent of insurance required or approved. If the facilities contract does not restrict the use of the facilities to work performed for the Departments, provision shall be made that the Contractor shall procure and maintain insurance as the Department concerned shall require against loss or damage to the industrial facilities.

SUBPART G—SPECIAL CASUALTY INSURANCE RATING PLANS

§ 409.700 *Scope of subpart.* This subpart sets forth principles and requirements for use of the National Defense Projects Rating Plan, which is available for application on both domestic and foreign contracts which meet the eligibility requirements set forth herein. This subpart likewise applies to the World War II War Department Insurance Rating Plan, also known as the War Projects Insurance Rating Plan, which is currently available for application only outside the continental United States. These plans provide a special rating formula for the purchase of the casualty insurance coverages listed in §§ 409.501–1 through 409.501–3, and are mandatory as to contracts which meet the use and eligibility standards set forth in § 409.703. Inclusion under the prime Contractor's Rating Plan policies of similar coverages for subcontractors, whose contracts with the prime Contractor provide that the insurance shall be furnished by the prime Contractor, shall be automatic if the subcontract operations are at the project site, unless the Departments specifically direct otherwise. Subcontractors whose operations are away from the projects site will not be covered under the prime Contractor's Rating Plan policies unless the prime Contractor is specifically directed by the Departments to request inclusion of such subcontractors.

§ 409.701 *Purpose of plans.* These plans are designed to utilize the services and organizations of the insurance industry for safety engineering and the handling of claims arising under eligible contracts at a minimum cost to the Government.

§ 409.702 *Description of plans.* These plans are effected by endorsements attached to standard insurance policy forms for workmen's compensation, employer's liability, general liability, and automobile liability. The Rating Plans provide for a fixed deposit premium, for a reduced rate of current premium payments, for yearly adjustments of the premium depending upon loss experience during the period, and for final adjustment of the premium based upon the experience of the entire period covered by the policies. The final adjustment may be deferred for a maximum of 68 months after expiration of the policies. The total adjusted premium is the sum of the following:

(a) A fixed charge which is a percentage of the standard premium and is to compensate the insurance company for general expenses other than those referred to hereafter;

(b) Modified losses, which are the losses paid or incurred, multiplied by a conversion factor of 1.12 to compensate the insurance company for the claim department expense;

(c) Allocated claims expenses, which are expenses for claims services not of the type ordinarily rendered by the insurer's claim department, such as actual expenditures for attorney's fees and other trial or hearing expenses in connection with litigated cases;

(d) Special assessments imposed by the applicable jurisdiction for purposes such as second injury funds, rehabilitation funds, maintenance of workmen's compensation commissions, etc.; and

(e) Actual premium taxes.

Each of the above adjustments are subject to review by authorized representatives of the Department concerned, and the total adjusted premium derived therefrom cannot exceed a maximum premium which is a percentage of the standard premium developed by use of manual rates issued or approved by the appropriate rating organization. In general, the plans are variations of commercially available insurance rating plans, but have been specially developed to meet the requirements of the Departments.

§ 409.703 *Use and eligibility for plans.* The Rating Plans described in this subpart shall be applied to all eligible defense projects where such application is determined by the Department concerned to be in the best interests of the Government. The Rating Plans may be applied to cost-reimbursement type contracts and also, in appropriate cases, to fixed-price contracts with price redetermination provisions. A defense project is eligible for application of a plan when (a) eligible Government contracts represent, at inception of the plan, at least 90 percent of the payroll for total operations at the specific locations of the project, and (b) the annual premium for insurance is estimated to be at least $10,000. A defense project may include contracts awarded by more than one Department to the same Contractor.

T. P. PIKE,
*Deputy Assistant Secretary of Defense (Supply and Logistics).*

## TITLE 43—PUBLIC LANDS: INTERIOR

### Chapter I—Bureau of Land Management, Department of the Interior

Appendix—Public Land Orders

[Public Land Order 926]

ARIZONA

PARTIALLY REVOKING EXECUTIVE ORDER OF JANUARY 13, 1915, CREATING PUBLIC WATER RESERVE NO. 24, ARIZONA NO. 3

By virtue of the authority vested in the President by section 1 of the act of June 25, 1910 (36 Stat. 847; 43 U. S. C. 141), and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

The Executive order of January 13, 1915, creating Public Water Reserve No. 24, Arizona No. 3, as construed by Department of the Interior Interpretation No. 49 of October 29, 1927, is hereby revoked so far as it affects the following-described public land:

GILA AND SALT RIVER MERIDIAN

T. 39 N., R. 6 E.,
Sec. 28, SE¼SE¼.

The area described contains 40 acres. The land is rolling to rough. The soil is sandy with rocky outcroppings. The land is not suitable for cultivation. It is chiefly suitable for disposal by private exchange. It is unlikely that it will be classified for any other disposition but any application that is filed will be considered on its merits. The land will not be subject to occupancy or disposition until it has been classified.

This order shall not become effective to change the status of the described lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall become subject to application, petition, location and selection, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable laws, and the 91-day preference right filing period for veterans and others entitled to preference under the act of September 27, 1944 (59 Stat. 747; 43 U. S. C. 279–284) as amended.

Information showing the periods during which and the conditions under which veterans and others may file applications for these lands may be obtained on request from the Manager of the Land Office at Phoenix, Arizona.

ORME LEWIS,
*Assistant Secretary of the Interior.*

NOVEMBER 5, 1953.

## TITLE 35—PANAMA CANAL

### Chapter I—Canal Zone Regulations

PART 24—SANITATION, HEALTH, AND QUARANTINE

DESIGNATION OF COUNTRIES WHERE FOOT-AND-MOUTH DISEASE OR RINDERPEST EXISTS; MEXICO

Pursuant to the authority vested in the Governor by Rule 119qq of Executive Order No. 4314 of September 25, 1925, as amended by Canal Zone Order No. 15 of July 15, 1948 (35 CFR 24.102), § 24.102a, as amended by Governor's Regulation of October 14, 1952, 17 F. R. 10559, is hereby further amended by adding Mexico to the list of designated countries in which it is determined that foot-and-mouth disease or rinderpest exists.

(Sec. 1, 39 Stat. 527, as amended; 2 C Z Code 371, 372, 48 U. S. C. 1310)

Issued at Balboa Heights, Canal Zone, October 15, 1953.

[SEAL] H. O. PAXSON,
*Acting Governor of the Canal Zone.*

## DEPARTMENT OF THE TREASURY

### Office of the Secretary

[Treasury Department Order 165-2]

COMMISSIONER OF CUSTOMS

DELEGATION OF AUTHORITY WITH RESPECT TO CERTAIN FUNCTIONS

OCTOBER 29, 1953.

By virtue of the authority vested in me by Reorganization Plan No. 26 of 1950 (3 CFR, 1950 Supp. Ch. III), it is hereby ordered that effective January 1, 1954, there shall be transferred from the Commissioner of Internal Revenue to the Commissioner of Customs the function of refunding excess deposits of internal-revenue tax, previously collected by collectors of customs, which are found by collectors of customs upon liquidations or reliquidations made on or after January 1, 1954, to be due and the functions prescribed by 26 U. S. C. 3771(a), (b) (2) (53 Stat. 465) of determining, allowing, and paying interest in connection with such refunds.

The functions herein transferred may be delegated by the Commissioner of Customs to other officers or employees of the Customs Service in such manner as the Commissioner shall direct.

[SEAL] H. CHAPMAN ROSE,
*Acting Secretary of the Treasury.*

### Bureau of Customs

[Customs Delegation Order No. 6; T. D. 53369]

COLLECTORS OF CUSTOMS

REDELEGATION OF AUTHORITY WITH RESPECT TO CERTAIN FUNCTIONS

OCTOBER 29, 1953.

Delegation to collectors of customs of authority transferred by the Secretary of the Treasury to the Commissioner of Customs by Treasury Department Order No. 165-2.[1]

Pursuant to Treasury Department Order No. 165-2, published as T. D. 53368, it is hereby ordered:

The functions of refunding excess deposits of internal-revenue tax, collected by collectors of customs, and of determining, allowing, and paying interest in connection with such refunds, transferred to the Commissioner of Customs by Treasury Department Order No. 165-2, are hereby delegated to collectors of customs.

[SEAL] D. B. STRUBINGER,
*Acting Commissioner of Customs.*

## Office of Alien Property

[Vesting Order 19272, Amdt.]

ADOLPHUS BUSCH

In re: Trust under will of Adolphus Busch, deceased. File No. D 28-13164.

Vesting Order 19272 dated April 14, 1953, is hereby amended as follows and not otherwise:

1. By inserting, immediately preceding the name, Hans Philipp Geyl, appearing in paragraph "1" of said Vesting Order 19272, the name "Lilly Gronewaldt".

All other provisions of said Vesting Order 19272 and all actions taken by or on behalf of the Attorney General of the United States in reliance thereon, pursuant thereto and under the authority thereof are hereby ratified and confirmed.

Executed at Washington, D. C., on November 6, 1953.

For the Attorney General.

[SEAL] DALLAS S. TOWNSEND,
*Assistant Attorney General,*
*Director, Office of Alien Property.*

# DEPARTMENT OF THE INTERIOR

## Bureau of Land Management

ARIZONA

RESTORATION ORDER UNDER FEDERAL POWER ACT

NOVEMBER 3, 1953.

Pursuant to determinations of the Federal Power Commission dated December 12, 1950 (DA-96-Arizona and DA-97-Arizona) and January 31, 1952 (DA-108-Arizona), and in accordance with Order No. 427, section 2.22 (a) of the Director, Bureau of Land Management, approved August 16, 1950 (15 F. R. 5639), it is ordered as follows:

Subject to valid existing rights and the provisions of existing withdrawals, the lands hereinafter described, so far as they were withdrawn or reserved for power purposes in Power Site Reserve No. 83 dated December 9, 1909, in Water Power Designation No. 4 dated February 1, 1917, and in Power Project No. 837, having been reserved on September 2, 1927, are hereby restored to disposition under any applicable public land law, subject to the provisions of section 24 of the Federal Power Act of June 10, 1920 (41 Stat. 1075; 16 U. S. C. 818), as amended:

GILA AND SALT RIVER MERIDIAN

T. 5 S., R. 20 E.,
Sec. 25, W½SW¼;
Sec. 26, all;
Sec. 27, S½NE¼.

The lands described aggregate 800.00 acres.

The lands are crossed by or are adjacent to the Gila River. Evidence has been furnished that Wenceslao Subia of Clifton, Arizona, claims some of these lands under the settlement laws.

The lands described shall be subject to application by the State of Arizona for a period of ninety days from the date of publication of this order in the FEDERAL REGISTER for rights-of-way for public highways or as a source of material for the construction of such highways, as provided by section 24 of the Federal Power Act, as amended.

This order shall not otherwise become effective to change the status of such land until 10:00 a. m. on the 91st day after the date of publication. At that time the said lands shall become subject to application, petition, and selection, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable law, and the 90-day preference right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279-284), as amended.

Information showing the period during which, and the conditions under which veterans and others may file applications on the land may be obtained on request from the U. S. Land and Survey Office, Phoenix, Arizona.

E. R. SMITH,
*Regional Administrator.*

[F. R. Doc. 53-9514; Filed, Nov. 10, 1953; 8:47 a. m.]

## Office of the Secretary

KLAMATH TRIBE OF OREGON

FEDERAL INDIAN LIQUOR LAWS

Pursuant to the act of August 15, 1953 (Pub. Law 277, 83d Cong., 1st Sess.), I certify that the following ordinance relating to the application of the Federal Indian liquor laws on the Klamath Reservation was duly adopted by the Klamath Tribe of Oregon which has jurisdiction over the area of Indian country included in the resolution:

Whereas Public Law 277, 83d Congress, approved August 15, 1953, provides that sections 1154, 1156, 3113, 3488 and 3618 of title 18, United States Code, commonly referred to as the Federal Indian liquor laws, shall not apply to any act or transaction within any area of Indian country provided such act or transaction is in conformity with both the laws of the State in which such act or transaction occurs and with an ordinance duly adopted by the tribe having jurisdiction over such area of Indian country, certified by the Secretary of the Interior, and published in the FEDERAL REGISTER.

Therefore, be it resolved that the introduction, sale or possession of intoxicating beverages shall be lawful within the Indian country under the jurisdiction of the Klamath Tribe, consisting of the Klamath, Modoc and Yahooskin Band of Snake Indians, provided, that such introduction, sale or possession is in conformity with the laws of Oregon.

Be it further resolved, That any tribal laws, resolutions or ordinances heretofore enacted which prohibit the sale, introduction or possession of intoxicating beverages are hereby repealed.

ORME LEWIS,
*Assistant Secretary of the Interior.*

# DEPARTMENT OF COMMERCE

## Bureau of Foreign Commerce

[Case No. 166]

JOHANNES M. A. KLAASEN ET AL

ORDER REVOKING LICENSES AND DENYING EXPORT PRIVILEGES

In the matter of Johannes M. A. Klaasen and Antonius A. Klaasen, individually and as partners in Handelshuis J. M. A. Klaasen & Co., J. M. A. Klaasen & Co., Klaasen & Co., 41 Eendrachtsweg, Rotterdam, Netherlands; Johannes C. A. M. van Woerkom, individually and doing business as Industriele Handelsonderneming v h Rotterdamsche Producten Maatschaprij, Maarten Dijkshoornlaan 23, Hillegersburg, Netherlands; respondents; Case No. 166.

This proceeding was commenced by the transmission of a charging letter issued to the above-named respondents by the Director of the Investigation Staff, Bureau of Foreign Commerce (formerly the Office of International Trade), United States Department of Commerce, under date of July 23, 1953. Respondents are charged therein with having violated the Export Control Act of 1949, as amended, and the regulations issued thereunder, during the period April through December 1951, by having knowingly concealed material facts, made false representations and certifications, and having submitted false and fabricated ultimate consignee statements to various United States exporters-suppliers, and through such suppliers to United States authorities, to induce the issuance of validated export licenses and to facilitate the exportation to respondents in Holland of ten shipments of antibiotics and insecticides valued in excess of $125,000.

The charges allege further that respondents unlawfully diverted and transshipped, or caused to be diverted and transshipped, all ten of said exportations to countries of ultimate destination other than those authorized, in contravention of the destination control notice contained on the shipping documents of eight of said exportations and with knowledge that all said transshipments were contrary to United States export law and regulations.

By the terms of said charging letter the validated license privileges of said respondents were temporarily suspended pending the determination of this proceeding.

After receiving said charging letter, respondents transmitted to the Bureau of Foreign Commerce a request that they be granted a delay of this proceeding of at least three months, as the principals of the respondent companies were then abroad and would require more than the ten days (to answer the charges or ask for oral hearing) allowed under the terms of the charging letter. Officials of the Bureau of Foreign Commerce felt that a prolonged delay was not warranted by the circumstances, or necessary, but nevertheless allowed respondents an extension of one month. Within the period of extension so granted respondents failed to submit an answer or to ask for hearing, notwithstanding which the Bureau of Foreign Commerce voluntarily allowed them several additional days on the proviso that they either submit an answer or ask for a hearing by a specified date, or have the evidence of the violations charged summarily submitted to the Compliance Commissioner for hearing on the basis of their default. When apprised of the additional time granted respondents declined to answer the charges or to appear in the proceeding and intimated that the pending proceeding and the outcome thereof was a matter of indifference to them.

On September 25, 1953, a default hearing was duly held before the Compliance Commissioner at Washington, D. C., at which the Bureau of Foreign Commerce was represented by counsel and through said counsel presented to the Commissioner the evidence compiled by the Investigation Staff bearing on the violations charged to the respondents in said charging letter. The Commissioner was informed by counsel of the extensions granted to respondents and of their refusal to appear in the proceeding or to file an answer to the charges, as aforesaid. On the basis thereof the Commissioner duly declared the respondents to be in default in accordance with the regulations. Notwithstanding the ruling as to respondents' default, it was stipulated that the proceeding should be kept open subject to receiving an answer from the respondents within a reasonable time and while the matter was still under consideration by the Commissioner. Respondents not having thereafter indicated any change of position or of intention to contest the proceeding, the default has been made final.

It appears from the Compliance Commissioner's report that at the time of

the violations charged respondent Johannes M. S. Klaasen and his son, respondent Antonius A. Klaasen, were, and still are, partners in the firms Handelshuis J. M. A. Klaasen & Co., J. M. A. Klaasen & Co., and Klaasen & Co. ("Klaasen"), Rotterdam, Holland, all of which firms are engaged in the import-export of diverse commodities, including chemicals and pharmaceuticals, and have been so engaged for many years. Respondent Johannes C. A. M. van Woerkom was then, and still is, an important official of Klaasen and a member of its board of directors, and is also the sole owner of Industriele Handelsonderneming v/h Rotterdamsche Producten Maatschappij ("Rotterdamsche Producten"), an inoperative concern which van Woerkom formerly conducted from his residence in Hillegersburg, a suburb of Rotterdam.

It appears further from the Compliance Commissioner's report that the Klaasens and van Woerkom are associated in various other enterprises in Holland, in some instances van Woerkom and Antonius A. Klaasen being partners in specific firms, and in another instance Johannes M. Klaasen and Antonius A. Klaasen own the stock of a company and Johannes M. A. Klaasen and van Woerkom are on the board of directors. In addition to these firms, the Klaasens have a connection with two interlocking Rotterdam firms through an employee of theirs who is a board member of one of these firms. All of the concerns under consideration are named below as being subject to the prohibitions of this order because of the relationship to the Klaasans and van Woerkom, as indicated.

On the evidence and on the entire record the salient facts are as follows:

During the period April through June 1951, the Klaasen firm ordered five shipments of United States origin DDT powder, sulfadiazine powder, and sulfadiazine tablets to be made to it in Holland. These orders were placed with various New York export concerns. All said orders, except one, were accompanied by ultimate consignee statements in which Klaasen falsely represented and certified that the given commodity was intended for ultimate consumption or resale in Holland or Belgium. One of said statements was on the letterhead of a purported Belgium ultimate consignee. Actually, the letterhead had been deviously obtained and the name of the alleged Belgium consignee placed thereon without authority.

Unaware of the falsity of the representations on the orders and ultimate consignee statements, the several exporters applied to the Bureau of Foreign Commerce for validated export licenses to ship the required commodities to Klaasen in Rotterdam, and export license were thereafter obtained authorizing such shipments. In each instance except one, shipment of the ordered commodity was made under an order bill of lading containing the required destination control notice, "These commodities licensed by U. S. for ultimate destination Holland. Diversion contrary to U. S. law prohibited." In the one exception the destination control notice was inadvertently omitted from the bill of lading.

A copy of each of the bills of lading containing the aforesaid destination control notice was furnished to Klaasen and its duly authorized forwarding agent at Rotterdam. Upon reaching Rotterdam each of the said five shipments was diverted and transshiped to Hong Kong by the said forwarding agent acting for and upon the instructions of Klaasen.

Evidently in an attempt to divert suspicion from its large scale Hong Kong transshipments, Klaasen placed five additional orders with various New York exporters for large quantities of aureomycin chloromycetin, sulfadiazine powder, sulfathiazole powder, and DDT during the period July through October, 1951, but in each instance used the name of Rotterdamsche Producten, the inoperative company owned by van Woerkom, as the purported purchaser. Employing the same pattern used earlier, Rotterdamsche Producten issued to the exporters ultimate consignee statements falsely representing and certifying that the ordered commodities were to be used in Holland only. In two of these transactions, and probably more, the letter of credit covering the purchase price was established by Klaasen. In each instance the ultimate consignee statement, though on the letterhead of Rotterdamsche Producten, was an exact replica, in format and design, of the consignee statements issued by Klaasen, and obviously originated from the same source.

Having no reason to doubt the authenticity on the representations and certifications on the orders and ultimate consignee statements, the several exporters applied to the Bureau of Foreign Commerce for validated export licenses to ship the required commodities to Holland as the country of ultimate destination, and export licenses were thereafter issued authorizing such shipments. Again, in each instance except one, the exportations effected under order bills of lading "notify Rotterdamsche Producten and Klaasen," contained the required destination control notice, "These commodities licensed by U. S. for ultimate destination Holland. Diversion contrary to U. S. law prohibited." In the one exception the destination control notice was inadvertently omitted from the bill of lading.

Copies of each of the bills of lading containing the aforesaid destination control notice were furnished to Klaasen, Rotterdamsche Producten, and their duly authorized forwarding agents at Rotterdam. Upon reaching Rotterdam each of the said five shipments was diverted and transshipped by the forwarding agents acting for and upon the instructions of Klaasen and Rotterdamsche Producten, four of the said shipments being diverted to Hong Kong and the other being transshipped to Germany.

In his report the Compliance Commissioner has pointed out the relationship of van Woerkam to the Klaasen firm, his close association in other Klaasen enterprises, and his participation in the instant transactions and the use of his company's name as a front, and has stated as his conclusion that van Woerkom was an integral factor in the Klaasen operations and an indistinguishable part of the Klaasen entity.

The Compliance Commissioner also refers to the record herein which shows that, in the course of an investigation by United States Foreign Service officers, Klaasen first professed no knowledge of the instant transshipments and denied having engaged therein, and in fact attempted to prove by fabricated records that in one instance they had sold the United States commodity to a French concern for consignment to Belgium. This assertion was proved false investigation thereof showing that the firm named as the alleged purchaser in France was non-existent and that the purported Belgium consignee knew nothing of the alleged transaction.

Later, and after again denying to the authorities that the goods had been transshipped, Klaasen finally admitted that the said commodities had been diverted as shown. When it was pointed out that the goods were licensed by the United States only on condition that they be used in Holland or Belgium and that the licenses were issued on the basis of Klaasen's sworn statements that they would be so used, Klaasen stated that United States export controls were none of their concern and that they were not bound by the laws of a foreign country.

The record also discloses that the forwarding agent acting for Klaasen and Rotterdamsche Producten in all the Hong Kong transshipments was a notorious, known transshipper of strategic American goods to Soviet areas and that its United States license privileges were denied by order of the Bureau of Foreign Commerce in September 1951 and that such deprivation of license privileges was a matter of general knowledge in Holland; but that such knowledge failed to deter Klaasen and van Woerkom from continuing to employ the services of said forwarding agent to divert the American goods to Hong Kong.

In summing up the evidence and the record, the Compliance Commissioner states in his report that the series of falsehoods, evasions, and half-truths perpetrated by respondents upon United States officials abroad, coupled with the false representations, fabricated ultimate consignee statement and deliberate transshipments under the circumstances shown, constitute a flagrant case of violation of United States export controls; and that it shows respondents' utter disregard for United States export controls and for constituted American authority here and abroad. He points out also that the admitted unlawful transshipments took place contemporaneously with and soon after the outbreak of hostilities in Korea, and at a time when United States commodities to Hong Kong were undergoing a careful selective screening.

In making his recommendations the Commissioner has based them on his conclusion that by reason of the antagonism towards United States export control law and regulations openly expressed by respondents and of the translation of this attitude into the violative acts above shown, the instant respondents constitute a continuing threat to the integrity of the export control system and to the security of the United States.

The findings and recommendations of the Compliance Commissioner have been carefully considered, together with the charging letter, the evidentiary material, and the entire record. It appears therefrom that the Compliance Commissioner's findings are in accordance with the evidence and that such recommendations are reasonable and should be adopted.

Now, therefore, it is ordered as follows:

(1) All outstanding validated export licenses held by or issued in the names of respondents Johannes M. A. Klaasen, Antonius A. Klaasen, individually, and as Handelshuis J. M. A. Klaasen & Co., J. M. A. Klaasen & Co., and Klaasen & Co., and Johannes C. A. M. van Woerkom, individually, and as Industriele Handelsonderneming v/h Rotterdamsche Producten Maatschappij, or any of them, or in which they appear or participate as purchaser, intermediate or ultimate consignee, or otherwise, are hereby revoked and shall be forthwith returned to the Bureau of Foreign Commerce for cancellation.

(2) Respondents, their successors or assigns, directors, officers, associates, partners, representatives, agents, and employees, are hereby denied and declared ineligible to exercise the privileges of participating directly or indirectly in any manner or capacity in the exportation of any commodity from the United States to any foreign destination, including Canada, for the duration of export controls. Without limitation of the generality of the foregoing denial of export privileges, participation in an exportation is deemed to include and prohibit respondents' participation (a) as a party as a representative of a party to any validated export license application, (b) in the obtaining or using of any validated or general export license or other export control documents, (c) in the receiving in any foreign country of any exportation from the United States, and (d) in the financing, forwarding, transporting, or other servicing of exports from the United States.

(3) Such denial of export privileges shall extend not only to the named respondents, and each of them, but also to Lindemann & Co., Holland N. V., Gold Oil Company, International Meat Company, Handel Maatschappij Blessing-Etra, and Etra Technische Ondernemeing, all of Holland (companies with which the named respondents are associated) and also to any other person, firm, corporation, or business organization with which said respondents, or any of them, may be now or hereafter related by ownership, control, position of responsibility, or other connection in the conduct of trade involving exports from the United States or services connected therewith.

(4) No person, firm, corporation, or other business organization shall knowingly apply for or obtain any license, shipper's export declaration, bill of lading, or other export control document relating to any exportation from the United States under validated and general export licenses, or finance, service, transport, forward, or receive any commodities thereunder, to or for said respondents or any of them, or any person, firm, corporation, or other business organization covered by paragraph (3) above, without prior disclosure of such facts to, and specific authorization from, the Bureau of Foreign Commerce.

Dated: November 6, 1953.

JOHN C. BORTON,
*Director,*
*Office of Export Supply.*

## DEPARTMENT OF LABOR

### Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1068, as amended; 29 U. S. C. and Sup. 214), and Part 522 of the regulations issued thereunder (29 CFR Part 522), special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 522. The effective and expiration dates, occupations, wage rates, number or proportion of learners, and learning period for certificates issued under the general learner regulations (§§ 522.1 to 522.14) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Single Pants, Shirts and Allied Garments, Women's Apparel, Sportswear and Other Odd Outerwear, Rainwear, Robes and Leather and Sheep-Lined Garments Divisions of the Apparel Industry Learner Regulations (29 CFR 522.160 to 522.168, as amended June 2, 1952, 17 F. R. 3818).

Associated Garment Co., 18 South Popla Street, Pana, Ill., effective 11-20-53 to 11-19-54; 10 learners (dresses).

Bates Nitewear Co., Inc., 1120 East Bessemer Avenue, Greensboro, N. C., effective 11-9-53 to 11-8-54; 10 percent of the factory production force for normal labor turnover purposes (children's pajamas).

Blue Bell, Inc., Woodstock, Va., effective 10-29-53 to 4-28-54; 10 learners for expansion purposes (dungarees).

Carbondale Manufacturing Co., Inc., 33 South Main Street, Carbondale, Pa., effective 10-30-53 to 10-29-54; 10 learners for normal labor turnover purposes (dresses).

Cluett, Peabody & Co., Shamokin, Pa., effective 11-4-53 to 11-3-54; 10 percent of the factory production workers for normal labor turnover purposes (sport shirts).

Cluett, Peabody & Co., Shamokin, Pa., effective 11-4-53 to 5-3-54; 40 learners for expansion purposes (sport shirts).

Cluett, Peabody & Co., Inc., Virginia, Minn., effective 11-19-53 to 11-18-54; 10 percent of the factory production force for normal labor turnover purposes (shirts).

Duquesne Manufacturing Co., 832 Constitution Boulevard, New Kensington, Pa., effective 11-15-53 to 11-14-54; 10 learners for normal labor turnover purposes (dresses, hooverettes, etc.).

Fields Manufacturing Co., 246 Oconee Street, Athens, Ga., effective 10-29-53 to 10-28-54; 10 learners for normal labor turnover purposes (men's and boys' work and sports shirts and work pants).

Forest City Manufacturing Co., DuQuoin, Ill., effective 10-29-53 to 4-28-54; 20 learners for expansion purposes (juniors' and misses' dresses).

Forest City Manufacturing Co., Zeigler, Ill., effective 10-29-53 to 4-28-54; 10 learners for expansion purposes (juniors' and misses' dresses).

Jacqueline of Delaware, Townsend, Del., effective 10-30-53 to 10-29-54; 5 learners for normal labor turnover purposes (dresses).

Lesmar Manufacturing Co., Inc., Stark Industrial Park, Charleston, S. C., effective 11-3-53 to 11-2-54; 9 learners for labor turnover purposes (ladies' and children's pajamas).

McEwen Manufacturing Co., McEwen, Tenn., effective 11-6-53 to 11-5-54; 10 percent of the factory production force for normal labor turnover purposes (overalls, dungarees, playsuits).

Oberman Manufacturing Co., Harrison, Ark., effective 11-17-53 to 11-16-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' pants).

Pella Manufacturing Corp., 707 East 3rd Street, Pella, Iowa, effective 11-2-53 to 11-1-54; 5 learners for normal labor turnover purposes (overalls and dungarees).

Princess Peggy, Inc., Chillicothe, Ill., effective 10-28-53 to 10-27-54; 10 percent of the factory production workers for normal labor turnover purposes (dresses).

The Pyke Manufacturing Co., 154 West 2nd South Street, Salt Lake City, Utah, effective 11-2-53 to 11-1-54; 10 percent of the factory production force for normal labor turnover purposes (work pants, overalls, coveralls, pedal pushers, and shorts).

Rice Stix No. 15, Lebanon, Mo., effective 11-8-53 to 11-7-54; 10 percent of the factory production force for normal labor turnover purposes (overalls, dungarees and jumpers).

Royal Manufacturing Co., Inc., Washington, Ga., effective 10-30-53 to 10-29-54; 10 percent of the number of factory production workers engaged in the production of woven sport shirts (sport shirts).

Salant & Salant, Inc., Princeton Factory, Tennessee Avenue, Parsons, Tenn., effective 11-8-53 to 11-7-54; 10 percent of the factory production force for normal labor turnover purposes (cotton work pants).

Salant & Salant, Inc., Washington Street, Paris, Tenn., effective 11-9-53 to 11-8-54; 10 percent of the factory production force for normal labor turnover purposes (cotton work shirts and wool work shirts).

Saluda Shirt Co., Inc., Saluda, S. C., effective 10-29-53 to 10-28-54; 10 learners for normal labor turnover purposes. This certificate authorizes the employment of learners engaged in the manufacture of men's sport shirts only (sport shirts).

Sea Craft Sportswear, Inc., Grassflat, Pa., effective 10-30-53 to 10-29-54; 10 learners for normal labor turnover purposes (trousers).

Seattle Woolen Co., 2822 A Street, Tacoma, Wash., effective 11-2-53 to 11-1-54; 10 learners for normal labor turnover purposes (men's jackets and cruisers).

Shane Mfg. Co., Inc., 2015 West Maryland Street, Evansville, Ind., effective 11-16-53 to 11-15-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (cotton work clothing).

Southern Maid Garment, Inc., Winnsboro, S. C., effective 11-14-53 to 5-13-54; 20 learners for expansion purposes (children's dresses).

Standard Garments, Inc., 123 Fayette Street, Martinsville, Va., effective 10-28-53 to 10-27-54; 10 percent of the factory production force for normal labor turnover purposes (men's and boys' pants and jackets).

Summit Station Mfg. Co., 194 South Main Street, Pine Grove, Pa., effective 10-29-53 to 10-28-54; 10 learners for normal labor turnover purposes (women's dresses and blouses).

Glove Industry Learner Regulations (29 CFR 522.220 to 522.231, as amended July 13, 1953, 18 F. R. 3292).

North Star Manufacturing Co., Tacoma, Wash., effective 11-21-53 to 11-20-54; 6 learners (canton flannel gloves).

Western Glove Co., Orting, Wash., effective 11-21-53 to 11-20-54; 6 learners (canton flannel gloves).

Hosiery Industry Learner Regulations (29 CFR 522.40 to 522.51, as amended November 19, 1951; 16 F. R. 10733).

Chancellor Hosiery Mills, Inc., Reading, Pa., effective 11-3-53 to 11-2-54; 5 percent of the total number of factory production workers for labor turnover purposes.

Dolly Hosiery Mills, Inc., Valdese, N. C., effective 11-3-53 to 11-2-54; 5 learners for labor turnover purposes.

Industrial Hosiery Mills, Inc., Summit and Chestnut Streets, Mohnton, Pa., effective 10-30-53 to 10-29-54; 4 learners.

Peerless Hosiery Co., West Jefferson, N. C., effective 11-1-53 to 6-30-54; 50 learners for expansion purposes.

Independent Telephone Industry Learner Regulations (29 CFR 522.82 to 522.93, as amended January 25, 1950; 15 F. R. 398).

West Iowa Telephone Co., Marcus, Iowa, effective 11-17-53 to 11-16-54.

Knitted Wear Industry Learner Regulations (29 CFR 522.68 to 522.79, as amended January 21, 1952; 16 F. R. 12866).

Royal Manufacturing Co., Inc., Washington, Ga., effective 10-30-53 to 10-29-54; 5 percent of the number of factory production workers engaged in the production of cotton drawers and cotton shorts (drawers, shorts).

Royal Manufacturing Co., Inc., Crawfordville, Ga., effective 10-28-53 to 10-27-54; 5 learners (drawers, shorts).

Saluda Shirt Co., Inc., Saluda, S. C., effective 10-29-53 to 10-28-54; 5 learners. This certificate authorizes the employment of learners engaged in the manufacture of men's and boys' shorts only (shorts).

Regulations Applicable to the Employment of Learners (29 CFR 522.1 to 522.14).

Newberry Bagging & Tie Co., Caldwell Street, Newberry, S. C., effective 10-30-53 to 4-29-54; 1 learner; sewing machine operator, 160 hours at 65 cents per hour (cotton bagging).

Redwood City Knitting Mills, 120 Wilson Street, Redwood City, Calif., effective 10-28-53 to 4-27-54; 2 learners; hand embroiderers, 200 hours at 65 cents per hour (embroidery on sweaters).

The following special learner certificates were issued in Puerto Rico to the companies hereinafter named. The effective and expiration dates, the number of learners, the learner occupations, the length of the learning period and the learner wage rates are indicated, respectively.

Fonda Gage (Puerto Rico), Inc., Ponce, P. R., effective 10-20-53 to 3-31-54; 11 learners; millers, drill press operators, universal grinder; each 320 hours at 40 cents an hour (steel and carbide gage blocks).

Pan-Am Textiles, Inc., Caguas, P. R., effective 10-17-53 to 4-16-54; 57 learners; knitters, 240 hours at 30 cents an hour, 240 hours at 35 cent an hour; examiners, 240 hours at 30 cents an hour; seamers, menders; each 480 hours at 30 cents an hour, 480 hours at 35 cents an hour (full-fashioned hosiery).

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be canceled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 2d day of November 1953.

MILTON BROOKE,
*Authorized Representative of the Administrator.*

## CIVIL AERONAUTICS BOARD

[Docket No. 5628]

AEROVIAS INTERAMERICANAS DE PANAMA, S. A.; SERVICE FROM TOCUMEN, PANAMA, TO MIAMI, FLA.

NOTICE OF REOPENED HEARING

In the matter of the application of Aerovias Interamericanas de Panama, S. A., for a foreign air carrier permit under section 402 of the Civil Aeronautics Act of 1938, as amended, authorizing it to engage in scheduled or nonscheduled foreign air transportation between the terminal point Tocumen, Panama, and the terminal point Miami, Florida, with or without intermediate traffic stops in Havana, Cuba, and/or Kingston, Jamaica, and/or Nassau, Bahamas.

Notice is hereby given pursuant to the Civil Aeronautics Act of 1938, as amended, particularly sections 402 and 1001 of said act, that a hearing in the above-entitled proceeding will be reopened and resumed on November 13, 1953, at 10:00 a. m., e. s. t., in Room 2070 Temporary Building No. 5, Sixteenth Street and Constitution Avenue, NW, Washington, D. C., before Examiner Curtis C. Henderson.

Without limiting the scope of the issues presented by the applicant particular attention will be directed to the following questions:

1. Whether the proposed air transportation will be in the public interest.

2. Whether the applicant is fit, willing, and able to perform the proposed air transportation and to conform to the provisions of the act and the rules, regulations and requirements of the Board thereunder.

3. Whether the authorization of the proposed air transportation will be consistent with the obligations assumed by the United States in any treaty, convention, or agreement that may be in force between the United States and the Republic of Panama.

For further details as to the service proposed and authorization requested, interested parties are referred to the application on file with the Civil Aeronautics Board.

Notice is further given that any person, other than a party of record, desiring to be heard in this proceeding must file with the Board on or before November 13, 1953, a statement setting forth the pertinent issues of fact or law which he desires to controvert.

Dated at Washington, D. C., November 6, 1953.

By the Civil Aeronautics Board.

[SEAL] FRANCIS W. BROWN,
*Chief Examiner.*

## FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 10346]

JAMES GERITY, JR.

ORDER CONTINUING HEARING

In re application of James Gerity, Jr., Pontiac, Michigan, for construction permit; Docket No. 10346, File No. BP-8651.

The Commission having before it a petition filed by WKMH, Incorporated, on October 27, 1953, requesting that the hearing herein now scheduled for November 5, 1953, be continued "until at least 20 days after the Commission has acted upon a Petition to Amend Order and Issues filed by WKMH, Incorporated on October 26, 1953;" and

It appearing, that in its petition of October 26, 1953, WKMH, Incorporated requested that issues be added and that the burden of proceeding with the introduction of evidence and the burden of proof be placed upon James Gerity, Jr., instead of upon itself; and

It further appearing, that the Commission has not as yet acted upon the petition of October 26, 1953, and that no opposition to the instant petition for a continuance of the hearing herein has been filed;

*It is ordered*, This 3d day of November 1953, that the petition for continuance is granted and that the hearing herein is continued until a date to be scheduled in a later order.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9534; Filed, Nov. 10, 1953; 8:51 a. m.]

[Docket No. 10414]

RICHLAND BROADCASTING CORP.

ORDER CONTINUING HEARING

In re application of Richland Broadcasting Corporation, Richland, Wisconsin, for construction permit, Docket No. 10414, File No. BP-8584.

The Commission having under consideration a petition, filed on behalf of the above-entitled applicant on October 22, 1953, requesting a continuance of the hearing in this proceeding for a period of ninety days; and

It appearing, that applicant requests a continuance of the hearing in order to have more time to study other methods of improving broadcasting service in the Richland area; and

It further appearing, that the applicant's study may develop plans which do not necessitate a hearing upon this application, that no opposition to the petition has been filed, and that a continuance without date will conduce to the orderly dispatch of the Commission's business;

*Now therefore, it is ordered*, This 3d day of November 1953, that the petition for continuance is granted, and the hearing which is now scheduled for November 5 is continued to a date to be fixed by subsequent order.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9535; Filed, Nov. 10, 1953; 8:51 a. m.]

[Docket No. 10745]

HENRY K. LINDSEY AND EDWIN JAMES KLEIN

ORDER DESIGNATING MATTER FOR HEARING

In the matter of a cease and desist order to be directed to Henry K. Lindsey and Edwin James Klein; Docket No. 10745.

At a session of the Federal Communications Commission held at its offices in Washington, D. C. on the 5th day of November 1953;

The Commission having under consideration the issuance of an order pursuant to section 312 (b) of the Communications Act of 1934, as amended, to Henry K. Lindsey and Edwin James Klein to cease and desist from operating an unlicensed television booster station on the Nawiliwilinui Range in Hawaii or any other unlicensed station;

It appearing, that Henry K. Lindsey and Edwin James Klein operated an unlicensed television booster station on Nawiliwilinui Range in Hawaii from March 25, 1953 until April 5, 1953 and from August 25, 1953 until August 31, 1953; and

It further appearing, that on March 30, 1953 the unlawful nature of this operation was explained to Henry K. Lindsey and that a letter of April 6, 1953 from Edwin James Klein to the Commission states that there was no intention on the part of Lindsey and Klein to violate any Commission regulations in their experimental operations; and

It further appearing, that, in spite of the notice to Lindsey and Klein, unlawful operation was again conducted by them in August, 1953; and

It further appearing, that said operations were in violation of section 301 of the Communications Act of 1934, as amended, and that they were wilful;

*It is ordered*, Pursuant to section 312 (c) of the Communications Act of 1934, as amended, that Henry K. Lindsey and Edwin James Klein are directed to show cause why an order should not be issued commanding them to cease and desist from operating any unlicensed television station; and

*It is further ordered*, That a hearing in this matter be held in the Commission's offices, Twelfth and Pennsylvania Avenue NW., Washington, D. C., on the 11th day of January 1954, in order to determine whether said cease and desist order should be issued, and that Henry K. Lindsey and Edwin James Klein are herewith called upon to appear at this hearing and give evidence upon the matters specified herein; and

*It is further ordered*, Pursuant to § 1.402 of the rules, that said Henry K. Lindsey and Edwin James Klein are directed to file with the Commission within thirty days of the receipt of this order a written appearance in triplicate, stating that they will appear and present evidence on the matter specified in this order if they desire to avail themselves of their opportunity to appear before the Commission. If they do not desire to appear before the Commission and give evidence on the matter specified herein, they shall, within thirty days of the receipt of this order, file with the Commission, in triplicate, a written waiver of hearing. Such waiver may be accompanied by a statement of reasons why Henry K. Lindsey and Edwin James Klein believe that a cease and desist order should not be issued, and

*It is further ordered*, That failure of said Edwin James Klein and Henry K. Lindsey timely to respond to this order or failure to appear at the hearing designated herein will be deemed a waiver of hearing.

Released: November 5, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9536; Filed, Nov. 10, 1953; 8:51 a. m.]

## FEDERAL POWER COMMISSION

[Docket No. E-6335]

HOUSTON LIGHTING & POWER CO.

NOTICE OF ORDER APPROVING MAINTENANCE OF PERMANENT CONNECTION FOR EMERGENCY USE ONLY

NOVEMBER 5, 1953.

Notice is hereby given that on November 4, 1953, the Federal Power Commission issued its order adopted November 4, 1953, approving maintenance of permanent connection for emergency use only in the above-entitled matter.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 53-9526; Filed, Nov. 10, 1953; 8:49 a. m.]

[Docket No. E-6496]

WASHINGTON WATER POWER CO.

ORDER POSTPONING DATE OF HEARING

The intervening Public Utility Districts, by motion filed October 30, 1953, have requested that the hearing heretofore set for November 9, 1953, on the application of Washington Water Power Company for approval of the merger of Puget Sound Power and Light Company into Washington Water Power Company, be postponed. That hearing was set after the Washington Public Service Commission had issued its order approving the proposed merger.

In support of their motion, Intervenors assert that the order of the Washington Commission is not as yet final inasmuch as they have submitted a petition for rehearing to that Commission. Intervenors further assert that their counsel have been directed to prosecute statutory review proceedings through the courts of the State of Washington should their petition for rehearing be denied. In its answer, filed November 3, 1953, Applicant states that the aforementioned petition for rehearing was denied by the Washington Public Service Commission on November 3, 1953.

As an additional reason in support of their motion, Intervenors point out that Applicant's and Puget's Joint Agreement to Merge will, by its terms, terminate on November 19, 1953, in the event that the merger shall not have been consummated. Applicant answers that the consummation date of the merger agreement has once been extended by agreement of the parties, and may again be extended.

However, no evidence has been presented to the Commission by either Applicant or Intervenors that the termination date has, in fact, been extended, nor have any unequivocal representations been made that it will be.

In view of the fact that the transaction now could not possibly be consummated prior to the present termination date and the uncertainty that it will again be extended, there is considerable probability that the hearing now set for November 9, 1953, would prove to be unnecessary and involve a waste of time and expense.

The Commission therefore finds that it is appropriate in carrying out the provisions of the Federal Power Act to postpone the hearing in this matter presently set for November 9, 1953, as hereinafter ordered.

The Commission orders: The hearing herein previously ordered to be held on November 9, 1953 is postponed to a date

hereafter to be fixed by further order of the Commission.

Adopted: November 4, 1953.

Issued: November 5, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[Docket Nos. G-2035, G-2040, G-2048, G-2049, G-2050, G-2073, G-2091, G-2301]

PANHANDLE EASTERN PIPE LINE CO. ET AL

ORDER TO SHOW CAUSE, REOPENING AND CONSOLIDATING PROCEEDINGS AND FIXING DATE OF HEARING

In the matters of Panhandle Eastern Pipe Line Company, Docket Nos. G-2035, G-2040, G-2048, G-2049, G-2050, G-2073, G-2301; and Panhandle Eastern Pipe Line Company, Southeastern Michigan Gas Company, Citizens Gas Fuel Company, Citizens Gas Company, Michigan Gas Utilities Company, Docket No. G-2091.

Docket Nos. G-2035, G-2040, G-2048, G-2049, and G-2050 are applications of Panhandle Eastern Pipe Line Company (Panhandle) for disclaimers of jurisdiction or authorizations relative to the delivery of natural gas to certain direct sale customers. These dockets were consolidated for hearing together with Docket Nos. G-1767 and G-2047, two other certificate applications and Docket No. G-2091, an investigation on a number of related matters. Hearings were held and decisions were issued by the Presiding Examiner in all but Docket No. G-2091. Exceptions were taken to the Presiding Examiner's Decisions by parties to the proceedings or the Staff in all instances in which decisions were issued. The Commission by its order issued October 23, 1953, affirmed the Examiner's decision in Docket Nos. G-1767 and G-2047.

From an examination of the record, the Examiner's decisions, and the exceptions thereto, two conclusions have become abundantly apparent to us as to Panhandle's proposed sales. First, Panhandle in proposing the direct sales has ignored the provisions of section 7 of its interruptible rate schedules which provide that if it has gas available in excess of that necessary to meet its firm and annual contract volume service requirements, it shall offer such gas first to its buyers which own or control storage facilities to the extent such buyers contract to take such gas for storage and then on an equitable basis to its other customers. Secondly, in at least the one instance in which there was presented the testimony of a customer utility serving the franchise area in which a direct sale was proposed to be made, Panhandle refused to make sales of natural gas to that utility under its interruptible schedule, stating that it was not selling "I" schedule gas. Instead, Panhandle entered into an arrangement with the utility whereby the utility would transport to Panhandle's direct sale customer the volume of natural gas Panhandle was proposing to sell.

Regarding the failure of Panhandle to invoke the provisions of section 7 of its interruptible schedules, we have provided in Docket No. G-2073 for a hearing encompassing the validity of a procedure by which Panhandle has sold excess gas to certain of its resale customers through an arrangement other than its interruptible schedules. Also the subject of that hearing is the question of whether the interruptible rate schedule should be revised. We believe that the hearings on Panhandle's proposed direct sales have shown that the problem of whether Panhandle should be permitted to make direct sales before offering gas under its interruptible schedules to its buyers which own or control storage, or without offering gas to its other customers on an equitable basis is integrally related to the question of possible changes in Panhandle's interruptible rate schedules and that the matters should be presented to us in a single record. With that aim in mind we are reopening the proceedings in Docket Nos. G-2035, G-2040, G-2048, G-2049, G-2050 and G-2091 and consolidating them with Docket No. G-2073.

With respect to Panhandle's proposals to make direct sales within the franchise areas of its utility customers, we believe that the necessity for such arrangements should not result from Panhandle's refusal to sell natural gas to its resale customers under its interruptible rate schedules so that it may render the service as a direct sale. To the end of permitting the resale customers a freedom of choice as to whether they or Panhandle shall serve industrial customers in their franchise areas, we are requiring Panhandle to show cause why it should not be ordered under section 7 (a) of the Natural Gas Act to sell gas to the local distributors of natural gas in the case of the service as proposed by it in Docket Nos. G-2040, G-2049, and G-2050, as well as in the instance of its deliveries to the Mueller Brass Company through the facilities of Southeastern Michigan Gas Company.

In promulgating this order we are not unmindful of the conditions which have prompted our issuance of temporary authorizations in Docket Nos. G-2040, and G-2048 and it is not the purpose of this order to indicate any disposition of these causes. The existence of these temporary authorizations during the period of the further determinations will, however, permit a continuation of that service for which the Commission has found temporary authorization was necessary.

The Commission finds:

(1) It is necessary and appropriate in the public interest, pursuant to the provisions of the Natural Gas Act, particularly sections 7 (a), 14, 15 and 16 thereof, and § 1.6 of the Commission's rules of practice and procedure, for the Commission, upon its own motion, to institute proceedings and to require Panhandle to show cause, if any there be, why it should not be required to sell gas to Citizens Gas Fuel Company, Citizens Gas Company, Michigan Gas Utilities Company, and Southeastern Michigan Gas Company so that these companies may render the service within their particular franchise areas proposed to be rendered by Panhandle at Docket Nos. G-2040, G-2049, and G-2050, and being rendered by Panhandle to the Mueller Brass Company.

(2) It is appropriate for carrying out the provisions of the Natural Gas Act and good cause exists for reopening the proceedings in Docket Nos. G-2035, G-2040, G-2048, G-2049, G-2050, and G-2091, and consolidating such proceedings with Docket Nos. G-2073 and G-2301.

The Commission orders:

(A) Panhandle show cause, if any there be, why it should not be required to sell natural gas to Citizens Gas Fuel Company, Citizens Gas Company, Michigan Gas Utilities Company, and Southeastern Michigan Gas Company so that such companies may render the service within their particular franchise areas proposed to be rendered by Panhandle at Docket Nos. G-2040, G-2049, and G-2050, and being rendered by Panhandle to the Mueller Brass Company.

(B) The proceeding instituted in Paragraph A above is to be designated as Docket No. G-2301.

(C) The proceedings in Docket Nos. G-2035, G-2040, G-2048, G-2049, G-2050, and G-2091 be and the same hereby are reopened and consolidated with Docket Nos. G-2073 and G-2301 for the purpose of hearing.

(D) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by the Natural Gas Act, including particularly sections 4, 5, 7, 14, 15, and 16, and the Commission's rules of practice and procedure, a public hearing be held commencing January 5, 1954 at 10:00 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues presented in the consolidated proceedings.

(E) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Adopted: November 4, 1953.

Issued: November 5, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 53-9530; Filed, Nov. 10, 1953; 8:50 a. m.]

[Docket No. G-2263]

LONE STAR GAS CO.

ORDER FIXING DATE FOR HEARING

Lone Star Gas Company (Applicant) filed an application on September 28, 1953, for a certificate of public convenience and necessity for authority to construct and operate 4.13 miles of 10-inch transmission pipe line, and for an order permitting and approving abandonment of 2.7 miles of existing 10-inch transmission line, all as described in the application on file with the Commission and open to public inspection.

The Commission finds: This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure. Applicant having requested that its application be heard under the shortened procedure provided by the aforesaid rule for noncontested proceedings, and no request to be heard, protest or petition to intervene having been filed subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER on October 15, 1953 (18 F. R. 6578).

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on November 25, 1953, at 9:30 a. m., e. s. t., in a hearing room of the Federal Power Commission, 441 G Street, NW., Washington, D. C., concerning the matters involved and the issues presented by the application: *Provided, however,* That the Commission may, after a noncontested hearing, forthwith dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Adopted: November 4, 1953.

Issued: November 5, 1953.

By the Commission.

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28621]

COAL FROM WESTERN KENTUCKY MINES TO PADUCAH, KY.

APPLICATION FOR RELIEF

NOVEMBER 6, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for the Louisville and Nashville Railroad Company and the Nashville, Chattanooga & St. Louis Railway.

Commodities involved: Coal, in carloads.

From: Western Kentucky mines.

To: Paducah, Ky.

Grounds for relief: Competition with rail carriers, circuitous routes, market competition, and to maintain grouping.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1224, supp. 52.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

[F. R. Doc. 53-9532; Filed, Nov. 10, 1953; 8:50 a. m.]

## NATIONAL LABOR RELATIONS BOARD

SPECIAL PROCESSING OF REPRESENTATION CASES INVOLVING UNIONS OF WHICH AN OFFICER HAS BEEN INDICTED FOR FILING A FALSE NON-COMMUNIST AFFIDAVIT

STATEMENT OF POLICY

Pursuant to the provisions of section 3 (a) of the Administrative Procedure Act (Pub. Law 404, 79th Cong., 2d Sess.), the National Labor Relations Board hereby separately states and currently publishes in the FEDERAL REGISTER the following statement of policy on processing of representation cases involving unions of which an officer has been indicted for filing a false non-Communist affidavit (effective October 23, 1953).

Recent indictments of union officers in connection with the filing of affidavits under section 9 (h) have raised administrative problems of case handling and practical problems of labor relations which require attention. Involved in such criminal proceedings are questions concerning the truth or falsity of the affidavits. A judicial determination in that regard will, of course, have a direct impact upon the compliance status of the labor organization involved.

While the Board, of course, draws no inference of guilt from the issuance of the indictments concerning the falsity of the affidavits or the mala fides of the compliance status of the labor organizations affected, the Board at the same time recognizes that a conviction based on such an indictment would necessarily invalidate any certifications or other official action taken by the Board in reliance on the truth of such affidavits. Moreover, collective bargaining and other rights and relationships will undoubtedly be affected or established as a result of certifications issued by the Board to the labor organizations in question, so that the status quo ante cannot be restored in the event convictions under the indictments should establish that the certifications or other official action should not have issued or been taken.

Accordingly, the Board in order to avoid such irreparable consequences so far as it is possible to do so, and the futile dissipation of its necessarily limited resources, and to avoid a possible frustration of the policies which the act is designed to achieve, has determined to hold in abeyance, pending final disposition of the foregoing indictments any official action which would necessarily result in according final and official status to a labor organization and which would have to be invalidated in the event convictions resulted from the indictments.

The Board has weighed the competing considerations of injury to the affected labor organizations and their members by holding such matters in abeyance, against the broad considerations of practicality, administrative workability and statutory policy, and has concluded that, under all the circumstances, the following procedures, to be put into effect immediately in all representation cases involving such a union, are best calculated to effectuate the policies of the act, and to threaten least unsettling disturbance to labor-management relations and collective bargaining agreements.

1. RC and RM cases in which such union is the only labor organization involved: These cases will be docketed and then held in abeyance pending the outcome of the indictment proceeding.

2. RD cases in which such union is the only labor organization involved: These cases will be processed in the usual manner up to but not including issuance of the certification. At this point, in the event the union has won the election, issuance of the final document should be held in abeyance pending the outcome of the indictment case.

3. RC cases in which such union is the Petitioner but not the only labor organization involved:

(a) In the absence of a contention by the Intervenor or employer that such action would be prejudicial to its interests, these cases should be docketed and then held in abeyance as in 1 above.

(b) Where, upon inquiry, the intervenor or employer contends that withholding further action would be prejudicial to its interests, the case should be fully processed in the usual way (with exception noted in 6) up to but not including certification. At this point, in the event the Petitioner has won the election, issuance of the certification should be held in abeyance pending the outcome of the indictment case.

4. RC cases in which such union is an intervenor: These cases will be processed in the usual manner, with the exception noted in 6, up to but not including issuance of the certification. At this point, in the event such intervenor has won the election, issuance of a certification should be held in abeyance pending the outcome of the indictment case.

5. RM cases in which such union is not the only labor organization involved: These cases should be handled in the manner outlined in 3 above, as though such union were the petitioner and the other unions involved were intervenors.

6. Consent election agreements which provide for such union to appear on the ballot should contain a proviso to Paragraph 5 of the Agreement for Consent Election or the Stipulation for Certification Upon Consent Election as follows:

It is agreed that in the event the ---------- union prevails in the election, the Regional Director shall hold in abeyance issuance of the certification of representatives pending the outcome of the indictment proceedings.

Dated: Washington, D. C., October 23, 1953.

By direction of the Board.

FRANK M. KLEILER,
*Executive Secretary.*

## SECURITIES AND EXCHANGE COMMISSION

[File Nos. 70-3077, 70-3078]

CITIES SERVICE CO. ET AL.

ORDER RELEASING JURISDICTION OVER LEGAL FEES AND EXPENSES

NOVEMBER 5, 1953.

In the matter of Cities Service Company, Republic Light, Heat and Power Company, Inc., Gas Advisers, Inc., File No. 70-3078; National Fuel Gas Company, File No. 70-3077.

The Commission, by order dated July 16, 1953, having authorized, among other things, the acquisition by National Fuel Gas Company ("National"), a registered holding company, of all of the common stocks of Republic Light, Heat and Power Company, Inc. and of Penn-York Natural Gas Corporation, both subsidiaries of Cities Service Company, a registered holding company; and

The Commission in said Order having reserved jurisdiction with respect to the payment of legal fees and expenses incurred or to be incurred by National in connection with said acquisition; and

The record having been completed with respect to the legal fees and expenses of National, namely (1) a fee in the amount of $6,000 to Stryker, Tams & Horner, counsel for National and expenses of said firm amounting to $105.14, (2) a fee in the amount of $6,500 to Kenefick, Bass, Letchworth, Baldy & Phillips, counsel for National and expenses of said firm amounting to $313.93, and (3) miscellaneous expenses of National amounting to $1,051.25; and

The Commission having considered the record with respect to said fees and it appearing that the same are not unreasonable;

*It is ordered*, That the jurisdiction heretofore reserved over fees and expenses for legal services be, and the same hereby is, released.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

[F. R. Doc. 53-9519; Filed, Nov. 10, 1953; 8:48 a. m.]

[File No. 70-3135]

WORCESTER COUNTY ELECTRIC CO.

ORDER AUTHORIZING SALE OF PREFERRED STOCK AT COMPETITIVE BIDDING

NOVEMBER 5, 1953.

Worcester County Electric Company ("Worcester"), a subsidiary of New England Electric System ("NEES"), a registered holding company, having filed an application-declaration with this Commission pursuant to sections 6 (a) (2), 6 (b) and 7 of the Public Utility Holding Company Act of 1935 ("act") and Rules U-42 (b) (2) and U-50 thereunder with respect to the following proposed transactions:

Worcester proposes to create a new class of capital stock, namely, 300,000 shares of $100 par value cumulative preferred stock, and proposes to issue and sell, pursuant to the competitive bidding requirements of Rule U-50, 75,000 shares of such stock. The dividend rate (which shall be expressed in a multiple of .04 of 1 percent and not in excess of 6 percent) and the price to be paid to Worcester (which shall not be less than $100 and shall not exceed $102.75 per share) will be determined by competitive bidding. Bids will be received up to 12 noon on a date, not less than ten days or more than thirty days after the date of the invitation for bids, which the company shall fix by giving notice at least forty-two hours in advance to each prospective bidder.

The proceeds from the proposed sale of preferred stock (exclusive of accrued dividends and the expenses of issuance) are to be applied to the payment of short-term notes payable to NEES and to banks, estimated in the aggregate of $6,500,000 and the balance, if any, of the proceeds will be used to pay for capitalizable expenditures or to reimburse the treasury therefor.

The proposed issue and sale of preferred stock has been approved by the Massachusetts Department of Public Utilities. Worcester requests that the Commission's orders entered herein become effective upon the issuance thereof.

Due notice having been given of the filing of the application-declaration, and a hearing not having been requested of or ordered by the Commission; and the Commission finding that the applicable provisions of the act and rules promulgated thereunder are satisfied and that no adverse findings are necessary, and deeming it appropriate in the public interest and the interest of investors and consumers that said application-declaration, as amended, be granted and permitted to become effective:

*It is ordered*, Pursuant to Rule U-23 and the applicable provisions of said act, that said application-declaration, as amended, be and hereby is, granted and permitted to become effective forthwith subject to the terms and conditions prescribed in Rule U-24 and subject to the further condition that the proposed sale of preferred stock shall not be consummated until the results of competitive bidding with respect thereto shall have been made a matter of record in this proceeding and a further order shall have been entered by this Commission in the light of the record so completed, which order may contain such further terms and conditions as may then be deemed appropriate

*It is further ordered*, That jurisdiction be, and hereby is, reserved over the payment of all fees and expenses incurred or to be incurred in connection with the proposed transactions.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

[F. R. Doc. 53-9520; Filed, Nov. 10 1953; 8:48 a. m.]

[File No. 70-3146]

DELAWARE POWER & LIGHT CO.

NOTICE OF FILING REGARDING ISSUE AND SALE OF SHARES OF COMMON STOCK

NOVEMBER 5, 1953.

Notice is hereby given that an application or declaration has been filed with this Commission, pursuant to the Public Utility Holding Company Act of 1935 ("the act"), by Delaware Power & Light Company ("Delaware"), a registered holding company and a public utility operating company, designating sections 6 (a) and 7 of the act and rules thereunder as applicable to the proposed transactions which are summarized as follows:

Delaware proposes to issue and sell 232,520 shares of its Common Stock, par value $13.50 per share, and in addition to sell such shares, but not in excess of 23,252 shares, as may be purchased for the purpose of stabilizing the price of the common stock. The 232,520 shares of common stock will be offered to stockholders in accordance with their preemptive rights and upon the basis of one share for each seven shares. Transferable warrants evidencing the right to subscribe will be issued to common stockholders of record as of the close of business on November 25, 1953. Subject to such rights of the stockholders, the stock will also be offered to employees of Delaware and its subsidiaries in an amount not exceeding 150 shares per employee. The balance, if any, of the stock not subscribed for by holders of warrants and employees will be sold to underwriters.

The Board of Directors of Delaware will, not later than 12:00 o'clock noon on November 23, 1953, determine the offering price of the stock to stockholders and to employees, which price will be specified in the bids submitted by underwriters as the price to be paid the company for any unsubscribed stock. Immediately following determination by the Board of Directors of such offering price, notice of the price will be given to prospective bidders and will be publicly announced by the company. Bids for the unsubscribed stock will specify the compensation to be paid the underwriters.

Delaware proposes that, for the purpose of stabilizing the price of its common stock, it may purchase up to 23,252 shares of its common stock on the New York Stock Exchange, the Philadelphia-Baltimore Stock Exchange, in the over-the-counter market, or otherwise. Such stabilization, if commenced, will be terminated not later than the time fixed for the acceptance of a bid for the purchase of the unsubscribed stock. Shares acquired by Delaware as a result of such stabilization will be included as part of the unsubscribed stock which will be sold to the underwriters.

Delaware requests that the period between the publication of the invitation for bids and the time of opening of bids be shortened to seven days in order that bids for the stock may be opened on November 25, 1953.

The net proceeds from the proposed sale of common stock will be used to finance a portion of the construction program of Delaware and its two subsidiaries which, it is contemplated, will require expenditures of approximately $30,000,000 in 1953 and 1954.

The issuance of the warrants and the issuance and sale of the 232,520 shares of common stock was approved by the Public Service Commission of Delaware by order dated October 15, 1953.

It is requested that the Commission issue its order herein to become effective on November 17, 1953.

Notice is further given that any interested person may, not later than November 16, 1953, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reason or reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, the application or declaration, as filed or as amended, may be granted or permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rules U-20 and U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

# FEDERAL REGISTER

VOLUME 18 NUMBER 222

Washington, Friday, November 13, 1953

## TITLE 12—BANKS AND BANKING

### Chapter II—Federal Reserve System

#### Subchapter A—Board of Governors of the Federal Reserve System

[Reg F]

#### PART 206—TRUST POWERS OF NATIONAL BANKS

INTERPRETATION; AGGREGATE INVESTMENT IN COMMON TRUST FUND

§ 206.110 *Aggregate Investment in Common Trust Fund.* (a) The Board of Governors has been requested to interpret the following sentence of subparagraph (5) of § 206.17 (c):

No funds of any trust shall be invested in a participation in a Common Trust Fund if such investment would result in such trust having invested in the aggregate in the Common Trust Fund an amount in excess of 10 percent of the value of the assets of the Common Trust Fund at the time of investment, as determined by the trust investment committee, or the sum of $100,000 whichever is less.

The specific question was whether (1) the actual amount previously invested in participations in the Common Trust Fund or (2) the present market value of such participations, should determine the amount of additional investments, if any, which may be made in such participations.

(b) It is the Board's view that under this language of this part the additional amount which a trust may invest in a Common Trust Fund is determined by the dollar amount which the trust actually invested in the participations which it now holds, rather than by the present market value of such participations. For example, if a total of $75,000 was paid for units purchased for the trust on previous occasions, the amount which could now be invested would be $25,000 (assuming that $100,000 does not exceed 10 percent of the present value of the assets of the common trust fund), regardless of the present market value of the units already held by the trust.

(Sec. 11 (k), 38 Stat. 262; 12 U. S. C. 248 (k). Interprets or applies secs. 2–4, 24 Stat. 18, 19, sec. 1, 40 Stat. 1043, as amended, sec. 1, 44 Stat. 1225, as amended, sec. 11 (k), 38 Stat. 261 as amended, 53 Stat. 68, as amended; 12 U. S. C. 30–33, 34 (a), 248 (k), 26 U. S. C. 169)

[Cease and desist order, National Blind Industries, Inc., et al., Washington, D. C., Docket 6036, October 20, 1953]

*In the Matter of National Blind Industries, Inc., a Corporation, and Walter O. Ulrey, Frances D. Lehman, and David A. Ulrey, Individually and as Officers of National Blind Industries, Inc.*

This proceeding was heard by William L. Pack, hearing examiner, upon the complaint of the Commission, respondents' answers, and hearings at which testimony and other evidence, duly recorded and filed in the office of the Commission, in support of and in opposition to the allegations of the complaint, were introduced before said examiner, theretofore duly designated by the Commission.

Thereafter the proceeding regularly came on for final consideration by said examiner on the complaint, answer, testimony and other evidence and proposed findings as to the facts and conclusions submitted by counsel supporting the complaint and by certain of the respondents (oral arguments not having been requested); and said examiner, having duly considered the matter and having found that the proceeding was in the interest of the public, made his initial decision comprising certain findings as to the facts,[1] conclusion drawn therefrom,[1] and order, including order to cease and desist and order of dismissal as to certain respondents.

No appeal having been filed from said initial decision of said hearing examiner, as provided for in Rule XXII, nor any other action taken as thereby provided to prevent said initial decision becoming the decision of the Commission thirty days from service thereof upon the parties, said initial decision, including said order to cease and desist, accordingly, under the provisions of said Rule XXII became the decision of the Commission on October 20, 1953.

Said order to cease and desist is as follows:

*It is ordered*, That respondent National Blind Industries, Inc., a corporation, and its officers, and respondent David A. Ulrey, individually and as an officer of said corporation, and respondent's representatives, agents and employees, directly or through any corporate or other device, in connection with the offering for sale, sale and distribution of house numbers, woven goods or any other products in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Representing, directly or by implication, that respondents have facilities for training, or that they do train, blind persons.

2. Representing, directly or by implication, that contributions received from the public will be used to train or rehabilitate the blind or otherwise used for the benefit of the blind.

3. Using as a part of respondents' corporate or trade name the words "National Industries for the Blind."

*It is further ordered*, That the complaint be, and it hereby is, dismissed as to respondents Walter O. Ulrey and Frances D. Lehman.

By "Decision of the Commission and Order to File Report of Compliance", Docket 6036, October 20, 1953, which announced and decreed fruition of said initial decision, report of compliance was required as follows:

*It is ordered*, That the respondents, National Blind Industries, Inc., a corporation, and David A. Ulrey, individually and as an officer of said corporation, shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing, setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: October 20, 1953.

By the Commission.

[SEAL] ALEX. AKERMAN, Jr., *Secretary.*

# TITLE 26—INTERNAL REVENUE

## Chapter I—Internal Revenue Service, Department of the Treasury

### Subchapter C—Miscellaneous Excise Taxes

[T. D. 6051; Regs. 3]

### PART 182—INDUSTRIAL ALCOHOL

COMPLETELY DENATURED ALCOHOL FORMULAE; MISCELLANEOUS AMENDMENTS

The purpose of these amendments is to provide more flexibility in the selection of denaturants which may be authorized for use in Specially Denatured Alcohol Formula No. 29, by eliminating the restrictive requirement that any alternate denaturant must be a chemical produced from ethyl alcohol. The amendments will permit the use as denaturants of chemicals other than those produced from ethyl alcohol. These amendments are considered necessary since present authorized denaturants have been found unsatisfactory for modern chemical manufacturing processes. Accordingly, the Appendix to Regulations 3, "Industrial Alcohol" (26 CFR Part 182; 7 F. R. 1858.), as amended, is hereby amended as follows:

PARAGRAPH 1. The composition of Specially Denatured Alcohol Formula No. 29 is amended to read as follows:

To every 100 gallons of ethyl alcohol add: One gallon of 100 percent acetaldehyde or 5 gallons of an alcoholic solution of acetaldehyde containing not less than 20 percent acetaldehyde, or not less than 1 part by weight if solid, or volume if liquid, of any chemical that meets with the approval of the Commissioner.

This formula is restricted to processes where the alcohol loses its identity as alcohol by being converted into other chemicals. Where it is desired to use any chemicals other than actaldehyde or an alcoholic solution of acetaldehyde for Formula No. 29, the use of such chemicals shall be subject to approval by the Commissioner as to kind and amount required.

PAR. 2. The specifications for denaturant Ethylamines, listed immediately following the specifications for Ethyl Acetate in the "Specifications for Denaturants in Specially Denatured Alcohol," are revoked.

PAR. 3. The specifications for denaturant Ethyl Propionate, listed immediately following the specifications for Ethyl Ether in the "Specifications for Denaturants in Specially Denatured Alcohol," are revoked.

PAR. 4. The list "Denaturants Authorized for Completely and Specially Denatured Alcohol," is amended by striking therefrom the following:

Ethyl propionate ..... S D 29
Ethylamines ..... S. D. 29

The provisions of these amendments are not to be construed as restricting the use of alternate denaturants such as "GC–78," and "GC–79," which have been previously authorized.

(53 Stat. 375; 26 U. S. C. 3176. Interprets or applies 53 Stat. 355, 358, 373, as amended; 26 U. S. C. 3070, 3105, 3170)

Because the amendments made by this Treasury decision are of a liberalizing character, it is unnecessary to issue this Treasury decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitations of section 4 (c) of said act.

This Treasury decision shall be effective upon its publication in the FEDERAL REGISTER.

[SEAL] T. COLEMAN ANDREWS, *Commissioner of Internal Revenue.*

OCTOBER 9, 1953.

Approved: November 6, 1953.

M. B. FOLSOM, *Acting Secretary of the Treasury.*

[F. R. Doc. 53-9588; Filed, Nov. 12, 1953; 8:51 a. m.]

[T. D. 6050; Regs. 10]

### PART 185—WAREHOUSING OF DISTILLED SPIRITS

APPROVAL OF ALTERNATE OPERATIONS OF A BOTTLING-IN-BOND DEPARTMENT AS A TAXPAID BOTTLING HOUSE

In order that the storekeeper-gauger in charge at an internal revenue bonded warehouse, in lieu of the Assistant Regional Commissioner, may approve the alternate operation of the bottling-in-bond department of such warehouse as a taxpaid bottling house, Regulations 10 (26 CFR Part 185) are amended as follows:

PARAGRAPH 1. Section 185.270 is amended as follows:

(A) By inserting immediately after the words "taxpaid bottling house" in the proviso of the first sentence, the following: "is for a period of twenty-four hours, or multiples thereof, concurrent with the calendar day, or days, as the case may be, and".

(B) By striking the word "district supervisor" in the two places they appear in the last sentence and inserting in lieu thereof in the first instance "Assistant Regional Commissioner" and in the second instance "storekeeper-gauger in charge of the warehouse".

PAR. 2. Section 185.271 is amended by striking the words "district supervisor" and inserting in lieu thereof "storekeeper-gauger in charge of the warehouse".

PAR. 3. Section 185.272 is amended as follows:

(A) By striking the words "district supervisor" in the first sentence of paragraph (a) and inserting in lieu thereof "storekeeper-gauger in charge of the warehouse".

(B) By amending the second sentence of paragraph (a) which begins "The form shall" to read as follows: "The form shall be executed in accordance with the instructions printed thereon or issued in respect thereto, and as required by this part."

(C) By inserting after the second sentence of paragraph (a) the following new sentence: "Upon approval of Form 404, the storekeeper-gauger in charge will forward the original copy to the Assistant Regional Commissioner, deliver one copy to the proprietor and retain the remaining copy for his files."

PAR. 4. Section 185.273 is amended as follows:

(A) By striking the words "district supervisor" in the first sentence of paragraph (a) and inserting in lieu thereof "storekeeper-gauger in charge of the warehouse".

(B) By amending the second sentence of paragraph (a) which begins "The form shall" to read as follows: "The form shall be executed in accordance with the instructions printed thereon or issued in respect thereto, and as required by this part."

(C) By inserting after the second sentence of paragraph (a) the following new sentence: "Upon approval of Form 404, the storekeeper-gauger in charge will forward the original copy to the Assistant Regional Commissioner, deliver one copy to the proprietor and retain the remaining copy for his files."

(53 Stat. 375; 26 U. S. C. 3176)

Because the changes made are of an administrative character, it is found that it is unnecessary to issue this Treasury decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitations of section 4 (c) of said act.

This Treasury decision shall be effective upon the date of publication in the FEDERAL REGISTER.

[SEAL] JUSTIN F. WINKLE,
*Acting Commissioner of Internal Revenue.*

Approved: November 6, 1953.

M. B. FOLSOM,
*Acting Secretary of the Treasury.*

[F. R. Doc. 53-9589; Filed, Nov. 12, 1953; 8:51 a. m.]

## TITLE 33—NAVIGATION AND NAVIGABLE WATERS

### Chapter II—Corps of Engineers, Department of the Army

PART 204—DANGER ZONE REGULATIONS

ALBEMARLE SOUND, PAMLICO SOUND AND ADJACENT WATERS, NORTH CAROLINA

Pursuant to the provisions of section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U. S. C. 1), and Chapter XIX of the Army Appropriation Act of July 9, 1918 (40 Stat. 892; 33 U. S. C. 3), § 204.54 establishing and governing the use and navigation of danger zones for naval aircraft operations in Albermarle Sound, Pamlico Sound, and adjacent waters, North Carolina, is hereby amended, as follows:

§ 204.54 *Albemarle Sound, Pamlico Sound and adjacent waters, N. C.; danger zones for naval operations.* • • •

(b) *Target and bombing areas*—(1) *Along north shore of Albemarle Sound*—(i) *Western area.* Beginning at a point on the north shore of Albemarle Sound where the eastern highway bridge intersects the shore at Sandy Point; thence southerly along the eastern side of the bridge to the northern end of the draw; thence northeasterly to latitude 36°02′18″, longitude 76°19′30″; thence northwesterly to latitude 36°04′18″, longitude 76°20′20″; thence 23°15′ true to the shore; and thence southwesterly along the shore and across the mouth of Yeopim River, to the point of beginning.

(ii) *Eastern area.* Beginning on the north shore of Albemarle Sound at the easternmost tip of Harvey Point; thence southeasterly to Perquimans Bluff Flats Buoy; thence southeasterly to latitude 36°03′06″, longitude 76°16′43″; thence southwesterly to latitude 36°02′18″, longitude 76°19′30″; thence northwesterly to latitude 36°04′18″, longitude 76°20′20″; thence 23°15′ true to the shore; and thence northeasterly along the shore to the point of beginning.

(2) *Along south shore of Albemarle Sound; Target and bombing area.* Beginning at the northernmost point of Laurel Point; thence to Laurel Point Light; thence to latitude 36°02′40″, longitude 76°04′26″; thence to Lewis Point; thence westerly along the shore to a point bearing 68°, 2,200 yards from Scuppernong River Entrance Light; thence 263°, to the shore south of Bull Creek entrance; thence northerly along the shore and across the entrance to Bull Creek to the point of beginning; excluding from this area a passage 600 yards in width the center line of which extends due north from Scuppernong River Entrance Light.

• • • • •

(d) *The regulations.* • • •

(2) *Target and bombing areas.* The areas described in paragraph (b) (1) (i) and (2) of this section will be used as target and bombing areas by naval aircraft during daylight only. The area described in paragraph (b) (1) (ii) of this section will be used as a target and bombing area for both day and night operations. No use will be made of these areas for target and bombing operations during the period 30 days prior to and during the annual duck hunting season as established by the State of North Carolina. Dummy ammunition, water-filled and smoke bombs will be used, except during wartime when live ammunition and bombs may be used. The areas will be open to navigation, except for brief periods when target and bombing exercises are being conducted by naval aircraft. The areas will be patrolled and vessels shall clear the area under patrol upon being warned by the surface patrol craft or when "buzzed" by patrolling aircraft. No vessel shall enter the areas described in paragraph (b) (1) (i) and (2) of this section until the surface patrol craft and patrol aircraft leave the area or areas. As a further means of warning vessels of naval aircraft operations in the area described in paragraph (b) (1) (ii) of this section a cluster of flashing red lights at night and a large red flag by day will be displayed from the range observation tower located in the approximate center of the shore side of this area. No vessel shall enter the area until the surface patrol craft and patrol aircraft leave the area and the tower signals are discontinued.

• • • • •

[Regs., October 21, 1953, 800.2121 (Albemarle Sound, N. C.)—ENGWO] (40 Stat. 266 292; 33 U. S. C. 1, 3)

[SEAL] WM. E. BERGIN,
*Major General, U. S. Army, The Adjutant General.*

[F. R. Doc. 53-9587; Filed, Nov. 12, 1953; 8:51 a. m.]

## TITLE 35—PANAMA CANAL

### Chapter I—Canal Zone Regulations

PART 24—SANITATION, HEALTH, AND QUARANTINE

DESIGNATION OF COUNTRIES WHERE FOOT-AND-MOUTH DISEASE OR RINDERPEST EXISTS; IMPORTATIONS PROHIBITED

Pursuant to the authority vested in the Governor by Rule 119qq of Executive Order No. 4314 of September 25, 1925, as amended by Canal Zone Order No. 15 of July 15, 1948 (35 CFR 24.102), § 24.102a, as amended by Governor's regulations of October 14, 1952, 17 F. R. 10559, and October 15, 1953, is hereby further amended by adding the Channel Islands and the Island of Martinique to, and deleting Canada, Island of Jersey, and Norway from, the list of designated countries in which it is determined that foot-and-mouth disease or rinderpest exists.

(Sec. 1, 39 Stat. 527, as amended; 2 C. Z Code 371, 372, 48 U. S. C. 1310)

Issued at Balboa Heights, Canal Zone, October 30, 1953.

[SEAL] J. S. SEYBOLD,
*Governor.*

[F. R. Doc. 53-9572; Filed, Nov. 12, 1953; 8:49 a. m.]

## TITLE 36—PARKS, FORESTS, AND MEMORIALS

### Chapter II—Forest Service, Department of Agriculture

PART 221—TIMBER

MISCELLANEOUS AMENDMENTS

Sections 221.5, 221.6, 221.7, 221.9, 221.11 to 221.19 inclusive, and 221.29, Part 221, Chapter II, Title 36, Code of Federal Regulations, are superseded by the following regulations, effective upon publication in the FEDERAL REGISTER.

*Explanatory notes.* In this document the following changes are made:

1. Section 221.5: Changes "agreement" to "contract."

2. Section 221.6: Changes "agreements" to "contracts."

3. Section 221.7: The title of this section is changed from *Reappraisals* to *Rate redetermination* because this term more clearly expresses what is done.

Redetermination of rates for required deposits is added because there may be need to adjust such rates at time of rate redetermination to reflect current requirements for sale area betterment and slash disposal.

The term "chiefly for pulpwood" is eliminated in the last clause of the first sentence. This change will authorize a maximum period of ten years before rate redetermination for all classes of large sales in Alaska which require installation of extensive manufacturing facilities. Such provision is needed to obtain advances in utilization of sawlogs as well as for the installation of pulp mills.

4. Section 221.9: Changes "agreement" to "contract."

5. Section 221.11: Changes "agreement" to "contract."

6. Section 221.12: Changes "appraised value" to "advertised value" to clarify the section.

7. Section 221.13: Changes "agreement" to "contract."

8. Section 221.14: Changes "agreement" to "contract."

9. Section 221.15: Changes "agreement" to "contract" and adds to the approved list of log rules a decimalized version of the International ¼″ log rule. Decimalized log rules conserve scaling time without sacrifice in accuracy when a substantial quantity of logs are scaled.

10. Section 221.16: Section restated to clarify conditions under which rights of third parties in a timber sale contract may be recognized by the Forest Service.

11. Section 221.17: Changes "agreements" to "contracts."

12. Section 221.18: Changes "agreement" to "contract."

13. Section 221.19: Changes agreement" to "contract."

14. Section 221.29: Changes "agreement" to "contract."

§ 221.5 *Where timber may be cut.* (a) The cutting of timber may be authorized as prescribed by regulation, under sale, permit, or otherwise on any vacant national forest land whether reserved from the public domain, purchased, acquired by exchange, donated, or transferred from other Federal Agencies, or on land administered by the Forest Service under an authorization for the application to it of the regulations for the occupancy and use of the national forests, except for:

(1) Timber reserved by a grantor of land, during the life of such reservation.

(2) Timber reserved from disposal under other regulations.

(3) Timber on valid claims which were located or entered prior to:

(i) The first publication of the notice of sale.

(ii) The execution of the sale contract or approval of permit for timber where disposal is without publication of notice.

(iii) The signing by the Secretary of Agriculture of a recommendation to the Secretary of the Interior for an exchange in which timber on the area is to be given to the proponent.

(iv) The first publication of a notice of hearing under the provisions of § 221.4 on a cooperative or Federal sustained yield unit including the area.

(b) No person shall prevent or interfere with the cutting and removal of timber under any sale, permit, grant, contract, or establishment of a sustained yield unit because of a location or entry made subsequent to authorized actions for timber disposal.

(c) Timber on any unperfected claim may be disposed of with the written consent of the claimant, or, in emergencies arising from insect infestations, disease infections, or rapid deterioration of timber killed or dying from fire or other causes, without the consent of the claimant.

(d) Timber on an unperfected mining or homestead claim may be cut by the claimant for the actual development of the claim or for uses consistent with the purposes for which the claim was entered. All other cutting by or under authority of the claimant is prohibited on such claims except as may be authorized by sale, permit, or grant in exchange for land.

(e) Timber on unapproved selections or other lands of unsettled status may be sold, in emergencies to prevent serious loss, upon submission of a bond by the operator to pay a stipulated price for the timber cut if title is not perfected adversely to the United States within a specified period, or if the claim of title thereto adverse to the United States is determined to be invalid.

(f) With prior approval by the Regional Forester timber on lands under option by the United States or on offered lands included in an approved land exchange agreement may be sold. Before the sale is made, a cooperative agreement must be made with the owner of the land authorizing the Forest Service to conduct the sale and providing for return of stumpage receipts to the owner if title to the land is not accepted by the United States.

§ 221.6 *Authorization to make sales.* (a) The Chief, Forest Service, is authorized to make timber sales for any amount on any national forest, subject to the maximum cut fixed in accordance with established policies for management of the national forests. He may delegate this authority for amounts not exceeding, in any one sale, 50 million feet board measure, or the equivalent thereof, to Regional Foresters, and the latter may authorize subordinates to make sales not exceeding, in any one sale, 10 million feet board measure or the equivalent. All supervisors and forest officers in charge of Research Centers may make sales of not exceeding $2,000 in value without special authorization and may delegate this authority to subordinate officers.

(b) The Chief, Forest Service, after approval of conditions of sale, may authorize Regional Foresters formally to approve timber sale contracts and related papers in sales exceeding the volume which the Regional Forester has been authorized to sell.

§ 221.7 *Rate redetermination.* All sale contracts exceeding five years in duration, and those of shorter duration to the extent found desirable by the officer authorizing the sale, will provide for the redetermination of rates for stumpage and for required deposits, at intervals ordinarily of not more than three years, and of not more than five years in any case, exclusive of any period allowed for the construction of improvements; but contracts for large sales in Alaska, involving installation of extensive manufacturing facilities may provide that the first redetermination of rates and deposits will be made after not more than ten years, exclusive of any period allowed for the construction of improvements. No redetermined stumpage price shall be less than the base price determined in the original appraisal.

§ 221.9 *Emergency sales.* (a) Timber may be sold in amounts exceeding $2,000 in value in advance of advertisement in cases of unusual emergency. Emergency sale contracts will require that the purchaser bid for the entire offering at not less than the appraised value, and pay for all timber cut under the emergency contract at the rate or rates of the highest bona fide bid submitted.

(b) An unusual emergency exists if the applicant is in immediate need of timber for his own use or to meet urgent public needs, or to maintain opportunities for gainful employment in the locality, or if immediate cutting is necessary because of rapid deterioration of the timber. Emergency sale contracts will be approved by the officer having authority to approve sales of the total quantity being advertised, but Regional Foresters may require advance submission to them of all proposals to make emergency sales.

§ 221.11 *Financial standing of applicant or bidder.* When necessary in the judgment of the approving officer, any applicant or bidder may be required to submit, before expense is incurred in acting on the application or before award is made in response to a bid, a satisfactory showing of financial ability and bidder may be required to show that he has or can obtain equipment and supplies suitable for logging and manufacturing the timber and for meeting the fire precautionary terms of the contract.

§ 221.12 *Private sales of advertised timber.* Forest Officers may sell, within their authorization, any timber previously advertised for competitive bids but not sold because of lack of satisfactory bids, without further advertisement, at not less than the advertised value.

§ 221.13 *Payment in advance of cutting; refunds and transfers.* (a) Timber and forest products must be paid for in advance of cutting under any sale contract or sale permit. Sums deposited in excess of amounts found to be due the United States may be refunded to original depositors, their local representatives, or to successors in interest.

(b) Transfer of deposits may be made from one transaction to another of the same purchaser, or from the credit of the original depositor to a successor in interest, with the written consent of the original depositor or his legal representative.

§ 221.14 *Bonds.* The officer approving any timber sale contract may require the purchaser to furnish a performance bond for satisfactory compliance with its terms.

§ 221.15 *Administration of sales.* (a) No live timber shall be cut under any timber sale contract or permit until marked or otherwise designated for cutting by a forest officer.

(b) The volume of national forest timber in a sale may be determined by scaling, measuring, or counting the logs or other products, or by measuring the trees before cutting. If the contract or permit provides for the determination of volume by tree measurement and the timber has been paid for, the marking or otherwise designating of the tree authorizes cutting and removal. Otherwise no timber cut under any contract shall be removed from the place designated until it has been scaled, measured, or counted by a forest officer, unless such removal is specifically authorized in the contract.

(c) No person except a forest officer shall stamp any timber belonging to the United States upon a national forest with the official marking ax or any instrument having a similar design, or otherwise mark or designate such timber for cutting or removal.

(d) National forest timber sold on scale shall be scaled by the Scribner Decimal C Log Rule, or if the advertisement and contract or permit so state, by the International ¼ inch log rule, by the International Decimal ¼ inch log rule, or by the cubic volume rule, each as used by the Forest Service.

§ 221.16 *Modifications of contract and performance by third party.* (a) Timber sale contracts may be modified only when the modification will apply to unexecuted portions of the contract and will not be injurious to the United States. Modifications permitted by this section may be made by the officer approving the sale, by his successor, or by his superior.

(b) No agreement permitting a third party to acquire the rights of a purchaser under a timber sale contract may be recognized and approved by the Forest Service except in writing signed by the officer approving the sale, his successor, or superior officer. Such approval shall not relieve the purchaser of his responsibilities or liabilities under the timber sale contract and may be given only if (1) the third party is acceptable to the Forest Service as a purchaser of timber under the conditions and requirements then in effect for similar timber sales and assumes in writing all of the obligations to the Forest Service under the terms of the timber sale contract as to the uncompleted portion thereof, or (2) the rights are acquired in trust as security and subject to such conditions as may be necessary for the protection of the public interests.

§ 221.17 *Cancellation of contracts.* (a) Timber sale contracts may be canceled:

(1) For serious or continued violation of their terms.

(2) Upon application, or with the consent of, the purchaser, when such action is of advantage to the United States or not prejudicial to its interests.

(3) Upon application of the purchaser if the condition of the timber has changed materially due to some cause, such as a forest fire or insect infestation, for which the purchaser is not responsible.

(b) Cancellation will be by the Chief, Forest Service, if the amount of the sale exceeded the Regional Forester's authorization and by the Regional Forester in all other cases.

§ 221.18 *Breach of contract.* Action for breach of contract may be brought for violations of the sale contract or where damages to the United States from violation of the contract cannot be recovered otherwise. Such action will be brought only with the approval of the Chief, Forest Service.

§ 221.19 *Sales of naval stores cuppage.* (a) So far as applicable, the regulations governing timber sales will be followed in sales of naval stores cuppage.

(b) The Chief, Forest Service, is authorized to make such sales for any amount on any national forest in accordance with established policies for management of the national forests and to delegate this authority for amounts not exceeding 200,000 cups in any one sale to Regional Foresters. Regional Foresters may delegate this authority to supervisors for amounts not exceeding 40,000 cups, in any one sale.

(c) The Chief may authorize Regional Foresters to formally approve naval stores contracts and related papers in sales exceeding 200,000 cups, in which the conditions of sale have been previously approved by him. Emergency sales will not be made.

§ 221.29 *Timber settlement.* (a) Permission may be granted to cut, damage, or destroy national forest timber without advertisement when necessary for the occupancy of a right-of-way or other authorized use of national forest land.

(b) Payment will be required at the appraised market value of the timber, subject to a minimum rate equivalent to the estimated cost of administration except:

(1) For timber the logging and sale of which are impracticable but which is necessarily killed or cut but not used by any permittee.

(2) For timber necessarily killed or cut in connection with land uses which are of benefit to the national forests.

(3) For timber necessarily killed or cut and used by the permittee which would have been granted free under other applicable regulations.

(4) For timber which will be cut by the permittee who cannot utilize the material, but which the forest officer can sell, under contract or permit, to another party.

(Sec. 1, 30 Stat. 35, as amended; 16 U S C. 476, 551. Interpret or apply sec. 1, 33 Stat. 628, 34 Stat. 1270, as amended; 16 U. S. C. 472, 499 )

In testimony whereof, I have hereunto set my hand and caused the official seal of the Department of Agriculture to be affixed, in the City of Washington, this 9th day of November 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

[F. R. Doc. 53-9576; Filed, Nov. 12, 1953; 8:49 a. m.]

## TITLE 47—TELECOMMUNICATION

### Chapter I—Federal Communications Commission

PART 1—PRACTICE AND PROCEDURE

FILING OF DEFECTIVE APPLICATIONS

1. The Commission desires to amend § 1.361 of its rules, which governs the filing of defective applications.

2. Paragraph (c) of that section now permits the filing of an application not "in accordance with the Commission's Rules" if it is accompanied by either a petition to amend or a request for waiver of the conflicting rule. It is the Commission's opinion that this provision should be revised so as to preclude the filing of applications in conflict with the rules even though accompanied by petitions for appropriate rule making. It is believed such a revision will promote more orderly procedure and particularly will eliminate the pendency before the Commission of applications which cannot be acted upon for extended periods because of their interrelation with complex, unresolved rule making proceedings.

3. It is believed desirable at this time to clear up an ambiguity which may exist with respect to this provision. It is applicable only to applications which, because of the nature of the particular rule involved, can be patently seen to be in conflict with the rule (e. g., minimum mileage separation requirements for television stations, limitation on the number of stations to be commonly owned—see In the Matter of the Application of WSTV, Inc., 8 Pike & Fischer, R. R. 854, 9 Pike & Fischer, R. R. 175.) Where the conflict can be determined only after a hearing evaluating various pertinent factors, this procedural provision is inapplicable. (See In the Matter of Application of WIS–TV Corporation, 9 Pike & Fischer, R. R. 361, 607). It is proposed to amend paragraph (c) so that this distinction is clearly made.

4. The revised paragraph will read as follows:

(c) Applications which, because of the nature of the particular rule, regulation, or requirement involved, are patently not in accordance with the Commission's rules, regulations, or other requirements will be considered defective and will be dismissed unless accompanied by a request of the applicant for waiver of, or exception to, any rule, regulation, or requirement with which the application is in conflict. Such requests shall show the nature of the waiver or exception desired and set forth the reasons in support thereof.[*a*]

5. Authority for the adoption of this amendment is contained in sections 4 (i), 4 (j), and 303 (r) of the Communications Act of 1934, as amended.

6. In view of the fact that the amendment adopted herein is procedural in nature, prior publication of notice of proposed rule making under the provisions of section 4 of the Administrative Procedure Act is unnecessary, and the amendment may become effective immediately.

7. *It is ordered*, This 5th day of November, 1953, that, effective upon publication in the FEDERAL REGISTER, § 1.361 of the Commission's rules is amended as set forth herein.

(Secs. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303)

Released: November 6, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9599; Filed, Nov. 12, 1953; 8:52 a. m.]

[*a*] This paragraph shall not apply to applications filed prior to its effective date (November 13, 1953); such applications, which could be accepted for filing even though patently not in accordance with the Commission's rules, regulations, or other requirements if accompanied by an appropriate rule-making petition, will remain on file.

# PROPOSED RULE MAKING

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

### [ 7 CFR Part 906 ]

[Docket No. AO 210–A5]

MILK IN TULSA-MUSKOGEE, OKLA., MARKETING AREA

PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND TO ORDER, AS AMENDED, REGULATING HANDLING

Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of a public hearing to be held in the Auditorium, Agricultural Building, 15th and Quebec, Tulsa, Oklahoma, beginning at 10:00 a. m., c. s. t., November 17, 1953, for the purpose of receiving evidence with respect to emergency and other economic conditions which relate to the handling of milk in the Tulsa-Muskogee, Oklahoma, marketing area and to the proposed amendments hereinafter set forth, or appropriate modifications thereof, to the tentative marketing agreement heretofore approved by the Secretary of Agriculture and to the order, as amended, regulating the handling of milk in the Tulsa-Muskogee, Oklahoma, marketing area. These proposed amendments have not received the approval of the Secretary of Agriculture.

Amendments to the order, as amended, regulating the handling of milk in the Tulsa-Muskogee, Oklahoma, marketing area, were proposed as enumerated below:

Proposed by Pure Milk Producers Association of Tulsa:

1. Delete paragraph (c) of § 906.80 and substitute therefor the following:

(c) On or before the 13th and 27th day of each month the cooperative association which so requests, with respect to producers for whose milk the cooperative association is authorized to collect payment (this authorization to collect payment to be determined by the market administrator), an amount to be equal to the gross sum of the individual payment to the cooperative association for its members' deliveries determined pursuant to paragraphs (a) and (c), respectively, of this section.

2. Delete § 906.31 and substitute therefor the following:

§ 906.31 *Report of payments to nonmember producers and to a cooperative association and its members' deliveries.* On or before the 20th day of each month each handler should submit to the market administrator (a) a report of payment to a cooperative association for its members' deliveries, showing the total pounds of milk and the total pounds of butterfat received from such producers, and the gross amount paid to the cooperative association for its members' deliveries for the preceding month, and (b) producer payroll of nonmember producers for deliveries of the preceding month which shall show (1) the total pounds of milk received from each nonmember producer, the total pounds of butterfat contained in such milk, and the number of days on which milk was received from such producers, including for the months of April through June such producer deliveries of base and excess milk; (2) the amount of payment to each nonmember producer; and (3) the nature and amount of any deduction for charges involved in such payments.

3. Amend § 906.32 by adding the following as paragraph (a) and redesignating the present paragraph (a) as paragraph (b) and the present paragraph (b) as paragraph (c):

(a) Each handler shall submit to a cooperative association for its member-producers the following:

(1) On or before the 25th day of each month a report showing the total pounds of milk received from each such member-producer during the first 15 days of the current month and on or before the 10th day of each month a report for the preceding month which shall show (i) the total pounds of milk received from each such member-producer; (ii) the total pounds of butterfat contained in such member-producers' milk; (iii) the number of days on which milk was received from each such member-producer, including for the months of April through June such member-producer deliveries of base and excess milk.

By the Dairy Branch, Production and Marketing Administration:

4. Make such changes as may be required to make the order in its entirety conform with any amendment thereto which may result from this hearing.

Copies of this notice of hearing, and the order now in effect, may be procured from the Market Administrator, 2635 East 11th Street, Royal Theatre Building, Tulsa 4, Oklahoma, or the Hearing Clerk, United States Department of Agriculture, Room 1353, South Building, Washington 25, D. C., or may be there inspected.

Dated: November 10, 1953.

[SEAL] GEORGE A. DICE,
*Acting Assistant Administrator.*

[F. R. Doc. 53-9642; Filed, Nov. 12, 1953; 8:52 a. m.]

### [ 7 CFR Part 914 ]

HANDLING OF NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

NOTICE OF PROPOSED RULE MAKING WITH RESPECT TO APPROVAL OF EXPENSES AND FIXING OF RATE OF ASSESSMENT FOR 1953–54 FISCAL YEAR

Consideration is being given to the following proposals submitted by the Navel Orange Administrative Committee, established under Marketing Agreement No. 117 and Order No. 14 (18 F. R. 5638), regulating the handling of navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), as the agency to administer the terms and provisions thereof: (1) That the Secretary of Agriculture find that expenses not to exceed $151,937.50 will be necessarily incurred during the period October 1, 1953, through October 31, 1954, for the maintenance and functioning of the committee established under the aforesaid marketing agreement and order, and (2) that the Secretary of Ag-

riculture fix, as the share of such expenses which each handler who first handles oranges shall pay during the fiscal year in accordance with the aforesaid marketing agreement and order, the rate of assessment of $0.0125 per box of oranges handled by such handler as the first handler thereof during such fiscal year.

All persons who desire to submit written data, views, or arguments in connection with the aforesaid proposals should file the same with the Director, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, Room 2077, South Building, Washington 25, D. C., not later than the 10th day after the publication of this notice in the FEDERAL REGISTER. All documents should be filed in quadruplicate.

As used herein, "handle," "handler," "oranges," "fiscal year" and "box" shall have the same meaning as is given to each such term in said marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Issued this 6th day of November 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

[F. R. Doc. 53-9577; Filed, Nov. 12, 1953; 8:49 a. m.]

## [ 7 CFR Part 722 ]

### 1954 CROP OF EXTRA LONG STAPLE COTTON

### NOTICE OF PROPOSED FORMULATION OF MARKETING QUOTA REGULATIONS RELATING TO APPORTIONMENT OF NATIONAL ACREAGE ALLOTMENT TO STATES, COUNTIES, AND FARMS

The Secretary of Agriculture has proclaimed a national marketing quota and a national acreage allotment for the 1954 crop of extra long staple cotton (18 F. R. 6557). Pursuant to provisions of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1301–1393), the Secretary now has under consideration the formulation of regulations pertaining to apportionment of the national acreage allotment among the States (including Puerto Rico) producing extra long staple cotton, apportionment of the State acreage allotments among counties, and the establishment of farm acreage allotments, and other provisions relating to the operation of marketing quotas. There appear below the provisions of the regulations being considered for issuance. Prior to issuing the proposed regulations, consideration will be given to any data, views, and recommendations pertaining to such regulations which are submitted in writing to the Director, Cotton Branch, Production and Marketing Administration, U. S. Department of Agriculture, Washington 25, D. C., within 10 days following the publication of this notice in the FEDERAL REGISTER. The date of the postmark will be considered as the date of any submission.

The provisions of the proposed regulations are as follows:

§ 722.1111 *Basis and purpose.* The provisions of §§ 722.1111 to 722.1128 are issued pursuant to the Agricultural Adjustment Act of 1938; as amended, and govern the establishment of acreage allotments and marketing quotas for the 1954 crop of extra long staple cotton. The latest available statistics of the Federal Government have been used in making the determinations required to be made in connection with §§ 722.1111 to 722.1128.

§ 722.1112 *Definitions.* As used in §§ 722.1112 to 722.1128 and in all forms and documents in connection therewith, unless the context or subject matter otherwise requires, the following terms shall have the following meanings and the masculine shall include the feminine and neuter genders and the singular shall include the plural number:

(a) "Act" means the Agricultural Adjustment Act of 1938 and any amendments thereto heretofore or hereafter made.

(b) "Secretary" means the Secretary, or Acting Secretary, of Agriculture of the United States.

(c) "Assistant Administrator" means the Assistant Administrator for Production, or Acting Assistant Administrator for Production, of the Production and Marketing Administration of the United States Department of Agriculture.

(d) "Director" means the Director, or Acting Director, of the Cotton Branch, Production and Marketing Administration, United States Department of Agriculture.

(e) "Committees": (1) "Community committee" means the persons elected within a community as the community committee pursuant to the Secretary's regulations governing the selection and functions of the Production and Marketing Administration county and community committees (14 F. R. 5916).

(2) "County committee" means the persons elected within a county as the county committee pursuant to the Secretary's regulations governing the selection and functions of the Production and Marketing Administration county and community committees (14 F. R. 5916). In Puerto Rico the PMA Caribbean Area Committee shall, insofar as applicable, perform all functions of the county committee.

(3) "State committeee" means the persons designated by the Secretary as the State committeee of the Production and Marketing Administration. In Puerto Rico the PMA Caribbean Area Committee shall, insofar as applicable, perform all functions of the State committee.

(4) "Review committee" means the review committee appointed by the Secretary as provided in section 363 of the act.

(f) "Person" means an individual, partnership, firm, joint-stock company, corporation, association, trust, estate, or other legal entity, or State or agency thereof. The term "person" shall include two or more persons having a joint or common interest.

(g) "Owner" or "landlord" means a person who owns farm land and rents such land to another person or who operates such land.

(h) "Cash tenant", "standing-rent tenant", "fixed-rent tenant" means a person who rents land from another for a fixed amount of cash or a commodity to be paid as rent.

(i) "Share tenant" means a person other than a sharecropper who rents land from another person and pays as rent a share of the crops or the proceeds thereof.

(j) "Sharecropper" means a person who works a farm in whole or in part under the general supervision of the operator and is entitled to receive for his labor a share of the crops produced thereon or the proceeds thereof.

(k) "Operator" means the person who is in charge of the supervision and conduct of the farming operations on the entire farm.

(l) "Farm" means all adjacent or nearby farm or range land under the same ownership which is operated by one person, including also:

(1) Any other adjacent or nearby farm or range land which the county committee, in accordance with instructions issued by the Assistant Administrator, determines is operated by the same person as part of the same unit in producing range livestock or with respect to the rotation of crops and with workstock, farm machinery, and labor substantially separate from that for any other lands; and

(2) Any field-rented tract (whether operated by the same or another person) which, together with any other land included in the farm, constitutes a unit with respect to the rotation of crops.

A farm shall be regarded as located in the county or administrative area, as the case may be, in which the principal dwelling is situated, or if there is no dwelling thereon it shall be regarded as located in the county or administrative area, as the case may be, in which the major portion of the farm is located.

(m) "Farm acreage allotment" means an acreage allotment established for extra long staple cotton for a farm under the regulations in this subpart.

(n) "Extra long staple cotton" means American-Egyptian, Sea Island and Sealand cotton, including all varieties of the Barbedense species, and any hybrid thereof, and any other cotton in which one or more of these varieties predominates.

(o) "State and county code number" means the applicable number assigned by the Production and Marketing Administration to each State and county for the purpose of identification. In Puerto Rico a comparable identifying number will be used in place of the county code number.

(p) "Serial number of the farm" or "farm serial number" means the serial number assigned to a farm by the county committee.

(q) "Old cotton farm" means a farm having an acreage planted to extra long staple cotton in any one or more of the years 1951, 1952, and 1953.

(r) "New cotton farm" means a farm on which extra long staple cotton is to be planted in 1954 but on which there was no acreage planted to such cotton in any of the years 1951, 1952, or 1953.

(s) "Normal yield" means the average yield of extra long staple lint cotton per acre for the farm, adjusted for abnormal weather conditions, during the five calendar years 1947, 1948, 1950, 1951, and 1952. If for any such year the data are not available or there is no actual yield, then the normal yield for the farm shall be appraised in accordance with instructions issued by the Assistant Administrator, taking into consideration abnormal weather conditions, the normal yield, if any, for the county, and the yield in years for which data are available.

(t) "Normal production" of any number of acres means the normal yield per acre of extra long staple lint cotton for the farm multiplied by such number of acres.

(u) "Actual yield" means the pounds of extra long staple lint cotton per acre determined by dividing the number of pounds of such lint cotton produced on the farm in 1954 by the acreage planted to such cotton on the farm in 1954.

(v) "Actual production" of any number of acres means the actual yield of extra long staple lint cotton per acre for the farm multiplied by such number of acres.

(w) "Producer" means a person who as landlord (other than the landlord of a standing-rent tenant, fixed-rent tenant, or cash tenant), cash tenant, standing-rent tenant, fixed-rent tenant, share tenant, or sharecropper is entitled to all or a share of the 1954 crop of extra long staple cotton or of the proceeds thereof.

(x) "Acreage planted to extra long staple cotton: (1) *State and county.* The acreages of extra long staple cotton to be used in establishing State acreage allotments are the official acreages for the years 1947, 1948, 1950, 1951, and 1952, as determined by the Bureau of Agricultural Economics of the United States Department of Agriculture. Official estimates of planted acreages shall be used where available from the Bureau of Agricultural Economics; in other cases, the official estimates of the acreages in cultivation on July 1 of each year shall be used.

(2) *Farm.* For purposes of establishing farm acreage allotments for the 1954 crop of extra long staple cotton, the acreage planted to such cotton on a farm means the acreage of land seeded to such cotton. The acreage seeded to extra long staple cotton for the years 1951 to 1953, inclusive, shall be determined as follows:

(i) *For 1951 and 1952.* The acreage measured by the county committee or reported to the county committee for the farm, with such adjustments in the reported acreages as are necessary under instructions issued by the Assistant Administrator. The sum of the reported acreages as adjusted by the county committee plus the measured acreages shall conform with the official planted acreages of the Bureau of Agricultural Economics, United States Department of Agriculture, for the respective years to the extent required under instructions issued by the Assistant Administrator.

(ii) *For 1953.* The acreage measured by the county committee in accordance with instructions issued by the Assistant Administrator.

(y) "Abnormal weather conditions" means weather conditions (including conditions directly resulting therefrom) adversely affecting the planting of cotton, which conditions must have been of sufficient duration to make it impractical to seed land to cotton and must have continued until the end of the planting season for the area. In apportioning the national acreage allotment to States, the Secretary shall make such adjustments in State extra long staple cotton acreages affected by abnormal weather conditions as he determines are necessary. In apportioning the State acreage allotment to counties, adjustments in county acreages of extra long staple cotton for abnormal weather conditions shall be made for applicable years where recommended by the State committee and approved by the Secretary. Any such adjustment in State or county acreages of extra long staple cotton shall be the amount which can be established by reference to available information and data as the net reduction of planted acreage in the State or county attributable solely to abnormal weather conditions. Adjustments for abnormal weather conditions shall take into consideration failure to seed extra long staple cotton because of abnormal weather conditions. Also, in cases where the acreage of extra long staple cotton in cultivation July 1 is used in apportioning allotments to States and counties, abandonment of extra long staple cotton prior to July 1 in excess of normal abandonment by that date because of abnormal weather conditions shall be taken in consideration in determining adjustments, if any, in county acreages of extra long staple cotton for these years.

(z) "Cropland" means the land which in 1953 was tilled or was in regular rotation as determined in accordance with instructions issued by the State committee, excluding any land which constitutes or will constitute, if such tillage is continued, a wind-erosion hazard to the community and also excluding bearing orchards and vineyards (except the acreage of cropland therein) and plowable non-crop open pasture.

§ 722.1113 *Issuance of forms and instructions.* The Director shall cause to be prepared such forms and instructions as are necessary for carrying out the regulations in §§ 722.1111 to 722.1128. The forms shall be issued by the Director, with the approval of the Assistant Administrator, and the instructions shall be issued by the Assistant Administrator. Copies of such forms and necessary instructions shall be furnished free to persons needing them upon request made to the office of the State or county committee or the Director.

§ 722.1114 *Extent of calculations and rule of fractions.* The acreage planted to extra long staple cotton on farms and farm acreage allotments shall be rounded to the nearest one-tenth acre. Fractions of fifty-one thousandths of an acre or more shall be rounded upward, and fractions of fifty-thousandths of an acre or less shall be dropped. For example, 10.051 would be 10.1 and 10.050 would be 10.0.

STATE AND COUNTY ACREAGE ALLOTMENTS

§ 722.1115 *Apportionment of national acreage allotment among States.* The national acreage allotment proclaimed by the Secretary for the 1954 crop of extra long staple cotton shall be apportioned among the States (including Puerto Rico) on the basis of the acreage planted to extra long staple cotton in such States for the years 1947, 1948, 1950, 1951, and 1952, with adjustments for abnormal weather conditions during such years. The acreage allotted to a State pursuant to the provisions of this section is herein referred to as the "State acreage allotment."

§ 722.1116 *Apportionment of State acreage allotment among counties*—(a) *Computed county acreage allotments.* The State acreage allotment for the 1954 crop of extra long staple cotton, less the State acreage reserve established pursuant to paragraph (b) of this section, shall be apportioned to Cochise, Graham, Greenlee, Maricopa, Mohave, Pima, Pinal, Santa Cruz and Yuma Counties, Arizona, and Imperial and Riverside Counties, California, and Alachua, Columbia, Hamilton, Jefferson, Lake, Madison, Marion, Orange, Putnum, Seminole, Suwannee, Union and Volusia Counties, Florida, and Atkinson, Berrien, Cook and Lanier Counties, Georgia, and Chaves, Dona Ana, Eddy, Grant, Hidalgo, Lea, Luna, Otero and Sierra Counties, New Mexico, and the counties in Puerto Rico, and Brewster, Culberson, El Paso, Hudspeth, Jeff Davis, Loving, Pecos, Presidio, Reeves, Terrell and Ward Counties, Texas, on the basis of the acreage planted to extra long staple cotton in 1947, 1948, 1950, 1951, and 1952 (herein referred to as the "base years"), with adjustments for abnormal weather conditions during such years. The acreage allotted to a county pursuant to the provisions of this paragraph is herein referred to as the "computed county acreage allotment". The cotton producing areas located in the northern part of Puerto Rico shall be considered as a county and the cotton producing areas in the southern part of Puerto Rico shall be considered as a county.

(b) *State acreage reserve.* The State committee shall set aside a total State acreage reserve of 10 percent of the State acreage allotment unless, on the basis of the needs of the State as determined under each of the subparagraphs of this paragraph, the State committee recommends a smaller reserve and the Administrator of the Production and Marketing Administration approves such recommendation. The State acreage reserve needs for the purposes set forth in subparagraphs (1) through (4) of this paragraph shall be determined and the acreage so reserved shall be used in accordance with instructions issued by the Assistant Administrator.

(1) *To adjust computed county acreage allotments for trends in the acreage of extra long staple cotton in the county.* The State committee shall, if necessary, use a part of the State acreage reserve to adjust the computed county acreage allotments for trends in the acreage of extra long staple cotton in the county during recent years, excluding 1949. Any such adjustment shall be determined by use of a formula, if needed, applied uniformly to each county in the State.

(2) *To adjust computed county acreage allotments for counties adversely affected by abnormal conditions affecting plantings of extra long staple cotton.* The State committee shall, if necessary, use a part of the State acreage reserve to adjust the computed county acreage allotments for abnormal conditions adversely affecting plantings in the county during the base years. The State committee shall examine the acreage planted to extra long staple cotton for each of the base years to determine whether the acreage planted may have been adversely affected by abnormal conditions. In determining the needs for adjustments for abnormal conditions adversely affecting plantings, the State committee shall take into account (i) abnormal weather conditions adversely affecting plantings during any of the base years; (ii) conditions in counties in which a number of farms are being returned to cotton production or are increasing the acreage in cotton after having been out of production or having been on a reduced level of cotton production because such farms were used to a larger extent than normal in connection with air bases, defense plants and other wartime activities; (iii) abnormal reduction in planted cotton acreage because of an unusual movement of labor from farms in the area or county to war industries or into the armed forces and its return, as compared with such movements in other counties; and (iv) any other abnormal conditions which adversely affected plantings in the county to a greater extent as compared with other counties.

(3) *To make adjustments in acreage allotments for small farms.* The State committee shall determine the acreage required from the State acreage reserve to supplement that part of the county acreage reserve established as provided for in subparagraphs (1) and (2) of § 722.1117 (d) to adjust indicated farm acreage allotments established under § 722.1117 (b) at 15 acres or less. The acreage made available to any county under this subparagraph shall be used by the county committee only for small farm allotments.

(4) *To establish 1954 acreage allotments for new cotton farms.* Where the State committee determines that the needs for acreage to establish acreage allotments for new cotton farms are generally uniform throughout the State, the State committee shall determine whether all the acreage required to establish acreage allotments for new cotton farms shall be provided from the State acreage reserve or the county acreage reserve, or from both such reserves. In determining the source of acreage for new cotton farms the State committee shall take into consideration the acreage requirements determined for such farms from the county surveys, if available, as provided for in § 722.1117 (d) (3). In States where new areas within the counties designated in this section will be brought into the production of extra long staple cotton in 1954, the State committee shall consider establishing an acreage from the State acreage reserve to supplement the acreage set aside by the county committee, if any, from the county acreage reserve for establishing acreage allotments for new cotton farms. The acreage made available to any county under this subparagraph shall be used by the county committee only for new cotton farms.

(c) *Availability of data for inspection.* The following shall be on file and shall be available in the office of the State committee for examination by any interested producer of extra long staple cotton:

(1) The amount of the State acreage reserve;

(2) The formula, if any, and data developed and used under subparagraphs (1) and (2) of paragraph (b) of this section; and

(3) The total acreage set aside from the State acreage reserve for the purposes set forth in subparagraphs (3) and (4) of paragraph (b) of this section.

(d) *County acreage allotment.* The county acreage allotment shall be the sum of (1) the computed county acreage allotment determined under paragraph (a) of this section, and (2) the acreage from the State acreage reserve which are added to the computed county acreage allotment under subparagraphs (1) and (2) of paragraph (b) of this section.

(e) *Administrative areas.* If the county committee with the approval of the State committee, or if the State committee, determines with respect to a county that, because of the difference in types, kinds, and productivity of the soil or other conditions, different areas of the county should be treated separately in order to prevent discrimination, each such area shall, in accordance with instructions issued by the Assistant Administrator, be designated as an administrative area and, insofar as practicable, each such area shall be treated as a county in establishing farm acreage allotments under § 722.1117. The computed county acreage allotment determined under paragraph (a) of this section shall be apportioned to administrative areas on the same basis as to years as that used in apportioning the State acreage allotment to counties, with adjustments for trends in acreage and for abnormal conditions adversely affecting plantings in such areas in the same manner as provided in subparagraphs (1) and (2) of paragraph (b) of this section for counties.

ESTABLISHMENT OF FARM ACREAGE ALLOTMENTS

§ 722.1117 *Apportionment of county acreage allotment*—(a) *Determination of adjusted cropland.* The county committee shall, in accordance with instructions issued by the Assistant Administrator, determine an adjusted cropland acreage for each old cotton farm by subtracting from the acreage of land on the farm which in 1953 was tilled annually or in regular rotation, the sum of the following acreages:

(1) The 1953 acreage of sugarcane for sugar or for syrup and sugar beets for sugar;

(2) The 1953 acreage of tobacco for market (or the 1953 farm acreage allotment, if any, for the applicable type of tobacco if the 1953 acreage has not been determined);

(3) The 1953 acreage of peanuts picked and threshed as determined by the county committee;

(4) The acreage of wheat for harvest in 1954 for market or for feeding to livestock for market (or the 1954 farm acreage allotment for wheat if the wheat acreage has not been determined);

(5) The acreage planted to rice in 1953 for market or for feeding to livestock for market, plus the acreage of other riceland on the farm for which water is available and which is not used for the production of extra long staple cotton under the rotation system for the farm;

(6) The acreage of land devoted in 1953 primarily to orchards or vineyards, less the acreage therein which qualifies as cropland for 1954; and

(7) In Cochise, Graham, Greenlee, Maricopa, Mohave, Pima, Pinal, Santa Cruz and Yuma Counties, Arizona, and in Imperial and Riverside Counties, California, and in Chaves, Dona Ana, Eddy, Grant, Hidalgo, Lea, Luna, Otero and Sierra Counties, New Mexico, and in Brewster, Culberson, El Paso, Hudspeth, Jeff Davis, Loving, Pecos, Presidio, Reeves, Terrell and Ward Counties, Texas, the acreage of cropland in excess of that acreage for which irrigation water is normally available and adequate from available facilities for the production of irrigated crops during the producing season for extra long staple cotton (seeding to maturity).

(b) *Determination of county acreage reserve.* The county committee shall establish a county acreage reserve of not in excess of 15 percent of the county acreage allotment which shall be used to adjust indicated farm acreage allotments determined under paragraph (c) of this section and to establish acreage allotments for new cotton farms under paragraph (d) (3) (ii) of this section. The county acreage reserve shall not be less than 13 percent of the county acreage allotment unless the county committee recommends a smaller acreage reserve and the State committee gives its approval in accordance with instructions issued by the Assistant Administrator. Any approval of a smaller acreage reserve shall be based upon a showing by the county committee that the recommended acreage is adequate to make necessary adjustments in indicated allotments for old cotton farms and to establish allotments for new cotton farms considering all the factors set forth in paragraph (d) of this section.

(c) *Indicated acreage allotments for old cotton farms.* The county acreage allotment, less the county acreage reserve, shall be used to determine indicated allotments for old cotton farms as follows:

(1) *Determination of county cropland factors.* The first county cropland factor shall be computed by dividing the county acreage allotment (less the county acreage reserve) by the total of the adjusted cropland acreages on old cotton farms. Second and additional county cropland factors shall be determined, if necessary, by dividing (i) the available county acreage allotment remaining after maximum indicated farm acreage allotments as defined in subparagraph (2) of this paragraph have been established by (ii) the total of the adjusted cropland acreages for old cotton farms in the county which under the preceding factor were not affected by the maximum allotment provisions. The last county cropland factor computed and applied shall be referred to herein as the "final county cropland factor".

(2) *Indicated farm acreage allotment.* An indicated acreage allotment shall be computed for each old cotton farm by multiplying the adjusted cropland for each such farm by the applicable county cropland factor except that the maximum indicated acreage allotment for any such farm shall not exceed the highest acreage planted to extra long staple cotton on the farm in any of the years 1951, 1952, or 1953.

(d) *Use of county acreage reserve.* The county acreage reserve shall be used by the county committee as follows:

(1) *Adjustments in indicated farm acreage allotments of 5 to 15 acres.* Not less than 20 percent of the county acreage reserve shall, to the extent required, be used by the county committee to adjust indicated farm acreage allotments of 5 to 15 acres, inclusive, determined under paragraph (c) of this section. Such adjustments shall be made so as to establish acreage allotments which are fair and reasonable in relation to the acreage allotments established for similar farms in the community, taking into consideration for the farm the acreages planted to extra long staple cotton in 1951, 1952, and 1953, the land, labor, and equipment available for the production of extra long staple cotton, crop-rotation practices, the soil and other physical facilities affecting the production of extra long staple cotton, and abnormal conditions of production. The county committee shall not make adjustments so as to cause an acreage allotment to be established by any such farm (i) in excess of the acreage which could be planted on the farm in 1954 consistent with sound crop-rotation practices followed in the community, (ii) in excess of the acreage which can be farmed with the labor and equipment currently or normally available on the farm, or (iii) which would cause extra long staple cotton to be planted on land unsuited to the production of such cotton.

(2) *Adjustments in indicated acreage allotments for other farms.* The remainder of the acreage in the county acreage reserve, after meeting the requirements under subparagraphs (1) and (3) of this paragraph, shall be used by the county committee to adjust indicated acreage allotments for farms which are less than 5 acres or more than 15 acres. Such adjustments shall be made so as to establish acreage allotments which are fair and reasonable in relation to the acreage allotments established for similar farms in the community, taking into consideration for the farm the land, labor, and equipment available for the production of extra long staple cotton, crop-rotation practices, the soil and other physical facilities affecting the production of extra long staple cotton, and abnormal conditions of production. The acreages planted to extra long staple cotton on a farm in 1951, 1952, and 1953 shall be considered in determining the land, labor, and equipment available for the production of such cotton and in connection with crop-rotation practices followed on the farm. The county committee shall not make adjustments so as to cause an acreage allotment to be established for any such farm (i) in excess of the acreage which could be planted on the farm in 1954 consistent with sound crop-rotation practices followed in the community, (ii) in excess of the acreage which can be farmed with the labor and equipment currently or normally available on the farm, or (iii) which would cause extra long staple cotton to be planted on land unsuited for the production of such crop.

(3) *Acreage allotments for new cotton farms*—(i) *Determination of county acreage needed for establishing acreage allotments for new cotton farms.* The county committee with the assistance of the community committees shall estimate from county office records and other available sources of information the number of new cotton farms in the county and the adjusted cropland acreage for such farms. The data obtained from such surveys shall be used by the State and county committees as a basis for determining the acreage that will be required for establishing acreage allotments for new cotton farms. The acreage so determined shall not exceed 75 percent of the acreage determined by multiplying the county cropland factor, which shall be estimated where necessary, by the total estimated adjusted cropland acreage on new cotton farms in the county. In determining the acreage to be set aside from the county acreage reserve for establishing acreage allotments for new cotton farms, the county committee shall take into consideration the acreage, if any, to be made available from the State acreage reserve pursuant to paragraph (b) (4) of § 722.1116 for establishing acreage allotments for new cotton farms.

(ii) *Establishment of acreage allotments for new cotton farms.* The operator of each new cotton farm shall file with the county committee a written application requesting a cotton acreage allotment for such farm by not later than the closing date established by the State committee which shall not be earlier than January 15, 1954. The county committee shall determine the eligibility of each applicant's farm for an extra long staple cotton acreage allotment. If the applicant's farm is eligible for an extra long staple cotton acreage allotment, such allotment shall be established by the committee on the basis of land, labor, and equipment available for the production of extra long staple cotton, crop-rotation practices, the soil and other physical facilities affecting the production of extra long staple cotton. The acreage allotment so determined for any such farm shall not exceed the acreage allotment established for old cotton farms in the county which are similar with respect to such factors. The acreage allotments for new cotton farms shall be subject to review and approval by the State committee.

(e) *Use of acreage allocated to county from State acreage reserve for making adjustments in acreage allotments for small farms.* The acreage allocated to a county from the State acreage reserve for making adjustments in acreage allotments for small farms shall be used to adjust indicated farm acreage allotments of 15 acres and less on the basis of the factors set forth in paragraph (d) of this section for adjusting small farm allotments.

(f) *Availability of reserves for inspection by interested cotton producers.* The allocations to the county from the State acreage reserve and the total amount and the distribution of the county acreage reserve and all other data used in establishing farm acreage allotments shall be available in the office of the county committee for examination by any interested cotton producer.

FARM MARKETING QUOTA AND FARM MARKETING EXCESS

§ 722.1118 *Notice of farm acreage allotment and marketing quota.* Immediately upon establishing farm acreage allotments for farms in a county or other local administrative area, the county committee shall mail to the operator of each such farm a written notice of the farm acreage allotment and marketing quota for the farm. The county committee shall also mail to the operator of (1) each new cotton farm for which application for an allotment is made but for which it is determined that no farm acreage allotment and marketing quota will be established and (2) each farm for which no acreage data for extra long staple cotton was reported pursuant to § 722.1124 and the county committee has no basis which appears to be reliable for appraising data for the farm but the county committee believes extra long staple cotton was planted on the farm in one or more of the years 1951, 1952 or 1953, a similar written notice showing "none" as the acreage allotment and marketing quota established for the farm. The notice shall contain at or near the top thereof the following statement: "To all persons who as operator, landlord, tenant, or sharecropper are interested in the farm for which this acreage allotment and marketing quota are established." Notice so given shall constitute notice to all such persons. Such notice shall also contain a brief statement of the procedure whereby application for review of the marketing quota may be made under section 363 of the act. A copy of each notice, containing a notation thereon of the date of mailing the notice to the operator of the farm, shall be kept among the permanent records of the county committee, and upon request a

copy thereof, duly certified as a true and correct copy, shall be furnished without charge to any person who as operator, landlord, tenant, or sharecropper is interested in the extra long staple cotton produced in 1954 on the farm for which the notice is given. Insofar as practicable, the notice for each old cotton farm shall be prepared and mailed to the operator so as to be received prior to December 15, 1953, the date on which the referendum to determine whether farmers producing extra long staple cotton favor or oppose marketing quotas for the 1954 crop will be held.

§ 722.1119 *Amount of the farm marketing quota.* The farm marketing quota for any farm for the 1954 crop of extra long staple cotton shall be the actual production of extra long staple lint cotton for the acreage planted to such cotton on the farm less the farm marketing excess.

§ 722.1120 *Amount of the farm marketing excess*—(a) *Where the acreage planted to extra long staple cotton is determined.* The farm marketing excess for the 1954 crop of extra long staple cotton shall be the normal production of the acreage of such cotton on the farm in excess of the farm acreage allotment. Where it is established by any producer on the farm in connection with an application filed by him or by any other producer on the farm in accordance with regulations to be issued under this part by the Secretary, that the normal production of the excess acreage is larger than the amount by which the actual production of extra long staple cotton in 1954 on the farm exceeds the normal production of the farm acreage allotment, the farm marketing excess shall be adjusted downward to the smaller amount.

(b) *Where the acreage planted to cotton is not determined.* Whenever the determination of the acreage planted to extra long staple cotton in excess of the farm acreage allotment is prevented by the farm operator, the farm marketing excess shall be the total number of pounds of such cotton produced in 1954 on the farm. In the event the farm operator or any other producer on the farm establishes in accordance with regulations to be issued under this part by the Secretary, the total number of pounds of extra long staple cotton produced in 1954 on the farm, the farm marketing excess shall be the number of pounds of such cotton produced in 1954 on the farm in excess of the normal production of the farm acreage allotment.

(c) *Acreage planted on farms without an allotment.* If extra long staple cotton is grown in 1954 on any farm outside the area designated in § 722.1116, or if extra long staple cotton is grown in 1954 on a farm which is located within the area so designated but which does not have an allotment for extra long staple cotton, the farm marketing excess for the 1954 crop of extra long staple cotton shall be the normal production of the acreage of such cotton on the farm where it is established by any producer on the farm in connection with an application filed by him or by any other producer on the farm in accordance with regulations to be issued under this part by the Secretary, that the normal production of the acreage planted to extra long staple cotton exceeds the actual production of such cotton on the farm in 1954, the farm marketing excess shall be adjusted downward to the smaller amount.

§ 722.1121 *Publication of farm acreage allotments and marketing quotas.* One copy of each notice of the farm acreage allotment and marketing quota for farms in a county shall be placed in binders or folders, or in lieu thereof a listing of such allotments shall be prepared, and such notices or listing shall be kept freely available in the office of the county committee for public inspection. If the county is divided into administrative areas, separate binders, folders, or listings shall be prepared and made available for inspection for each administrative area.

§ 722.1122 *Successors - in - interest.* Any person who succeeds to the interest of a producer in a farm, or in a crop of extra long staple cotton, or in extra long staple cotton for which a farm marketing quota and farm marketing excess were established, shall, to the same extent as his predecessor, be entitled to all the rights and privileges incident to such marketing quota and marketing excess and be subject to the restrictions on the marketing of extra long staple cotton.

§ 722.1123 *Marketing quotas not transferable.* A farm marketing quota is established for a farm and may not be assigned or otherwise transferred in whole or in part to any other farm.

MISCELLANEOUS PROVISIONS

§ 722.1124 *Report of data and information for old cotton farms.* The owner, operator, or any other interested person shall furnish the county committee of the county in which the farm is located the data and information required to be entered on Form CN–364 (1953), "Farm Acreage Report", a copy of which may be obtained from the county committee of any county in which extra long staple cotton is grown or from the State committee. The county committee, with the assistance of the community committee, shall, insofar as possible, appraise and otherwise determine the required data and information for any farm for which such report on Form CN–364 (1953) is not filed by a person having an interest in the farm, using for such appraisals and determinations the records of the county office for the farm and other farms in the community and other available information.

§ 722.1125 *Acreage planted to extra long staple cotton*—(a) *Adjustment of acreage planted in excess of farm acreage allotment.* If the acreage determined to be planted to extra long staple cotton on a farm in 1954 is in excess of the farm acreage allotment, the farm operator may, not later than a date established under instructions issued by the Assistant Administrator, adjust such planted acreage to the farm acreage allotment. The date established under such instructions shall afford farm operators a reasonable time for making such adjustments.

(b) *Underplanting the farm acreage allotment.* For any farm on which extra long staple cotton is planted in 1954 and the acreage of such cotton in 1954 is less than the farm acreage allotment for the 1954 crop of such cotton by not more than the larger of 10 percent of the allotment or one acre, an acreage equal to the farm acreage allotment shall be deemed to be the acreage planted to extra long staple cotton on the farm in 1954, and the additional acreage added to the acreage history for extra long staple cotton for the farm shall be added to the acreage history for such cotton for the county and State.

(c) *No credit for overplanting the farm acreage allotment.* Any acreage planted to extra long staple cotton in 1954 in excess of the farm acreage allotment for the 1954 crop of such cotton shall not be taken into account in establishing State, county, and farm acreage allotments for the 1955 and subsequent crops of extra long staple cotton.

§ 722.1126 *Availability of records.* The State and county committee shall make available for inspection by owners or operators of farms receiving acreage allotments for extra long staple cotton, all records pertaining to such cotton acreage allotments and marketing quotas.

§ 722.1127 *Approval of county committee determinations and redelegation of authority by the State committee*—(a) *Approval of county committee determinations.* The State committee shall review all acreage allotments and may correct or require correction of any determinations made under §§ 722.1117 to 722.1125. All acreage allotments shall be approved by the State committee and no official notice of acreage allotment and marketing quota shall be mailed to a farm operator until such allotment has been approved by the State committee.

(b) *Redelegation of authority.* Any authority delegated to the State committee by the regulations in §§ 722.1111 to 722.1128 may be redelegated by the State committee.

REVIEW OF QUOTAS

§ 722.1128 *Review of quotas*—(a) *Review committees.* Any producer who is dissatisfied with the farm acreage allotment or marketing quota established for his farm, or in the case of a new cotton farm with the action of the county committee in refusing to establish a farm acreage allotment or marketing quota for such farm, may, by making application within 15 days after the mailing directly to him of the notice provided for in § 722.1118, have such allotment, quota, or determination reviewed by a review committee composed of three farmers appointed by the Secretary. The review committee shall, upon proper application, review the action of the county committee. The review committee in determining any farm acreage allotment or marketing quota shall, to the same extent as the county committee, be limited to the establishment of a farm acreage allotment or marketing quota in an amount which, under the Act and regulations, should have been established. Unless such application is made within 15 days, the original determination of the farm acreage allotment or marketing quota shall be final. All applications for review shall be made in accordance with the Marketing Quota Review Regulations issued by the Secretary.

(b) *Court review.* If the producer is dissatisfied with the determination of the review committee, he may, within 15 days after notice of such determination is mailed to him by registered mail, institute proceedings against the review committee to have the determination of the review committee reviewed by a court in accordance with section 365 of the act.

Issued at Washington, D. C., this 9th day of November 1953.

[SEAL] M. B. BRASWELL,
*Acting Administrator, Production and Marketing Administration.*

## INTERSTATE COMMERCE COMMISSION

### [ 49 CFR Part 91 ]

[Ex Parte No. 179]

RULES AND INSTRUCTIONS FOR INSPECTION AND TESTING OF MULTIPLE UNIT EQUIPMENT

NOTICE OF PROPOSED RULE MAKING

OCTOBER 23, 1953.

Investigation will be conducted by the Commission in the above-entitled proceeding.

*Nature of investigation.* The investigation is for the purpose of determining what rules and instructions should be prescribed for the inspection and testing of electrically operated units designed to carry freight and/or passengers, operated by a single set of controls.

*Authority for the investigation.* The investigation is made under the provisions of the Locomotive Inspection Act of February 17, 1911, as amended by Acts of March 4, 1915, June 7, 1924, June 27, 1930, and April 22, 1940.

*Reasons for investigation.* There are at present no rules or instructions prescribed by the Commission for the inspection and testing of the multiple unit equipment described above and need for same is shown.

*Proposed rules and instructions.* The rules tentatively proposed by the Commission are contained in Appendix A set forth below. These proposed rules and instructions are subject to any change or changes that may be made as a result of this investigation.

*Written evidence; special rules.* Evidence shall be submitted in written form at the times and in the manner provided for in the special rules of practice contained in Appendix B set forth below.

*Notice to parties in interest.* Notice to the general public will be given by depositing a copy of this notice in the office of the Secretary of the Commission for public inspection, by filing a copy of the notice with the Director, Division of the Federal Register, and by serving copies on each common carrier by railroad subject to the Interstate Commerce Act and on each national organization of railroad employees.

By the Commission, Division 3.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

APPENDIX A

Proposed rules and instructions for inspection and testing of multiple operated electric locomotive units.

SECTION 400. All rules and instructions contained herein apply to electrically operated units designed to carry freight and/or passenger traffic operated by a single set of controls which are defined thus:

(a) Unit or units with propelling motors, control apparatus and one or more control stands.

(b) Unit or units with propelling motors and control apparatus but without control stands.

(c) Unit or units without propelling motors or control apparatus but with control stands.

SEC. 401. (a) The railroad company is held responsible for the general design, construction, inspection, and repair of all units used or permitted to be used on its line. It must know that all inspections, tests, and repairs are made and reports made and filed as required, and that all parts and appurtenances of every unit used are maintained in condition to meet the requirements of the law and these rules and instructions. Nothing contained in these rules and instructions, however, shall be construed as prohibiting any carrier from enforcing additional rules and instructions not inconsistent with those herein contained, tending to a greater degree of precaution against accidents.

(b) The letter "F" shall be legibly stenciled on each side of every unit near the end, which, for identification purposes, will be known as the front end. The unit number shall be legibly stenciled on each side of every unit and shall be shown on the specification, Form No. 4–A.[1]

SEC. 402. The term "inspector" as used in these rules and instructions means, unless otherwise specified, the railroad company's inspector.

SEC. 403. Each unit in service shall be inspected at least once in every 24-hour period and a record made thereof on Form No. 2–B.[1] If any defects are found, a report shall be made on Form No. 2–C[1] to the proper representative of the company. Form No. 2–C shall show the name of the railroad; the initials and number of the unit; the place, date, and time of the inspection; the defects found; and the signature of the inspector. Form No. 2–C shall be approved by an authorized representative of the company. Form No. 2–B and Form No. 2–C shall then be filed in the office of the railroad company at the place where inspection is made and retained for a period of three years. If any defects exist which render the unit unsafe for further service, such defects shall be repaired before the unit is again placed in service.

SEC. 404. The railroad company must know before each trip that the brakes are in safe and suitable condition for service; that the air compressor or compressors are in condition to provide an ample supply of air for the service in which the unit is put; that the devices for regulating all pressures are properly performing their functions; that the brake valve works properly in all positions; and that all condensation has been drained from the air brake system at least once within the preceding 24-hour period.

SEC. 405. (a) The main reservoir system of each unit shall be equipped with at least one safety valve, so located as not to be subject to freezing, the capacity of which shall be sufficient to prevent an accumulation of pressure of more than 10 pounds per square inch above the maximum working air pressure fixed by the chief mechanical officer of the carrier operating the unit.

(b) A suitable governor shall be provided that will stop and start the air compressor within 5 pounds per square inch above or below the pressures fixed.

(c) Compressor governor when used in connection with the automatic air-brake system shall be so adjusted that the compressor will start when the main reservoir pressure is not less than 15 pounds per square inch above the maximum brake-pipe pressure fixed by the rules of the carrier and will not stop the compressor until the reservoir pressure has increased not less than 10 pounds per square inch.

(d) The compressor or compressors shall be tested for capacity by orifice test as often as conditions may require, but not less frequently than once every three months.

(e) The minimum capacity of any compressor permitted in service shall be approximately 80 percent of the capacity of the compressor when new. The diameter of orifice, speed of compressor, and air pressure to be maintained for compressors in common use are given in the following tables. For diagram of orifice see figure 1.

SEC. 406. (a) Every main reservoir before being put into service, and at least once every 12 months thereafter, shall be subjected to hydrostatic pressure not less than 25 percent above the maximum working pressure fixed by the chief mechanical officer, and report made on Form No. 1-A.

(b) The entire surface of each main reservoir shall be hammer tested each

[1] Filed as part of the original document.

time the unit is shopped for general repairs, but not less frequently than once every 18 months, and report made on Form No. 1-A. This test shall be made while reservoir is empty.

SEC. 407. (a) Air gauges shall be so located that they may be conveniently read by the enginemen from their usual position in the operating compartment and shall show main reservoir and brake pipe or equalizing reservoir pressures.

(b) Air gauges shall be tested at least once every three months, and whenever any irregularity is reported. They shall be compared with an accurate deadweight tester, or test gauge constructed for the purpose of testing gauges, and gauges found incorrect shall be repaired before they are returned to service.

SEC. 408. (a) Brake cylinders, slack adjusters, control valves, reducing valves, triple valves, transfer valves, straight air double check valves, brake pipe vent valves, relay valves, magnet valves and electro-pneumatic master controllers shall be cleaned, oiled and tested as often as conditions require to maintain them in safe and suitable condition for service but not less frequently than once every 15 months with the exception of the D-22. UE and PS types which must be cleaned, oiled and tested not less frequently than once every 24 months.

(b) The date of testing or cleaning, and the initials of the shop or station at which the work is done, shall be legibly stenciled in a conspicuous place on the unit, or placed on a card displayed under glass in each unit.

SEC. 409. (a) Minimum brake cylinder piston travel shall be sufficient to provide proper brake shoe clearance when the brakes are released.

(b) On swivel trucks where the brakes on more than one truck are operated by the same cylinder the maximum piston travel shall not exceed 9 inches. Where the cylinder operates the brakes on one truck only and on units equipped with truck mounted brake cylinder the piston travel shall be properly adjusted for that type of brake cylinder.

SEC. 410. (a) Foundation brake gear shall be maintained to the standard for the unit. Levers, rods, brake beams, hangers, and pins shall not be fouled in any way which will affect the proper operation of the brake. All pins shall be properly secured in place with cotters, split keys, or nuts. Brake shoes must be properly fastened in place, and kept approximately in line with the tread of the wheel.

(b) Provision shall be made to prevent brake beams and bottom rods from dropping to the track structure in the event of failure of the brake beam, hangers, or connections.

SEC. 411. (a) Leakage from main air reservoir and related piping shall not exceed an average of 3 pounds per square inch per minute in a test of 3 minutes' duration, made after the pressure has been reduced 40 per cent below maximum pressure.

(b) Brake-pipe leakage shall not exceed 3 pounds per square inch per minute.

(c) With a full service application from maximum brake pipe pressure, and with communication to the brake cylinders closed, the brakes shall remain effectively applied not less than 10 minutes.

SEC. 412. Draw gear and attachments thereto shall be securely attached and properly maintained. Draw gear consisting of automatic couplers with friction or spring draft gear shall be so maintained that the lost motion in each assemblage, not absorbed by the springs or friction devices, will not exceed $\frac{1}{2}$ inch. Standard couplers measuring $5\frac{1}{8}$ inches or more between point of knuckle and guard arm shall not be continued in service.

SEC. 413. Driving and truck axles more than $\frac{1}{2}$ inch under original diameter, or with any of the following defects, shall not be continued in service: Seams, cracked or bent axles, or cut journals.

SEC. 414. (a) Exposed gears shall be provided with guards.

(b) Gears or pinions with any of the following defects shall not be continued in service: Loose on shaft; broken, cracked, or with excessively worn teeth; broken or defective rim fastenings; out of alignment or improperly meshed; split gears with loose or missing bolts.

SEC. 415. Springs or spring rigging with any of the following defects shall be renewed or repaired: Top leaf broken or two leaves in top half or any three leaves in spring broken (the long side of spring to be considered the top); springs with leaves working in band; broken coil springs; broken, cracked, or badly worn equalizer, hanger, bolt, gib, or pin.

SEC. 416. The total lateral motion between wheels and boxes on any pair of wheels shall not exceed one inch.

SEC. 417. (a) Truck center plates shall fit properly and be securely fastened. The male center plate shall extend into the female center plate not less than $\frac{3}{4}$ inch, except on motor trucks constructed to transmit tractive effort through center plate or center pin the male center plate shall extend into the female center plate not less than $1\frac{1}{2}$ inches.

(b) Trucks shall be locked to the unit body and so arranged that the entire truck will lift with the unit body without disengaging the center plates. The attachments shall be of adequate strength and properly maintained. Such provision shall be made on units presently in service and not so equipped when the unit receives general repairs but not later than (24 months after effective date of order.)

(c) Truck bolsters shall be maintained approximately level.

(d) Trucks with any of the following defects shall not be continued in service: Loose column, pedestal, or journal-box bolt; cracked or broken frame, unless properly repaired; loose tie bar; broken or defective motor suspension lug, spring, bar, or bolt; broken or cracked center casting; cracked or broken equalizer, hanger, gib, or pin.

(e) Suspension lugs or bars shall be of ample strength to keep motors secured and provision shall be made to prevent nose-supported motors from falling in case of failure of motor supports.

SEC. 418. (a) Side bearings shall be securely fastened in place. Friction side bearings with springs designed to carry weight shall not be continued in service with more than 25 percent of the springs broken in any one nest.

(b) Friction side bearings unless designed to carry weight shall not be run in contact. Maximum clearance of side bearings shall not exceed $\frac{1}{4}$ inch on each side, or a total of $\frac{1}{2}$ inch on both sides, except where more than two side bearings are used under the same rigid superstructure, the clearance on one pair of side bearings under the same rigid superstructure shall not exceed $\frac{1}{4}$ inch on each side or a total of $\frac{1}{2}$ inch on both sides. The other side bearings under the same rigid superstructure may have $\frac{1}{2}$ inch clearance on each side or a total of one inch on both sides. These clearances apply where the spread of the side bearings is 50 inches or less. Where the spread is greater, the side bearing clearance may be increased in proportion.

SEC. 419. No part or appliance of unit, except the wheels, contact shoes, and train stop or signal devices shall be less than $2\frac{1}{2}$ inches above the top of rail.

SEC. 420. (a) Wheels shall be securely pressed on axles, except wheels and axles of special design and construction where other proper and safe means are provided for holding the wheels on the axles. Prick punching, shimming wheel fit, or pins driven in ends of axles will not be permitted.

(b) When wheels are applied, or wheels are turned, the circumference of the wheels on the same axle shall not vary more than $\frac{1}{16}$ inch.

(c) Wheels used on standard-gauge track will be out of gauge if the inside gauge of flanges, measured on base line, is less than 53 inches or more than $53\frac{1}{2}$ inches.

(d) The distance back to back of flanges of wheels mounted on the same axle shall not vary more than $\frac{1}{4}$ inch.

(e) The minimum height of flange measured from tread shall be one inch.

(f) The maximum taper for tread of truck whels from throat of flange to outside of wheel shall be $\frac{5}{16}$ inch.

SEC. 421. Wrought-steel or steel-tired wheels with any of the following defects shall not be continued in service:

(a) Slid flat, when the flat spot is $1\frac{1}{2}$ inches or over in length.

(b) Flanges having flat vertical surface extending one inch or more from the tread, or flanges $\frac{15}{16}$ inch thick or less.

(c) Burnt rim, shattered rim, spread rim, sub-surface defect, or shelled tread.

(d) Transverse cracks in tread or flange regardless of length.

(e) Cracked or broken plate.

(f) Flanges $1\frac{1}{2}$ inches or more from tread to top of flange.

(g) Out of gauge.

(h) Loose on axle.

(i) Wrought-steel wheels one inch or less in thickness at the rim.

(j) Steel-tired wheels with cracked or broken retaining ring, bolt or tire, or with loose tire.

(k) Steel-tired wheels with tread worn to within ¼ inch of the measuring line which is the inside edge of the limit of wear groove as shown in figures 2, 3, and 4.

SEC. 422. Cast iron or cast steel wheels with any of the following defects shall not be continued in service:

(a) Slid flat, when the flat spot is 1½ inches or over in length.

(b) Flange, plate or bracket, cracked or broken, or with chip from flange exceeding 1½ inches in length and ½ inch in width.

(c) Broken rim, if the tread, measured from the flange at a point ⅝ inch above tread, is less than 3¾ inches in width.

(d) Shelled-out spots one inch long or over, or three shelled-out spots not more than 3 inches apart.

(e) Any seam running lengthwise and within the limit of 3¾ inches from flange.

(f) Flanges having a flat vertical surface extending ⅞ inch or more from the tread, or flange 1 1/16 inches thick, or less, gauged at a point ⅜ inch above the tread.

(g) Wheels with tread worn hollow 5/16 inch or with flanges more than 1½ inches from tread to top of flange.

(h) Cracked hub.

(i) Out of gauge.

(j) Loose on axle.

(k) Cast iron wheels with defective treads on account of brake burn cracks one inch or over in length, or with comby spots ½ inch or over in length.

(l) Cast steel wheels with transverse cracks in treads or flange regardless of length.

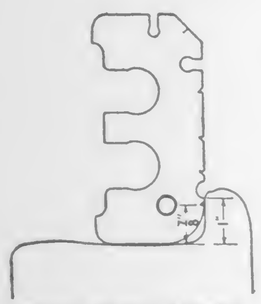

FIGURE 7—Method of gauging worn flanges.

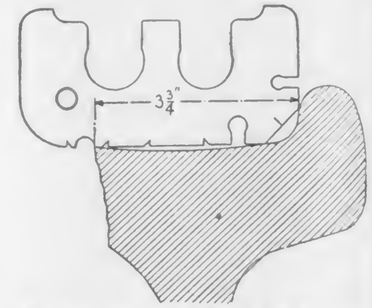

FIGURE 8—Method of gauging broken rims.

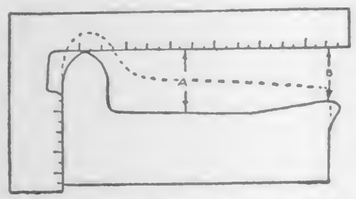

FIGURE 9—Method of measuring tread worn hollow. Tread worn hollow = *A* minus *B* limit, five-sixteenths inch.

SEC. 423. (a) Windows at each end from which a unit may be operated shall be so located and maintained that the enginemen will have a clear view of track and signals from their usual position while operating the unit.

(b) Windows located in line of enginemen's vision when looking ahead from their usual position when operating the unit shall be of shatter-proof glass and equipped with a power operated wiper that will cover sufficient space to provide a clear view of track and signals ahead and an adequate defrosting device. This equipment shall be installed on all units built after (effective date of order) and on units presently in service when same receive general repairs but not later than (24 months after effective date of order).

(c) Floors of operating compartments shall be kept free from accumulations of oil, waste, or unnecessary obstructions.

(d) Floors of operating compartments shall be heat insulated.

(e) Operating compartments shall be provided with heating arrangements that will maintain therein a temperature of not less than 50 degrees F.

SEC. 424. Pilots, when used, shall be securely attached and properly braced. On approximately straight level track the minimum clearance of pilot above the rail shall be 3 inches, and the maximum clearance 6 inches.

SEC. 425. (a) Each unit operated separately and the leading unit of a multiple unit train shall have a headlight which shall afford sufficient illumination to enable a person in the operating compartment who possesses the usual visual capacity required of enginemen to see in a clear atmosphere a dark object as large as a man of average size standing erect at least 800 feet ahead and in front of such headlight; and such headlight must be maintained in good condition.

(b) Such headlights shall be provided with a device, which may be conveniently operated by the enginemen, whereby the light from same may be diminished in yards and at stations or when meeting trains.

SEC. 426. Each unit shall be provided with such classification and marker lights as may be required by the rules of the railroad company operating the unit. When such lights are used they shall be kept clean and be electrically lighted. Such provision shall be made on all units built after (effective date of order). Units presently in service, which are not so equipped, shall be equipped when the unit receives general repairs but not later than (24 months after effective date of order).

SEC. 427. (a) Each unit shall have lights which will provide sufficient illumination for the control instruments, meters, and gauges to enable the enginemen to make accurate readings from their usual operating position. These lights shall be so located, constructed, and maintained, that light will shine only on those parts requiring illumination. There shall also be a light conveniently located to enable the enginemen to easily and accurately read train orders and time tables, and so constructed that it may be readily darkened or extinguished.

(b) Lights shall be so located, constructed or shielded that the light will not interfere with enginemen's vision of track and signals.

(c) All lights may be entirely supplied from storage batteries if desired. Where lights are not supplied from storage batteries, there shall be two or more lighting circuits for providing illumination required by paragraphs (a) and (b) of this section. Battery containers shall be properly vented.

SEC. 428. Each leading unit shall be provided with a suitable whistle or horn so arranged that it may be conveniently operated by the enginemen from their position in the operating compartment.

SEC. 429. Headlights and whistles shall be located in safe and accessible places. Where units are equipped with overhead current collectors, headlights shall be so located, constructed, and arranged that they can be given necessary repairs and attention without requiring a person to mount the roof or become exposed to contact with parts carrying high tension.

SEC. 430. Where sanding apparatus is used it shall be maintained in proper operating condition. Sand pipes shall be securely fastened and arranged to deliver the sand on the rails in front of the wheel contact.

SEC. 431. The train signal system shall be tested and known to be in condition for service before each trip.

SEC. 432. Current collectors shall be properly insulated from the unit structure for the maximum voltage carried by the conductor.

SEC. 433. (a) Pantographs shall be so arranged that they can be operated from the enginemen's usual and proper place in the operating compartment.

(b) Pantographs which automatically rise when released shall be provided with an automatic locking device that will hold them while in down position.

(c) Each pantograph operating on an overhead trolley wire shall be provided with a device for locking and grounding it when in lowest position, which can be applied and released only from a position where the operator will have a clear view of pantograph and roof without mounting the roof. Such grounding will not be required on units with insulated roofs.

(d) Pantograph shoes with cracked or badly worn contact surface or with defective horn shall not be continued in service.

(e) Leaky or defective pantograph operating cylinder or air line connection shall not be continued in service. Air line connections shall afford proper insulation.

SEC. 434. (a) When a unit is equipped with a trolley pole a hook shall be provided that will hold the pole while in down position. This hook shall be securely fastened and properly insulated from the unit structure.

(b) When a unit with a non-insulated roof is equipped with more than one trolley pole, each pole shall be equipped with a device for grounding the pole when it is secured by the hook referred to in paragraph (a) of this section, which can be applied and released only from a position where the operator will have a clear view of the trolley pole and roof without mounting the roof.

(c) Each trolley pole shall be equipped with a trolley pole rope. A retriever or trolley pole catcher shall also be provided.

(d) Where trolley wire has a potential of more than 750 volts, each trolley pole rope shall be insulated from the pole for the maximum voltage carried by the trolley wire.

(e) Trolleys shall not be continued in service if broken or excessively burned, warped, or worn.

SEC. 435. (a) When units are equipped with both third rail and overhead collectors, third-rail shoes shall be deenergized while in yards and at stations when current collection is from overhead conductor and not intermittent from third rail and overhead.

(b) Third-rail shoe beams loose on brackets, split or cracked, or with accumulations of extraneous matter conducive of short circuits shall not be continued in service.

SEC. 436. (a) Each train of one or more units operated by means of a pantograph shall have a suitable emergency pole for operating the pantograph. This pole shall be protected from moisture while not in use and the part which can be safely handled shall be so marked.

(b) Each unit equipped with third-rail shoes shall have a device that will insulate current collecting apparatus from third rail when desired.

SEC. 437. (a) Where current supply is continuously taken from an overhead conductor and lightning protection is not provided along the line of road that will afford adequate protection for the unit, each unit shall be provided with a suitable lightning arrester. In sections where freezing weather is generally encountered, lightning arresters will not be required on units between November 1 and March 1. The current-collector cable shall be tapped for a lightning arrester near the overhead current collector.

(b) The lightning arrester shall be properly grounded.

SEC. 438. All unguarded noncurrent-carrying metal parts subject to becoming charged which are not thoroughly insulated shall be grounded.

SEC. 439. All current-carrying parts connected to circuits with potential of more than 150 volts, except current collectors, shall be insulated, or located or guarded to prevent accidental contact.

SEC. 440. All doors and cover plates guarding current carrying equipment in circuits having a potential of more than 150 volts shall be securely fastened in place, and the inside kept marked with the word "Danger" and the normal voltage of the circuit.

SEC. 441. (a) All current-carrying, hand-operated switches in circuits having a potential of more than 150 volts, which may be operated while under load shall be enclosed in a cabinet or properly covered and be operative from the outside, and means provided to show whether switches are open or closed. Switches which may not be operated while under load shall be guarded against accidental contact and kept plainly marked with the words "must not be operated under load" and the voltage of the circuit.

(b) Circuit breakers, contactors, and fuses shall be maintained in safe and suitable condition for service and shall be so located or guarded that persons will not be injured by their operation.

(c) Oil type circuit breakers shall be equipped with suitable sight glasses or indicators.

SEC. 442. (a) Jumpers or cable connections between units shall not be allowed to hang with one end free.

(b) Cable connections between units and all jumpers shall be thoroughly cleaned, inspected, and tested as often as necessary to maintain them in safe and suitable condition for service, but not less frequently than once each three months. Each jumper carrying current having a potential of 600 volts or more shall be tested by immersing the cable portion in water and subjecting each conductor with another, and with the water, to a difference in potential of not less than one and three-fourths times the normal working voltage for not less than one minute. Date and place of inspection and test shall be legibly stenciled on the jumper or stamped on a tag securely attached to jumper.

(c) Defective cable connections and jumpers shall not be continued in service.

SEC. 443. All cables and wires carrying current shall be in proper condition for service.

SEC. 444. Motors and generators shall be securely fastened in place and properly maintained.

SEC. 445. Transformers shall be securely fastened in place. Liquid filled transformers and related piping shall be maintained free from leaks and the liquid maintained at proper level in transformer cases.

SEC. 446. Rheostats and grid resistors shall be maintained in proper condition for service.

SEC. 447. Not less than once every year an insulation dielectric test of not less than one minute duration shall be applied to all circuits and parts carrying current with potential of more than 150 volts. The voltage applied to circuits other than motor windings, shall be not less than 75 percent above the normal working voltage; the voltage applied to windings shall be not less than 50 percent above the normal working voltage. A careful examination shall be made of any weakness indicated and all defects remedied before the unit is put in use.

SEC. 448. Not less than once every 30 days a careful inspection of all visible insulation and electrical connections shall be made and all defects repaired.

SEC. 449. (a) A specification, Form No. 4–A, shall be filed with the Director of Locomotive Inspection for each unit, and a copy kept in the office of the chief mechanical officer of the company operating the unit. These specifications shall be filed as promptly as conditions permit, but not later than (effective date of order).

(b) When any change is made which affects the data shown on the specification, a corrected specification or an alteration report, Form No. 19–A,[1] showing such changes, shall be filed within 30 days after the changes are made.

SEC. 450. Where units are transferred from one Federal inspection district to another Federal inspection district, assignment list of units shall be supplied to the United States inspector for each of said districts at least once every three months, showing the unit numbers assigned to their respective districts and the reports required by sections 449 to 451, inclusive, shall be sent to the inspector on whose list the unit numbers are shown.

SEC. 451 (a) Not less than once every 30 days each unit in service shall be inspected in accordance with the law and these rules and instructions, and a report made on Form No. 1–A. This report shall be subscribed and sworn to before an officer authorized to administer oaths, by the inspectors who made the inspection, and by the officer in charge of the unit. Within 10 days after each inspection a duplicate of this report shall be filed with the United States district inspector and a copy filed in the office of the mechanical officer.

(b) A copy of the last inspection report shall be kept under glass in a conspicuous place in a compartment in each unit. This must be a duplicate of the report filed with the United States inspector, except it need not be sworn to.

(c) An out-of-service report on Form No. 1–A shall be filed with the United States district inspector for each unit which was out of service for an entire calendar month, or was out of service when due for inspection and remained out for the rest of the month. This report shall show the month covered thereby; the name of the railroad; the initials and number of the unit; the place where unit is out of service; the date removed from service; the reason for being out of service; and shall bear the statement, "Unit will not again be used until inspection is made and report rendered." The report shall give date and place where made.

(d) Out-of-service report shall not be filed until the end of the month covered thereby. It need not be sworn to, but must be signed by the officer in charge of the unit. When out-of-service report has been filed, an inspection must be made and report made on Form No. 1–A before the unit is again returned to service.

SEC. 452. (a) When a unit is permanently retired from service a final report shall be filed with the United States district inspector. The report shall show the name of the railroad; initials and number of the unit; the disposition made of it, whether scrapped or sold, and if sold, to whom. These reports shall bear the statement, "Unit will not again be used by this company." The report shall give date and place where made and be signed and sworn to by the chief mechanical officer.

(b) When the road number of a unit is changed, the first inspection and repair report rendered thereafter should show in the upper right-hand corner the old and new number:

Old No. 000.
New No. XXX.

SEC. 453. (a) The period of time within which inspections and tests are required to be made may be extended without application as hereinafter provided on units which are out of service for one or more months. Time out of service shall be properly accounted for by out-of-service reports and notations made on the back of each subsequent inspection report and cab card for time claimed out of service. Portions of calendar months out of service will not be counted in granting extensions.

(b) The period of time within which orifice test of compressors is required to be made in accordance with section 405 (d), may be extended for a period equal to the full calendar months the unit was out of service since last such test.

(c) The period of time within which hydrostatic and hammer tests are required to be made in accordance with section 406, may be extended for a period equal to the full calendar months the unit was out of service since the last such tests provided such service is performed within two consecutive years.

(d) Insulation dielectric tests of circuits, as required by section 447, may be extended for a period equal to the full calendar months the unit has been out of service.

SEC. 454. In the case of an accident resulting from failure of a unit, or any part or appurtenance thereof, or from coming in contact with an electrically energized part of appurtenance thereof, resulting in serious injury or death to one or more persons, the carrier on whose line the accident occurred shall immediately report such accident by telegram to the director, at his office in Washington, D. C. Such report should state the nature of the accident, number of persons killed or seriously injured, the place at which it occurred and the place where the unit may be inspected. The telegraphic report shall be confirmed by mail, giving a full detailed report of such accident, stating, as far as may be known, the causes, and giving a complete list of the killed and injured.

SEC. 455. Changes in construction which are necessary to meet the requirements of these rules shall be made as rapidly as conditions permit, and all such changes, except as otherwise specified, shall be completed before (6 months after effective date of order).

SEC. 456. (a) (1) Each unit shall be equipped with the same complement of safety appliances as is required for passenger-train cars included in the classification comparable to it set up in the Commission's order of March 13, 1911, as amended. In cases where both ends of a unit do not fall into any single classification set up in the above-mentioned order, as amended, each end and the side at each end shall be provided with the same complement of safety appliances as is required for passenger-train cars of the classification within which each belongs.

(2) Units of construction not covered specifically in the above-mentioned order relative to handholds, sill-steps, ladders, and hand-brakes may be considered as of special construction, but shall have, as nearly as possible, the same complement of handholds, sill-steps, ladders, and hand-brakes as are required for cars of the nearest approximate type.

(b) Any unit equipped with a pilot which extends beyond the end of the unit must also be equipped, as near as possible, with the same complement of pilot sill-steps and pilot beam handholds as is required by the aforesaid order of March 13, 1911, as amended, for steam locomotives used in road service.

(c) Units having headlights which cannot be safely and conveniently reached from end platforms shall be equipped with secure handholds and steps suitable for the use of men in getting to and from such headlights.

SEC. 457. (a) Units built new after (effective date of order) and operated in trains having a total empty weight of 600,000 pounds or more shall have body structure designed to meet or exceed the following minimum specifications:

(1) The unit structure shall resist a minimum static end load of 800,000 pounds at the read draft stops ahead of the bolster on the center line of draft, without developing any permanent deformation in any member of the unit structure.

(2) An anti-climbing arrangement shall be applied at each end, designed so that coupled units under full compression shall mate in a manner which will resist one unit from climbing the other. This arrangement shall resist a vertical load of 100,000 pounds without exceeding the yield point of its various parts or its attachments to the unit structure.

(3) The coupler carrier and its connections to the unit structure shall be designed to resist a vertical downward thrust from the coupler shank of 100,000 pounds for any horizontal position of the coupler, without exceeding the yield points of the materials used. When yielding type of coupler carrier is used an auxiliary arrangement shall be provided, designed in accordance with these requirements.

(4) The outside end of each unit shall be provided with two main vertical members, one at each side of the diaphragm opening. Each main member shall have an ultimate shear valve of not less than 300,000 pounds at a point even with the top of the underframe member to which it is attached. The attachment of these members at bottom shall be sufficient to develop their full shear value. If reinforcement is used to provide the shear value such reinforcement shall have full value for a distance of 18 inches up from the underframe connection, then taper to a point approximately 30 inches above the underframe connection.

(5) Strength of locking means of truck unit body shall be not less than the equivalent of an ultimate shear value of 250,000 pounds.

(b) Units built new after (effective date of order) and operated in trains having a total empty weight of less than 600,000 pounds shall have body structure designed to meet or exceed the following minimum specifications:

(1) The unit structure shall resist a minimum static end load of 400,000 pounds at the rear draft stops ahead of the bolster on the center line of draft, without developing any permanent deformation in any member of the unit structure.

(2) An anti-climbing arrangement shall be applied at each end designed so that coupled units under full compression shall mate in a manner which will resist one unit from climbing the other. This arrangement shall resist a vertical load of 75,000 pounds without exceeding the yield point of its various parts or its attachments to the unit structure.

(3) The coupler carrier and its connections to the unit structure shall be designed to resist a vertical downward thrust from the coupler shank of 75,000 pounds for any horizontal position of the coupler, without exceeding the yield points of the materials used. When a yielding type of coupler carrier is used an auxiliary arrangement shall be provided, designed in accordance with these requirements.

(4) The outside end of each unit shall be provided with two main vertical members, one at each side of the diaphragm opening. Each main member shall have an ultimate shear value of not less than 200,000 pounds at a point even with the top of the underframe member to which it is attached. The attachments of these members at bottom shall be sufficient to develop their full shear value. If reinforcement is used to provide the shear value such reinforcement shall have full value for a distance of 18 inches up from the underframe connecton, then taper to a point approximately 30 inches above the underframe connection.

(5) Strength of locking means of truck to unit body shall be not less than the equivalent of an ultimate shear value of 250,000 pounds.

SEC. 458. (a) Monthly inspection and repair report, Form No. 1–A, shall be as shown in Appendix A–1,[1] printed on a good grade of pale blue paper, size 6 by 9 inches.

(b) Daily inspection and repair reports, Forms Nos. 2–B and 2–C, shall be as shown in Appendix A–2.[1]

(c) Specification, Form No. 4–A, shall be as shown in Appendix A–3,[1] size 8 by 10½ inches.

(d) Alteration report, Form No. 19–A, shall be as shown in Appendix A–4,[1] size 8 by 10½ inches.

[1] Filed as part of the original document.

APPENDIX B—SPECIAL RULES OF PRACTICE APPLICABLE IN DOCKET EX PARTE NO. 179

In addition to the general rules of practice, the following special rules will govern these proceedings.

1. *Submission of evidence in written form with affidavit attached.* The Commission desires that all evidence be submitted in written form with affidavits attached. Exhibits may be attached to the written statements, and such exhibits should conform to the General Rules of Practice, particularly to Rules 81 to 84 inclusive. All evidence of each witness that is submitted in exhibit form should, so far as practicable, be incorporated in a single exhibit. The written evidence, with or without exhibits attached, will be referred to as verified statements, and each verified statement will be assigned a serial number by the Commission.

2. *Evidence-in-Chief.* Evidence-in-Chief of all parties should be submitted in the form of verified statements as provided in paragraph 1. Such verified statements, with accompanying exhibit or exhibits, should be made available to the Commission by filing 25 copies thereof with the Secretary of the Commission on or before January 1, 1954. Copies of such verified statements of the railroads should be made available to the parties by mailing a copy to any person who duly makes a request therefor to R. L. Davis, Jr., General Counsel, Delaware, Lackawanna & Western Railroad Co., 140 Cedar St., New York 6, N. Y., on or before January 1, 1954. Parties other than the railroads will be expected to furnish the railroads with twenty-five (25) copies of all verified statements, such copies to be sent to R. L. Davis, Jr., at the address above specified, and to also furnish a copy thereof to any other party who may make a request therefor to the Secretary of the Commission on or before December 1, 1953. A list of the parties upon whom copies of verified statements should be served will be furnished the parties by the Secretary.

3. *Objections to evidence.* Notice of objections to receipt in evidence of any verified statement or any part thereof should be filed with the Secretary of the Commission on or before January 15, 1954. If the evidence is submitted on behalf of the railroads, a copy of the notice should be immediately mailed to R. L. Davis, Jr.; if the evidence is submitted on behalf of any other party, a copy of the notice should be immediately mailed to the witness or his attorney.

4. *Rebuttal evidence.* Evidence on rebuttal by any party must be designated as such, and filed with the Secretary of the Commission on or before February 1, 1954, even if the original evidence is objected to as provided in paragraph 3 hereof. Its presentation and distribution will be governed by the rules set forth in paragraphs 1 and 2 hereof.

5. *Cross-examination of witnesses.* If cross-examination of a witness is desired by any party written request therefor must be given to the Secretary of the Commission and to the witness, or his authorized attorney on or before February 1, 1954. The Commission will fix the time and place for cross examination.

6. *Record* The evidence presented and admitted pursuant to the provisions of the foregoing paragraphs of these special rules shall constitute the entire record in these proceedings upon which decision will be made

SMALL TRACT CLASSIFICATION ORDER NO. 25; CORRECTION

NOVEMBER 3, 1953.

That part of the opening sentence of paragraph 7 of Arizona Small Tract Classification Order No. 25, dated October 27, 1953 (18 F. R. 6854) which reads "Commencing at 10:00 a. m. on October 27, 1953, and until 10:30 a. m. on December 1, 1953" is hereby corrected to read "Commencing at 10:00 a. m. on October 27, 1953, and until 10:00 a. m. on December 1, 1953".

E. R. SMITH,
*Regional Administrator.*

[Docket No. G-2273]

EAST TENNESSEE NATURAL GAS CO.

ORDER FIXING DATE OF HEARING

On October 12, 1953, East Tennessee Natural Gas Company (Applicant), a Tennessee corporation with its principal office near Knoxville, Tennessee, filed an application, and on October 26, 1953 a supplement to that application, for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation in Morgan County, Tennessee, of certain natural gas interconnecting, metering and regulating facilities, for the purpose of delivering and selling natural gas to Russell Producing Company for distribution and resale to the public in Morgan and Scott Counties, Tennessee, all as more fully described in the application on file with the Commission and open to public inspection.

Due notice of the filing of the application has been given, including publication in the FEDERAL REGISTER on October 29, 1953 (18 F. R. 6838-6839).

The Commission finds:

(1) It is appropriate, reasonable and in the public interest in carrying out the provisions of the Natural Gas Act, and good cause exists, to hold a public hearing in the above-entitled proceeding at the time and place hereinafter ordered.

(2) This proceeding is a proper one for disposition under the provisions of § 1.32 (b) of the Commission's rules of practice and procedure (18 CFR 1.32(b)), Applicant having requested that its application be heard under the shortened procedure provided for by the aforesaid rule for noncontested proceedings: *Provided, however,* That no request to be heard, protest or petition is filed raising an issue of substance.

The Commission orders:

(A) Pursuant to authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7, 15, and 16 of the Natural Gas Act, and the Commission's general rules and regulations, including rules of practice and procedure (18 CFR Chapter I), a public hearing be held commencing on November 13, 1953, at 9:00 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues presented by the application herein: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceeding pursuant to provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

Adopted: November 6, 1953.

Issued: November 6, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 53-9565; Filed, Nov. 12, 1953 8:47 a. m.]

[Docket No. G-2283]

PERMIAN BASIN PIPELINE CO.

NOTICE OF APPLICATION

NOVEMBER 6, 1953.

Take notice that on October 16, 1953, Permian Basin Pipeline Company (Applicant), a Delaware corporation with its principal office in Omaha, Nebraska, filed application with the Federal Power Commission for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act authorizing the construction and operation of certain natural gas pipeline facilities hereinafter described.

Applicant seeks authorization: (1) To construct and operate two additional 1320 horsepower compressor units and appurtenant facilities at its Spraberry Compressor Station; (2) to construct and operate additional measuring facilities at its Plains Measuring Station; and (3) to operate its 30-inch pipeline facilities, being constructed between its Spraberry Compressor Station and its Plains Measuring Station at the point of connection with El Paso Natural Gas Company facilities near Wasson, Texas, in the transportation of natural gas for the account of El Paso Natural Gas Company.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 25th day of November 1953. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 53-9559; Filed, Nov. 12, 1953; 8:46 a. m.]

[Docket No. G-2285]

UNITED FUEL GAS CO.

NOTICE OF APPLICATION

NOVEMBER 6, 1953.

Take notice that on October 21, 1953, United Fuel Gas Company (Applicant), a West Virginia Corporation, address, Charleston, West Virginia, filed an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of a natural-gas compressor station, to be known as Station X-59, to be located at Applicant's existing Storage Pool X-59 in Jackson County, West Virginia, and to consist of four 1100 horsepower gas engine driven compressor units, together with necessary foundations, piping, fitting, and auxiliary equipment.

Applicant proposes the construction and operation of said facility to enable it to operate its Storage Pool X-59 to maximum capacity through use of increased volumes of natural gas available for storage by Applicant from the "Pool Supply" of the operating companies of The Columbia Gas System, Inc., of which Applicant is one. Applicant estimates that the proposed facility will enable it to increase the ultimate total storage capacity of its Storage Pool X-59 by approximately 20,000,000 Mcf of natural gas. Applicant proposes to inject approximately 6,000,000 Mcf into its Pool X-59 during July and August, 1955, which will necessitate injection rates up to approximately 125,000 Mcf per day and require the construction and operation of the proposed facility.

The estimated total overall capital cost of the proposed facility is $2,240,000, which Applicant proposes to finance from funds to be provided by its parent, The Columbia Gas System, Inc., which proposes to purchase notes and common stock of Applicant or to make capital contributions to Applicant as funds are required for the construction of facilities by Applicant, including the facility herein proposed.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 25th day of November 1953. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[Docket No. G-2286]

ATLANTIC SEABOARD CORP. AND VIRGINIA GAS TRANSMISSION CORP.

NOTICE OF APPLICATION

NOVEMBER 6, 1953.

Take notice that on October 21, 1953, Atlantic Seaboard Corporation (Atlantic Seaboard), a Delaware corporation, and Virginia Gas Transmission Corporation (Virginia Gas), a Virginia Corporation, hereinafter sometimes referred to as Applicants, both of which have their principal place of business at Charleston, West Virginia, filed a joint application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of approximately 116.6 miles of 26-inch natural-gas transmission pipeline looping approximately 111.1 miles of Applicants' existing transmission facilities which extend eastward from their affiliate, United Fuel Gas Company's Cobb Compressor Station in Kanawha County, West Virginia together with (1) the installation of one additional 1100 horsepower gas engine driven compressor unit in Atlantic Seaboard's Cleveland Compressor Station, (2) the installation of two additional 1100 horsepower gas engine driven compressor units in Atlantic Seaboard's Lost River Compressor Station, and (3) the construction and operation of a new compressor station to be known as Station "Q", to be located at a point on Atlantic Seaboard's 20-inch pipeline in Baltimore County, Maryland, approximately 32 miles southwest from the Maryland-Pennsylvania state line, and to consist of one 1100 horsepower gas engine driven compressor unit and auxiliary structures and equipment.

Applicants propose, by means of said facilities, to increase the capacity of their combined pipe-line systems from an estimated present capacity of approximately 470,300 Mcf to an estimated capacity of approximately 556,700 Mcf of natural gas per day, thereby enabling Applicants to receive into their transmission systems available volumes of natural gas and to transport and deliver such volumes to Applicants' present wholesale customers during the maximum day of the 1954-55 winter period.

The estimated total overall capital cost of the proposed facilities is $14,634,300, of which $1,535,000 represents the estimated cost of additional compressor facilities, and $13,099,300 represents the estimated cost of transmission faciliti s. Funds for financing such construction cost will be provided by Atlantic Seaboard's parent, The Columbia Gas System, Inc., which will provide the necessary funds for Atlantic Seaboard's construction direct to Atlantic Seaboard, and, through Atlantic Seaboard, will provide the funds necessary for the construction proposed by Atlantic Seaboard's wholly-owned subsidiary, Virginia Gas. The Columbia Gas System, Inc. proposes to purchase notes and common stock of Atlantic Seaboard, and Atlantic Seaboard proposes to purchase notes and common stock of Virginia Gas as funds are required by Applicants to meet construction costs.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 25th day of November 1953. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[Docket No. G-2292]

EL PASO NATURAL GAS CO.

NOTICE OF APPLICATION

NOVEMBER 6, 1953.

Take notice that on October 26, 1953, El Paso Natural Gas Company (Applicant), a Delaware corporation with its principal office in El Paso, Texas, filed application with the Federal Power Commission for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act authorizing the construction and operation of certain natural gas pipeline facilities hereinafter described.

Applicant proposes the construction and operation of two taps and meter stations on its authorized 30-inch Permian-San Juan crossover line for sale and delivery of natural gas to Southern Union Gas Company for distribution and resale by the latter in and near the villages of Grants, Valencia County, New Mexico, and Tatum, Lea County, New Mexico.

Applicant estimates the cost of facilities at $11,147 and proposes to finance their construction out of its available treasury funds.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 25th day of November 1953. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[Docket No. G-2294]

ALGONQUIN GAS TRANSMISSION CO.

NOTICE OF APPLICATION

NOVEMBER 6, 1953.

Take notice that Algonquin Gas Transmission Company (Applicant), a Delaware corporation, with its principal place of business in Boston, Massachusetts, filed, on October 26, 1953, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of the following natural-gas facilities:

(1) 2,500 feet of 4-inch lateral pipe connecting Applicant's existing transmission line with proposed metering station at Suffern, New York.

(2) One 4" main line tap at metering station, Stony Point, New York, proposed in application of Rockland Light and Power Company, Docket No. G-2295.

(3) One 4" mail line tap at proposed metering station, Suffern, New York.

(4) One 4" measuring and regulating station, Suffern, New York.

(5) One gas scrubber in connection with above station at Suffern, New York.

The facilities are proposed to be used to deliver a contract quantity of 5,000 Mcf of gas per day to Rockland Light and Power Company.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 25th day of November 1953.

Applicant requests that this matter be considered under the shortened hearing procedure provided for in § 1.32 of the rules of practice and procedure.

This application is on file with the Commission for public inspection.

[Docket No. G-2295]

ROCKLAND LIGHT AND POWER CO.

NOTICE OF APPLICATION

NOVEMBER 6, 1953.

Take notice that Rockland Light and Power Company (Applicant), a New York Corporation, with its principal place of business in Nyack, New York, filed on October 26, 1953, an application for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of the following natural-gas facilities:

(1) One metering and regulating station at the proposed connection with the Algonquin Gas Transmission Co. line at Stony Point, New York.

(2) Approximately 5,900 feet of 6-inch steel main connecting above station with Applicant's existing feeder main system.

The facilities are proposed to be used to receive natural gas from Algonquin Gas Transmission Co. for the purpose of augmenting Applicant's gas supply available for sale and delivery to its residential, commercial and industrial customers as well as to give Applicant greater flexibility of operation.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 25th day of November 1953.

Applicant requests that this matter be considered under the shortened hearing procedure provided for in § 1.32 of the rules of practice and procedure. This application is on file with the Commission for public inspection.

[Docket No. G-2296]

ARIZONA PUBLIC SERVICE CO.

NOTICE OF APPLICATION

NOVEMBER 6, 1953.

Take notice that Arizona Public Service Company (Applicant), an Arizona corporation, with its principal place of business in Phoenix, Arizona, filed on October 27, 1953, an application for an order disclaiming jurisdiction, or in the alternative, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the operation of the following facilities:

(1) Approximately 10 miles of 4 inch pipe line known as the Buckeye Line constructed in 1948 in Maricopa County, Arizona, running from a connection at a tap point on the transmission line of El Paso Natural Gas Company to the regulating station at Buckeye, Arizona.

(2) Taps on said Buckeye Line.

(3) One regulating station just outside the corporate limits of Buckeye, Arizona.

The facilities are being used and will continue to be used to render gas service to industrial, commercial and residential customers in the area of the town of Buckeye and the unincorporated community of Liberty, Arizona.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 25th day of November 1953.

This application is on file with the Commission for public inspection.

[Docket No. G-2302]

NATURAL GAS PIPELINE CO. OF AMERICA

ORDER SUSPENDING PROPOSED CHANGES IN RATE SCHEDULES AND FIXING DATE OF HEARING

On October 13, 1953, Natural Gas Pipeline Company of America (Natural) tendered for filing its Second Revised Sheets Nos. 5, 6, and 7, and First Revised Sheet No. 8, to its FPC Gas Tariff, First Revised Volume No. 1, proposing that such revised sheets become effective on November 13, 1953. Such revised sheets would effect an increase in rates of $7,209,459, or 21.7 percent annually, based on adjusted sales for the twelve months ended July 31, 1953. The proposed annual increase is in addition to the amounts presently being collected under bond in Docket Nos. G-1967 and G-2083.

The increases proposed in said revised sheets are based almost entirely upon claimed increases of $7,030,000 in the cost of purchased gas. Of the total, $2,250,000 is attributable to increases in rates proposed by Colorado Interstate Gas Company which are under suspension in Docket No. G-2260 and $1,020,000 from increases proposed by Texas Illinois Natural Gas Pipeline Company, also under suspension in Docket No. G-2219. The remaining $3,760,000 is the estimated increase attributable to anticipated increased field prices, reduction in Natural's own production and field purchases due to anticipated lowering of gas production allowances in Texas, and termination of certain field purchase contracts.

In the proceedings in Docket Nos. G-1697 and G-2083, Natural proposed a revision of its rate structure tendering a two-block form of rate. Its so-called "First Block" would cover charges for firm volumes of gas theretofore contracted for and purchased by the customers. The "Second Block" rate would cover additional volumes of firm gas for which Natural proposed to charge the exact demand-commodity rate paid by it to its supplier, Texas Illinois Natural Gas Pipeline Company. The proposed two-block form of rate is presently in effect under bond in Docket Nos. G-1697 and G-2083.

By the tendered filing of October 13, 1953, Natural would increase the rates in the "First Block" of Rate Schedule CD-1 by $5,903,685 and the "Second Block" of the Rate Schedule CD-1 and Rate Schedule I-1 by $1,305,774.

Natural has requested that if the "First Block" increase be suspended that the suspension be for a maximum period ending March 3, 1954, and that the "Second Block" increase and Rate Schedule I-1 not be suspended beyond January 1, 1954, the dates when the respective increases proposed by Colorado Interstate in Docket No. G-2260 and by Texas Illinois in Docket No. G-2219 may go into effect subject to refund.

It is thus apparent that Natural's proposed increase in rates and charges, in large measure, rests upon claimed or anticipated increases in Natural's cost of purchased gas, which appear to be speculative and will not be incurred, if at all as of November 13, 1953, the proposed effective date of the revised tariff sheets.

The increased rates and charges proposed, therefore, have not been shown to be justified, and may be unjust, unreasonable, unduly discriminatory or preferential, and may place an undue burden upon the ultimate consumers of natural gas.

In accordance with the provisions of § 154.16 of the Commission's regulations under the Natural Gas Act, copies of the revised tariff sheets have been served upon each customer of Natural which would be affected thereby and the State Commissions concerned. To date seven customer companies and the State Commissions of Illinois and Wisconsin have filed their comments on the proposed filing. These included objections to some aspects of the proposed increase and to a suspension period of less than the statutory five month period.

It does not appear that suspension for a period of less than five months requested by Natural is justified.

The Commission finds:

1. It is necessary and proper in the public interest and in aid of the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing as hereinafter ordered, pursuant to the authority contained in section 4 of the act, concerning the lawfulness of Natural's FPC Gas Tariff, first revised Vol. No. 1, as proposed to be amended by Second Revised Sheets Nos. 5, 6, and 7, and first revised sheet No. 8, and that said revised sheets be suspended as hereinafter provided and the use thereof be deferred pending hearing and decision thereon.

2. Natural's request that the Commission suspend the proposed increased rates for periods less than five months should be denied. The grant of the request is not in the public interest.

The Commission orders:

A. Pursuant to the authority contained in section 4 of the Natural Gas Act, a public hearing be held commencing March 3, 1954, at 10:00 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the lawfulness of the rates, charges, classifications, and services contained in Natural's FPC Gas Tariff, First Revised Volume No. 1, as proposed to be revised by Second Revised Sheets Nos. 5, 6, and 7, and First Revised Sheet No. 8.

B. Pending such hearing and decision thereon the revised sheets enumerated in paragraph (A) hereof be and the same are hereby suspended, and their use deferred until April 13, 1954, unless otherwise ordered by the Commission, and until such further time as said tariff sheets may be made effective in the manner prescribed by the Natural Gas Act.

C. Natural's request for suspension of the proposed increase for less than five months be and the same is hereby denied.

D. At the hearing, the parties, including Commission Staff Counsel, may reserve cross-examination until after Natural has presented and completed the case-in-chief.

E On or before January 18, 1954, Natural shall serve upon all parties copies of the testimony and exhibits which Natural proposes to offer at the hearing, including five (5) copies upon Commission Staff Counsel.

F. Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted: November 4, 1953.

Issued: November 6, 1953.

By the Commission.

[Docket No. G-2303]

HOPE NATURAL GAS CO.

ORDER SUSPENDING PROPOSED TARIFF CHANGES, FIXING DATE OF HEARING, AND SPECIFYING PROCEDURE

On October 9, 1953, Hope Natural Gas Company (Hope), pursuant to section 4 of the Natural Gas Act and the Commission's general rules and regulations, particularly Part 154 thereof (18 CFR Part 154), tendered for filing Seventh Revised Sheet No. 3-A, Eighth Revised Sheet No. 4, and Sixth Revised Sheet No. 20 to its FPC Gas Tariff, Original Volume No. 1, setting forth therein its proposed Rate Schedules H-1B and H-2A, proposed to be made effective November 9, 1953, increasing Hope's rates and charges, subject to the Commission's jurisdiction under that act, for sales by Hope in interstate commerce of natural gas for resale for ultimate public consumption, to its six interstate wholesale customers.[1]

The proposed tariff changes embody rate schedules containing increased rates and charges to Hope's interstate wholesale customers of approximately $3,676,000 per year, based upon the Company's sales for the 12-months ended July 31, 1953, above the level of rates submitted in the "Proposed Settlement," which was accepted and made effective by the Commission's Opinion No. 262 and order, adopted on November 4, 1953, In the Matters of Hope Natural Gas Company, Docket Nos. G-2051 and G-2165.

Hope bases its proposed increase in rates and charges, among other things, upon a claimed increase in the cost of gas purchased from Tennessee Gas Transmission Company (Tennessee Gas) resulting from the proposed increased rates filed by Tennessee Gas on August 31, 1953. The Commission has, however, suspended Tennessee Gas' proposed increased rates and has ordered a hearing thereon, to commence on February 8, 1954. Order issued September 24, 1953, In the Matter of Tennessee Gas Transmission Company, Docket No. G-2252. Hope also relies upon other claimed increases in its cost of service, including, among other things, a rate of return of 6¾ percent and income taxes associated with the return computed at such rate upon the rate base claimed by Hope.

Copies of the aforesaid revised sheets to Hope's FPC Gas Tariff, Original Volume No. 1, and the supporting data submitted by Hope to the Commission, have been served upon Hope's wholesale customers as well as the State regulatory commissions involved, as required by the Commission's general rules and regulations.

Upon consideration of the aforesaid proposed revised tariff sheets tendered for filing on October 9, 1953, the data tendered in support thereof, and the Commission's order issued September 24, 1953, in Docket No. G-2252 with respect to the increased rates and charges proposed by Tennessee Gas, of which official notice is hereby taken, it appears that the increased rates, charges and services proposed by Hope in its aforesaid Seventh Revised Sheet No. 3-A, Eighth Revised Sheet No. 4, and Sixth Revised Sheet No. 20 to its FPC Gas Tariff, Original Volume No. 1, have not been shown to be justified, and may be unjust, unreasonable, and otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest, and to aid in the enforcement of the provisions of the Natural Gas Act, that the Commission enter upon a hearing, as hereinafter ordered, pursuant to the authority contained in section 4 of that act, concerning the lawfulness of the rates, charges, classifications, and services, or any of them, contained in Hope's FPC Gas Tariff, Original Volume No. 1, as proposed to be amended by Seventh Revised Sheet No. 3-A, Eighth Revised Sheet No. 4, and Sixth Revised Sheet No. 20 thereto, and that said Seventh Revised Sheet No. 3-A, Eighth Revised Sheet No. 4, and Sixth Revised Sheet No. 20 be suspended as hereinafter provided, and the use thereof be deferred pending hearing and decision thereon.

The Commission orders:

(A) Pursuant to authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 4, 15, and 16 of the Natural Gas Act, and the Commission's general rules and regulations, including rules of practice and procedure (18 CFR Chapter I), a public hearing be held, commencing on March 9, 1954, at 10:00 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the lawfulness of the rates, charges, classifications, and services, or any of them, contained in the aforesaid Hope Natural Gas Company's FPC Gas Tariff, Original Volume No. 1, as proposed to be amended by Seventh Revised Sheet No. 3-A, Eighth Revised Sheet No. 4, and Sixth Revised Sheet No. 20 thereto.

(B) Pending such hearing and decision thereon, Hope's Seventh Revised Sheet No. 3-A, Eighth Revised Sheet No. 4, and Sixth Revised Sheet No. 20 to its FPC Gas Tariff, Original Volume No. 1, be and the same are hereby suspended and the use thereof deferred until April 9, 1954, unless otherwise ordered by the Commission, and until such further time thereafter as said proposed Seventh Revised Sheet No. 3-A, Eighth Revised Sheet No. 4, and Sixth Revised Sheet No. 20 may be made effective in the manner prescribed by the Natural Gas Act.

(C) At the hearing, the parties, including Commission Staff Counsel, may reserve cross-examination until after Hope has presented and completed its case-in-chief.

(D) Hope, on or before February 9, 1954, shall serve upon all parties copies of the testimony and exhibits it proposes to offer at the hearing, including five (5) copies upon Commission Staff Counsel.

(E) Interested State commissions may participate, as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

Adopted: November 4, 1953.

Issued: November 6, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 53-9556; Filed, Nov. 12, 1953; 8:45 a. m.]

[1] Hope's interstate wholesale customers are: The Manufacturers Light and Heat Company (Manufacturers) and Mount Morris Gas Company (Mount Morris), nonaffiliates; and, the East Ohio Gas Company (East Ohio), New York State Natural Gas Corporation (New York Natural), the Peoples Natural Gas Company (Peoples), and the River Gas Company (River Gas), all of which, together with Hope, are subsidiaries of the Consolidated Natural Gas Company.

## SECURITIES AND EXCHANGE COMMISSION

[File No. 1-449]

LOS ANGELES INVESTMENT CO.

NOTICE OF APPLICATION TO WITHDRAW FROM LISTING AND REGISTRATION, AND OF OPPORTUNITY FOR HEARING

NOVEMBER 6, 1953.

In the matter of Los Angeles Investment Company Common Stock, $100 Par Value, File No. 1-449.

Los Angeles Investment Company, a California corporation, pursuant to section 12 (d) of the Securities Exchange Act of 1934 and Rule X-12D2-1 (b) promulgated thereunder, has made application to the Commission to withdraw its Common Stock $100 Par Value, from listing and registration on the Los Angeles Stock Exchange.

The application includes, among others, the following allegations:

(1) On June 30, 1953, there were 21,381 shares of the above security outstanding in the hands of 1,275 shareholders.

(2) Applicant for a number of years has purchased shares of the above security out of earned surplus and restored said shares to the status of authorized but unissued shares, and has informed its shareholders of this in its annual reports.

(3) The total number of shares of the above security traded in "board lots" on the Los Angeles Stock Exchange for the last three and one-half years is as follows:

(a) During the year 1950, 230 shares were traded, of which 160 shares were purchased by applicant.

(b) During the year 1951, 400 shares were traded, of which 220 shares were purchased by applicant.

(c) During the year 1952, 95 shares were traded, of which 55 shares were purchased by applicant.

(d) During the first six months of the year 1953, 40 shares were traded, all of which were purchased by applicant.

(4) The price quotation for the above security on said exchange at the time of the above application, dated September 30, 1953, was: Bid $420, Asked, no offering.

(5) Trading in the above security can be handled adequately on the over-the-counter market in Los Angeles, California.

(6) Applicant does not feel justified in continuing the expenses connected with having the above security listed and registered on a national securities exchange.

Upon receipt of a request, prior to December 18, 1953, from any interested person for a hearing in regard to terms to be imposed upon the delisting of this security, the Commission will determine whether to set the matter down for hearing. Such request should state briefly the nature of the interest of the person requesting the hearing and the position he proposes to take at the hearing with respect to imposition of terms or conditions. In addition, any interested person may submit his views or any additional facts bearing on this application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington, D. C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application, and other information contained in the official file of the Commission pertaining to the matter.

By the Commission.

[SEAL] NELLYE A. THORSEN,
*Assistant Secretary.*

[F. R. Doc. 53-9569; Filed, Nov. 12, 1953; 8:48 a. m.]

[File No. 1-3237]

ADOLF GOBEL, INC.

ORDER SUMMARILY SUSPENDING TRADING

In the matter of trading on the American Stock Exchange in the $1.00 par value Common Stock of Adolf Gobel, Inc., File No. 1-3237.

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C., on the 6th day of November A. D. 1953.

The Commission by order adopted March 13, 1953, pursuant to section 19 (a) (4) of the Securities Exchange Act of 1934, having summarily suspended trading in the $1.00 par value common stock of Adolf Gobel, Inc., on the American Stock Exchange for a period of ten days from that date, and subsequently having entered additional orders further suspending such trading in order to prevent fraudulent, deceptive or manipulative acts or practices; and

The Commission being of the opinion that the public interest requires the summary suspension of trading in such security on that Exchange and that such action is necessary and appropriate for the protection of investors; and

The Commission being of the opinion that such suspension is necessary in order to prevent fraudulent, deceptive or manipulative acts or practices, with the result that it will be unlawful under section 15 (c) (2) of the Securities Exchange Act of 1934 and the Commission's Rule X-15C2-2 thereunder, for any broker or dealer to make use of the mails or of any means or instrumentality of interstate commerce to effect any transaction in, or to induce or attempt to induce the purchase or sale of, such security otherwise than on a national securities exchange.

*It is ordered,* Pursuant to section 19 (a) (4) of the Securities Exchange Act of 1934, that trading in said securities on the American Stock Exchange be summarily suspended in order to prevent fraudulent, deceptive or manipulative acts or practices, effective at the opening of the trading session on said Exchange on November 9, 1953, for a period of ten days.

By the Commission.

[SEAL] NELLYE A. THORSEN,
*Assistant Secretary.*

[F. R. Doc. 53-9567; Filed, Nov. 12, 1953; 8:48 a. m.]

[File No. 54-211]

CENTRAL PUBLIC UTILITY CORP.

NOTICE OF FILING OF AND ORDER GIVING OPPORTUNITY FOR HEARING ON AMENDED APPLICATION FOR APPROVAL OF A SECTION 11 (e) PLAN

NOVEMBER 6, 1953.

Notice is hereby given that on October 19, 1953 Central Public Utility Corporation ("Cenpuc"), a registered holding company, amended its application for an order approving a plan filed under section 11 (e) of the Public Utility Holding Company Act of 1935 ("act") and for an order granting Cenpuc and each company which is a subsidiary upon consummation of the plan an exemption pursuant to section 3 (a) (5) of the act. Holding Company Act Release No. 11898 (May 8, 1953) summarizes the exemption application and the plan as proposed prior to October 1953 and describes the companies in the Cenpuc holding company system directly affected by the plan. Briefly, the plan, as then proposed, provided for the distribution by Cenpuc to its stockholders of the reclassified stock of its wholly-owned subsidiary, Central Indiana Gas Company, the liquidation and dissolution of Central Natural Gas Corporation, a maintenance company and also a wholly-owned subsidiary of Cenpuc, and the merger into Cenpuc of its wholly-owned subsidiary, The Islands Gas and Electric Company ("Islands") which is an exempt holding company with four public-utility subsidiary companies incorporated and doing business outside the United States. After appropriate notice to the public and to all of Cenpuc's stockholders, public hearings were held on June 9, 1953, in respect of Cenpuc's application; no findings, opinion or order have been issued by the Commission to date in respect of said application.

All interested persons are referred to the application, as amended, which is on file at the offices of this Commission. The application, as amended, changes the section 11 (e) plan so that it no longer provides for the merger of Islands into Cenpuc. In addition, it withdraws

the request for an exemption of the applicant pursuant to section 3 (a) (5) of the act and the request that the Commission apply to an appropriate United States District Court for an order approving the plan and directing that it be enforced. Otherwise, the plan, as amended, is substantially the same as summarized in Holding Company Release No. 11898.

On June 13, 1952, the Commission, pursuant to section 11 (b) (2) of the act ordered that Cenpuc "take appropriate steps to terminate the existence of" certain system companies including Islands. It is stated by Cenpuc that it has complied with this order except that Islands has not been eliminated. The record contains a statement by Cenpuc that, upon effectuation of the amended plan, it contemplates retaining its then existing operating companies and that on or about December 1, 1953, it intends to file an application seeking an order modifying the section 11 (b) (2) order of June 13, 1952, by eliminating therefrom the references to Island and granting Cenpuc and each company which is a subsidiary an exemption from the provisions of the act under section 3 (a) (5) of the act.

*It is ordered,* That any interested person may, not later than November 20, 1953, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on said amended application of Cenpuc, stating therein the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted or submitted for consideration at any such hearing. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after November 20, 1953, the Commission may approve the amended section 11 (e) plan of Cenpuc.

By the Commission.

[SEAL] NELLYE A. THORSEN,
*Assistant Secretary.*

INTERSTATE POWER CO. AND WISCONSIN POWER AND LIGHT CO.

ORDER AUTHORIZING NON-AFFILIATED HOLDING COMPANIES TO SELL AND ACQUIRE COMMON STOCK OF A PUBLIC UTILITY COMPANY

NOVEMBER 6, 1953.

In the matter of Interstate Power Company, File No. 70-3112; Wisconsin Power and Light Company, File No. 70-3110.

Interstate Power Company ("Delaware"), a registered holding company, having filed a declaration pursuant to section 12 (d) of the Public Utility Holding Company Act of 1935 ("act") and Rule U-44 promulgated thereunder, and Wisconsin Power and Light Company ("Wisconsin"), a non-affiliated exempt holding company, having filed an application and amendments thereto pursuant to sections 3 (a) (2), 9 (a) and 10 of said act proposing transactions summarized as follows:

Wisconsin proposes to purchase from Delaware and Delaware proposes to sell to Wisconsin as of April 30, 1953, pursuant to contract dated June 22, 1953, all the outstanding capital stock (16,274 shares) being all the outstanding securities of Interstate Power Company of Wisconsin (herein called "Interstate") a Wisconsin corporation and a utility subsidiary of Delaware. The agreed purchase price is $2,359,730 ($145 per share), subject to certain adjustments provided for in the contract, and is payable in cash on the closing date, which is to be within 30 days after all required regulatory commission approvals or authorizations are received. Under the terms of the contract the seller will be entitled to all net profits of Interstate earned during the period from April 30, 1953, to the closing date. Interstate, a wholly owned subsidiary of Delaware, owns and operates electric utility properties in three counties in extreme southwestern Wisconsin. Its service area adjoins that of Wisconsin and its properties are interconnected with those of Wisconsin. It is a public utility as defined in the laws of Wisconsin and also a public utility as defined in the Federal Power Act. Wisconsin owns no stock or other interest of any kind in Delaware and no affiliation of any kind exists between them.

As soon as reasonably possible after the acquisition of the stock of Interstate, Wisconsin proposes to merge the properties and assets of Interstate, with those of Wisconsin, the sole purpose of the proposed purchase of the stock being the acquisition by Wisconsin of the properties of Interstate. The acquisition by Wisconsin of the physical and other assets of Interstate through merger or otherwise, will be subject to the jurisdiction of both the Public Service Commission of Wisconsin and the Federal Power Commission. Both of those commissions exercise jurisdiction over the accounting of Wisconsin, and the accounting entries to be made on the books of Wisconsin with respect to the acquisition of the property of Interstate will be in conformity with the orders of those commissions. Wisconsin requests that the order of this Commission contain no provision as to the accounting with respect to the proposed purchase since Wisconsin is required to comply with the orders of the Federal Power Commission and the Public Service Commission of Wisconsin.

Wisconsin is a holding company as defined in the act but has been exempted by order therefrom pursuant to section 3 (a) (2). Upon acquisition of the stock of Interstate, Wisconsin will also be a holding company with respect to Interstate, but for a temporary period. For the 12 months ended April 30, 1953, the gross operating revenues of the subsidiaries of Wisconsin, after giving effect to the proposed acquisition of Interstate, and elimination of intercompany transactions, would have been equivalent to approximately 6.3 percent of the operating revenues of Wisconsin. Thus, Wisconsin will continue to be predominantly a public utility company whose operations as such do not extend beyond the State of Wisconsin in which it is organized, and a state contiguous thereto.

The stock of Interstate is presently subject to the respective liens of the First Mortgage Indenture, as supplemented, of Delaware to The Chase National Bank of the City of New York and Carl E. Buckley, as Trustees, securing its outstanding First Mortgage Bonds, and of the Debenture Indenture of Delaware to Manufacturers Trust Company and Frederick E. Lober, as Trustees, securing its outstanding Debentures. It is anticipated that Delaware will simultaneously with consummation of the proposed sale secure the release of the shares being sold from the liens of said Indentures and pledge gross property additions under the indentures in lieu of depositing with the Corporate Trustee under the First Mortgage Indenture any of the cash proceeds of the sale.

Delaware has determined to carry out a program of sale and disposition of its two wholly owned subsidiaries, Interstate and East Dubuque Electric Company, an Illinois corporation, so as ultimately to terminate its status as a holding company. The proposed sale of the stock of Interstate is stated to be the first step in the accomplishment of this program.

The net proceeds from the sale of the Interstate stock will be applied by Delaware to the acquisition and construction of electric utility additions to its electric system.

Said application-declaration, as amended, having recited that no State commission or any other Federal commission has jurisdiction over the proposed transactions, other than the Public Service Commission of Wisconsin, which has jurisdiction over, and has by order approved, the acquisition by Wisconsin of the common stock of Interstate:

Delaware having stated that its expenses to be incurred by it in connection with the proposed transactions will amount to $8,550, which includes legal fees of $4,500, and Wisconsin having estimated that its expenses will be only nominal:

Delaware having requested that the Commission's order herein make the necessary findings and contain the recitals required by Supplement R and section 1808 (f) of the Internal Revenue Code, as amended, with respect to certain of the proposed transactions, and that the order become effective upon its issuance:

Wisconsin having applied for exemption pursuant to section 3 (a) (2) of the act from all provisions of the act applicable to holding companies which otherwise would be applicable to it upon its acquisition of the stock of Interstate:

Due notice having been given of the filing of the application-declaration and a hearing not having been requested of or ordered by the Commission; and the Commission finding that the applicable provisions of the act and rules promulgated thereunder are satisfied, that no adverse findings are necessary with re-

spect thereto, and that compliance with paragraphs (b) and (c) of Rule U-50 promulgated under the act is not necessary or appropriate in the public interest or for the protection of investors or consumers to assure the maintenance of competitive conditions, the receipt of adequate consideration or the reasonableness of the fees or commissions to be paid with respect to the sale of said securities, and deeming it appropriate in the public interest and in the interest of investors and consumers that said declaration, and said application as amended, be permitted to become effective and be granted, effective forthwith, subject to the terms and conditions contained in Rule U-24.

*It is ordered*, Pursuant to Rule U-23 and the applicable provisions of the act:

(1) That the declaration filed by Delaware be, and it hereby is, permitted to become effective forthwith subject to the terms and conditions prescribed in Rule U-24;

(2) That the application, as amended, filed by Wisconsin regarding the acquisition of the stock of Interstate be, and it hereby is, granted forthwith, subject to the terms and conditions prescribed in Rule U-24;

(3) That the application filed by Wisconsin requesting exemption from all provisions of the act applicable to holding companies which otherwise would be applicable to it upon its acquisition of the stock of Interstate be, and it hereby is, granted.

*It is further ordered and recited*, And the Commission finds, that the sale by Interstate Power Company of the 16,274 shares of capital stock of Interstate Power Company of Wisconsin of the par value of $100 per share to Wisconsin Power and Light Company and the expenditure of the proceeds (or an amount equal thereto) to be received from said sale by Interstate Power Company for the acquisition by Interstate Power Company of the following utility assets, to-wit: 161 kv transmission lines from Heron Lake, Minnesota to Luverne, Minnesota; from Winnebago, Minnesota to the Fox Lake, Minnesota power plant of Interstate Power Company; and from Albert Lea, Minnesota to Winnebago, Minnesota together with all necessary substations and switching equipment, all as set forth in the declaration, as amended, are necessary or appropriate to effectuate the provisions of section 11 (b) of the Public Utility Holding Company Act of 1935 within the meaning of sections 371, 373 and 1808 (f) of the Internal Revenue Code, as amended, and jurisdiction is hereby reserved to amend, supplement, or modify, upon the petition or application of Interstate Power Company, the recitals, itemizations and specifications required by Supplement R of the Internal Revenue Code, as amended, with respect to the above-described transactions.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

[File No. 70-3145]

ATTLEBORO STEAM AND ELECTRIC CO. ET AL.

NOTICE OF FILING REGARDING ISSUE AND SALE OF SHORT TERM UNSECURED PROMISSORY NOTES TO BANKS AND TO PARENT COMPANY

NOVEMBER 5, 1953.

In the matter of Attleboro Steam and Electric Company, Haverhill Electric Company, the Lowell Electric Light Corporation, Weymouth Light and Power Company, Worcester County Electric Company, New England Electric System, File No. 70-3145.

Notice is hereby given that New England Electric System ("NEES"), a registered holding company, and its above named subsidiary companies, hereinafter individually referred to as "Attleboro", "Haverhill", "Lowell", "Weymouth", and "Worcester" and collectively referred to as "the borrowing companies", have filed a joint application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("the act"). The borrowing companies have designated sections 6 (a), 7, 9 (a), 10 and 12 (f) of the act and Rules U-23, U-42 (b) (2), U-43 (a), U-45 (b) (1) and U-50 (a) (2) and (3) promulgated thereunder as applicable to the proposed transactions, which are summarized as follows:

Lowell and Worcester propose to issue to banks, from time to time but not later than December 31, 1953, unsecured promissory notes in the respective amounts of $200,000 and $3,500,000. Attleboro, Haverhill and Weymouth propose to issue to NEES, from time to time but not later than December 31, 1953, unsecured promissory notes in the respective amounts of $75,000, $100,000 and $150,000.

Each of such notes to be issued to NEES will mature on April 1, 1954, and each of the notes to be issued to banks will mature six months after the issue date thereof. Such notes will bear interest at the prime rate of interest at the time of the issuance thereof. It is stated that said prime interest rate at the present time is 3¼ percent.

According to the application-declaration, the proceeds derived from the proposed additional notes will be used for the payment of note indebtedness and construction and other purposes.

Each of the borrowing companies has stipulated that if any permanent financing is done prior to the maturity date of its then outstanding unsecured promissory notes, the proceeds derived therefrom will be applied in reduction of, or in total payment of, notes then outstanding, and the amount of then authorized but unissued promissory notes will be reduced by the amount, if any, by which such permanent financing exceeds the amount of the then outstanding unsecured promissory notes. At the present time Worcester has pending before the Commission an application-declaration (identified by File No. 70-3135) in which it seeks authority to issue 75,000 shares of $100 par value cumulative preferred stock (see Holding Company Act Release No. 12177). Worcester has stipulated that if said sale of preferred stock is approved by the Commission and the proceeds therefrom are available prior to November 30, 1953, Worcester will relinquish all right to issue the $3,500,000 of notes proposed in the instant application-declaration.

The application-declaration states that incidental services in connection with the proposed note issues will be performed at cost by New England Power Service Company, an affiliated service company, such cost being estimated not to exceed $100 for NEES and each borrowing company, or an aggregate of $600.

The application-declaration further states that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

NEES and the borrowing companies request that the Commission's order herein become effective forthwith upon issuance.

Notice is further given that any interested person may, not later than November 16, 1953, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his request, the reasons for such request and the issues of fact or law, if any, raised by the said application-declaration which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after that date, said application-declaration, in whole or in part and as filed or as amended, may be granted and permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transaction as provided in Rule U-20 (a) and Rule U-100 thereof. All interested persons are referred to said application-declaration which is on file in the offices of the Commission for a statement of the transaction therein proposed.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28622]

BRICK FROM LOCHER, VA., TO MISSISSIPPI VALLEY TERRITORY

APPLICATION FOR RELIEF

NOVEMBER 9, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Brick and related articles, carloads.

From: Locher, Va.

To: Points in Kentucky, Louisiana, Mississippi and Tennessee named in exhibit A of the application and points grouped therewith.

Grounds for relief: Rail carriers, circuity, to maintain grouping, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1278, supp. 40.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

[4th Sec. Application 28623]

LIQUEFIED PETROLEUM GAS FROM SOUTHWEST TO CELINA, OHIO

APPLICATION FOR RELIEF

NOVEMBER 9, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedule listed below.

Commodities involved: Liquefied petroleum gas, in tank-car loads.

From: Points in Southwest including Kansas and New Mexico.

To: Celina, Ohio, and intermediate points.

Grounds for relief: Rail competition, circuity, to maintain grouping, and to maintain rates prescribed in docket 30602 288 I. C. C. 797.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3651, supp. 326.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

IRON AND STEEL ARTICLES FROM ILLINOIS TERRITORY TO THE SOUTH

APPLICATION FOR RELIEF

NOVEMBER 9, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. G. Raasch, Agent, for carriers parties to schedule listed below.

Commodities involved: Iron and steel articles, carloads.

From: Points in Illinois territory.

To: Points in southern territory.

Grounds for relief: Rail competition, circuity, market competition, grouping, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: R. G. Raasch, Agent, I. C. C. No. 793.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

MOTOR-RAIL RATES BETWEEN BOSTON, MASS., PROVIDENCE, R. I., AND HARLEM RIVER, N. Y., ELIZABETH AND EDGEWATER, N. J.; SUBSTITUTED SERVICE

APPLICATION FOR RELIEF

NOVEMBER 9, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: The New York, New Haven and Hartford Railroad Company, and H. W. Taynton Co., Inc.

Involving: Semi-trailers, loaded or empty, on flat cars.

Between: Boston, Mass., and Providence, R. I., on the one hand and Harlem River, N. Y., Elizabeth and Edgewater, N. J., on the other.

Grounds for relief: Competition with motor carriers.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

GROUND OR PULVERIZED MARBLE OR LIMESTONE FROM CARTERSVILLE, GA., TO ST. LOUIS, MO.

APPLICATION FOR RELIEF

NOVEMBER 9, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: The St. Louis-San Francisco Railway Company for itself and on behalf of carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1315, pursuant to fourth-section order No. 16101.

Commodities involved: Limestone or marble, ground or pulverized, carloads.

From: Cartersville, Ga.

To: St. Louis, Mo.

Grounds for relief: Competition with rail carriers, circuitous routes, and operation through higher-rated territory.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of

temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

SULPHATE OF COPPER FROM COPPERHILL, TENN., TO LYNDONVILLE, N. Y.

APPLICATION FOR RELIEF

NOVEMBER 9, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Copper, sulphate of (blue vitriol), carloads.

From: Copperhill, Tenn.

To: Lyndonville, N. Y., and points taking same rates.

Grounds for relief: Competition with rail carriers, circuitous routes, and to maintain grouping.

Schedules filed containing proposed rates: C. W. Boin, Agent, I. C. C. No. A-800, supp. 211.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. *Washington, Saturday, November 14, 1953*

## TITLE 3—THE PRESIDENT

### PROCLAMATION 3036

THANKSGIVING DAY, 1953

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

As a Nation much blessed, we feel impelled at harvest time to follow the tradition handed down by our Pilgrim fathers of pausing from our labors for one day to render thanks to Almighty God for His bounties. Now that the year is drawing to a close, once again it is fitting that we incline our thoughts to His mercies and offer to Him our special prayers of gratitude.

For the courage and vision of our forebears who settled a wilderness and founded a Nation; for the "blessings of liberty" which the framers of our Constitution sought to secure for themselves and for their posterity, and which are so abundantly realized in our land today; for the unity of spirit which has made our country strong; and for the continuing faith under His guidance that has kept us a religious people with freedom of worship for all, we should kneel in humble thanksgiving.

Especially are we grateful this year for the truce in battle-weary Korea, which gives to anxious men and women throughout the world the hope that there may be an enduring peace:

NOW, THEREFORE, I, DWIGHT D. EISENHOWER, President of the United States of America, in consonance with the joint resolution of Congress approved December 26, 1941, do hereby call upon our people to observe Thursday, the twenty-sixth day of November, 1953, as a day of national thanksgiving. On that day let all of us, in accordance with our hallowed custom, forgather in our respective places of worship and bow before God in contrition for our sins, in suppliance for wisdom in our striving for a better world, and in gratitude for the manifold blessings He has bestowed upon us and upon our fellow men.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this Seventh day of November in the year of our Lord nineteen hundred and [SEAL] fifty-three, and of the Independence of the United States of America the one hundred and seventy-eighth.

DWIGHT D. EISENHOWER

By the President:

WALTER B. SMITH,
*Acting Secretary of State.*

Rules and regulations:
Vocational rehabilitation and education; Veterans' Readjustment Assistance Act, 1952; miscellaneous amendments, correction — 7240

## CODIFICATION GUIDE

A numerical list of the parts of the Code of Federal Regulations affected by documents published in this issue. Proposed rules, as opposed to final actions, are identified as such.

**Title 3** — Page
Chapter I (Proclamations):
3036 — 7219

**Title 5**
Chapter I:
Part 6 — 7219

**Title 6**
Chapter IV:
Part 664 — 7219

**Title 7**
Chapter IV:
Part 418 — 7222
Part 420 — 7222
Chapter IX:
Part 914 (2 documents) — 7223
Part 921 (proposed) — 7249
Part 927 — 7224
*Proposed rules* — 7249
Part 933 (3 documents) — 7228, 7229
Part 953 — 7229

**Title 14**
Chapter I:
Part 233 — 7232
Chapter II:
Part 609 — 7233

**Title 17**
Chapter I:
Part 150 — 7230
Chapter II:
Part 210 — 7231

**Title 20**
Chapter V:
Part 604 — 7231

**Title 21**
Chapter I:
Part 3 — 7232
Part 125 (proposed) — 7249

**Title 26**
Chapter I:
Part 316 — 7239

## CODIFICATION GUIDE—Con.

**Title 32** — Page
Chapter XIV:
Part 1453 — 7239
Part 1457 — 7239
Part 1499 — 7239

**Title 32A**
Chapter I (ODM):
DMO V–1 — 7239
Chapter XXI (DRAD):
RR 1 — 7240
RR 2 — 7240
RR 3 — 7240
RR 4 — 7240

**Title 38**
Chapter I:
Part 21 — 7240

**Title 47**
Chapter I:
Part 1 (proposed) — 7250
Part 2 (proposed) — 7250
Part 3 (4 documents) — 7240, 7246, 7247
Part 11 (proposed) — 7250
Part 16 (proposed) (2 documents) — 7255, 7257

of types 21, 22, 23, 31, 35, 36, and 37 tobacco under the tobacco loan program formulated by Commodity Credit Corporation and Production and Marketing Administration, published May 14, 1953 (18 F. R. 2779).

Sec.
664.524 1953 crop; Virginia fire-cured tobacco, Type 21
664.525 1953 crop; Tennessee and Kentucky fire-cured tobacco, Type 22
664.526 1953 crop; Kentucky and Tennessee fire-cured tobacco, Type 23
664.527 1953 crop; Burley tobacco, Type 31
664.528 1953 crop; bark air-cured tobacco, Types 35 and 36
664.529 1953 crop; Virginia sun-cured tobacco, Type 37

AUTHORITY: §§ 664.524 to 664.529 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. Sup., 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 101, 401, 63 Stat. 1051, as amended, 1054, sec. 2, 59 Stat. 506; 15 U. S. C. Sup., 714c, 7 U. S. C. Sup., 1441, 1421, 1312 note.

§ 664.524 *1953 crop; Virginia fire-cured tobacco, Type 21, advance schedule.*[1]

## TITLE 7—AGRICULTURE

### Chapter IV—Federal Crop Insurance Corporation, Department of Agriculture

[Amdt. 4]

PART 418—WHEAT CROP INSURANCE

SUBPART—REGULATIONS FOR THE 1953 AND SUCCEEDING CROP YEARS

POLICY

*Correction*

In Federal Register Document 53-9345, published on page 6990 of the issue for Thursday, November 5, 1953, "Subsection (a) of section 30", appearing in amendatory paragraph 5, should read "Subsection (d) of section 30".

PART 420—MULTIPLE CROP INSURANCE

SUBPART—REGULATIONS FOR THE 1950 AND SUCCEEDING CROP YEARS

*Correction*

The following changes are made in Federal Register Document 53-8108, published at page 6282 of the issue for Friday, October 2, 1953:

1. The word "Average" should read "Acreage" in the second column headnotes of the Production Schedules appearing in §§ 420.55–3, 420.64–3, 420.70–5, 420.70–6, 420.75–2, 420.85–2, 420.90–7, and 420.91–3.

2. The first word of Footnote 1 of the Production Schedule in § 420.55–3 should read "Production".

3. In § 420.75–2 the following changes are made:

a. Paragraph (d) of section 1 of the rider should read:

(d) Winter wheat planted for harvest as grain. (Insurance on wheat to attach the first crop year of the contract only if the application is filed on or before September 30 preceding the calendar year in which the crop for that crop year is normally harvested.)

b. The discount date under section 7 of the rider should read "June 30".

4. First word of the second line of Footnote 1 of the Production Schedule in § 420.80–2 should read "for" instead of "or".

### Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

[Navel Orange Reg. 3]

PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

§ 914.303 *Navel Orange Regulation 3*—(a) *Findings.* (1) Pursuant to the marketing agreement and Order No. 14 (18 F. R. 5638), regulating the handling of navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Navel Orange Administrative Committee, established under the said marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling such navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The Navel Orange Administrative Committee held an open meeting on November 5, 1953, after giving due notice thereof, to consider supply and market conditions for navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., November 15, 1953, and ending at 12:01 a. m., P. s. t., May 2, 1954, no handler shall handle any Navel oranges, grown in District 1, or in District 3, which are of a size smaller than 2.31 inches in diameter, which shall be the largest measurement at a right angle to a straight line running from the stem to the blossom end of the fruit, except that a tolerance of 5 percent, by count, or oranges smaller than such minimum size, but not less than 2.20 inches in diameter, shall be permitted: *Provided,* That in determining the percentage of oranges which are smaller than 2.31 inches in diameter, such percentage shall be based only on those oranges which are of a size 2.43 inches in diameter and smaller, but oranges in any container must average not less than a diameter of 2.375 inches. The aforesaid tolerance is on a container basis but individual packages in any lot may contain not more than double the tolerance specified: *Provided,* That the average for the entire lot is within the tolerance specified: *Provided further,* That at least one orange which does not meet the requirements shall be permitted in any one package.

(2) As used in this section, "handler," "handle," "District 1," and "District 3," shall have the same meaning as when used in said marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 12th day of November 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

[F. R. Doc. 53-9660; Filed, Nov. 13, 1953; 8:57 a. m.]

[Navel Orange Reg. 4]

PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

§ 914.304 *Navel Orange Regulation 4*—(a) *Findings.* (1) Pursuant to the marketing agreement and Order No. 14 (18 F. R. 5638), regulating the handling of navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Navel Orange Administrative Committee, established under the said marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. The Navel Orange Administrative Committee held an open meeting on November 12, 1953, after giving due notice thereof, to consider supply and market conditions for navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date hereof.

(b) *Order.* (1) The quantity of navel oranges grown in Arizona and designated part of California which may be handled during the period beginning at 12:01 a. m., P. s. t., November 15, 1953, and ending at 12:01 a. m., P. s. t., November 22, 1953, is hereby fixed as follows:

(i) District 1: 164.21 carloads;

(ii) District 2: Unlimited movement;

(iii) District 3: 50 carloads;

(iv) District 4: 50 carloads.

(2) The prorate base of each handler who has made application therefor, as provided in the said marketing agreement and order, is hereby fixed in accordance with the prorate base schedule

which is attached hereto and made a part hereof by this reference.

(3) As used in this section "handled," "handler," "carloads," "prorate base," "District 1," "District 2," "District 3," and "District 4" shall have the same meaning as when used in said marketing agreement and order.

[Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c]

Done at Washington, D. C., this 13th day of November 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

[Docket No. AO 71 A-23]

## PART 927—MILK IN THE NEW YORK METROPOLITAN MILK MARKETING AREA

### ORDER AMENDING ORDER, AS AMENDED

§ 927.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary to and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), and in accordance with the notice of hearing issued on December 24, 1952 (18 F. R. 43), a public hearing was held at Syracuse, New York, on January 22-23, 1953, and on February 16-21, 1953, upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the New York metropolitan milk marketing area (7 CFR 927.1 et seq.).

The hearing was held with respect to whether the milk marketing order, as amended, for the New York metropolitan marketing area should continue to provide payments, from the producer-settlement fund, to cooperative associations of producers for market-wide services, and, if so, the changes, if any, which should be made in the present provisions of the order, as amended, under which the payments are authorized for market-wide services. The transcript of the testimony at the hearing consists of more than 1,700 pages and numerous exhibits.

The Assistant Administrator, Production and Marketing Administration, on August 17, 1953, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision in this proceeding. The notice of filing of such recommended decision and opportunity to file written exceptions thereto was published in the FEDERAL REGISTER on August 21, 1953 (18 F. R. 4998). Subsequent to the expiration of the time for filing exceptions, the Secretary of Agriculture, on October 7, 1953, issued his final decision in this proceeding and directed that a referendum be conducted to determine whether the issuance of this order amending the order, as amended, was approved or favored by the producers who, during the determined representative period (July 1953), were engaged in the production of milk for sale in the said marketing area. The decision and order of the Secretary directing that a referendum be held were published in the FEDERAL REGISTER on October 10, 1953 (18 F. R. 6458, 6465).

Upon the basis of the evidence introduced at said hearing and the record thereof, it is found that:

(1) The marketing agreement and the order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act.

(2) The terms and conditions in § 927.76 of the order, as amended, and as hereby further amended, are incidental to, and not inconsistent with, the terms and conditions specified in subsections (5)-(7) of section 8c of the act (7 U. S. C. sections 608c (5)-(7)) and necessary to effectuate the other provisions of the order.

(3) The terms and conditions in § 927.76 of the order, as amended, and as hereby further amended, are necessary in order equitably to apportion the total value of the milk purchased by all handlers among producers and associations of producers, on the basis of their marketings of milk during each month which is the proper representative period.

(4) The terms and conditions in § 927.76 of the order, as amended, and as hereby further amended, are necessary to accord such recognition and encouragement to producer-owned and producer-controlled cooperative associations as will be in harmony with the policy toward cooperative associations set forth in the relevant acts of Congress, and as will tend to promote efficient methods of marketing and distribution.

(5) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the marketing agreement and in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest.

(6) The marketing agreement and the order, as amended, and as hereby further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity, specified in a marketing agreement upon which a hearing has been held.

In addition to the foregoing findings, numerous other findings have been made in the final decision of October 7, 1953 (18 F. R. 6458), on the basis of the evidence adduced at the hearing.

(b) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or shipping milk covered by this order amending the order, as amended, which is marketed within the New York metropolitan milk marketing area) of more than 50 percent of the milk which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said proposed marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order amending the order, as amended, is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order amending the order, as amended, is approved or favored by 87.88 percent of the 30,684 producers who participated in a referendum on the question of approval of its issuance and who during the determined representative period (July 1953) were engaged in the production of milk for sale in the said marketing area. Of the 18,312 ballots mailed to individual producers only 523 were returned and of these 20 affirmative, 18 negative, and 5 blank ballots were disqualified. Of the 480 qualified individual ballots, 42.5 percent (204) approved and 57.5 percent (276) disapproved the issuance of this amendatory order. There were 49,453 producers who were eligible to vote in the referendum.

*Order relative to handling.* It is therefore ordered that on and after the effective date hereof, the handling of milk in the New York metropolitan milk marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended; and the aforesaid order, as amended, is hereby further amended as follows:

Delete § 927.76 of the order as now in effect and subsitute therefor the following:

§ 927.76 *Cooperative payments for market-wide services.* Payments shall be made to qualified cooperatives or to federations under the conditions, in the manner, and at the rates set forth in this section.

(a) *Definitions.* As used in this section the following terms shall have the following meanings:

(1) "Cooperative" means a cooperative association of producers which is duly incorporated under the cooperative corporation laws of a state; is qualified under the Capper-Volstead Act (7 U. S. C. 291 et seq.); has all its activities under the control of its members and has full authority in the sale of its members' milk.

(2) "Federation" means a federation of cooperatives.

(3) "Federated cooperative" means a cooperative which is a member of a federation and on whose membership the federation is an applicant for or receives payments under subparagraph (2) of paragraph (f) of this section.

(4) "Member" means, when used with respect to a member of a cooperative or of a federated cooperative, only a member who is also a producer, as defined in § 927.6.

(b) *Qualified cooperatives and federations.* A cooperative or federation may submit an application to the Market Administrator for payments under the provisions of this section. In accordance with the requirements of the rules and regulations issued by the Market Administrator, any such application shall include a written description of the applicant's program for the performance of market-wide services, including evidence that adequate facilities and personnel will be maintained by it so as to enable it to perform the market-wide services; and the application shall contain a statement by the applicant that it will perform the required market-wide services for which it is applying for payments. The application shall set forth all necessary data so as to enable the Market Administrator to determine whether it meets the qualification requirements with respect to the payments for which the application is submitted. An application shall be approved by the Market Administrator only if he determines that:

(1) In the case of a cooperative:

(i) It has not less than 4,000 members and receives from its members not less than 1 cent per hundredweight of milk delivered by them: *Provided*, That no person shall be counted in this respect as a member if he is a member of another cooperative which is an applicant for or which receives cooperative payments, or if he is a member of a federated cooperative.

(ii) If the application is also for an additional payment under subparagraph (3) of paragraph (f) of this section, it has not less than 6,000 members and receives from its members not less than 1 cent per hundredweight of milk delivered by them, subject to the proviso in subdivision (i) of this subparagraph.

(iii) If the application is also for an additional payment under subparagraph (4) of paragraph (f) of this section, the cooperative is an operating cooperative which operates marketing facilities, i. e., pool plant(s), at which it receives at least 25 per centum, by weight, of the milk marketed by all of its members: *Provided*, That in determining whether the 25 per centum minimum requirement is complied with there shall be excluded the milk delivered by a member of the cooperative who is a member of another cooperative which is an applicant for or which receives cooperative payments on the same milk or which is a federated cooperative in a federation which is an applicant for or receiving cooperative payments on the same milk.

(2) In the case of a federation:

(i) It is duly incorporated under the laws of a State.

(ii) It has contracts with each of its federated cooperatives under which the cooperatives agree to remain in the federation for at least one year, and such contracts cover or will be renewed for a yearly period for every subsequent year for which the federated cooperatives are to be included within the membership of the federation for cooperative payment purposes.

(iii) Its federated cooperatives have an aggregate of not less than 4,000 members and the federated cooperatives receive from their members not less than 1 cent per hundredweight of milk delivered by them; and its federated cooperatives will pay to the federation, when required by rules and regulations issued by the market administrator, the minimum monthly payment specified in the rules and regulations to finance the activities of the federation that are not market-wide in character: *Provided*, That no person shall be counted in this respect as a member if he is a member of a cooperative which is an applicant for or which receives cooperative payments, or if he is a member of another federated cooperative.

(iv) If the application is also for an additional payment under subparagraph (3) of paragraph (f) of this section, the aggregate membership of the federated cooperatives is not less than 6,000 members and the federated cooperatives receive from their members not less than 1 cent per hundredweight of milk delivered by their members, subject to the proviso in subdivision (iii) of this subparagraph.

(v) If the application is also for an additional payment under subparagraph (5) of paragraph (f) of this section, the federation operates marketing facilities, i. e., pool plant(s), or the federated cooperatives operate marketing facilities, at which is received at least 25 per centum, by weight, of the milk marketed by the members of the federated cooperatives: *Provided*, That in determining whether the 25 percentum minimum requirement is complied with, there shall be excluded the milk delivered by members of a cooperative which is an applicant for or which receives cooperative payments on the same milk, or which is a federated cooperative in another federation which is an applicant for or receiving cooperative payments on the same milk, or which is not meeting the requirements of this section applicable to it.

(3) The applicant cooperative or federation demonstrates that it has the ability to perform the market-wide services for which application is made, and that such services will be performed.

(4) The applicant cooperative or the federated cooperatives of an applicant federation are in no way precluded from arranging for the utilization of milk under their respective control so as to yield the highest available net return to all producers without displacing an equivalent quantity of other producer milk in the preferred classification.

(c) *Notice of qualification or denial; effective date.* Upon determination by the market administrator that a cooperative or a federation is qualified to receive payment for performance of the market-wide services, he shall transmit such determination to the applicant cooperative or federation and publicly announce the issuance of the determination. The determination shall be effective with respect to milk delivered on and after the first day of the month following issuance of the determination. If, after consideration of an application for payments for market-wide services, the market administrator determines that the cooperative or federation is not qualified to receive such payments, he shall promptly notify the applicant and specifically set forth in such notice his reasons for denial of the application.

(d) *Requirements for continued qualification.* From time to time and in accordance with rules and regulations which may be issued by the market administrator, each qualified cooperative or federation must demonstrate to the market administrator that it continues to meet the qualification requirements for the payments and is fully performing the market-wide services for which it is being paid.

(e) *Market-wide services.* Each cooperative or federation shall perform the market-wide services enumerated in this paragraph. Such services are: (1) Analyzing milk marketing problems and their solution, conducting market research and maintaining current information as to all market developments, preparing and assembling statistical data relative to prices and marketing conditions, and making an economic analysis of all such data; (2) determining the need for the formulation of amendments to the order and proposing such amendments or requesting other appropriate action by the Secretary or the market administrator in the light of changing conditions; (3) participating in proceedings with respect to amendments to the order, including the preparation and presentation of evidence at public hearings, the submission of appropriate briefs and exceptions, and also participating, by voting or otherwise, in the referenda relative to amendments; (4) participating in the meetings called by the market administrator, such as meetings with respect to rules and regulations issued under the order, including activities such as the preparation and presentation of data at such meetings and briefs for submission thereafter; (5) conducting a comprehensive educational program among producers—i. e., members and nonmembers of cooperatives—and keeping such producers well informed for participation in the activities under the regulatory order and, as a part of such program, issuing publications that contain relevant data and information about the order and its operation, and the distribution of such publication to members and, on the same subscription basis, to nonmembers who request it, and holding meetings at which members and nonmembers may attend; and (6) in the case of a cooperative or federation which receives an additional payment under subparagraph (4) or (5) of paragraph (f) of this section, operating marketing facilities, or having within its membership federated cooperatives operating marketing facilities, i. e., pool plant(s), at which is received at least 25 per centum, by weight, of the milk marketed by all the members of the cooperative or by all the members of the federated cooperatives.

(f) *Rate, computation, time, and method of payment.* (1) Subject to the provisions of paragraph (g) of this section, the market administrator, on or before the 25th day of each month, shall make payment out of the producer-settlement fund, or issue equivalent credit therefor, to each cooperative or federation which is qualified for such payments for market-wide services. The payment to a cooperative shall be based upon the milk reported by cooperative or proprietary handlers to have been received during the preceding month from its members, and the payment to a federation shall be based upon the milk reported by cooperative or proprietary handlers to have been received during the preceding month from the members of its federated cooperatives, subject in both instances to adjustment upon verification by the market administrator.

(2) Such payment or credit shall be at the rate of 2 cents per hundredweight of milk in accordance with subparagraph (1) of this paragraph: *Provided*, That in computing payment to a cooperative there shall be excluded all of the milk of its members who belong to another cooperative which is an applicant for or which receives cooperative payments on the same milk or which is a federated cooperative in a federation which is an applicant for or receiving cooperative payments on the same milk: *And provided further*, That in computing payment to a federation there shall be excluded all of the milk of members of a cooperative which is an applicant for or which receives cooperative payments on the same milk or which is a federated cooperative in another federation which is an applicant for or receiving cooperative payments on the same milk, or which is not meeting the requirements of this section applicable to it.

(3) Any cooperative that has at least 6,000 members and any federation which has an aggregate membership of its federated cooperatives of at least 6,000 members shall receive a payment, in addition to the payment provided for in subparagraph (2) of this paragraph, of 1 cent per hundredweight of milk in accordance with subparagraph (1) of this paragraph and subject to the provisos contained in subparagraph (2) of this paragraph.

(4) Any cooperative that operates marketing facilities, i. e., pool plant(s), at which is received at least 25 per centum, by weight, of the milk marketed by all of its members shall receive a payment, in addition to the payment provided for in subparagraph (2) or subparagraph (3) of this paragraph, of 1 cent per hundredweight of all milk marketed by its members in accordance with subparagraph (1) of this paragraph: *Provided*, That in computing the payment under this subparagraph there shall be excluded the milk delivered by a member of the cooperative who is a member of another cooperative which is an applicant for or which receives cooperative payments on the same milk or which is a federated cooperative in a federation which is an applicant for or receiving cooperative payments on the same milk.

(5) Any federation that operates marketing facilities, i. e., pool plant(s), or whose members include one or more federated cooperatives that operate marketing facilities, at which is received at least 25 per centum, by weight, of the milk marketed by all the members of its federated cooperatives shall receive a payment, in addition to the payment provided for in subparagraph (2) or subparagraph (3) of this paragraph, of 1 cent per hundredweight of all milk marketed by such members in accordance with subparagraph (1) of this paragraph: *Provided*, That in computing the payment under this subparagraph there shall be excluded the milk delivered by members of a cooperative which is an applicant for or which receives cooperative payments on the same milk, or which is a federated cooperative in another federation which is an applicant for or receiving cooperative payments on the same milk, or which is not meeting the requirements of this section applicable to it.

(6) If an individually qualified cooperative is affiliated with a federation, the cooperative payment shall be made to such cooperative unless its contract with the federation specifies in writing that the federation is to receive the payments. Any such contract must authorize the federation to receive the payments for at least one year, and such agreement must cover or be renewed for a yearly period for every subsequent year for which the federation is to receive the payments.

(g) *Disqualification.* (1) The market administrator shall issue an order wholly or partly disqualifying a previously qualified cooperative or federation for payments authorized pursuant to this section and such payments shall not thereafter be made to it if he determines that:

(i) The cooperative or federation no longer complies with the requirements of this section: *Provided*, That in the case of the federation, if one of its federated cooperatives has failed to comply with the requirements of this section applicable to it or has failed, promptly after demand by the market administrator, to arrange for the utilization of milk under its control so as to yield the highest available net return to all producers without displacing an equivalent quantity of other producer milk in the preferred classification, the federation shall be disqualified only to the extent that its qualification for payments or the amount of its payments are based upon the membership, milk or operations of such non-complying federated cooperatives;

(ii) The cooperative or federation has failed to make reports or furnish records pursuant to this section or pursuant to rules and regulations issued by the market administrator; or

(iii) In the case of the cooperative, it has failed, promptly after demand by the market administrator, to arrange for the utilization of milk under its control so as to yield the highest available net return to all producers without displacing an equivalent quantity of other producer milk in the preferred classification.

(2) An order of the market administrator wholly or partly disqualifying a cooperative or federation shall not be issued until after the cooperative or federation has had opportunity for hearing thereon following not less than 15 days' notice to it specifying the reasons for the proposed disqualification. If the cooperative or federation fails to file a written request for hearing with the market administrator within such period of 15 days, the market administrator may issue an order of disqualification without further notice; but if within such period a request for hearing is filed, the market administrator shall promptly proceed to hold such hearing pursuant to rules and regulations issued by him under paragraph (i) of this section.

(3) A disqualification order issued by the market administrator shall set forth the findings and conclusions on the basis of which it is issued.

(h) *Appeals*—(1) *From denials of application.* Any cooperative or federation whose application for qualification has been denied by the market administrator may, within 30 days after notice of such denial, file with the Secretary a written petition for review. But the failure to file such petition shall not bar the cooperative or federation from again applying to the market administrator for qualification.

(2) *From disqualification orders.* A disqualification order by the market administrator shall become final 30 days after its service on the cooperative or federation unless within such 30-day period the cooperative or federation files a written petition with the Secretary for review thereof. If such petition for review is filed, payments for which the cooperative or federation has been disqualified by the order shall be held in reserve by the market administrator pending ruling of the Secretary, after which the sums so held in reserve shall either be returned to the producer-settlement fund or paid over to the cooperative or federation depending on the Secretary's ruling on the petition. If such petition for review is not filed, any payments which otherwise would be made within the 30-day period following issuance of the disqualification order shall be held in reserve until such order becomes final and shall then be returned to the producer-settlement fund.

(3) *Record on appeal.* If an appeal is taken under subparagraphs (1) or (2) of this paragraph, the market administrator shall promptly certify to the Secretary the ruling or order appealed from and the evidence upon which it was issued: *Provided*, That if a hearing was held the complete record thereof, including the applications, petitions, and all exhibits or other documentary material submitted in evidence shall be the record so certified. Such certified material shall constitute the sole record upon which the appeal shall be decided by the Secretary.

(i) *Regulations.* The market administrator is authorized to issue regulations and amendments thereto to effectuate the provisions of this section and to facilitate and implement the administration of its provisions. Such regulations shall be issued in accordance with the following procedure:

(1) All proposed rules and regulations and amendments thereto shall be the subject of a meeting called by the market administrator, at which all interested persons shall have opportunity to be heard. Not less than five days prior to the meeting, notice thereof and of the proposed regulations or amendments shall be published in the FEDERAL REGISTER and mailed to qualified cooperatives and federations. A stenographic record shall be made at such meetings which shall be public information and be available for inspection at the office of the market administrator.

(2) A period of at least five days after the meeting shall be allowed for the filing of briefs.

(3) All regulations and amendments thereto issued by the market administrator pursuant to this section must be submitted in tentative form to the Secretary for approval, shall not be effective without such approval, and shall be published in the FEDERAL REGISTER following such approval. The regulations or amendments in tentative form shall be forwarded also to cooperatives and federations qualified under this section and to other persons upon request in writing. The Secretary shall either approve the regulations or amendments thereto submitted by the market administrator or direct the market administrator to reconsider the tentative rules or amendments. In the event the market administrator is directed to give reconsideration to the matter, the market administrator shall either issue revised tentative regulations or amendments or call another meeting pursuant to this section for additional consideration of the rules or amendments.

(j) *Reports and records.* A qualified cooperative or federation and any federated cooperative in a qualified federation shall make such reports to the market administrator as may be requested by him for the administration of the provisions of this section, and shall maintain and make available to the market administrator or his representative such records as will enable the market administrator to verify such reports.

(k) *Notices, demands, orders, etc.* All notices, demands, orders or other papers required by this section to be given to or served upon a cooperative or federation shall be deemed to have been given or served as of the time when mailed to the last known secretary of the cooperative or federation at his last known address.

(l) *Adjustment period.* Any cooperative which was qualified, on the effective date of this section, to receive payments pursuant to the provisions of this section as effective December 31, 1952 (referred to in this paragraph as the "former provisions"), shall continue to receive payments pursuant to and subject to the conditions specified in such former provisions on milk received from producers during the 90-day period immediately following the effective date of this section; and if such cooperative has applied, or is a federated cooperative of a federation which has applied, for qualification pursuant to this section prior to the expiration of such 90-day period, it shall continue to receive payments pursuant to the former provisions beyond such 90-day period until such time as the market administrator has ruled upon such application: *Provided*, That a cooperative or a federation may be qualified to receive payments pursuant to this section within such 90-day period: *And provided further*, That in no event shall a cooperative, or a federated cooperative in a federation, receive payment under the former provisions for any period following the effective date of qualification of the cooperative or federation under this section. For the purposes and to the extent specified in this paragraph, the provisions of this section as effective December 31, 1952, shall remain in force and effect after the effective date of this section.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup., 608c)

Issued at Washington, D. C., this 9th day of November 1953, to be effective on and after December 16, 1953.

[SEAL] EZRA TAFT BENSON,
*Secretary of Agriculture.*

[F. R. Doc. 53-9640; Filed, Nov. 13, 1953; 8:55 a. m.]

[Grapefruit Reg. 188]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.644 *Grapefruit Regulation 188*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of grapefruit, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than November 16, 1953. Shipments of grapefruit, grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, and will so continue until November 16, 1953, the recommendation and supporting information for continued regulation subsequent to November 15 was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on November 10; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such grapefruit; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of grapefruit; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., e. s. t., November 16, 1953, and ending at 12:01 a. m., e. s. t., November 30, 1953, no handler shall ship:

(i) Any white seeded grapefruit, grown in the State of Florida, which do not grade at least U. S. No. 1 Russet;

(ii) Any pink seeded grapefruit, grown in the State of Florida, which do not grade at least U. S. No. 2;

(iii) Any seedless grapefruit, grown in the State of Florida, which do not grade at least U. S. No. 2;

(iv) Any white seeded grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 70 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box;

(v) Any pink seeded grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 80 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box; or

(vi) Any seedless grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 96 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box.

(2) As used in this section, "handler," and "ship," shall have the same meaning as when used in said amended marketing agreement and order; and "U. S. No. 1 Russet," "U. S. No. 2," "standard pack," and "standard nailed box" shall have the same meaning as when used in the revised United States Standards for Florida Grapefruit (§ 51.193 of this title).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 12th day of November 1953.

[SEAL] S. R. SMITH,

[Orange Reg. 243]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.645 *Orange Regulation 243*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than November 16, 1953. Shipments of oranges, grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, and will so continue until November 16, 1953; the recommendation and supporting information for continued regulation subsequent to November 15 was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on November 10; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of oranges; and compliance with this section will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., e. s. t., November 16, 1953, and ending at 12:01 a. m., e. s. t., November 30, 1953, no handler shall ship:

(i) Any oranges, except Temple oranges, grown in the State of Florida, which do not grade at least U. S. No. 1 Russet; or

(ii) Any oranges, except Temple oranges, grown in the State of Florida, which are of a size smaller than 2$^{1}/_{16}$ inches in diameter, measured midway at a right angle to a straight line running from the stem to the blossom end of the fruit, except that a tolerance of 10 percent, by count, of oranges smaller than such minimum size shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances, specified in the revised United States Standards for Florida oranges (§ 51.302 of this title): *Provided*, That in determining the percentage of oranges in any lot which are smaller than 2$^{1}/_{16}$ inches in diameter, such percentage shall be based only on those oranges in such lots which are of a size 2$^{1}/_{16}$ inches in diameter and smaller.

(2) During the period beginning at 12:01 a. m., e. s. t., November 16, 1953, and ending at 12:01 a. m., e. s. t., November 23, 1953, no handler shall ship:

(i) Any Temple oranges, grown in the State of Florida, which do not grade at least U. S. Fancy.

(3) As used in this section, the terms "handler," "ship," and "Growers Administrative Committee" shall each have the same meaning as when used in said amended marketing agreement and order; and the terms "U. S. Fancy," and "U. S. No. 1 Russet" shall have the same meaning as when used in the revised United States Standards for Florida Oranges (§ 51.302 of this title).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 12th day of November 1953.

[SEAL] S. R. SMITH,

[Tangerine Reg. 139]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.646 *Tangerine Regulation 139*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of tangerines, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than November 16, 1953. Shipments of tangerines, grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, and will so continue until November 16, 1953; the recommendation and supporting information for continued regulation subsequent to November 15 was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on November 10; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such tangerines; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of tangerines; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date hereof.

(b) *Order* (1) During the period beginning at 12:01 a. m., e. s. t., November 16, 1953, and ending at 12:01 a. m., e. s. t., November 23, 1953, no handler shall ship:

(i) Any tangerines, grown in the State of Florida, that do not grade at least U. S. No. 1; or

(ii) Any tangerines, grown in the State of Florida, which are of a size smaller than the size that will pack 176 tangerines, packed in accordance with the requirements of a standard pack, in a half-standard box (inside dimensions 9$^{1}/_{2}$ x 9$^{1}/_{2}$ x 19$^{1}/_{8}$ inches; capacity 1,726 cubic inches).

(2) As used in this section, "handler," "ship," and "Growers Administrative Committee" shall have the same meaning as when used in said amended marketing agreement and order; and "U. S. No. 1" and "standard pack" shall have the same meaning as when used in the United States Standards for Tangerines (§ 51.416 of this title).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 12th day of November 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

[Lemon Reg. 511]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATION OF SHIPMENTS

§ 953.618 *Lemon Regulation 511*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified in this section was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on November 10, 1953, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., November 15, 1953, and ending at 12:01 a. m., P. s. t., November 22, 1953, is hereby fixed as follows:

(i) District 1: 12 carloads;

(ii) District 2: 227 carloads;

(iii) District 3: 11 carloads.

(2) The prorate base of each handler who has made application therefor, as provided in the said amended marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached hereto and made a part hereof by this reference.

(3) As used in this section, "handled," "handler," "carloads," "prorate base," "District 1," "District 2" and "District 3," shall have the same meaning as when used in the said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 12th day of November 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

# TITLE 17—COMMODITY AND SECURITIES EXCHANGES

## Chapter I — Commodity Exchange Authority (Including Commodity Exchange Commission), Department of Agriculture

[Hearing Docket CE-P 10]

PART 150—ORDERS OF THE COMMODITY EXCHANGE COMMISSION

LIMITS ON POSITION AND DAILY TRADING IN SOYBEANS FOR FUTURE DELIVERY

*Findings of fact.* On September 22, 1953, public notice was given (18 F. R. 5654) that the Commodity Exchange Commission proposed to amend its order of August 13, 1951 (16 F. R. 8107), establishing limits on position and daily trading in soybeans for future delivery, by increasing such limits from 1,000,000 bushels to 2,000,000 bushels. The said notice set forth the considerations which were the basis for the proposed amendment, stated that a hearing with respect thereto would be held if any interested person desired a hearing and notified the Presiding Officer to that effect on or before October 10, 1953, and specified that written statements with reference to the proposed amendment could be submitted by any interested person in addition to or in lieu of testimony at such hearing. No requests for a hearing have been received.

Pursuant to the provisions of section 4a of the Commodity Exchange Act (7 U. S. C. 6a), the Commodity Exchange Commision, after investigation and full consideration of written statements submitted by interested persons, and of representations made and evidence furnished by the Commodity Exchange Authority of the United States Department of Agriculture, which statements, representations, and evidence are made a part of the record, does hereby find:

(a) The volume of trading in soybean futures on the Chicago Board of Trade has been maintained at a level approximately equal to those for wheat and corn on the same market during the two and one-half years from January 1951 to June 1953. The volume of trading in soybeans during this period has approximated 25 to 30 percent of total trading in all grains on the Chicago Board of Trade. The ratio of volume of trading to open contracts in soybean futures is consistently higher than comparable ratios for other commodities.

(b) The level of open contracts in the January 1951–June 1953 period of approximately 46,100,000 bushels is not significantly higher than the average of 40,500,000 bushels in the representative period, October 1943 through December 1950, to warrant an increase in the position limit. However, the same limit for positions as for daily trading would avoid confusion and difficulties in enforcement.

(c) Trading in soybeans for future delivery on or subject to the rules of a contract market by a person who holds or controls a speculative net position of more than 2,000,000 bushels, long or short, in any one future or in all futures combined in soybeans, on or subject to the rules of such contract market, tends to cause sudden or unreasonable fluctuations or changes in the price of soybeans not warranted by changes in the conditions of supply or demand.

(d) Speculative buying or selling by a person during one business day of more than 2,000,000 bushels in any one future or in all futures combined in soybeans, on or subject to the rules of a contract market, tends to cause sudden or unreasonable fluctuations or changes in the price of soybeans not warranted by changes in the conditions of supply or demand.

*Conclusions.* Upon the foregoing facts, it is concluded that in order to prevent excessive speculation in soybean futures which will cause sudden, unreasonable, or unwarranted fluctuations or changes in price resulting in an undue and unnecessary burden on interstate commerce in soybeans, it is necessary to maintain limits on the amount of speculative trading under contracts of sale of soybeans for future delivery on or subject to the rules of contract markets which may be done by any person; that an increase in the limit on daily trading in soybean futures is warranted; that there should be a similar increase in the limit on position; that 2,000,000 bushels is a reasonable limit on the net long or net short speculative position which any person may hold or control and upon the daily speculative purchases or sales which any person may make, in any one future or in all futures combined in soybeans, on or subject to the rules of any contract market.

*Order.* Section 150.4 (a) and (b) of the order of the Commodity Exchange Commission, promulgated August 13, 1951 (17 CFR, 1952 Supp. 150.4 (a), (b)), is hereby amended by deleting the figure "1,000,000" appearing in each paragraph of such section and substituting in lieu thereof the figure "2,000,000."

(Sec. 4a, as added by sec. 5, 49 Stat. 1492; 7 U. S. C. 6a)

This amendment increases the limit on the maximum net long or net short position which any person may hold or control in soybeans on or subject to the rules of any one contract market from 1,000,000 bushels in any one future or in all futures combined to 2,000,000 bushels in any one future or in all futures combined, and raises the limit on the maximum quantity of soybeans which any person may buy and on the maximum quantity which such person may sell, on or subject to the rules of any one contract market during any one business day, from 1,000,000 bushels in any one future or in all futures combined to 2,000,000 bushels in any one future or in all futures combined. Since the amendment will operate to relieve or liberalize an existing restriction and will not adversely affect the public, it is hereby found upon good cause, in accordance with section 4 (c) of the Administrative Procedure Act (5 U. S. C. 1003 (c)), that the amendment should be made effective within less than 30 days after publication in the FEDERAL REGISTER.

This amendment shall become effective November 16, 1953.

Issued this 10th day of November 1953.

COMMODITY EXCHANGE COMMISSION,
[SEAL] EZRA TAFT BENSON,
*Secretary of Agriculture, Chairman.*
SINCLAIR WEEKS,
*Secretary of Commerce.*
HERBERT BROWNELL, JR.,
*Attorney General.*

## Chapter II—Securities and Exchange Commission

PART 210—FORM AND CONTENT OF FINANCIAL STATEMENTS, SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935 AND INVESTMENT COMPANY ACT OF 1940

TREATMENT OF COMPENSATION IN THE FORM OF STOCK OPTIONS GRANTED BY CORPORATIONS TO THEIR OFFICERS AND EMPLOYEES

On February 25, 1953, the Commission announced, in Securities Exchange Act of 1934 Release No. 4893-X, that it had under consideration the adoption of a proposed rule concerning treatment of compensation in the form of stock options granted by corporations to their officers and employees. All interested persons were invited to submit views and comments on the proposal.

The rule was proposed because of the apparent lack of unanimity of opinion among corporate and public accountants as to the appropriate manner in which the amounts, if any, to be charged against income representing compensation to recipients of stock options should be determined. The principal point of disagreement was the time at which the determination should be made. Persuasive arguments were advanced for each of three dates, i. e., when the options were (1) granted, (2) exercisable, or (3) exercised.

The Commission considered the comments and suggestions received and concluded that the propriety of using any one of these dates in all cases had not been established, and that determination of, and accounting for, cost to the grantor based upon the excess of fair value of the optioned shares over the option price at any one of the three dates advocated might, in some cases, result in the presentation of misleading profit and loss or income statements.

In these circumstances the Commission deemed it inappropriate to prescribe a procedure for determining the amount of cost, if any, of these stock options to be reflected in profit and loss or income statements filed with the Commission. However, in order that investors may be apprised of the monetary significance of the concessions made by registrants to officers and employees through the granting of stock options, the Commission announced, on August 25, 1953, in Securities Exchange Act Release No. 4926-X, a proposal to adopt a rule to be added to Regulation S-X (Part 210), and to be designated § 210.3-20 (d) (Rule 3-20 (d)), which will require full and complete disclosure of all stock option arrangements in financial statements filed with the Commission.

Only a small number of comments were received with respect to this latter proposal, and the Commission has determined that the rule should be adopted with certain minor modifications in wording. The principal change in the rule as adopted is the addition to § 210.3-20 (d) (2) of the sentence "The required information may be summarized as appropriate with respect to each of these categories."

The text of the Commission's action follows:

The Securities and Exchange Commission, acting pursuant to authority conferred upon it by the Securities Act of 1933, particularly sections 6, 7, 8, 10 and 19 (a) thereof, the Securities Exchange Act of 1934, particularly sections 12, 13, 15 (d) and 23 (a) thereof, the Public Utility Holding Company Act of 1935, particularly section 20 thereof, and Investment Company Act of 1940, particularly sections 8, 30, 31 (c) and 38 (a) thereof, and deeming such action necessary and appropriate in the public interest and for the protection of investors and necessary for the execution of the functions vested in it by the said acts, hereby adopts the following rule to be added to Article 3 of Regulation S-X:

(d) *Capital stock optioned to officers and employees.* (1) A brief description of the terms of each option arrangement shall be given, including (i) the title and amount of securities subject to option; (ii) the year or years during which the options were granted; and (iii) the year or years during which the optionees became, or will become, entitled to exercise the options.

(2) State (i) the number of shares under option at the balance sheet date, and the option price and the fair value thereof, per share and in total, at the dates the options were granted; (ii) the number of shares with respect to which options became exercisable during the period, and the option price and the fair value thereof, per share and in total, at the dates the options became exercisable; and (iii) the number of shares with respect to which options were exercised during the period, and the option price and the fair value thereof, per share and in total, at the dates the options were exercised. The required information may be summarized as appropriate with respect to each of these categories.

(3) State the basis of accounting for such option arrangements and the amount of charges, if any, reflected in income with respect thereto.

The foregoing action shall be effective with respect to financial statements for any fiscal year ending on or after December 31, 1953, filed as a part of any registration statement, application for registration, or report.

(Secs. 19, 23, 48 Stat. 85, 901 as amended, sec. 38, 54 Stat. 841; 15 U. S. C. 77s, 78w, 80a-37. Interpret or apply secs. 6, 7, 8, 10, 12, 13, 15, 48 Stat. 78, 79, 81, 892, 894, 895, as amended, sec. 20, 49 Stat. 833; secs. 8, 30, 31, 54 Stat. 803, 836, 838, 15 U. S. C. 77f, 77g, 77h, 77j, 78l, 78m, 78o, 79t, 80a-8, 80a-29, 80a-30)

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

NOVEMBER 3, 1953.

# TITLE 20—EMPLOYEES' BENEFITS

## Chapter V—Bureau of Employment Security, Department of Labor

PART 604—POLICIES OF THE UNITED STATES EMPLOYMENT SERVICE

SERVICE TO MINORITY GROUPS

Pursuant to the authority vested in me by section 12, 48 Stat. 117, as amended, 29 U. S. C. 49k, Reorganization Plan No. 2 of 1949 and by delegation from the Secretary of Labor, this part is amended in the manner set forth below:

1. Section 604.8 is amended to read as follows:

§ 604.8 *Service to minority groups.* It is the policy of the United States Employment Service:

(a) To promote employment opportunity for all applicants on the basis of their skills, abilities and job qualifications.

(b) To make definite continuous effort with employers with whom relationships are established, to the end that their hiring specifications be based exclusively on job performance factors.

(c) To assist the United States Civil Service Commission in effectuating Executive Order 9980 by disregarding nonperformance factors of race, color, religion, or national origin in the recruitment, selection, and referral of workers on job orders from Federal establishments.

(d) To cooperate with procurement agencies and other appropriate agencies

of the Government in their efforts to secure compliance with nondiscrimination clauses in Government contracts.

(Sec. 12, 48 Stat. 117; 29 U. S. C. 40k)

Signed at Washington, D. C., this 5th day of November 1953.

ROBERT C. GOODWIN,
*Director of the Bureau of Employment Security.*

[F. R. Doc. 53-9595; Filed, Nov. 13, 1953; 8:47 a. m.]

## TITLE 21—FOOD AND DRUGS

### Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

LABEL DECLARATION OF SALT IN FROZEN VEGETABLES

Pursuant to section 3 of the Administrative Procedure Act (60 Stat. 237, 238; 5 U. S. C. 1002), the following statement of policy is issued:

§ 3.31 *Label declaration of salt in frozen vegetables.* (a) In a number of diseases or disease conditions it is important to restrict the intake of sodium. Sodium occurs in all natural foods, but added salt makes the most important contribution to the total sodium intake in the diet. Most fresh vegetables are of low sodium content and consumers generally regard frozen vegetables as being free of added salt and suitable for use in low-sodium diets. While salt may not be added directly as a seasoning ingredient during the processing of frozen vegetables, the use of salt brine in quality separation of such vegetables as peas and lima beans preparatory to freezing may contribute substantial amounts of salt to the finished article. The failure of the labels of frozen vegetables to declare the presence of salt has been the basis of complaints to the Food and Drug Administration.

(b) Section 403 (i) (2) of the Federal Food, Drug, and Cosmetic Act requires the label of a fabricated food to bear the common or usual name of each ingredient present. The Department of Health, Education, and Welfare regards any frozen vegetable containing salt, added directly or indirectly, as misbranded in violation of section 403 (i) (2) of the Federal Food, Drug, and Cosmetic Act unless its label names salt as an ingredient.

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371. Interprets or applies sec. 403, 52 Stat. 1048; 21 U. S. C. 343)

Dated: November 9, 1953.

[SEAL] OVETA CULP HOBBY,
*Secretary.*

[F. R. Doc. 53-9603; Filed, Nov. 13, 1953; 8:48 a. m.]

## TITLE 14—CIVIL AVIATION

### Chapter I—Civil Aeronautics Board

Subchapter B—Economic Regulations

[Reg. No. ER-190]

PART 233—TRANSPORTATION OF MAIL; FREE TRAVEL FOR POSTAL EMPLOYEES

POSTAL EMPLOYEES TO BE CARRIED FREE; REQUESTS TO BE FILED

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 10th day of November 1953.

The Post Office Department has requested the Board to amend Part 233 of the Economic Regulations, which governs free travel for postal employees pursuant to section 405 (m) of the Civil Aeronautics Act. At the present time, § 233.1 specifies certain officials by title who are authorized to receive free transportation by air traveling on official business relating to transportation of mail by air. Section 233.3 requires copies of transportation requests issued to air carriers by postal travelers to be forwarded to the Secretary of the Board and to the Deputy Second Assistant Postmaster General.

The basis upon which the Postmaster General has urged the Board to amend the foregoing sections is that the titles as now set forth do not correspond with the titles presently in use in the Department. While certain of the duties of the officials heretofore authorized by the Board to receive free transportation by air have been eliminated as a result of the reorganization of the Post Office Department, and while certain of the officials named in the Post Office request will perform additional duties, the net effect of the reorganization is to decrease the list of persons specifically authorized to receive free transportation from 54 to 51.

On the basis of the information furnished the Board by the Postmaster General, the Board finds that this amendment is primarily a formal one not imposing further substantive burdens on the air carriers concerned, and accordingly, notice and public procedure hereon are unnecessary.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 233 of the Economic Regulations (14 CFR Part 233), effective December 15, 1953.

1. By amending § 233.1 to read as follows:

§ 233.1 *Postal employees to be carried free.* Every air carrier carrying the mails shall carry, on any plane that it operates and without charge therefor, the persons in charge of the mails when on duty, and the following officers, agents, and inspectors of the Post Office Department, when such persons are traveling on official business relating to the transportation of mail by aircraft and are duly accredited as provided in this section:

(a) The Postmaster General.

(b) The Deputy Postmaster General, the Assistant Postmaster General—Transportation; the Assistant Postmaster General—Operations; the Assistant Postmaster General—Facilities; the Assistant Postmaster General—Finance; and the Assistant Postmaster General—Personnel.

(c) The Executive Assistant to the Postmaster General; the Special Assistant to the Postmaster General; the Confidential Assistant to the Postmaster General; the Technical Assistant to the Assistant Postmaster General—Transportation; and the Confidential Assistant to the Assistant Postmaster General—Transportation.

(d) The Chief Post Office Inspector, the Assistant Chief Post Office Inspector, the Solicitor, and the Associate Solicitors, of the Post Office Department.

(e) The following officers and agents of the Bureau of Transportation, viz: the Executive Director; the Director, Budget and Accounts; the Director, and the Assistant Director, Division of Air Service; the Administrative Officers, Division of Air Service; the Director, and Assistant Director, Division of International Service; the Director, Division of Employee Relations; the Regional Directors, Air Service; the General Superintendents, Postal Transportation Service; the District Superintendent, and the Assistant District Superintendent, 13th Division (Alaska), Postal Transportation Service.

(f) The Executive Director, and the Assistant Executive Director, Bureau of Post Office Operations; the Director, Division of Real Estate, Bureau of Facilities.

(g) Any Inspector of the Post Office Department.

(h) Any additional agent or officer of the Post Office Department designated by the Postmaster General.

2. By amending § 233.3 to read as follows:

§ 233.3 *Requests to be filed.* Each air carrier on or before the 20th day of each month shall forward one copy of every Request for Free Transportation by Air accepted by it during the preceding calendar month, to the Secretary, Civil Aeronautics Board, Washington 25, D. C., and one copy to the Director, Division of Air Service, Post Office Department, Washington, D. C.[1]

(Sec 205, 54 Stat. 984; 49 U. S. C. 425. Interprets or applies sec. 405, 52 Stat. 994; 49 U. S. C. 485)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
*Secretary.*

[F. R. Doc. 53-9636; Filed, Nov. 13, 1953; 8:54 a. m.]

[1] The third copy shall be preserved by the air carrier in its records in compliance with the requirements of this subchapter. See § 249.4 of this subchapter, item 48-B.

## Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 47]

PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

1. The low frequency range procedures prescribed in § 609.6 are amended to read in part:

LFR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation. Procedure turn is mandatory on the specified course unless "no PT" is indicated. Where a minimum altitude over facility is specified for procedure turn, it applies only to the course and direction specified. Aircraft executing instrument approach procedure, unless an approach is conducted in accordance with the following instrument approach procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below.

| City and State; airport name; type of facility; name and identification; procedure No.; effective date | Initial approach to facility from— | Course and distance | Minimum altitude (ft.) | Procedure turn (—) side of final approach course (additional and inbound; distances; limiting distances) | Minimum altitude over facility on final approach course (ft.) | Ceiling and visibility minimums: Condition | Type aircraft: 75 m. p. h. or less | Type aircraft: More than 75 m. p. h. |

Dated: November 10, 1953.

NATHAN BASS,
*Secretary.*

[F. R. Doc. 53-9634; Filed, Nov. 13, 1953; 8:54 a. m.]

PART 1457—FISCAL YEAR BASIS FOR RENEGOTIATION AND EXCEPTIONS

PART 1499—STATUTES, ORDERS AND DELEGATIONS

FISCAL YEAR OF PARTNERSHIPS; PARTNERSHIP RETURNS

1. Section 1457.7 is amended by deleting paragraphs (b) and (c) in their entirety and inserting in lieu thereof the following:

(b) *Application of statutory provision.* The fiscal year of a partnership is the taxable year thereof under chapter 1 of the Internal Revenue Code. If the composition of the partnership changes before the completion of a full fiscal year by reason of the death, withdrawal, substitution, or addition of a partner, or a shift of interests among the partners, but the partnership business, or a substantial portion thereof, is continued, the fiscal year of the partnership shall continue to be the taxable year previously established by the partnership, unless the Board determines otherwise. If on or before December 31, 1953, a partnership so continuing has filed a Standard Form of Contractor's Report for a fiscal year shorter than the fiscal year prescribed by this section, and final action with respect to such fiscal year has not been taken by the Board, such shorter fiscal year shall be considered to be the fiscal year of the partnership unless the contractor, within a reasonable time, or the Board, gives notice by registered mail that it desires that the contractor be renegotiated for such full fiscal year. Such notice by the contractor shall contain a statement that in determining the time limited under section 105 (c) of the act for commencement of renegotiation, such notice shall be considered the filing required by section 105 (c) of the act for such full fiscal year, unless renegotiation has already been commenced with respect to such shorter fiscal year. In the latter event, such notice shall contain a statement that the contractor agrees that, in lieu of the period of limitations prescribed in section 105 (c) of the act, renegotiation for such full fiscal year may be completed within two years following the date of the mailing of such notice by the contractor to the Board.

(c) *Comment.* Originally this section, following the rulings of the Internal Revenue Service, provided that, when a partnership before the completion of a full fiscal year had a readjustment of interests by reason of the death, withdrawal, substitution, or addition of a partner, or a shift of interests among the partners, the fiscal year of such partnership terminated on the date such readjustment occurred and a new fiscal year for the partnership commenced if the business continued. By Revenue Ruling 144 (Int. Rev. Bull. 1953–16, 29, dated August 3, 1953), set forth, in part, in § 1499.34 of this subchapter, the Internal Revenue Service declared that such readjustment did not, of itself, effect a termination of the partnership for Federal income tax purposes; and that, when the business of the partnership, or a substantial portion thereof, continued, the returns of such partnership should continue to be filed on the basis of the annual accounting period previously established by the partnership. This section has been amended as set forth in paragraph (b) of this section to conform the practice of the Board with that of the Internal Revenue Service. The ruling is not limited in its retroactive effect, and therefore, with the exceptions indicated, the Board will give it effect in all open cases under the 1951 Act. The former provisions of this section remain effective as to any cases concluded thereunder.

2. Part 1499 is amended by adding § 1499.34 to read as follows:

§ 1499.34 *Internal Revenue Service Rev. Rul. 144.* Section 187; Partnership returns.

Advice is requested respecting the effect on a partnership, for Federal income tax purposes, of the death, withdrawal, substitution, or addition of a partner.

As defined in section 3797 (a) (2) of the Internal Revenue Code, the term "partnership" for tax purposes is broader than the term under common law, the Uniform Partnership Act, or individual State laws. Accordingly, the Federal tax consequences of transactions involving partnerships and interests in partnerships will be determined upon the basis of their substance and in accordance with the Federal tax laws without regard to the technical refinements of State laws. (See Commissioner v. Francis E. Tower, 327 U. S. 280; Ct. D. 1670, C. B. 1946-1, 11, and Heiner v. Mellon, 304 U. S. 271; Ct. D. 1345, C. B. 1938-1, 349.)

Sections 187 and 188 of the Code, which refers to the "taxable year" of the partnership, recognizes a partnership as a unit for the purpose of filing returns. These sections do not contemplate that a partnership may terminate its taxable year and thus change its accounting period by the mere act of admitting or retiring a partner, nor that the Commissioner may force a change of accounting period under such circumstances.

* * * * * *

Accordingly, it is held that a change in the membership of a partnership resulting from the death, withdrawal, substitution, or addition of a partner, or a shift of interests among existing partners does not, in itself, effect a termination of a partnership for Federal income tax purposes. Ordinarily, a partnership will be treated as continuing where the business of the partnership, or a substantial portion thereof, is continued. The returns of a continuing partnership should continue to be filed on the basis of the annual accounting period previously established by the partnership. * * *

(Sec. 109, 65 Stat. 22, 50 U. S. C. App. Sup. 1219)

Dated: November 10, 1953.

NATHAN BASS,
*Secretary.*

# TITLE 32A—NATIONAL DEFENSE, APPENDIX

## Chapter I—Office of Defense Mobilization

[Defense Mobilization Order V-1]

DMO V-1—CREATING AN INTERDEPARTMENTAL MATERIALS ADVISORY COMMITTEE

By virtue of the authority vested in me pursuant to Defense Production Act of 1950 as amended; Executive Order No 10480 of August 15, 1953; Public Law 520, 79th Congress; and Reorganization Plan No. 3, effective June 12, 1953; and in order to facilitate the coordination of Federal policies and programs with respect to the supply of materials to meet the requirements for both current defense activities and readiness for any future national emergency, it is hereby ordered:

1. There is established in the Office of Defense Mobilization an Interdepartmental Materials Advisory Committee which shall consist of the Assistant Director for Materials as Chairman and a representative from each of the following departments and agencies:

Department of Agriculture.
Department of Commerce.
Department of Defense.
Department of the Interior.
Department of State.
Foreign Operations Administration.
General Services Administration.

2. The Interdepartmental Materials Advisory Committee shall advise the Assistant Director for Materials on policies, plans, programs, and problems relating to defense materials which come within his jurisdiction, including:

a. The stockpiling of strategic and critical materials.

b. The content, status, rate of progress, and completion dates of defense materials programs.

c. Changes in program emphasis necessary to meet major problems and objectives.

d. New programs that may be required to improve the supply of defense materials.

3. This order supersedes DPA Administrative Order No. 26–2, and shall become effective immediately.

OFFICE OF DEFENSE MOBILIZATION,
ARTHUR S. FLEMMING,
*Director.*

# TITLE 47—TELECOMMUNICATION

## Chapter I—Federal Communications Commission

[Docket No. 10685]

PART 3—RADIO BROADCAST SERVICES

EXTENSION OF USE OF CERTAIN FREQUENCIES IN TERRITORIES AND POSSESSIONS OF U. S.

In the matter of amendment of § 3.25 of Part 3 of the Commission's rules and regulations (Radio Broadcast Services) to permit more extensive use to be made of certain standard broadcasting frequencies in the territories and possessions of the United States; Docket No. 10685.

1. The Commission has under consideration its notice of proposed rule making issued September 11, 1953 (FCC 53–1162) proposing to amend § 3.25 of its rules to permit more extensive use to be made of certain standard broadcast frequencies in the territories and possessions of the United States.

2. Comments in support of the proposal were filed by William J. Wagner, trading as Alaska Broadcasting Company, licensee of KFQD, Anchorage, KFRB, Fairbanks, KTKN, Ketchikan, KINY, Juneau, KIFW, Sitka, and KIBH, Seward. It was urged that the Commission adopt the instant proposal and to make it effective as soon as possible. No oppositions to the proposal were filed.

3. Authority for the adoption of the amendment herein is contained in sections 4 (i), 303 (a), (b), (c), (d), (f), and (r), and 307 (b) of the Communications Act of 1934, as amended.

4. In view of the foregoing: *It is ordered,* That effective 30 days from publication in the FEDERAL REGISTER, § 3.25 (d) of the Commission's rules and regulations is amended to read as follows:

§ 3.25 *Clear channels: Class I and II stations.* * * *

(d) In continental United States, for Class II stations which operate daytime only with power not in excess of 1 kilowatt and which will not deliver over 5 microvolts per meter groundwave at any point on the Mexican border, and in Alaska, Hawaii, Puerto Rico, and the Virgin Islands, for Class II stations which will not deliver over 5 microvolts per meter groundwave or 25 microvolts per meter 10 percent time skywave at any point on the said border: 730, 800, 900, 1050,[6] 1220 [7] and 1570 kilocycles.

(Sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended, sec. 307, 48 Stat. 1084; 47 U. S. C. 303, 307)

Adopted: November 5, 1953.

Released: November 9, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53–9604; Filed, Nov. 13, 1953; 8:48 a. m.]

[Docket No. 10688]

PART 3—RADIO BROADCAST SERVICES

TABLE OF ASSIGNMENTS FOR TELEVISION BROADCAST STATIONS

In the matter of amendment of § 3.606 *Table of assignments,* rules governing television broadcast stations; Docket No. 10688.

1. The Commission has under consideration its notice of proposed rule making issued on September 11, 1953 (FCC 53–1174), and published in the FEDERAL REGISTER on September 17, 1953 (18 F. R. 5572), proposing to assign additional channels in a number of communities.

2. The time for filing comments in the above-entitled proceeding expired October 13, 1953. No comments have been filed opposing any of the proposed assignments with the exception of Channel 70 proposed for Lexington, Kentucky.

3. The University of Kentucky filed a comment requesting that the proposed assignment of Channel 70 to Lexington, Kentucky, be reserved for use by a noncommercial educational television station. The University states that while it will be adequately served for the time being by commercial television operations, "It is conceivable * * * that future needs and conditions may dictate a re-evaluation of [its] position and indicate the desirability of [its] own educational television station." Therefore, the University desires that it have a frequency available for such future use. It is pointed out that Lexington presently has two channels available for commercial operations, and it is urged that the channel to be added should therefore be made available for educational use.

4. The purpose for the assignment of additional channels to Lexington and the other communities in this proceeding, as stated in our notice of proposed rule making of September 11, 1953, was to make possible the affording of television service to large portions of the country as soon as possible. Reserving the additional channel to be assigned to Lexington, however, would not accomplish this desired result. The Commission in any event is of the view that the University has not made a sufficient showing warranting the reservation of a channel at this time. We are, therefore, of the view that the request of the University of Kentucky should be denied. However it is pointed out that additional channels are available for assignment in Lexington and that the Commission will reconsider the reservation of a channel for educational use upon an appropriate showing.

5. Bluegrass Broadcasting Company, Inc., an applicant for a construction permit on one of the presently assigned television channels in Lexington, has filed a comment in this proceeding requesting that Channel 15 or 18 be assigned to Lexington in addition to Channel 70 as proposed in this proceeding. This assignment could be accomplished by shifting Channel 15 from Louisville, Kentucky, to Lexington, and substituting Channel 69 in Louisville, or by shifting Channel 18 from Gallipolis, Ohio, to Lexington and substituting Channel 72 in Gallipolis. It is urged that the additional assignment as proposed by Bluegrass would comply fully with the Commission's minimum assignment spacing requirements. It is noted that no applications have been filed for either Channel 15 in Louisville or Channel 18 in Gallipolis. On the other hand, it is pointed out that there are two applications pending for each of the two presently assigned channels in Lexington. The addition of only one more channel to Lexington as proposed by the Commission in the subject proceeding would mean that a comparative hearing would still be required since four applicants would be seeking three channels. Bluegrass submits that if its proposal is adopted, a comparative hearing in Lexington may be averted.

6. It is the Commission's view that the Bluegrass proposal to add a fourth assignment for Lexington has merit. Accordingly, the Commission, in addition to the assignment of Channel 70 as proposed in this proceeding, is also adding Channel 18 to Lexington, Kentucky. The proposal to accomplish this assignment by substituting Channel 72 for Channel 18 in Gallipolis is preferred since the proposal to assign Channel 15 to Lexington by substituting Channel 69 for Channel 15 in Louisville involves an adjacent channel spacing only 2 miles above the minimum.

7. Authority for the adoption of the amendment herein is contained in sections 4 (i), 301, 303 (c), (d), (f), and (r) and 307 (b) of the Communications Act of 1934, as amended.

8. In view of the foregoing: *It is ordered,* That effective 30 days from publication in the FEDERAL REGISTER, the Table of Assignments contained in § 3.606 of the Commission's rules and regulations is amended as follows:

| City | Channel No. |
|---|---|
| Arkansas: | |
| Fort Smith | 5–, *16, 22, 39 |

[Docket No. 10651]

PART 3—RADIO BROADCAST SERVICES

TABLE OF ASSIGNMENTS FOR TELEVISION BROADCAST STATIONS

In the matter of amendment of § 3.606 *Table of assignments*, rules governing television broadcast stations; Docket No. 10651.

1. On August 3, 1953, Charles A Casmus, Jr., Montgomery, Alabama, filed a petition with the Commission requesting an amendment of § 3.606 *Table of assignments*, rules governing television broadcast stations so as to assign Channel 8 or Channel 3 to Montgomery, Alabama. On August 21, 1953, the Commission issued a notice of proposed rule making (FCC 53-1069) on the said proposal which was published in the FEDERAL REGISTER on August 28, 1953 (18 F. R. 5148.)

2. The time for filing comments in this proceeding expired October 5, 1953. The Alabama Telecasting Company and the Deep South Broadcasting Company of Montgomery, Alabama, supported the proposed assignments for Montgomery.

3. The assignment of Channel 8 to Montgomery was proposed as follows:

| City | Channel No. | |
|---|---|---|
| | Present | Proposed |
| Montgomery, Ala | 12, 20, *26+, 32 | 8—, 12, 20, *26+, 32 |
| West Point, Miss | 8, 56+ | 4—, 56+ |

On October 16, 1953, petitioner amended its proposal so as to delete the request for Channel 3 at Montgomery[1] and amended its proposal to assign Channel 8 to Montgomery as follows:

| City | Channel No. | |
|---|---|---|
| | Present | Proposed |
| Montgomery, Ala | 12, 20, *26+, 32 | 8—, 12, 20, *26+ |
| Columbus, Miss | 28— | 4—, 28— |
| West Point, Miss | 8, 56+ | 56+ |

4 Capitol Broadcasting Co., the permittee of television Station WCOV-TV on Channel 20 in Montgomery, Alabama opposed the assignment of an additional channel to Montgomery. Capitol stated that there were 2 applications on file for Channel 12 at Montgomery;[2] that WCOV-TV has commenced commercial operation on Channel 20; and that there are no applications on file for Channel 32 presently assigned to Montgomery. Capitol urged that the assignments to Montgomery are consonant with the number assigned to communities of comparable size; that the proposed assignments are not necessary to effect a fair and equitable distribution of facilities; that there is no special need for a second VHF assignment in Montgomery in view of the rather smooth terrain in the area; that the addition of a second VHF assignment would be unfair to the UHF operator who pioneered in developing the service in the area; and that it would hinder the development of the UHF service as an integral part of television service. Capitol further urged that the requested assignments be withheld pending a request therefor in a city for which there is need shown.

5. Dallas Broadcasters, Inc., Selma, Alabama, opposed the assignment of Channel 8 to Montgomery and proposed that this channel be assigned instead to Selma, Alabama. In support of its counterproposal Dallas Broadcasters urged that Selma is a city of 22,840 population; that it is not economically feasible to construct a UHF station at Selma in order to obtain the coverage necessary to serve the population around the city; that that proposed assignment of Channel 8 to Selma would meet the requirements of the Commission's Rules and would represent a fair and equitable distribution of television facilities.

6. Mr. Birney Imes, Jr., Columbus, Mississippi, opposed the proposal to assign Channel 8 to Montgomery insofar as it assigned Channel 4 to West Point, Mississippi. Mr. Imes requested that Channel 4 be assigned to Columbus, Mississippi, instead of West Point. In support of his counterproposal Mr. Imes urged that Columbus had a population of 17,172 as against 6,432 for West Point; that the separation between West Point and Columbus was only 17 miles so that the assignment of Channel 4 to Columbus would provide VHF service to West Point; that the assignment as proposed would meet the requirements of the Commission's Rules; and that in view of the greater size and importance of Columbus the assignment would make possible greater coverage and availability of programming. As indicated above, in its reply to oppositions and counterproposals, petitioner amended his request to conform to Mr. Imes counterproposal insofar as it assigned Channel 4 to Columbus in lieu of West Point.

7. The Commission is presented with a request to assign Channel 8 to Montgomery and the conflicting counterproposal to assign that channel to Selma. In addition the Commission is presented with the choice of retaining the assignment of Channel 4 in West Point or assigning that channel to Columbus. With respect to the Channel 8 assignment, we are of the view that the assignment of a first VHF channel to Selma, a community of 22,800 is to be preferred over the assignment of a second VHF channel to Montgomery.[3] Further, we are of the view that the assignment of a first VHF channel to Columbus, a city of 17,200 is to be preferred over the assignment of a first VHF channel to West Point, a community of only 6,400. Accordingly, the petition of Charles A. Casmus, Jr., is denied, and the counterproposals of Dallas Broadcasters, Inc., and Mr. Birney Imes, Jr., are granted.

8. Authority for the adoption of the proposed amendments is contained in sections 4 (i), 301, 303 (c), (d), (f), and (r), and 307 (b) of the Communications Act of 1934, as amended.

9. In view of the foregoing: *It is ordered*, That effective 30 days after publication in the FEDERAL REGISTER, the Table of Assignments contained in § 3.606 of the Commission's rules and regulations is amended as follows:

| City: | Channel No. |
|---|---|
| Selma, Ala | 8—, 58+ |
| Columbus, Miss | 4—, 28— |
| West Point, Miss | 56+ |

(Sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interprets or applies sec. 301, 48 Stat. 1081, sec. 303, 48 Stat. 1082, as amended, sec. 307, 48 Stat. 1084; 47 U. S. C. 301, 303, 307)

Adopted: November 5, 1953.

Released: November 10, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[Docket No. 10597]

PART 3—RADIO BROADCAST SERVICES

NORMAL LICENSE PERIOD FOR TELEVISION BROADCAST STATIONS

In the matter of amendment of § 3.630 of the Commission's rules relating to license periods of television broadcast stations; Docket No. 10597.

1. The Commission has under consideration its notice of proposed rule making (FCC 53-932) issued in this proceeding on July 24, 1953, proposing to amend § 3.630 of the Commission's rules and regulations by extending the license term for television broadcast stations to a period of three years.

2. Comments supporting the proposed amendment were filed by National Broadcasting Company, Inc., WGN, Inc., Allen B. DuMont Laboratories, Inc., American Broadcasting-Paramount Theaters, Inc., National Association of Radio and Television Broadcasters, Columbia Broadcasting System, Inc., Storer Broadcasting Company, WDEL, Inc., WGAL, Inc., Associated Broadcasters, Inc., WTOP, Inc., WAAM, Inc., and The Washington Post Company.

3. In support of the proposed amendment it is urged that the extension of the license period for television stations to three years will facilitate the development of a nation-wide television system, will reduce substantially the workload for both television licensees and the Commission, and will systematize and ease the burden on the Commission and licensees where such licensees also hold authorizations for standard and FM broadcast stations. It is contended that the formative stage in the development of the television service has passed and that this service has now become sufficiently stabilized and mature to warrant the same license period currently in effect in the standard and FM broadcast fields. It is urged that increasing the license term to three years will free the Commission from entanglement in many routine cases and permit it to concentrate on those licensees whose operation and practices merit particular attention.

[1] In view of this amendment the proposal to assign Channel 3 to Montgomery and the oppositions thereto will not be considered further.

[2] There is outstanding an Initial Decision to grant one of the applications.

[3] The assignment of Channel 8 to Selma conflicts with an alternative proposal contained in a petition for rule making filed by the Logansport Broadcasting Company, Logansport, Indiana. Logansport proposes to assign Channel 8 to Dothan, Alabama, at a distance of approximately 125 miles from Selma. In view of the fact that the minimum co-channel spacing for VHF channels in Zone II is 190 miles only one of these proposals may be granted. In a Memorandum Opinion and Order, issued this day with this Report and Order, the request of Logansport is denied.

[4] Commissioner Bartley concurring in view of the Commission's action on the petition of the Logansport Broadcasting Corporation.

Adoption of the three-year period as proposed, it is argued, will stabilize television operation and afford added incentive thereby facilitating the development of a nation-wide competitive television service.

4. The American Veterans Committee, a national organization of veterans, filed a comment in opposition to the proposed amendment. AVC urges that the present one-year license period should be maintained until the Commission "shall have had the opportunity to engage in a factual study of television programming and the public shall have had the opportunity to present its views in an open public hearing on the rule proposed in this proceeding." AVC submits that renewal applications are the primary source of information relating to the operation of television stations available to the Commission and that information reflected by such applications must be forthcoming annually if the Commission is to be in a position to examine effectively the operation of television stations. AVC contends that the television broadcast service is still in its formative stage, and that the operation of each of the many new stations should be examined annually "to insure that the owners and operators commence operation with an attitude and feeling of public interest implicit in its operation." AVC argues that the advantages resulting from a procedure that will enable the Commission to examine effectively into television operations far outweigh any disadvantages inherent in the Commission's present workload.

5. The San Francisco Branch of the American Association of University Women also filed a letter opposing the adoption of the proposed amendment. It is urged that monitoring surveys of television programs indicate that the obligations of television broadcast stations to serve the public interest, convenience and necessity have not been fulfilled, and that until such time as the broadcasters "completely meet these responsibilities" the performance of the television stations should "be compared with their promises at least as frequently as once a year."

6. AVC urged that the Commission have "an open public hearing in this proceeding." [1] The Commission is of the view that a formal hearing is not necessary or desirable in this proceeding. All interested parties have been afforded full opportunity to file written data, views and arguments directed to the proposed rule, and a number of such comments have been filed. We are aware of no evidence relating to the issues in this proceeding that could be presented only during the course of an oral hearing and which could not be presented to us for consideration in the form of written comments. A formal public hearing in this proceeding would serve no useful purpose at this time and would merely result in unnecessary delay.

7. The Commission is of the view that the proposed amendment extending the normal license term for television broadcast stations to a three-year period should be adopted. This service, we believe, has now reached the stage where the license period for future television licenses and for renewals of existing licenses may be extended to three years to conform with the term currently authorized for both standard and FM broadcast stations. Extension of the license term as proposed will reduce substantially the workload for both television licensees and the Commission, and will also ease the burden on those television licensees also holding authorizations for standard and FM broadcast stations since the licenses of all such stations in the same geographical area will now expire on the same date. We do not believe, as AVC contends, that a factual study of television programming is a prerequisite to the extension of the license term for television broadcast stations.

8. In extending the license period, we wish to make clear that we are in no way modifying the responsibility of broadcasters to operate their stations in the public interest. On the contrary, as pointed out by a number of the parties in their comments, extending the term to three years will afford us more time to assure a complete and adequate review of the operation of such stations.

9. It should be noted that since § 4.18 of the rules (47 CFR 4.18) provides that "Licenses for stations in the Auxiliary Broadcast Service will be issued for a period running concurrently with the licenses of the broadcast station with which such auxiliary stations are acting", the adoption of the proposed rule also will have the effect of increasing to a three-year period the license term for television STL stations, television inter-city relay stations, and television pick-up stations.

10. Authority for adoption of the subject amendment is contained in sections 4 (i), 303 (r), 370 (b), (d), and (e), and 308 (a) and (b) of the Communications Act of 1934, as amended.

11. In view of the foregoing: *It is ordered*, That effective 30 days after publication in the FEDERAL REGISTER, § 3.630 of the Commission's rules and regulations is amended as set forth below.

(Sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended, secs. 307, 308, 48 Stat. 1084, 1085; 47 U. S. C. 307, 308)

Adopted: November 5, 1953.

Released: November 9, 1953.

FEDERAL COMMUNICATIONS COMMISSION,[2]

[SEAL] WM. P. MASSING,
*Acting Secretary.*

Section 3.630 is amended to read as follows:

§ 3.630 *Normal license period.* (a) All television broadcast station licenses will be issued for a normal license period of three years. Licenses will be issued to expire at the hour of 3:00 a. m., e. s. t., in accordance with the following schedule and at three-year intervals thereafter.[1]

(1) For stations located in Delaware and Pennsylvania, August 1, 1954.

(2) For stations located in Maryland, District of Columbia, Virginia, West Virginia, October 1, 1954.

(3) For stations located in North Carolina, South Carolina, December 1, 1954.

(4) For stations located in Florida, Puerto Rico, and Virgin Islands, February 1, 1955.

(5) For stations located in Alabama and Georgia, April 1, 1955.

(6) For stations located in Arkansas, Louisiana, and Mississippi, June 1, 1955.

(7) For stations located in Tennessee, Kentucky, and Indiana, August 1, 1955.

(8) For stations located in Ohio and Michigan, October 1, 1955.

(9) For stations located in Illinois and Wisconsin, December 1, 1955.

(10) For stations located in Iowa and Missouri, February 1, 1956.

(11) For stations located in Minnesota, North Dakota, South Dakota, Montana, and Colorado, April 1, 1956.

(12) For stations located in Kansas, Oklahoma, Nebraska, June 1, 1956

(13) For stations located in Texas, August 1, 1956.

(14) For stations located in Wyoming, Nevada, Arizona, Utah, New Mexico, and Idaho, October 1, 1956.

(15) For stations located in California, December 1, 1953.

(16) For stations located in Washington, Oregon, Alaska, and Hawaii, February 1, 1954.

(17) For stations located in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont, April 1, 1954.

(18) For stations located in New Jersey and New York, June 1, 1954.

[F. R. Doc. 53-9605; Filed, Nov. 13, 1953; 8:49 a. m.]

[1] On August 21, 1953, the Commission considered requests filed by The Americans for Democratic Action (ADA) and the International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO), for a "public hearing" in the above-entitled matter. On that date the Commission adopted an Order denying the requests but pointing out that ADA and UAW-CIO could resubmit their requests developing more fully the necessity and desirability for a public hearing and that the Commission would consider such requests in the proceeding. However, no additional comments have been filed by these parties.

[2] Commissioner Hennock dissenting and issuing an opinion which was filed as part of the original document.

[1] Renewals of licenses will be granted for the period specified in the rule: *Provided, however*, That if as a result of the transition from the previous schedule to the above schedule the period for which a license is renewed is 6 months or less, the licensee may within the period 60 days to 30 days before the expiration date of such renewed license file, in lieu of renewal application (FCC Form 303), a written application under oath for the next renewal of license which shall consist of (1) a request that its license be renewed; (2) a statement that no substantial changes have been made in its operations or in its plans for future operations since its last renewal application; or if changes have been made or proposed, a statement specifying such changes; and (3) a statement that the applicant waives any claim to the use of any particular frequency or of the ether as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise. Upon review of such statements, the Commission may grant a renewal of license for the full period provided for in the rule; or if the Commission requires additional information, it may require the filing of renewal application (FCC Form 303).

# PROPOSED RULE MAKING

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

### [ 7 CFR Part 921 ]

[Docket No. AO 222—A5 R01]

HANDLING OF MILK IN SPRINGFIELD, MO., MARKETING AREA

NOTICE OF REOPENING OF HEARING ON PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND TO ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the reopening of the public hearing held at Springfield, Missouri, September 28–30, 1953, on proposed amendments to the tentative marketing agreement heretofore approved by the Secretary of Agriculture and to the order, as amended, regulating the handling of milk in the Springfield, Missouri, marketing area.

The purpose of the reopened hearing is to afford interested parties opportunity to introduce additional evidence with respect to economic conditions which relate to the handling of milk in the Springfield, Missouri, marketing area, and to the material issues of the record of said hearing which were not decided in the Assistant Secretary's decision of October 26, 1953 (18 F. R. 6829), and to receive evidence concerning the additional proposals for amendment hereinafter set forth, or appropriate modifications thereof. None of the proposals to be considered at the hearing has received the approval of the Secretary of Agriculture.

The reopened hearing will be held in the Washington County Court House, Fayetteville, Arkansas, beginning at 10:00 a. m., December 1, 1953.

The following additional amendments have been proposed:

By the Northwest Arkansas Dairy Farmers Association:

1. Amend § 921.7 to include in the marketing area the county of McDonald in the State of Missouri and the counties of Benton and Washington in the State of Arkansas.

2. Amend the appropriate sections of the order to provide for the use of location differentials in calculating minimum handler and producer prices with respect to milk received in certain parts of the marketing area.

By the Producers Creamery Company of Springfield, Missouri:

3. Consider the inclusion of McDonald county, Missouri, and Benton and Washington counties, Arkansas, in the marketing area.

Copies of this notice of reopening of hearing and of the order now in effect may be procured from the Market Administrator, 4030 Chouteau Avenue, St. Louis 10, Missouri, or from the Hearing Clerk, Room 1353, South Building, United States Department of Agriculture, Washington 25, D. C., or may be there inspected.

Dated: November 10, 1953.

[SEAL] GEORGE A. DICE,
*Acting Assistant Administrator.*

### [ 7 CFR Part 927 ]

[Docket No. AO-71-A-26]

HANDLING OF MILK IN NEW YORK METROPOLITAN MILK MARKETING AREA

NOTICE OF HEARING ON PROPOSED AMENDMENTS TO TENTATIVE AGREEMNT AND TO ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of a public hearing to be held at the Hotel Utica, in Utica, New York on November 18, 1953 beginning at 10:00 a. m., for the purpose of receiving evidence with respect to the proposed amendment hereinafter set forth, or appropriate modifications thereof, to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the New York metropolitan milk marketing area. This proposed amendment has not received the approval of the Secretary of Agriculture.

Following is the proposed amendment:

Amend § 927.40 (a) to prevent the interruption of utilization of fluid milk during the month of October 1953, resulting from the strike of dairy plant employees and drivers which occurred during such month, from being reflected in the computation of Class I-A prices for the month, of December 1953 and thereafter.

Copies of this notice of hearing, the said order, as amended, and the said tentative marketing agreement may be procured from the Market Administrator, 205 East Forty-second Street, New York 17, New York, or from the Hearing Clerk, United States Department of Agriculture, Room 1353, South Building, Washington, D. C., or may be there inspected.

Dated: November 10, 1953.

[SEAL] ROY W. LENNARTSON,
*Assistant Administrator.*

[F. R. Doc. 53-9639; Filed, Nov. 13, 1953; 8:55 a. m.]

## DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

### Food and Drug Administration

### [ 21 CFR Part 125 ]

[Docket No. FDC-24 (a)]

LABEL STATEMENTS CONCERNING DIETARY PROPERTIES OF FOOD PURPORTING TO BE OR REPRESENTED FOR SPECIAL DIETARY USES

NOTICE OF HEARING

In the matter of amending the regulations pertaining to label statements concerning dietary properties of food purporting to be or represented for special dietary uses:

Upon the initiative of the Secretary of Health, Education, and Welfare, and in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 403 (j), 701, 52 Stat. 1047, 1055; 21 U. S. C. 343 (j), 371; 67 Stat. 18), notice is hereby given that a public hearing will be held commencing at 10 o'clock in the morning of December 15, 1953, in Room 3724, Health, Education, and Welfare Building, 330 Independence Avenue SW., Washington, D. C., for the purpose of receiving evidence upon a proposal to amend the regulations pertaining to label statements concerning dietary properties of food purporting to be or represented for special dietary uses (21 CFR Part 125), in the following respects:

1. In § 125.4 *Label statements relating to minerals* it is proposed to amend paragraph (a) (2) by changing the second sentence to read as follows: "Except as provided in § 125.9, the quantity of food specified as required in this section shall be the quantity customarily or usually consumed during a period of one day, or a quantity reasonably suitable for and practicable of consumption within such period."

2. It is proposed to amend Part 125 by adding the following new section:

§ 125.9 *Label statements relating to certain foods used as a means of regulating the intake of sodium for the purposes of dietary management with respect to disease.* If a food purports to be or is represented for special dietary use by man by reason of its use as a means of regulating the intake of sodium for the purposes of dietary management with respect to disease, the label shall bear a statement of the number of milligrams of sodium in 100 grams of such food.

At the hearing, evidence will be restricted to testimony and exhibits relevant and material to such proposals. The hearing will be conducted in accordance with the rules of practice provided therefor. Mr. Leonard D. Hardy is hereby designated as presiding officer to conduct the hearing in place of the Secretary, with full authority to administer oaths and affirmations and to do all other things appropriate to the conduct of the hearing.

The proposed amendments for consideration at the hearing are subject to adoption, rejection, or modification by the Secretary of Health, Education, and Welfare, in whole or in part, as the evidence adduced at the hearing may require.

Dated: November 9, 1953.

[SEAL] OVETA CULP HOBBY, *Secretary.*

## FEDERAL COMMUNICATIONS COMMISSION

### [ 47 CFR Part 1 ]

[Docket Nos. 10107, 10746]

ANNUAL REPORT FORMS APPLICABLE TO STANDARD BROADCAST, FM, TELEVISION AND INTERNATIONAL STATIONS

NOTICE OF FURTHER PROPOSED RULE MAKING

In the matter of amendment of Annual Report Form 324 and deletion of Annual Report Form 324-A; applicable to Standard Broadcast, FM, Television and International Stations; Docket No. 10746; amendment of Schedules 10-A and 10-B (Employees and Their Compensation) of Annual Report Form 324, applicable to Standard Broadcast, FM, Television and International Stations; Docket No. 10107.

1. Notice is hereby given of further proposed rule making in the above-entitled matter.

2. On January 11, 1952, the Commission issued a notice of proposed rule making ( 17 F. R. 527) looking toward the amendment in certain respects of Schedules 10-A and 10-B (Employees and Their Compensation) of Annual Report Form 324. The Commission is now proposing to delete these schedules, and is herewith consolidating that docket (Docket No. 10107) in the instant proceeding.

3. The Commission is also herewith proposing to amend Annual Report Form 324 in other particulars as set forth in Appendix A.[1] The proposed revisions provide for the deletion of certain schedules and for the simplification of other schedules. In addition, it is proposed to delete Annual Report Form 324-A, Summary Estimates of Station Broadcast Revenues and Expenses.

4. As a result of the above, changes are required in section 0.206 (c), and § 1.341 (a) and (b) of the Commission's rules and regulations. The proposed changes are set forth below.

5. Annual Report Form 324 is prescribed in § 1.341 (a) of the Commission's rules and regulations. Authority for the issuance of the proposed amendment is contained in sections 4 (i), 303 (r) and 308 (b) of the Communications Act of 1934, as amended.

6. Any interested party who is of the opinion that the proposed amendment should not be adopted, or should not be adopted in the manner proposed herein, may file with the Commission on or before December 7, 1953, a statement or brief setting forth his comments. At the same time persons favoring the amendment as proposed may file statements in support thereof. Statements or briefs in reply to the original comments may be filed on or before December 17, 1953. Before taking action in the matter the Commission will consider all such comments that are presented, and if any comments are submitted which appear to warrant the holding of oral argument, notice of the time and place of such oral argument will be given.

7. In accordance with the provisions of § 1.764 of the Commission's rules and regulations, an original and fourteen copies of all statements or briefs filed, plus one extra copy for each party to the proceeding in the case of comments in reply to the original statements or briefs, shall be furnished to the Commission.

Adopted: November 5, 1953.

Released: November 9, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

1. Amend section 0.206 (c) to read as follows:

(c) All applications and amendments thereto filed under Title II and Title III of the act, including all documents and exhibits filed with and made a part thereof, and all communications protesting or endorsing any such applications, authorizations, and certifications issued upon such applications; all pleadings, depositions, exhibits, transcripts of testimony, reports of examiners or presiding officers, exceptions, briefs, proposed reports, or findings of fact and conclusions; all minutes and orders of the Commission. The information filed under § 1.341 and network and transcription contracts filed pursuant to § 1.342 shall not be open to public inspection. The Commission may, however, either on its own motion, or on motion of an applicant, permittee or licensee, for good cause shown, designate any of the material in this subsection as confidential.

2. Amend § 1.341 (a) to read, as follows:

§ 1.341 *Financial report, broadcast licensees and permittees.* Each licensee of a broadcast station (standard, FM, television and international) and each permittee of a broadcast station engaged in interim operation shall file with the Commission on or before April 1 of each year on Form 324 an operating statement for the preceding calendar year together with a statement as to investment in tangible broadcast property as of December 31 of the preceding calendar year.

3. Delete paragraph (b) of § 1.341.

[F. R. Doc. 53-9609; Filed, Nov. 13, 1953; 8:50 a. m.]

[1] Filed as part of original document; copies obtainable upon request to Federal Communications Commission.

### [ 47 CFR Parts 2, 11 ]

[Docket Nos. 9703, 10742]

SPECIAL INDUSTRIAL RADIO SERVICES AND TABLE OF FREQUENCY ALLOCATIONS

SECOND NOTICE OF FURTHER PROPOSED RULE MAKING

In the matter of revision of Subpart K of Part 11, rules governing the Special Industrial Radio Services; Docket No. 9703; and amendment of § 2.104, *Table of frequency allocations*, of Part 2 of the Commission's rules; Docket No. 10742.

1. The Special Industrial Radio Service was established by the Commission's Report and Order of April 27, 1949 effective July 1, 1949. The service was intended to provide radiocommunications for a wide variety of industrial enterprises outside of population centers where other communications facilities were not readily available. Since its inception it has grown steadily to the point where there are now more than 4500 licensed stations in operation. This growth has given rise to many problems, not the least of which has been the difficulty experienced in applying some of the standards set forth in § 11.501.

2. In an effort to resolve some of these problems, two notices of proposed rule making have been issued. The comments filed in response thereto have served to accentuate the many questions confronting the Commission in promulgating reasonable and workable standards for this service. A First Report and Order which substituted the criterion of operation outside "Standard Metropolitan Areas" of 500,000 or more population for the term "remote or sparsely settled region" was issued May 13, 1953. The remaining issues in the proceeding, however, were left unresolved pending further study and it was indicated that further proposed rule making might be necessary.

3. The experience with the service since its inception together with the many comments and requests filed relative thereto indicate that a new approach might be the most expedient method of solution. Accordingly, a completely new set of rules is hereby proposed. These are set forth below. While the proposed rules speak for themselves there are certain features to which we believe specific attention should be directed.

4. At the outset it should be noted that an attempt has been made to delineate as specifically as possible the various categories of industrial activities for which it is proposed to make available radio communications in the Special Industrial Radio Service. The classification of industries has been based to a large extent on the Standard Industrial Classification Manual prepared by the Bureau of the Budget: Volume I, Manufacturing Industries, 1945; and Volume II, Non-Manufacturing Industries, 1949. In cases of doubt as to the proper classification for a particular activity, reference to that manual is recommended

5. The major activities delineated are agriculture, manufacturing, mining, heavy construction, and certain of the trades and services. There is little change in the eligibility requirements governing agriculture, manufacturing, and mining. The heavy construction category, however, specifically excludes building construction. Furthermore, within Standard Metropolitan Areas with a population of 500,000 or more, Base Stations must be located within one quarter mile of the particular construction project to be served.

6 One of the most significant changes in the new rules is the inclusion of certain service and trade activities. These are divided into four groups. The first, § 11.507, concerns those persons who provide specialized functions under contract to single categories of persons who would be eligible in certain of the Industrial Radio Services to use radio in the performance of the same function. Examples of the type of activities that would be included under this rule are the petroleum industry specialists such as well acidizers, loggers, perforators, and the like; pipeline repairers; agricultural specialists who spray or harvest crops for others. Those found eligible under this section may locate their radio system any place the industry served would be able to operate. However, the general limitations on use contained in § 11.512 apply to these licensees as well as all others in the Special Industrial Radio Service.

7. The second service and trade activity rule, § 11.508, provides for the use of radio by persons who perform specialized functions for several different categories of industry as distinguished from the single industry concept contained in § 11.507. Persons found eligible under § 11.508 are limited to station location and operation outside Standard Metropolitan Areas of 500,000 or more population. It will be noted that whereas the delivery and pouring of ready-mixed concrete and hot asphalt mix are included in this group, sand and gravel deliveries are not. The distinction is based upon the fact that ready-mixed concrete and asphalt are perishable products and proper timing of deliveries is essential to avoid loss.

8. The third category, § 11.509, provides on-the-job communications for a variety of engineering activities. There are no population limitations on where radio may be used by this group.

9. The final service and trade group is tied in with the proposal issued concurrently herewith to create a Motor Carrier Radio Service under Part 16 of the Commission's rules, "Rules Governing the Land Transportation Radio Services." This new service will provide for the use of radio in connection with the operation of busses, streetcars, and trucks operated by common or contract carriers. The so-called "private truckers", such as persons engaged in the delivery of fuel oil and butane gas, who operate trucks as an incident to a regular business, are being carried over into the Special Industrial Service under § 11.510. In this connection, six of the seven frequencies presently available to the Highway Truck Service are being reallocated to permit assignment in the Special Industrial Service. The proposed reallocation is set forth below.

10. We wish to call attention to the fact that each of the service and trade groups list certain activities as coming within the meaning of the particular definition under which they are set forth. We have attempted to be as specific as possible in this regard and if a particular activity has not been specifically delineated, any application to use radio in connection therewith must be accompanied by a petition to amend the rule to include that activity. It is believed that adherence to this policy will alleviate one of the problems associated with the present rules, i, e. the question of interpretations.

11. As is indicated in the section on scope of service, the proposed rules are designed to make mobile radio available to a wide variety of individual industrial enterprises. We anticipate that the Special Industrial Service will continue to grow. Hence, the limited number of frequencies available and suitable for mobile operations precludes unrestricted use thereof. Accordingly, we have found it necessary to place certain limitations not only on where radio may be used but also on the manner of operation. These are found in §§ 11.511 and 11.512. There are two limitations to which we direct attention. Since mobile relay operation is inherently wasteful of spectrum space, such stations will not be authorized within the limits of continental United States. Furthermore, because the service which the rules are designed to provide is mobile, except for safety messages communication between base stations is prohibited. Until the demands for mobile service are satisfied, we believe these prohibitions are reasonable.

12. The bands 3500-3700 Mc, 6425-6575 Mc, and 11,700-12,200 Mc available to the mobile service and the band 890-940 Mc available to the fixed service under the Table of Frequency Allocations in Part 2 of the Commission's rules have not been carried over into the new rules. The reason for this is that the Commission is undertaking a comprehensive study of the use of microwaves for private radio systems. (See Withdrawal of Notice of Proposed Rule Making and Termination of Proceedings in Docket 10500, released October 29, 1953.) Pending completion of this study, it is believed that no assignments should be made in these bands in this Service.

13. All persons presently licensed in the Special Industrial Radio Service who at the time of renewal or modification of their existing license are found to be ineligible under the new rules, will be given five years from the date of final action in this proceeding within which to amortize their equipment. Those required to change frequency shall do so within one year. All grants made during the pendency of the proceeding will be expressly made subject to such modification without hearing as may be necessary to effect compliance with the rules as finalized.

14. Final action in this matter will dispose of petitions filed by the National Ready Mixed Concrete Association and the National Sand and Gravel Association filed December 30, 1952, the Federal Communications Consulting Engineers Association dated February 4, 1952, and the Hawaiian Commercial and Sugar Company, Limited, filed August 5, 1953.

15. The proposed rules are issued under the authority contained in section 4 (i) and 303 of the Communications Act of 1934, as amended.

16. Any interested party who is of the opinion that the proposed amendment should not be adopted or should not be adopted in the form set forth herein may file with the Commission on or before February 5, 1954 a written statement or brief setting forth his comments. Comments in support of the proposed amendment may also be filed on or before the same date. Comments or briefs in reply to the original comments may be filed within 14 days from the last day for filing said original comments or briefs. The Commission will consider all such comments that are submitted before taking action in this matter, and if any comments appear to warrant the holding of a hearing or oral argument, notice of the time and place of such hearing or oral argument will be given.

17. In connection with the filing of comments, it is desired to point out that much of the material filed in response to the previous notices is outdated. Accordingly, it is requested that interested persons not rely on statements already on file but submit them anew.

18. In accordance with the provisions of § 1.784 of the Commission's rules and regulations, an original and 14 copies of all statements, briefs, or comments shall be furnished the Commission.

Adopted: November 4, 1953.

Released: November 6, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

Part 11, Industrial Radio Services, is proposed to be amended in the following particulars:

1. Insert the following new paragraph in § 11.3 *Definition of terms:*

(x) *Standard Metropolitan area.* Any or all of the areas within the continental limits of the United States described and enumerated as Standard Metropolitan Areas in the U. S. Census of Population, 1950; Vol. I, Number of Inhabitants; Chapter 1, U. S. Summary; Bureau of the Census, United States Department of Commerce. (The Standard Metropolitan Areas in the United States are listed in that publication in Table 26, beginning on Page 1-66. The publication is sold by the U. S. Government Printing Office, Washington 25, D. C.)

2. Delete the present index reference and text of Subpart K, Special Industrial Radio Service, and substitute the following new index reference and text:

SUBPART K—SPECIAL INDUSTRIAL RADIO SERVICE

Sec.
11.501 Scope of service.
11.502 Availability of service.
11.503 Agricultural activities.
11.504 Heavy construction activities.
11.505 Manufacturing activities.
11.506 Mining activities.

Sec.

11.507 Specialized industrial service and trade activities.
11.508 General industrial service and trade activities.
11.509 Engineering service activities.
11.510 Miscellaneous public service activities.
11.511 Permissible communications.
11.512 Station limitations.
11.513 Mobile service frequencies for use at temporary locations.
11.514 Frequencies available for base and mobile stations.
11.515 Frequencies available for operational fixed stations.
11.516 Frequencies available for base, mobile and operational fixed stations.

SUBPART K—SPECIAL INDUSTRIAL RADIO SERVICE

§ 11.501 *Scope of service.* (a) The rules set forth in this subpart are designed to make available to a variety of individual industrial enterprises mobile radiocommunication systems which can contribute materially to the safety and efficiency of the operations involved. The limited number of frequencies available for assignment in this service precludes making it available to all classes of persons who might have a need for mobile radiocommunication, particularly in or near large population centers. Accordingly, the Commission has been obliged to adopt strict eligibility limitations on industrial radio usage in such areas and, in addition, other limitations have been placed on the use of licensed stations. Nevertheless, those persons who do qualify for their own radio systems in this service are cautioned that a substantial amount of interference can be expected and are urged to cooperate in the solution of mutual interference problems.

(b) Certain frequencies are available for assignment for fixed service operations in this service on a limited basis; however, extensive licensing of point-to-point systems must await further development of the Commission's microwave program. Accordingly, requests for point-to-point facilities will be considered on a case-by-case basis. In general, requests for such point-to-point facilities should clearly establish either (1) that a number of fixed stations at permanent locations are required to provide communications between isolated establishments or from such establishments to points at which established communication facilities are available, or (2) that the use of a remotely located base station, with which a requested fixed control and fixed relay link is proposed to be used, is necessary to maintain communications with mobile units for the conduct of authorized communications. Point-to-point facilities will not be authorized for the transmission of any type of signal or communication between two locations within the same Standard Metropolitan Area except for the purpose of providing a fixed control and fixed relay link where the remote placement of a base station has been justified.

(c) The initial application from a person claiming eligibility under the provisions of this subpart shall be accompanied by a full description of the type, location and extent of the particular activity in which engaged and the proposed use of radio in connection therewith, together with a full description of any other activities in connection with which the radio-equipped vehicles will be used and the extent of such use.

§ 11.502 *Availability of service.* (a) Authorizations to operate stations in the Special Industrial Radio Service are available only to the extent and for the purposes set forth in this subpart. To the extent that the provisions of this subpart may be at variance with those contained in Subparts A, B, C, D or E of this part, the provisions of this subpart shall be controlling.

(b) Authorizations to operate stations in the Special Industrial Radio Service are not available to persons who are eligible to operate substantially the same radiocommunication facilities in other Radio Services.

(c) A subsidiary corporation furnishing a non-profit communications service to its parent corporation or its subsidiaries may be considered eligible in the Special Industrial Radio Service, if the parent or its subsidiaries are engaged in one of the activities set forth in this subpart. The use of any radio system authorized pursuant to this paragraph will be subject to all the limitations and conditions applicable to the particular activity upon which eligibility is predicated.

(d) The classification of certain industries and activities into specified categories for the purposes of this subpart is based upon the general classification of all industrial activities ocntained in the Standard Industrial Classification Manual (Executive Office of the President, Bureau of the Budget: Volume I, Manufacturing Industries, 1945; and Volume II, Nonmanufacturing Industries, 1949) with certain specific additions to and exclusions from the general categories for the purposes of the rules in this subpart. To determine whether or not a particular industrial activity falls within one of the categories delineated in this subpart, reference to that manual is recommended. (The manual is available from the Superintendent of Documents, Government Printing Office, Washington 25, D. C.)

§ 11.503 *Agricultural activities*—(a) *Definition.* For the purposes of this part, agricultural activities are defined as the activities directly involved in the operation of farms or ranches for the production of crops or plants, vines or trees (excluding forestry operations), or for the keeping, grazing or feeding of livestock for animal products, animal increase, or value enhancement. Included as farms are such agricultural enterprises as orchards, vineyards, nurseries, greenhouses, hothouses, fur farms, mushroom cellars, apiaries, cranberry bogs, fish farms, fish hatcheries, oyster farms and frog farms. The processing (curing, packing, canning, smoking, freezing, etc.) of food on a farm is classed as an agricultural rather than a manufacturing activity if the raw materials are grown on that farm.

(b) *Eligibility.* Persons engaged in agricultural activities, as that term is defined in this section, are eligibile in this service when it is shown that the use of radio will be exclusively in connection with the conduct of the agricultural activities involved and that all such activities take place exclusively in areas other than Standard Metropolitan Areas of 500,000 or more population.

(c) *Limitation on station locations.* Each station authorized in accordance with the provisions of this section shall be located and operated at all times in areas other than Standard Metropolitan Areas of 500,000 or more population.

§ 11.504 *Heavy construction activities*—(a) *Definition.* For the purposes of this part, heavy construction activities are defined as the activities directly involved in the construction of engineering projects, such as highways and streets, bridges, sewers, railroads, irrigation projects, flood control projects and marine construction, and miscellaneous types of construction work other than buildings. Not included as heavy construction activities are the functions performed by general contractors engaged in the construction of residential, farm, industrial, commercial, public, or other building, or by establishments specializing in plumbing, painting, electrical work, masonry, plastering, carpentry, or other special construction trades. Although marine construction is included as a heavy construction activity, dredging solely for the recovery of sand, gravel, fuels, minerals or metals shall be classed as a mining activity.

(b) *Eligibility.* Persons engaged in heavy construction activities, as that term is defined in this section, are eligible in this service when it is shown that the use of radio will be exclusively in connection with the conduct of the heavy construction activities involved and either (1) that all such activities take place exclusively in areas other than Standard Metropolitan Areas of 500,000 or more population, or (2) that the use of radio will be exclusively for on-the-job communications at the site of a particular heavy construction project within such Standard Metropolitan Area.

(c) *Limitation on station locations.* Each station authorized in accordance with the provisions of this section shall be located and operated at all times in areas other than Standard Metropolitan Areas of 500,000 or more population. Exceptions to the above may be made by the Commission in specific cases and for limited periods of time when it is shown that one or more base stations, to be associated with a specified heavy construction project and to be located within one quarter mile thereof, will be used exclusively in the conduct of that project; however, each authorization so issued, for the operation of base stations or mobile units within such Standard Metropolitan Areas of 500,000 or more population, will be limited in term to the expected duration of the construction project in connection with which it is proposed to be used, but in no event beyond a period of one year, and to a location, for any base station, within one quarter mile from the construction project it proposes to serve.

§ 11.505 *Manufacturing activities*—(a) *Definition.* For the purposes of this part, manufacturing activities are defined as the activities directly involved in the mechanical or chemical transformation of organic or inorganic substances into new products within establishments usually described as plants, factories, shipyards, or mills and which employ, in that process, power-driven machines and materials-handling equipment. Establishments engaged in assembling components of manufactured products in plants, factories, shipyards or mills are also engaged in manufacturing activities if the new product is neither a new structure nor other fixed improvement. Establishments primarily engaged in the wholesale or retail trade, or in service activities, even though they fabricate or assemble any or all of the products or commodities handled, shall not be considered to be engaged in manufacturing activities.

(b) *Eligibility.* Persons engaged in manufacturing activities, as that term is defined in this section, are eligible in this service when it is shown that the use of radio will be exclusively in connection with the conduct of the manufacturing activities involved and either (1) that those activities take place exclusively in areas other than Standard Metropolitan Areas of 500,000 or more population, or (2) that the use of radio will be exclusively within the yard area of a single plant for mobile service communications within such Standard Metropolitan Area and that the use of the Low Power Industrial Radio Service does not meet the operational requirements of the manufacturing activity otherwise found eligible under this paragraph.

(c) *Limitation on station location.* (1) Each station authorized in accordance with the provisions of paragraph (b) (1) of this section shall be located and operated at all times in areas other than Standard Metropolitan Areas of 500,000 or more population.

(2) Each base station authorized in accordance with the provisions of paragraph (b) (2) of this section shall be permanently located at a point within the yard area to be served by it, and the mobile units associated therewith shall not be operated beyond the boundaries of that yard area except that, upon specific authorization by the Commission after adequate showing that such operation is necessary in the interest of national defense, mobile units may be operated outside of such yard area for the purpose of maintaining plant security only.

§ 11.506 *Mining activities*—(a) *Definition.* For the purposes of this part, mining activities are defined as the activities directly involved in the process of recovery of solid fuels, minerals, or metals from the earth or from the sea by means of mining, quarrying, dredging, chemical extraction, deep-well operation, or similar processes. The operations involved in the exploration for and the development of mining properties are considered mining activities. The process of crushing, washing, sorting, grading, dressing, or other beneficiation or preparation for delivery as raw material to smelters, refining or other manufacturing processes or to the wholesale market is considered a part of the mining activity only when carried on by the same person who recovers the basic materials from the earth or from the sea.

(b) *Eligibility.* Persons engaged in mining activities, as that term is defined in this section, are eligible in this service when it is shown that the use of radio will be exclusively in connection with the conduct of the mining activities involved.

(c) *Limitation on station location.* No base station or operational fixed station shall be authorized in accordance with the provisions of this section for operation at temporary locations within any Standard Metropolitan Area of 500,000 or more population.

§ 11.507 *Specialized industrial service and trade activities*—(a) *Definition.* For the purposes of this part, specialized industrial service and trade activities are defined as those commercial or industrial activities directly involved in providing specialized functions, services or materials, under contract, to single categories of persons who are themselves eligible, in certain of the Industrial Radio Services, to use radio in connection with the performance of the same functions. Activities normally classed as building trade or special construction trade activities are not included. Only the following are recognized as specialized industrial service and trade activities in accordance with the foregoing:

(1) Plowing, spraying, dusting or harvesting for agricultural or forestry activities.

(2) Livestock breeding service.

(3) Cleaning and repair of oil, gas or water pipe lines.

(4) Acidizing, cementing, logging, perforating, or shooting activities incident to the drilling of new oil or gas wells or the maintenance or production from established wells.

(5) Supplying of chemicals, mud, tools, pipe and special equipment to the petroleum production industry, other than to refining, cracking or processing plants.

(6) Clearing and maintaining rights-of-way for public utilities.

(7) Crushing, washing, sorting, grading, dressing or other benefication or preparation of ores, minerals or solid fuels, when performed by a person who is not engaged in either a mining or a manufacturing activity and when all such operations, including all use of radio in connection therewith, are confined to a single yard area.

(b) *Eligibility.* Persons primarily engaged in specialized industrial service and trade activities, as that term is defined in this section, are eligible in this service when it is shown (1) that the use of radio will be exclusively in connection with the conduct of such specialized industrial service and trade activities, (2) that every basic industrial actvity served would be eligible for a station authorization in the Industrial Radio Services at the station locations proposed by the applicants in this service, (3) that the persons engaged in the specialized industrial service and trade activities are not otherwise eligible under this part for the use of radio in connection with those activities except in the Low Power Industrial Radio Services, and (4) that the use of the Low Power Industrial Radio Service would not meet the operational requirements of those activities.

(c) *Limitation on station locations.* Except for stations which exclusively serve the Petroleum, Power, Forest Products or Motion Picture Industries, as defined in Subparts F, G, H, or I of this part, or the mining industry, as defined in this Subpart, each station authorized in accordance with the provisions of this section shall be located and operated at all times in areas other than Standard Metropolitan Areas of 500,000 or more population.

§ 11.508 *General industrial service and trade activities*—(a) *Definition.* For the purposes of this part, general industrial service and trade activities are defined as those commercial or industrial activities directly involved in providing specialized functions, services or materials which are essential to the efficient conduct of the industrial processes involved in a wide variety of industrial activities, and which are performed by persons other than those conducting the basic industrial activities making use thereof. Only the following are recognized as general industrial service and trade activities in accordance with the foregoing:

(1) Servicing, repairing and maintaining heavy machinery (not including automobiles or trucks) when such operations are performed at the place where such machinery is used, and when such use is exclusively in connection with agricultural, heavy construction, manufacturing or mining activities, as those terms are defined in this subpart, or in connection with activities conducted by persons who are eligible for license in the Power, Petroleum, Forest Products or Motion Picture Radio Services in connection therewith.

(2) Delivering and pouring ready-mixed concrete or hot asphalt mix.

(b) *Eligibility.* Persons primarily engaged in general industrial service and trade activities, or in a combination of general and specialized industrial service and trade activities, as those terms are defined in this subpart, are eligible in this service when it is shown (1) that the use of radio will be exclusively in connection with the conduct of those activities and (2) that all such activities take place exclusively in areas other than Standard Metropolitan Areas of 500,000 or more population.

(c) *Limitation on station locations.* Each station authorized in accordance with the provisions of this section shall be located and operated at all times in areas other than Standard Metropolitan Areas of 500,000 or more population.

§ 11.509 *Engineering service activities*—(a) *Definition.* For the purposes of this part, engineering service activities are defined as those activities directly involved in the conduct of certain engineering field activities by professional engineers or consulting engineering firms. Only the following are rec-

ognized as engineering service activities in accordance with the foregoing:

(1) The conduct of topographical or geological surveys.

(2) The siting, construction and adjustment of antennas for commercial or educational or State or Local Government radio transmitting and receiving stations.

(b) *Eligibility.* Persons primarily engaged in engineering service activities, as that term is defined in this section, are eligible in this service when it is shown (1) that the use of radio will be exclusively in connection with the conduct of such engineering service activities, and (2) that the use of radio will be exclusively for on-the-job communications between members of the same engineering field party working on a single project.

(c) *Limitation on station locations.* No base station or operational fixed station shall be authorized in accordance with the provisions of this section for operation at any permanent location.

§ 11.510 *Miscellaneous public service activities*—(a) *Definition.* For the purposes of this part, miscellaneous public service activities are defined as those activities directly involved in the conduct of commercial or industrial enterprises which are considered essential to the health or immediate welfare of a large segment of the general public and are not classed among those commercial or industrial activities for which other specific provision has been made in the Commission's rules. Only the following are recognized as miscellaneous public service activities in accordance with the foregoing:

(1) The servicing and repair of heating or refrigerating equipment.

(2) The delivery of ice or fuel to the consumer in solid, liquid or gaseous form for heating, lighting, refrigerating or power generation purposes, by means other than pipe lines or railroad.

(3) The spraying or dusting of insecticides, herbacides or fungicides but not including the fumigation or other treatment of buildings (or other structures) or their contents for the control of rodents, pests, parasites or plant diseases.

(4) The repair of public streets, highways, and bridges.

(b) *Eligibility.* Persons primarily engaged in miscellaneous public service activities, or in a combination of those activities with general and specialized industrial service and trade activities, as those terms are defined in this subpart, are eligible in this service when it is shown (1) that the use of radio will be exclusively in connection with the conduct of those activities and (2) that all such activities take place exclusively in areas other than Standard Metropolitan Areas of 50,000 or more population.

(c) *Limitation on station locations.* Each station authorized in accordance with the provisions of this section shall be located and operated at all times in areas other than Standard Metropolitan Areas of 50,000 or more population.

§ 11.511 *Permissible communications.* (a) Except for the transmission of communications relating directly to the safety of life or to the protection of property, stations licensed to persons in the Special Industrial Radio Service may be used only for the transmission of communications relating to the immediate control of the movement of mobile units, or the supervisory control of other functions, directly involved in the conduct of the specific activity or activities in connection with which eligibility has been established.

(b) In addition to the foregoing provisions of this section, stations licensed to persons found eligible under the provisions of § 11.505 (b) (2) shall be limited in the transmission of such communications to those between stations or units within the same yard area; however, the transmission of communications relating directly to the maintenance of plant security may be made by or to associated mobile stations outside the specified plant area when such operation has been authorized by the Commission in accordance with the provisions of § 11.505 (c) (2).

(c) Communications relating directly or indirectly to the following shall not be transmitted by any base or mobile stations licensed in the Special Industrial Radio Service:

(1) Sales reports, or the dispatch of salesmen;

(2) Payrolls, accounts, or inventory control; or

(3) Any message or information where the time element is not of immediate importance.

§ 11.512 *Station limitations.* (a) Mobile relay stations will not be licensed in the Special Industrial Radio Service within the continental limits of the United States.

(b) Where a radio station authorization in the Special Industrial Radio Service is held by a person or organization engaged in activities beyond those indicated in the eligibility provisions of this service, the operation of such station shall be confined to those activities on which eligibility has been established, except for messages relating to the safety of life or to the protection of property.

(c) Except for the transmission of communications relating directly to the safety of life or to the protection of property, no base station in the Special Industrial Radio Service shall be used for the transmission of communications addressed to or to be relayed by any other base station.

§ 11.513 *Mobile service frequencies for use at temporary locations.* (a) Subject to the applicable provisions of § 11.54, authorization to operate a base station in this service at temporary locations will be granted only on the frequencies 27.31, 27.35, 27.39, 43.02, 43.06, 43.10, 43.14, 49.70, or 152.87 Mc: *Provided, however,* That this paragraph shall not be applicable in the case of such stations when they are to be operated only within direct communication range of one or more permanently located base stations operated by the same licensee.

(b) A mobile station not associated with one or more base stations installed at permanent locations will be authorized to operate on the frequencies 27.31, 27.35, 27.39, 43.02, 43.06, 41.10, 45.14, 49.70 or 152.87 Mc only.

§ 11.514 *Frequencies available for base and mobile stations.* (a) The following frequencies are available for assignment to base stations and mobile stations in the Special Industrial Radio Service only:

| Mc. | Mc. | Mc. | Mc. |
|---|---|---|---|
| 27.31 | 30.62 | 35.94 | 49.86 |
| 27.35 | 35.74 | 43.02 | 49.94 |
| 27.39 | 35.78 | 43.06 | 49.94 |
| 27.43 | 35.82 | 43.10 | 49.98 |
| 27.47 | 35.86 | 43.14 | 154.49 |
| 30.58 | 35.90 | 43.18 | |

(b) The following frequencies are available for assignment to base stations and mobile stations in the Special Industrial Radio Service on a shared basis with other services:

| kc. | Mc. | Mc. |
|---|---|---|
| [1] 2292 | 49.54 | 49.78 |
| [1] 2398 | 49.58 | 49.82 |
| [1] [2] 4637.5 | 49.62 | 152.87 |
| | 49.66 | 152.93 |
| | 49.70 | 152.99 |
| | 49.74 | 173.375 |

[1] Use of this frequency by stations licensed in the Special Industrial Radio Service is on a shared basis with other stations in the Industrial Radio Services, but is subject to the condition that harmful interference shall not be caused to the service of any station not in these services which, in the discretion of the Commission, may have priority on the frequency or frequencies used for the service to which interference is caused.

[2] This frequency is limited to daytime use only, with a maximum plate power input to the final radio frequency stage not to exceed 100 watts.

[3] This frequency may be subject to change when the Atlantic City table of frequency allocations between 4 Mc and 27.5 Mc comes into force.

(c) In addition to the frequencies listed in this section, mobile service frequencies above 152 Mc listed elsewhere in this part as available to the Petroleum, Forest Products, Motion Picture or Relay Press Radio Services also are available for assignment in this Service for use outside the continental limits of the United States and waters adjacent thereto: *Provided, however,* That operation on such frequencies is subject to the condition that harmful interference shall not be caused to licensees operating in the other Services.

§ 11.515 *Frequencies available for operational fixed stations.* (a) Subject to the condition that no harmful interference will be caused to reception of television channel No. 4 or 5, the following frequencies are available for assignment to operational fixed stations in the Special Industrial Radio Service on a shared basis with other services: [1]

| Mc. | Mc. | Mc. | Mc. |
|---|---|---|---|
| 72.02 | 72.34 | 72.66 | 72.98 |
| 72.06 | 72.38 | 72.70 | 73.02 |
| 72.10 | 72.42 | 72.74 | 73.06 |
| 72.14 | 72.46 | 72.78 | 73.10 |
| 72.18 | 72.50 | 72.82 | 73.14 |
| 72.22 | 72.54 | 72.86 | 73.18 |
| 72.26 | 72.58 | 72.90 | 73.22 |
| 72.30 | 72.62 | 72.94 | 73.26 |

[1] Subject to the proceedings in Docket No. 10315.

| Mc. | Mc. | Mc. | Mc. |
|---|---|---|---|
| 73.30 | 73.78 | 74.26 | 75.54 |
| 73.34 | 73.82 | 74.30 | 75.58 |
| 73.38 | 73.86 | 74.34 | 75.62 |
| 73.42 | 73.90 | 74.38 | 75.66 |
| 73.46 | 73.94 | 74.42 | 75.70 |
| 73.50 | 73.98 | 74.46 | 75.74 |
| 73.54 | 74.02 | 74.50 | 75.78 |
| 73.58 | 74.06 | 74.54 | 75.82 |
| 73.62 | 74.10 | 74.58 | 75.86 |
| 73.66 | 74.14 | 75.42 | 75.90 |
| 73.70 | 74.18 | 75.46 | 75.94 |
| 73.74 | 74.22 | 75.50 | 75.98 |

(b) Frequencies in the bands listed below are available for assignment to operational fixed stations in the Special Industrial Radio Service on a shared basis with other services, under the terms of a developmental grant only; the exact frequency and the authorized bandwidth will be specified in the authorization:

| Mc. | Mc. |
|---|---|
| 952– 960 | 6575– 6875 |
| 1850–1990 | 9800– 9930 |
| 2110–2200 | 12,200–12,700 |
| [1] 2450–2500 | [1] 16,000–18,000 |
| 2500–2700 | 26,000–30,000 |

[1] Use of frequencies in the bands 2450–2500, and 17,850–18,000 Mc is subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequencies 2450 and 18,000 Mc.

(c) Pursuant to the provisions of § 11.8, and for the specific purpose of transmitting hydrological or meteorological data, the frequencies listed in this paragraph are available for assignment to Operational Fixed Stations in this Service: *Provided, however,* That harmful interference shall not be caused to Federal Government stations: *And provided further,* That the hydrological or meteorological data is made available to interested government agencies. Notwithstanding the provisions of § 11.151, operational fixed stations authorized to operate on frequencies listed in this paragraph shall not communicate with or accept communications from any mobile station or base station unless written authorization to do so has been obtained from the Commission. Persons who desire to operate stations in accordance with the provisions of this paragraph should communicate with the Commission prior to filing formal application and request instructions concerning the procedure to be followed. The following frequencies are available for assignment:

| Mc. | Mc. | Mc. |
|---|---|---|
| 160.425 | 171.025 | [1] 406.050 |
| 160.475 | 171.075 | [1] 406.150 |
| 160.525 | 171.725 | [1] 406.250 |
| 160.575 | 171.125 | [1] 406.350 |
| 170.225 | 171.825 | [1] 412.450 |
| 170.275 | 171.875 | [1] 412.550 |
| 170.325 | 171.925 | [1] 412.650 |
| 170.375 | 171.975 | [1] 412.750 |

[1] Primarily for use by Fixed Relay Stations.

§ 11.516 *Frequencies available for base, mobile, and operational fixed stations.* (a) The frequencies listed in paragraph (c) of this section are available for assignment to stations in the Special Industrial Radio Service for Developmental Operation only (see Subpart E of this part), and are shared with other radio services.

(b) The frequencies listed in paragraph (c) of this section are primarily for assignment to Mobile and Base Stations operating in the mobile service. However, the frequencies also are available for assignment to operational fixed stations, subject to the following restrictions and limitations on assignment and use:

(1) All use by operational fixed stations is subject to the condition that harmful interference shall not be caused to stations operating in the mobile service on frequencies in the 450–460 Mc. band in accordance with the table of frequency allocations as set forth in Part 2 of this chapter.

(2) The frequencies are available for assignment only to those operational fixed stations which function as integral and essential parts of a mobile service radio system. Such operational fixed stations include only those which are operated as part of a radio circuit over which messages normally are sent to or from a mobile station without interruption for manual relaying at intermediate points.

(3) Fixed relay stations may be used to provide two automatic retransmissions of a mobile service message. Additional automatic retransmissions on these frequencies by means of such stations is prohibited.

(c) Frequencies available for assignment as provided in paragraphs (a) and (b) of this section are as follows: [1]

| Mc. | Mc. | Mc. | Mc. |
|---|---|---|---|
| 451.05 | 451.55 | 456.05 | 456.55 |
| 451.15 | 451.65 | 456.15 | 456.65 |
| 451.25 | 451.75 | 456.25 | 456.75 |
| 451.35 | 451.85 | 456.35 | 456.85 |
| 451.45 | 451.95 | 456.45 | 456.95 |

Part 2, Rules Governing Frequency Allocations and Radio Treaty Matters, is proposed to be amended in the following particulars:

In the table of frequency allocations contained in § 2.104 (a) (5), change the entries in column 11 opposite the frequencies 35.74 to 35.94 Mc, inclusive, to read "Industrial", and that opposite the frequency 35.98 Mc to read "Land Transportation".

[1] Subject to the proceedings in Docket No. 10554.

[F. R. Doc. 53-9606; Filed, Nov. 13, 1953; 8:49 a. m.]

## [ 47 CFR Part 16 ]

[Docket No. 10743]

### Land Transportation Radio Services

### Motor Carrier Radio Service

In the matter of amendment of Part 16, rules governing Land Transportation Radio Services, to establish a Motor Carrier Radio Service and to make other related changes.

1. Notice is hereby given of proposed rule making in the above-entitled matter.

2. The Commission's rules governing the Land Transportation Radio Services were made effective July 1, 1949. A study of the use made of the frequencies allocated to the Highway Truck, Intercity Bus and Urban Transit Radio Services indicates that a general revision of this group of services appears to be desirable.

3. The Highway Truck Radio Service was intended primarily to provide communication along intercity highways for trucks operating on a route basis. It now appears that the trucking industry may have a more pressing requirement for intracity communication, not now authorized. Furthermore, the records of the Commission indicate that the majority of Highway Truck Service licensees are not engaged in the trucking business as such, but operate trucks only as an adjunct to their regular business.

4. An examination of all related factors indicates that by combining the Highway Truck, Intercity Bus and Urban Transit Radio Services, by transferring certain truck operations other than those of common and contract truckers to the Special Industrial Radio Service, and by making frequency assignments on the basis of the type of function performed, the use of radio may be expanded, greater frequency utilization may be achieved, limitations on area of operation may be removed, and administration simplified. Acordingly, the Commission contemplates the creation of a new service to be entitled the "Motor Carrier Radio Service." This service will take the place of the present Highway Truck, Intercity Bus, and Urban Transit Radio Services.

5. The proposed rules are set forth below. Interested persons also should refer to two other rule making proposals issued concurrently herewith, concerning amendment of the Automobile Emergency and Special Industrial Radio Services. Although the proposed rules in general speak for themselves, the following points should be noted:

(a) Although the seven frequencies presently allocated to the Highway Truck Radio Service are being transferred to other Services, together with many of the licensees now assigned thereon, four pairs of frequencies in the 450–460 Mc range heretofore available only to the Urban Transit Radio Service, on a shared basis with the Railroad Service, become available on the same shared basis to all persons eligible for the Motor Carrier Radio Service.

(b) One half of the frequencies available to common and contract carriers of property have been designated for assignment to Mobile Stations only. This has been done in an effort to assure maximum frequency utilization and a minimum of interference for all concerned.

6. Certain frequencies are listed in the proposed rules as available for assignment for fixed service operations. However, pending further development of the Commission's microwave program, all requests for point-to-point facilities in the Motor Carrier Radio Service will be considered on a case-by-case basis. This policy is set forth in some detail in the proposed rules.

7. The bands 3500–3700 Mc, 6425–6575 Mc, and 11,700–12,200 Mc available to the mobile service and the band 890–940 Mc available to the fixed service under the Table of Frequency Allocations in Part 2 of the Commission's rules have not been carried over into the new rules.

The reason for this is that the Commission is undertaking a comprehensive study of the use of microwaves for private radio systems. (See Withdrawal of Notice of Proposed Rule Making and Termination of Proceedings in Docket 10500, released October 29, 1953.) Pending completion of this study, it is believed that no assignments should be made in these bands in this service.

8. At the time the rules are finalized, it is proposed to adopt the following policy with respect to existing licensees in the Highway Truck, Urban Transit, and Intercity Bus Radio Services:

(a) Each licensee of a station operating under present Subparts F, G, and J of Part 16 of the Commission's rules, the Intercity Bus, Highway Truck and Urban Transit Services respectively, shall submit an application for modification of his station license to change classification and, if necessary, frequency to that which is appropriate for his particular case. All applications shall be sufficiently complete to indicate clearly the applicant's eligibility for the classification desired. Such application may be submitted at any time after those rules are made effective, but no later than 60 days before the expiration date of the current license.

(b) During the pendency of this proceeding all grants will be made subject to such modification without hearing as may be necessary to effect compliance with the rules as finalized.

9. Final action in this matter will dispose of a petition filed by American Trucking Associations, Inc., in June 1951, for "Modification of Eligibility Provisions of Section 16.301 of Highway Truck Radio Service Rules". Said petition is incorporated as a part of the record in this docket.

10. The proposed rules are issued under authority of sections 4 (i) and 303 of the Communications Act of 1934, as amended.

11. Any interested party who is of the opinion that the proposed amendment should not be adopted or should not be adopted in the form set forth herein may file with the Commission on or before February 5, 1954, a written statement or brief setting forth his comments. Comments in support of the proposed amendment may also be filed on or before the same date. Comments or briefs in reply to the original comments may be filed within 14 days from the last day for filing said original comments or briefs. The Commission will consider all such comments that are submitted before taking action in this matter, and if any comments appear to warrant the holding of a hearing or oral argument, notice of the time and place of such hearing or oral argument will be given.

12. In accordance with the provisions of § 1.784 of the Commission's rules and regulations, an original and 14 copies of all statements, briefs, or comments shall be furnished the Commission.

Adopted: November 4, 1953.

Released: November 6, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

Proposed amendments to Part 16, rules governing Land Transportation Radio Services:

A. In § 16.6 *Definition of terms* delete the present terms and definitions in paragraphs (g), (h), and (u) and substitute the following:

(g) *Motor Carrier Radio Service.* A radiocommunication service for use in connection with the operation of a motor carrier.

(h) *Motor carrier.* Any motor vehicle or streetcar operated by a common or contract carrier and used for the transportation of passengers and or property: *Provided, however,* That motor vehicles used as taxicabs, school busses, or for sightseeing purposes are not included within the meaning of this term as used in the Motor Carrier Radio Service.

* * * * *

(u) *Common carrier.* As used in the Motor Carrier Radio Service any person who holds himself out to the general public to engage in the transportation of passengers and or property by motor carrier for compensation as a regular occupation or business.

* * * * *

(x) *Contract carrier.* As used in the Motor Carrier Radio Service, any person who under individual contracts or agreements engages in the transportation of passengers and or property by motor carrier for compensation as a regular occupation or business.

B. Delete Subpart G, Highway Truck Radio Service.

C. Delete Subpart J, Urban Transit Radio Service.

D. Delete the title and text of Subpart F, Intercity Bus Radio Service, and substitute the following:

SUBPART F—MOTOR CARRIER RADIO SERVICE

§ 16.251 *Eligibility for license.* Authorizations for stations in the Motor Carrier Radio Service will be issued only to:

(a) Persons regularly engaged in the operation of a common or contract carrier transportation service by motor carrier. For the purpose of establishing eligibility under this paragraph, a certified copy of a certificate of public convenience and necessity issued by the Interstate Commerce Commission, or similar document issued by a state or local regulatory body will be accepted. If such certificate is not available, complete details of applicant's operations, including a satisfactory explanation of why such a certificate is not available, must be submitted.

(b) A non-profit corporation or association organized for the purpose of furnishing a radiocommunication service on a cost-sharing basis solely to persons who are actually engaged in the activities set forth in paragraph (a) of this section.

§ 16.252 *Frequencies available for base and mobile stations.* (a) The following frequencies are available to the Motor Carrier Radio Service for assignment to base stations and mobile stations of common or contract carriers of property:

| *Base and Mobile* | *Mobile only* |
|---|---|
| *Mc.* | *Mc.* |
| 43.70 | 43.94 |
| 43.74 | 43.98 |
| 43.78 | 44.02 |
| 43.82 | 44.06 |
| 43.86 | 44.10 |
| 43.90 | 44.14 |

(b) The following frequencies are available to the Motor Carrier Radio Service for assignment to base stations and mobile stations of common or contract carriers of passengers:

| *Mc.* | *Mc.* |
|---|---|
| 44.18 | 44.42 |
| 44.22 | 44.46 |
| 44.26 | 44.50 |
| 44.30 | 44.54 |
| 44.34 | 44.58 |
| 44.38 | |

(c) The following frequencies are available to the Motor Carrier Radio Service on a shared basis with other services, for assignment to base stations and mobile stations of common or contract carriers of passengers:

| *Mc.* | *Mc.* |
|---|---|
| 30.66 | 30.94 |
| 30.70 | 30.98 |
| 30.74 | 31.02 |
| 30.78 | 31.06 |
| 30.82 | 31.10 |
| 30.86 | 31.14 |
| 30.90 | |

(d) The following frequencies[1] are available to all persons eligible in the Motor Carrier Radio Service on a shared basis with other services, for assignment to base stations and mobile stations under the terms of a developmental authorization only:

| *Base and mobile* | *Mobile only* |
|---|---|
| *Mc.* | *Mc* |
| 452.65 | 457.65 |
| 452.75 | 457.75 |
| 452.85 | 457.85 |
| 452.95 | 457.95 |

§ 16.253 *Frequencies available for operational fixed stations.* (a) Frequencies listed in this section are available for assignment for fixed service operations in this service on a limited basis; however, extensive licensing of point-to-point systems must await further development of the Commission's microwave program. Accordingly, requests for point-to-point facilities will be considered on a case-by-case basis. In general, requests for such point-to-point facilities should clearly establish either (1) that a number of fixed stations at permanent locations are required to provide communications between isolated establishments or from such establishments to points at which established communication facilities are available, or (2) that the use of a remotely located base station, with which a requested fixed control and fixed relay link is proposed to be used, is necessary to maintain communications with mobile units for the conduct of authorized communications. Point-to-point facilities will not be authorized for the transmission of any type of signal or communication between two locations within the same Standard Metropolitan Area except for the purpose of providing a fixed control and fixed relay link where the remote placement of a base station has been justified.

(b) Subject to the conditions that no harmful interference will be caused to reception of television channel No. 4 or 5, the following frequencies[2] are available for assignment to operational fixed stations in the Motor Carrier Radio Service on a shared basis with other services:

| *Mc* | *Mc.* | *Mc.* | *Mc.* |
|---|---|---|---|
| 72.02 | 72.82 | 73.62 | 74.42 |
| 72.06 | 72.86 | 73.66 | 74.46 |
| 72.10 | 72.90 | 73.70 | 74.50 |
| 72.14 | 72.94 | 73.74 | 74.54 |
| 72.18 | 72.98 | 73.78 | 74.58 |
| 72.22 | 73.02 | 73.82 | 75.42 |
| 72.26 | 73.06 | 73.86 | 75.46 |
| 72.30 | 73.10 | 73.90 | 75.50 |
| 72.34 | 73.14 | 73.94 | 75.54 |
| 72.38 | 73.18 | 73.98 | 75.58 |
| 72.42 | 73.22 | 74.02 | 75.62 |
| 72.46 | 73.26 | 74.06 | 75.66 |
| 72.50 | 73.30 | 74.10 | 75.70 |
| 72.54 | 73.34 | 74.14 | 75.74 |
| 72.58 | 73.38 | 74.18 | 75.78 |
| 72.62 | 73.42 | 74.22 | 75.82 |
| 72.66 | 73.46 | 74.26 | 75.86 |
| 72.70 | 73.50 | 74.30 | 75.90 |
| 72.74 | 73.54 | 74.34 | 75.94 |
| 72.78 | 73.58 | 74.38 | 75.98 |

(c) Frequencies in the bands listed below are available for assignment to operational fixed stations in the Motor Carrier Radio Service on a shared basis with other services, under the terms of a developmental grant only; the exact frequency and the authorized band width will be specified in the authorization:

| *Mc.* | *Mc.* |
|---|---|
| 952– 960 | 6575– 6875 |
| 1850–1990 | 9800– 9900 |
| 2110–2200 | 12,200–12,700 |
| [1] 2450–2500 | [1] 16,000–18,000 |
| 2500–2700 | 26,000–30,000 |

[1] Use of frequencies in the bands 2450–2500 and 17,850–18,000 Mc is subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequencies 2450 and 18,000 Mc.

[1] Subject to outcome of the proceedings in Docket No. 10554.

[1] Subject to outcome of the proceedings in Docket No. 10315.

§ 16.254 *Limitation on installation of mobile units.* Mobile units authorized in this service may be installed only in vehicles used for the carriage of passengers and/or property, and in vehicles used to supervise, tow, repair and maintain such vehicles and, in the case of street-car systems, associated trackage, rights-of-way and electric power facilities, if any.

[F. R. Doc. 53-9607; Filed, Nov. 13, 1953; 8:50 a. m.]

## [ 47 CFR Part 16 ]

[Docket No. 10744]

LAND TRANSPORTATION RADIO SERVICES

AUTOMOBILE EMERGENCY RADIO SERVICE

In the matter of revision of sub-allocations in the Automobile Emergency Radio Service, § 16.503 of Subpart K of Part 16 of the Commission's rules.

1. At the present time the following frequencies are available for assignment to the Automobile Emergency Radio Service:

35.70 Mc—shared by auto clubs and public garages.
452.55 and 457.55 Mc—proposed to be shared by auto clubs and public garages under Docket 10554.

2. In addition a proposal issued concurrently herewith to create a Motor Carrier Radio Service would make the frequency 35.98 Mc available to the Automobile Emergency Service.

3. It is believed that, by dividing the four frequencies equally between automobile clubs and public garages, a more orderly pattern of assignments may be made and interference reduced. Accordingly, it is proposed to make the frequencies 35.70 and 35.98 Mc[1] available to public garages exclusively, and 452.55 and 457.55 Mc[1] to automobile clubs exclusively. Persons who may be required to shift frequency in the event the changes are finalized as proposed will be given an amortization period of five years from the date of final action herein.

4. The proposed changes are issued under the authority contained in 4 (i) and 303 of the Communications Act of 1934, as amended.

5. Any interested party who is of the opinion that the proposed amendment should not be adopted or should not be adopted in the form set forth herein may file with the Commission on or before December 14, 1953, a written statement or brief setting forth his comments. Comments in support of the proposed amendment may also be filed on or before the same date. Comments or briefs in reply to the original comments may be filed within 10 days from the last day for filing said original comments or briefs. The Commission will consider all such comments that are submitted before taking action in this matter, and if any comments appear to warrant the holding of a hearing or oral argument, notice of the time and place of such hearing or oral argument will be given.

6. In accordance with the provisions of § 1.784 of the Commission's rules and regulations, an original and 14 copies of all statements, briefs, or comments shall be furnished the Commission.

Adopted: November 4, 1953.

Released: November 6, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

TOWN SITE OF WALLULA, WASHINGTON

SALE OF TOWN LOTS

NOVEMBER 6, 1953.

1. *Authority.* Pursuant to the authority delegated by section 2.78 of Bureau of Land Management Order No. 427 (15 F. R. 5639, 5642) the unsold lots in the town site of Wallula, Washington, will be disposed of under the provisions of sections 2382 to 2386, Revised Statutes. The plat of survey of this town site was approved on November 4, 1952.

2. *Area and price.* The area and minimum price of the lots which will be offered for sale are shown in the schedule set forth below.

3. *Preemption claims.* Preemption rights to purchase at the minimum price fixed by law and not exceeding 2 lots by any one individual were provided for in public notice issued February 18, 1953, in which preemption claimants were required to file in the Washington Land and Survey Office, not later than March 18, 1953, proof of preemption claims in order that publication might be made and proofs submitted prior to date of the public sale held May 14, 1953. The preemption claimants did not file and submit acceptable proofs of the preemption claims as to the lots herein listed, and this notice, announcing the public sale of the lots, contains no provisions pursuant to which preemption claims may be filed.

4. *Public sale.* The lots listed will be offered for sale at public auction by the Regional Administrator, or his designated representative, and will be sold to the highest bidder at the United States Post Office, Wallula, Washington, starting at 1:00 p. m. December 10, 1953, and continuing until all lots are offered. Any qualified person, including preemption claimants and purchasers of lots at the public sale held pursuant to the notice published February 18, 1953, may purchase any number of the lots for which he or she is the highest bidder.

5. *Payment.* No lot will be sold for less than the appraised price. Payment for lots must be made at the time of sale, unless the total sum due from any purchaser exceeds the amount of $500.00. If the total sum due from any purchaser exceeds the amount of $500.00 such purchaser may elect to pay one-half of the total amount in cash on the sale date, and pay the balance within one year from the date of sale, plus interest at four percent per annum to the date of payment. Any deferred payments must be made to the Manager, Washington Land and Survey Office, Spokane, Washington. Failure to make full payment of any deferred installments, with interest, within the time allowed will cause an automatic forfeiture of all payments made, and of all interest under the sale, and the cancellation of the memoran-

dum certificate of sale issued to the purchaser.

6. *Citizenship requirements.* Every individual purchasing a lot will be required to furnish evidence that he is a citizen of the United States, or that he has declared his intention to become a citizen and every corporation purchasing a lot will be required to furnish evidence, including a certified copy of its articles of incorporation, showing that it was organized under the laws of the United States or of some State, Territory, or possession thereof, and it is authorized to acquire and hold real estate in the State of Washington.

7. *Manner of sale.* Bids and payments may be made in person or by agent, but it may not be made by mail nor at any time or place other than that fixed by this notice.

8. *Authority of officer conducting the sale:* The officer conducting the sale is hereby authorized to reject any and all bids for any lot and to suspend, adjourn, or postpone the sale of any lot or lots. After all the lots to be sold have been offered in the manner herein provided, the sale will be adjourned or closed as the officer conducting the sale deems proper. If the sale is adjourned, the unsold lots will be held for future disposition at public sale. If the sale is closed, the unsold lots will become subject to private entry at the appraised price, and said lots may be purchased from the Manager, Washington Land and Survey Office, Spokane, Washington.

9. *Reservations.* Patents for lots, when issued, will contain a reservation of fissionable source materials and the conditions and limitations as provided by the act of August 1, 1946 (60 Stat. 755), and a reservation of rights-of-way for ditches and canals in accordance with the act of August 30, 1890 (26 Stat. 391).

10. *Warning.* All persons are warned against bargaining in a manner, forming any combination, or entering any agreements, which will prevent any lot from selling advantageously or which will, in any way, hinder or prevent this sale. Any person so offending will be subject to prosecution under 18 U. S. C. 1860.

WILLIAM G. GUERUSEY,
*Regional Administrator.*

SCHEDULE OF LOTS, BLOCKS, AREAS AND APPRAISED PRICES

TOWN SITE OF WALLULA, WASHINGTON

| Block | Lot | Area in square feet | Appraised prices per lot |

## Bureau of Reclamation

CENTRAL VALLEY PROJECT, CALIFORNIA

ORDER OF REVOCATION

JUNE 3, 1953.

Pursuant to the authority delegated by Departmental Order No. 2515 of April 7, 1949 (14 F. R. 1937), I hereby revoke Departmental Order of November 15, 1940, insofar as said order affects the following described land; provided, however, that such revocation shall not affect the withdrawal of any other lands by said order or affect any other orders withdrawing or reserving the land hereinafter described:

MOUNT DIABLO MERIDIAN, CALIFORNIA

T. 32 N., R. 5 W.,
Sec. 11, SE¼NW¼, E½SW¼.

The above areas aggregate 120 acres.

G. W. LINEWEAVER,
*Assistant Commissioner.*

NOVEMBER 9, 1953.

I concur. The records of the Bureau of Land Management will be noted accordingly.

The following-described lands released from withdrawal by this order have, with consent of the Bureau of Reclamation, been classified for lease under the Small Tract Act of June 1, 1938 (52 Stat. 609; 43 U. S. C. 682a) as amended, and are presently under lease:

MOUNT DIABLO MERIDIAN

T. 32 N., R. 5 W.,
Sec. 11, SW¼SE¼SE¼SW¼, SE¼SW¼SE¼SW¼, SE¼SE¼SE¼SW¼, S½NE¼SE¼SE¼SW¼, S½N½SE¼NE¼SW¼ and N½S½SE¼NE¼SW¼.

The remaining lands released from withdrawal by this order shall not become subject to the initiation of any rights or to any disposition under the public-land laws until it is so provided by an order of classification to be issued by an authorized officer opening the lands to application under the Small Tract Act of June 1, 1938 (52 Stat. 609; 43 U. S. C. 682a) as amended, with a 91-day preference right period for filing such applications by veterans of World War II and others entitled to preference.

Information showing the periods during which and the conditions under which veterans and others may file applications for these lands may be obtained on request from the Manager, Land Office, Sacramento, California.

WILLIAM PINCUS,
*Assistant Director,*
*Bureau of Land Management.*

[F. R. Doc. 53-9593; Filed, Nov. 13, 1953; 8:46 a. m.]

LABARGE PROJECT, WYOMING

ORDER OF REVOCATION

JANUARY 30, 1953.

Pursuant to the authority delegated by Departmental Order No. 2515 of April 7, 1949 (14 F. R. 1937), I hereby revoke Commissioner's Order of May 8, 1951, insofar as said order affects the following described land; *Provided, however,* That such revocation shall not affect the withdrawal of any other lands by said order or affect any other orders withdrawing or reserving the land hereinafter described:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 27 N., R. 112 W.,
Sec. 30, Lot 7.

The above area aggregates 22.15 acres.

G. W. LINEWEAVER,
*Assistant Commissioner.*

NOVEMBER 9, 1953.

I concur. The records of the Bureau of Land Management will be noted accordingly.

The land is cultivable level bench land above the Green River, having a sandy loam soil.

No applications for this land may be allowed under the homestead, desert-land, small tract, or any other nonmineral public-land law unless the land has already been classified as valuable or suitable for such type of application or shall be so classified upon the consideration of an application.

This order shall not otherwise become effective to change the status of the described land until 10:00 a. m. on the 35th day after the date of this order. At that time the said land shall become subject to application, petition, location and selection, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable laws, and the 91-day preference-right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747, 43 U. S. C. 279-284) as amended.

Inquiries concerning the lands shall be addressed to the Manager, Land and Survey Office, Bureau of Land Management, Cheyenne, Wyoming.

WILLIAM PINCUS,
*Assistant Director*
*Bureau of Land Management.*

DETROIT EDISON CO.

NOTICE OF ORDER AUTHORIZING TRANSMISSION OF ELECTRIC ENERGY TO CANADA AND RELEASING PERMIT

NOVEMBER 9, 1953.

Notice is hereby given that on November 6, 1953, the Federal Power Commission issued its order adopted November 4, 1953, in the above-entitled matter, authorizing transmission of electric energy to Canada and releasing Permit in Docket No. E-6516.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 53-9610; Filed Nov. 13, 1953; 8:50 a. m.]

[Docket No. G-1506]

NEW YORK STATE NATURAL GAS CORP.

NOTICE OF APPLICATION

NOVEMBER 9, 1953.

Take notice that on October 15, 1953, New York State Natural Gas Corporation (Applicant), a New York corporation, address, New York City, filed an application for modification of the Commission's order issued on January 17, 1951 in Docket No. G-1506, issuing a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of certain natural-gas facilities and the delivery and sale of natural gas by means thereof to Crystal City Gas Company (Crystal City) in the Town of Horseheads, Chemung County, New York.

The order issued on January 17, 1951, authorized the delivery and sale of natural gas as described in the application filed in Docket No. G-1506, which application contains a form of service agreement providing for maximum daily deliveries during December, January, February, and March, of 3,150 Mcf in 1953, increasing to 3,600 Mcf in 1956, with provision for election by Crystal City to receive up to 130 percent of the said volumes during the winter months. Applicant now requests authority to sell and deliver to Corning Natural Gas Corporation (Corning), the successor to Crystal City, additional volumes of natural gas, thereby increasing Applicant's daily deliveries to Corning from 3,150 Mcf in December 1953 to 5,150 Mcf, and for the first three months of 1954 from 3,450 Mcf to 5,450 Mcf per day. No new facilities are proposed to be constructed by Applicant to render the proposed increased service.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 30th day of November 1953. The application is on file with the Commission for public inspection.

## GENERAL SERVICES ADMINISTRATION

POSTMASTER GENERAL, POST OFFICE DEPARTMENT

DELEGATION OF AUTHORITY WITH RESPECT TO MAINTENANCE, OPERATION, PROTECTION, MANAGEMENT, AND DISPOSAL OF POST OFFICE SITES AND ADDITIONS THERETO

1. Pursuant to the authority vested in me by the provisions of the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, hereinafter called the act, I hereby delegate to the Postmaster General the authority vested in me for the maintenance, operation, protection, and management of sites or additions to sites acquired pursuant to the provisions of the act of May 25, 1926, 44 Stat. 630, as amended, and the act of June 16, 1949, 63 Stat. 176, heretofore or hereafter transferred and assigned to the Post Office Department including authority vested in me by the provisions of the third paragraph of section 5 (exclusive of the last proviso) of the act of May 25, 1926, 44 Stat. 630, as amended by the act of June 16, 1949, 63 Stat. 199 (40 U. S. C. 345).

2. Pursuant to the authority vested in me by the act, I hereby further authorize the Postmaster General to determine whether such sites are required for the needs and responsibilities of Federal agencies and, should the property be determined to be surplus to the needs of the Government, to dispose of such sites by sale, exchange, lease, permit or transfer, for cash, credit or other property, as the interest of the Government may require.

3. Prior to such termination and disposal of the sites, the Postmaster General shall take such steps as may be appropriate to determine whether any Federal agency has need therefor, and, if so, shall transfer the sites to such agency upon such terms as to reimbursement as may be prescribed in accordance with the provisions of section 202 (a) of the act, as amended.

4. In the event that disposal of any or all of the particular sites will be accomplished by negotiation, the Postmaster General shall submit to the appropriate committees of Congress an explanatory statement of the type required by section 203 (e) of the act, as amended by section 1 (i) of Public Law 522, 82d Congress, at least thirty (30) days prior to the consummation of the negotiated sale. A

copy of such statement shall be provided this Administration.

5. The authority conferred by sections 2 and 3 hereof shall be exercised in accordance with the act and regulations of this Administration issued pursuant thereto.

6. The authority delegated herein may be redelegated to any officer or employee of the Post Office Department.

7. This delegation of authority shall be effective as of September 17, 1953.

Dated: November 6, 1953.

EDMUND F. MANSURE,
*Administrator.*

## FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 10413]

KENEDY BROADCASTING CO., LTD.

ORDER CONTINUING HEARING

In re application of Kenedy Broadcasting Company, Ltd., Kenedy, Texas, Docket No. 10413, File No. BP-8578; for AM construction permit.

It appearing, that there was filed in behalf of the above applicant on November 5, 1953, a petition to reconsider and grant its application without hearing, and that such hearing is presently scheduled for November 9, 1953;

*It is ordered*, This 6th day of November 1953, on the Commission's own motion, that the hearing herein is continued indefinitely.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9629; Filed, Nov. 13, 1953; 8:53 a. m.]

[Docket Nos 10657, 10658]

SOUTH JERSEY BROADCASTING CO. AND PATRICK JOSEPH STATION

NOTICE CONTINUING HEARING

In re applications of South Jersey Broadcasting Company, Camden, New Jersey, Docket No. 10657, File No. BPCT-1522; Patrick Joseph Station, Philadelphia, Pennsylvania, Docket No. 10658, File No. BPCT-1674; for construction permits for new commercial television stations.

Hearing in the above-entitled proceedings is continued on the Examiner's own motion from 10:00 a. m., November 9, 1953, to 10.00 a. m., November 30, 1953.

Dated: November 6, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F R Doc. 53-9630; Filed, Nov. 13, 1953; 8:53 a. m.]

[Docket Nos. 10660, 10661]

BOOTH RADIO & TELEVISION STATIONS, INC., AND WOODWARD BROADCASTING CO.

ORDER RE ISSUES

In re applications of Booth Radio & Television Stations, Inc., Detroit, Michigan, Docket No. 10660, File No. BPCT-724; Woodward Broadcasting Company, Detroit, Michigan, Docket No. 10661, File No. BPCT-1418; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 5th day of November 1953;

The Commission having under consideration a Petition for Declaratory Ruling or for Alternative Relief filed by Woodward Broadcasting Company on October 21, 1953, and a reply filed in opposition thereto by Booth Radio & Television Stations, Inc., on October 30, 1953;

It appearing, that, contrary to the view urged by petitioner, the Commission's ruling of October 1, 1953, in South Central Broadcasting Corporation et al., 9 Pike & Fischer RR 1035, does not constitute a general authorization to Hearing Examiners in similar cases to enlarge specified hearing issues to determine whether the funds available to applicants will give reasonable assurances that the proposals set forth in the applications will be effectuated; and

It further appearing, that, following our ruling in South Central Broadcasting supra, the order of designation in the instant proceeding should be modified authorizing the Examiner, upon sufficient allegations of supporting facts, to enlarge the hearing issues to determine whether the funds available to Booth Radio & Television will give reasonable assurance that the proposals set forth in its application will be effectuated; and

It further appearing, that there is now pending before the Examiner herein a request by petitioner that the parties be required to exchange additional financial data relating to the question of ability to effectuate applicant's proposals; that under the Commission's hearing procedures Examiners possess the authority to require parties to exchange additional information to assure that statements of points of difference may be recited with reasonable specificity; and that, therefore, petitioner's request that we instruct the Examiner to require the exchange of such additional data is premature:

*It is ordered*, That the issues specified in this proceeding may be enlarged by the Examiner, upon sufficient allegations of fact made in support of said enlargement, by the addition of the following issue: To determine whether the funds available to Booth Radio & Television Stations, Inc., will give reasonable assurance that the proposals set forth in its application will be effectuated.

*It is further ordered*, That in all other respects the petition of Woodward Broadcasting Company is denied.

Released: November 10, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9631; Filed, Nov. 13, 1953; 8:53 a. m.]

[Docket Nos. 10672, 10673]

PERKINS BROTHERS CO. AND KCOM BROADCASTING CO.

ORDER DELETING ISSUES

In re applications of Perkins Brothers Company, Sioux City, Iowa, Docket No. 10672, File No. BPCT-688; KCOM Broadcasting Company, Sioux City Iowa, Docket No. 10673, File No. BPCT-864; for a construction permit for new television station.

At a session of the Federal Communications Commision held at its offices in Washington, D. C., on the 5th day of November 1953;

There being under consideration a Petition to Change Issues filed by Perkins Brothers Company on September 23, 1953; and

It appearing, that the petition of Perkins Brothers Company seeks to delete issues No. 1 and 2 of the Commission's order of September 2, 1953, for the reason that a petition for leave to amend petitioner's application covering the matters which it seeks to delete was granted by Order dated September 25, 1953; and

It further appearing, that issues Nos 1 and 2 of the Commision's order of September 2, 1953, relating to the above-entitled matter, have now become moot;

*It is ordered*, That the Commission's order of September 2, 1953, is modified by the deletion of issues Nos. 1 and 2.

Released: November 10, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R Doc. 53-9632; Filed, Nov. 13 1953; 8:54 a. m.]

## SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3139]

STANDARD POWER AND LIGHT CORP.

ORDER PERMITTING DECLARATION TO BECOME EFFECTIVE

NOVEMBER 9, 1953.

Standard Power and Light Corporation ("Standard Power"), a registered holding company, having filed a declaration and amendments thereto, pursuant to section 12 of the Public Utility Holding Company Act of 1935 ("act") and Rules U-44 and U-46 thereunder, regarding its proposals (a) to pay a dividend of 25 cents per share out of capital surplus, to the holders of its outstanding 1,320,000 shares of Common Stock and 110,000 shares of Common Stock, Series B, and (b) to sell from 10,000 to 15,000 shares of the 290,000 shares of common stock of Duquesne Light Company held by Standard Power; and

A public hearing having been held after appropriate notice and the Commission having this day issued its findings and opinion herein;

Standard Power having requested that the Commission's order herein become effective forthwith and the Commission deeming it appropriate to grant such request:

*It is ordered*, Pursuant to the applicable provisions of the act and subject to the terms and conditions prescribed in Rule U-24, that the aforesaid declaration, as amended, be, and the same hereby is, permitted to become effective forthwith, subject to the following additional terms and conditions and reservations of jurisdiction:

1. That Standard Power shall accompany the dividend checks with a statement to the effect

a. That the Commission's action in permitting the declaration to become effective is not to be construed as a determination by the Commission that such dividend payment is or is not taxable to the recipients pursuant to the provisions of the Internal Revenue Code; and

b. That Standard Power filed a declaration with the Commission pursuant to section 12 of the act and Rule U-46 thereunder and the Commission permitted the declaration to become effective without determining whether the payment is being made out of capital or unearned surplus.

2. That the proposed sale of the common stock of Duquesne Light Company by Standard Power shall not be consummated until the results of negotiation by Standard Power for such sale shall have been made a matter of record herein and a further order shall have been entered by the Commission in the light of the record so completed, which order may contain such further terms and conditions as may then be deemed appropriate.

3. That jurisdiction be, and it hereby is, specifically reserved to determine and pass upon, in this or any other appropriate proceeding:

a. The reasonableness of all counsel fees and expenses incurred or to be incurred in connection with the proposed transactions.

b. The accounting entries with respect to the proposed transactions.

c. The extent, if any, to which Standard Power may be liable to H. M. Byllesby and Company by reason of the payment of the dividend proposed herein.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28629]

FERTILIZERS FROM LUMBERTON, N. C., TO OFFICIAL AND ILLINOIS TERRITORIES

APPLICATION FOR RELIEF

NOVEMBER 10, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Fertilizer and fertilizer materials, carloads.

From: Lumberton, N. C.

To: Official and Illinois territories.

Grounds for relief: Rail competition, circuity, market competition, grouping, and additional origin.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1366, supp. 14.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

[4th Sec. Application 28630]

PHOSPHATE ROCK FROM FLORIDA TO THE SOUTHWEST

APPLICATION FOR RELIEF

NOVEMBER 10, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedules, listed below.

Commodities involved: Phosphate rock, carloads.

From: Bartow, Fla. and points in Florida taking same rates.

To: Points in Arkansas, Louisiana, Oklahoma, and Texas.

Grounds for relief: Rail competition, circuity, market competition, grouping, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: Atlantic Coast Line Railroad Company tariff I. C. C. No. B-3232, supp. 91; Seaboard Air Line Railroad Company tariff I. C. C. No. A-8153, supp. 85.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other

applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 28634]

SUPERPHOSPHATE FROM SOUTHERN TERRITORY TO ARMOUR, IOWA

APPLICATION FOR RELIEF

NOVEMBER 10, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr. Agent, for carriers parties to schedule listed below.

Commodities involved: Superphosphate (acid phosphate) other than ammoniated or defluorinated, carloads.

From: Points in southern territory.

To: Armour, Iowa.

Grounds for relief: Rail competition, circuitous routes, and to maintain grouping.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1286, supp. 20.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

TALL OIL FROM LOUISIANA, ARKANSAS AND TEXAS TO GREENVILLE, MISS.

APPLICATION FOR RELIEF

NOVEMBER 10, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedules listed below.

Commodities involved: Tall oil, crude, in barrels, carloads and in tank-car loads.

From: Points in Louisiana, Arkansas, and Texas.

To: Greenville, Miss.

Grounds for relief: Rail competition, circuity, and to apply rates constructed on the basis of short line distance formula, and additional destination.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3967, supp. 283; F. C. Kratzmeir, Agent, I. C. C. No. 3908, supp. 165; F. C Kratzmeir, Agent, I. C. C. No. 3906, supp 194

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73 persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

*Washington, Tuesday, November 17, 1953*

## TITLE 3—THE PRESIDENT

### PROCLAMATION 3037

COPYRIGHT—JAPAN

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

WHEREAS section 9 of title 17 of the United States Code, entitled "Copyrights", as codified and enacted into positive law by the act of Congress approved July 30, 1947, 61 Stat. 652, 655, provides in part that the copyright secured by the said title shall extend to the work of an author or proprietor who is a citizen of a foreign state or nation only:

(a) When an alien author or proprietor shall be domiciled within the United States at the time of the first publication of his work; or

(b) When the foreign state or nation of which such author or proprietor is a citizen or subject grants, either by treaty, convention, agreement, or law, to citizens of the United States the benefit of copyright on substantially the same basis as to its own citizens, or copyright protection, substantially equal to the protection secured to such foreign author under this title or by treaty; or when such foreign state or nation is a party to an international agreement which provides for reciprocity in the granting of copyright by the terms of which agreement the United States may, at its pleasure, become a party thereto.

; and

WHEREAS section 1 of the said title 17 provides in part as follows:

Any person entitled thereto, upon complying with the provisions of this title, shall have the exclusive right:

* * * * *

(e) To perform the copyrighted work publicly for profit if it be a musical composition * * * *Provided*, That the provisions of this title, so far as they secure copyright controlling the parts of instruments serving to reproduce mechanically the musical work, shall include only compositions published and copyrighted after July 1, 1909, and shall not include the works of a foreign author or composer unless the foreign state or nation of which such author or composer is a citizen or subject grants, either by treaty, convention, agreement, or law, to citizens of the United States similar rights.

[cont'd

WHEREAS section 9 of the said title 17 further provides:

The existence of the reciprocal conditions aforesaid shall be determined by the President of the United States, by proclamation made from time to time, as the purposes of this title may require * * *

; and

WHEREAS Article 22 (6) of the copyright law of Japan accords rights similar to those extended by section 1 (e) of title 17 of the United States Code; and

WHEREAS Article 12 of the Treaty of Peace with Japan, signed at San Francisco September 8, 1951, provides that Japan will, during a period of four years from the first coming into force of the Treaty, accord to an Allied Power national treatment as regards copyright protection to the extent that national treatment is accorded to it by the Allied Power concerned; and

WHEREAS the United States and Japan have each, in fact, since April 28, 1952, the date of the coming into force of the said Treaty of Peace, accorded to the nationals of the other, copyright protection on substantially the same basis as to its own citizens:

NOW, THEREFORE, I, DWIGHT D. EISENHOWER, President of the United States of America, do declare and proclaim:

That since April 28, 1952, the conditions specified in section 9 (b) and 1 (e) of title 17 of the United States Code have existed and have been fulfilled with respect to the nationals of Japan, and that nationals of Japan have since that date been entitled, and will continue to be entitled for a period of four years from the first coming into force of the Treaty of Peace, to all the benefits of the said title 17 except those conferred by the provisions embodied in the second paragraph of section 9 (b) thereof regarding the extension of time for fulfilling copyright conditions and formalities.

*Provided*, that the enjoyment by any work of the rights and benefits conferred by the said title 17 shall be conditioned upon compliance with the requirements and formalities prescribed with respect to such works by the copyright laws of the United States.

## TITLE 7—AGRICULTURE

### Chapter III—Bureau of Entomology and Plant Quarantine, Department of Agriculture

[B. E. P. Q. 604]

PART 301—DOMESTIC QUARANTINE NOTICES

SUBPART—PINK BOLLWORM

ADMINISTRATIVE INSTRUCTIONS MODIFYING REQUIREMENTS FOR MOVEMENT OF COTTONSEED AND COTTONSEED PRODUCTS FROM LIGHTLY INFESTED AREAS

Pursuant to the authority conferred by the second proviso of Pink Bollworm Quarantine No. 52 (7 CFR Supp. 301.52; 18 F. R. 6348), issued under sections 8 and 9 of the Plant Quarantine Act of August 20, 1912, as amended (7 U. S. C. 161, 162) and section 3 of the Insect Pest Act of March 3, 1905 (7 U. S. C. 143), the Chief of the Bureau of Entomology and Plant Quarantine hereby issues administrative instructions to appear in § 301.52a in Title 7, Code of Federal Regulations (7 CFR Supp. 301.52a) as follows:

§ 301.52a *Administrative instructions modifying requirements for movement of cottonseed and cottonseed products from lightly infested areas.* (a) Under § 301.52–6 (c) (1) cottonseed produced in any county in any lightly infested area in which the gins are not required to treat cottonseed as a part of the continuous process of ginning may be moved under limited permit to approved oil mills or other approved treating plants either in contiguous lightly infested areas or in nonregulated areas contiguous to the lightly infested area for heat treatment at 150° F. for 30 seconds or for approved fumigation upon arrival at such plants. Such treated seed is then eligible for certification and movement under certificate to any regulated areas or to nonregulated areas.

(b) The Chief of the Bureau of Entomology and Plant Quarantine hereby finds that facts exist as to the pest risk involved in the movement of cottonseed and cottonseed products to which § 301.52–6 applies, making it safe to modify by making less stringent the requirements of § 301.52–6. Hereafter, in addition to movement authorized under § 301.52–6 (c) (1), cottonseed produced in a lightly infested area in which the gins are not required to treat cottonseed as a part of the continuous process of ginning may be moved under limited permit to an approved oil mill or other approved treating plant in any of the lightly infested counties hereinafter listed, for storage and subsequent approved heat treatment, approved fumigation, or processing into linters, oil, cottonseed hulls, cottonseed meal, cottonseed cake, or other products, at such approved mill or plant: Counties of Curry, De Baca, Lea, Quay, and Roosevelt, in New Mexico; all of the counties in the regulated areas of Oklahoma; and the Counties of Bailey, Borden, Briscoe, Castro, Childress, Cochran, Collingsworth, Cottle, Crosby, Dawson, Deaf Smith, Dickens, Donley, Fisher, Floyd, Foard, Gaines, Garza, Gray, Hale, Hall, Hardeman, Haskell, Hockley, Jones, Kent, King, Knox, Lamb, Lubbock, Lynn, Motley, Parmer, Scurry, Stonewall, Swisher, Terry, Wheeler, and Yoakum, in Texas. As a condition of such limited permits all motes and unginned grabbots produced from such untreated cottonseed shall be either fumigated, given other approved treatment, or destroyed by burning. Such cottonseed and products thereof which are subject to § 301.52[1] may be moved from such lightly infested counties under certificates as follows:

(1) Such cottonseed that has been given approved heat treatment or approved fumigation, such linters and cottonseed hulls that have been given approved treatment, and such cottonseed meal and cake, which have been segregated from untreated cottonseed and cottonseed products and kept free from any other source of contamination, may be certified and moved to any destination.

(2) All linters produced from the untreated cottonseed may be certified and moved for processing to any destination within the regulated areas of New Mexico, Oklahoma, or Texas, or to any noncotton producing state, or to approved cellulose plants at any location.

(3) All cottonseed hulls produced from the untreated cottonseed may be certified and moved for consumption or utilization to any destination within the regulated areas of New Mexico, Oklahoma, or Texas, or to any noncotton producing state.

The approved treatment provided for in this paragraph shall be the heat treatment prescribed in paragraph (a) of this section or any alternate treatment that is administratively authorized under § 301.52–12.

(Secs. 1, 3, 33 Stat. 1269, 1270, sec 9, 37 Stat. 318; 7 U. S. C. 143, 162)

[1] Section 301.52 does not apply to cottonseed oil.

The purpose of these instructions is to make less stringent the requirements for movement of certain cottonseed and cottonseed products from the lightly infested areas described in the Pink Bollworm Quarantine, since it has been determined that the pest risk involved in such movement does not require the continuation of the present requirements. In order to be of maximum benefit to producers and shippers of cottonseed in the areas involved, the instructions should be made effective as soon as possible. Accordingly, under section 4 of the Administrative Procedure Act (5 U. S. C. 1003) it is found upon good cause that notice and other public procedure concerning these instructions are impracticable and unnecessary and since the instructions relieve restrictions they may be made effective less than 30 days after publication hereof in the FEDERAL REGISTER.

These instructions shall become effective November 17, 1953.

Done at Washington, D. C., this 2d day of November 1953.

[SEAL] W. L. POPHAM,
*Acting Chief, Bureau of Entomology and Plant Quarantine.*

[F. R. Doc. 53-9679; Filed, Nov. 16, 1953; 8:52 a. m.]

## TITLE 9—ANIMALS AND ANIMAL PRODUCTS

### Chapter I—Bureau of Animal Industry, Department of Agriculture

#### Subchapter C—Interstate Transportation of Animals and Poultry

[B. A. I. Order 383, Revised, Amdt. 12]

PART 76—HOG CHOLERA, SWINE PLAGUE, AND OTHER COMMUNICABLE SWINE DISEASES

SUBPART B—VESICULAR EXANTHEMA

CLEANING AND DISINFECTING FACILITIES USED IN CONNECTION WITH INTERSTATE MOVEMENT OF SWINE

Pursuant to the authority conferred upon the Secretary of Agriculture by sections 1 and 2 of the act of February 2, 1903, as amended (21 U. S. C. 111, 120), and section 3 of the act of March 3, 1905, as amended (21 U. S. C. 125), paragraph (c) of § 76.35 of the regulations restricting the interstate movement of swine and certain swine products because of vesicular exanthema and governing the cleaning and disinfecting of vehicles and other facilities used in connection with such interstate movement (9 CFR Supp., Part 76, Subpart B; 18 F. R. 3636, 3829, as amended) is hereby amended to read as follows:

§ 76.35 *Cleaning and disinfecting vehicles and facilities.* * * *

(c) Except as provided by the Chief of Bureau, facilities which are used for feeding, watering, and resting swine moved interstate shall be thoroughly cleaned and disinfected as prescribed in paragraph (g) of this section immediately after each such use.

The amendment is in the nature of a relief of restrictions in that it authorizes the Chief of the Bureau of Animal Industry to modify by making less stringent the requirements of said paragraph (c) of § 76.35 when conditions so justify. Certain modifications are needed now because of emergency conditions in some areas caused by severe winter weather. Accordingly, under section 4 of the Administrative Procedure Act (5 U. S. C. 1003) it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and contrary to the public interest, and good cause is found for making the amendment effective less than 30 days after publication in the FEDERAL REGISTER.

The foregoing amendment shall become effective upon issuance.

(Sec. 2, 32 Stat. 792, as amended; 21 U. S. C. 111. Interprets or applies sec. 1, 32 Stat. 791, sec. 3, 33 Stat. 1265, as amended; 21 U. S. C. 120, 125)

Done at Washington, D. C., this 12th day of November 1953.

[SEAL] TRUE D. MORSE,
*Under Secretary of Agriculture.*

[F. R. Doc. 53-9656; Filed, Nov. 16, 1953; 8:48 a. m.]

## TITLE 14—CIVIL AVIATION

### Chapter I—Civil Aeronautics Board

#### Subchapter B—Economic Regulations

[Reg. ER-191]

PART 223—TARIFFS OF AIR CARRIERS; FREE AND REDUCED RATE TRANSPORTATION

ISSUANCE OF PASSES; LISTS OF AUTHORIZED ISSUING OFFICIALS AND AFFILIATES

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 12th day of November 1953.

Part 223 of the Board's Economic Regulations governs the practices of air carriers in issuing passes for free or reduced rate transportation to their directors, officers and employees and their immediate families. Believing that certain of the requirements of these regulations might be simplified and made less burdensome, the Board in its Draft Release No. 65 circulated to the public for comment a proposed revision of these regulations. It is the purpose of this regulation to bring about simplification of these requirements, as more fully explained in the Explanatory Statement published with the above-mentioned Draft Release.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 223 of the Economic Regulations (14 CFR Part 223) effective December 17, 1953:

1. By amending § 223.4 to read as follows:

§ 223.4 *Form of pass.* No carrier shall issued any form of pass other than an "annual", "term", or "trip" pass. Every pass shall be issued upon the express condition that it is subject to suspension or cancellation for the abuse of the privileges accorded thereunder, and must show on its face, at least, the name of the person or persons who, or whose property, is entitled to receive free or reduced-rate transportation. Each pass must bear either the signature in ink of an official whose title is contained in the list referred to in § 223.6 (a), or the facsimile signature of such an official and the countersignature and title in ink of some other official or responsible subordinate whose title is contained in the list referred to in § 223.6 (b), who is authorized by said official to countersign passes on his behalf, and before it is presented for transportation such pass must bear the signature in ink of the person to whom issued: *Provided*, That regular tickets or bills of lading, stamped with a suitable notation, may be used as trip passes, and when so used need not conform to the provisions of this section as to form.

2. By amending § 223.6 to read as follows:

§ 223.6 *Carrier's rules.* Each carrier shall file with the Board three copies of all instructions to its employees, and of all company rules and regulations, governing its practices in connection with the issuance and interchange of passes. If no instructions, rules, or regulations are in effect, then three copies of a general statement by an appropriate official of the carrier, comprehensively describing its practices in connection with the issuance and interchange of passes must be filed. Each carrier's rules and regulations or statement referred to in this section shall include lists showing (a) the titles of its officials upon whose authorizations passes may be issued, (b) the titles of other officials or responsible subordinates who are authorized by said officials to countersign passes on their behalf and the extent of the authority granted them, and (c) the titles of persons who are authorized to request passes from other carriers. Three copies of any change in any such instructions, rules, regulations, or statement of practices must be filed with the Board within 30 days after the effective date of such change.

3. By amending § 223.7 to read as follows:

§ 223.7 *Filing of list of affiliates.* Before issuing any pass to directors, officers, employees, or members of their immediate families, of any of its affiliates, each carrier shall file with the Board a list containing all of such carrier's affiliates and showing the exact relationship of each such affiliate to such carrier as respects control and principal business. Any change in such list must be filed with the Board within 15 days after such change is effective: *Provided*, That an affiliate not previously included in any list filed with the Board must be included in a new list prior to the issuance of any pass to any person authorized to receive such pass by reason of such affiliation.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply sec. 403, 52 Stat. 992; 49 U. S. C. 483)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
*Secretary.*

[F. R. Doc. 53-9673; Filed, Nov. 16, 1953; 8:51 a. m.]

[Reg. ER-192]

PART 242—FILING OF REPORTS BY IRREGULAR AIR CARRIERS AND NONCERTIFICATED CARGO CARRIERS

ELIMINATION OF REPORTING REQUIREMENTS FOR AIR TAXI OPERATORS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 12th day of November 1953.

At the present time Part 242 of the Economic Regulations requires air taxi operators who own or have the right to operate for compensation or hire one or more aircraft having more than five passenger seats to file an annual statistical report. While the report is not onerous to prepare, the requirement is extremely difficult to enforce, since the Board does not have available to it the names of all air taxi operators who have the use of aircraft of more than five passenger seats. Ownership of such aircraft may change rapidly, and with such change the requirement to file statistical reports may become applicable or cease to apply. Moreover, the information supplied through these reports is not adequate to support general economic conclusions as to the air taxi operations industry as a whole. In light of the foregoing, and the fact that the elimination of the requirement would reduce the economic and administrative burden on the carriers of preparing the reports, as well as eliminate the administrative burden on the government for reviewing them, it would be in the public interest to abolish the requirement unless its retention serves a sound purpose.

At the time Part 293 was adopted the basic purpose of continuing the requirement for the filing of statistical reports was to obtain a means whereby a check could be made of the potential competitive aspects of air taxi operations with equipment of five passenger seats and over. To date there have been no complaints against the operations conducted by air taxi operators as such. In the future, if any certificated carrier suffers economic harm by reason of the operations of air taxis, the complaint can be readily referred to the Board, and any required action taken as expeditiously as would be the case if the information had been received through the annual report. As a result, the Board finds that it is no longer in the public interest to require the statistical reports from any air taxi operator. Accordingly, this amendment to Part 242 is being adopted to eliminate such reporting requirements. Apart from the foregoing, this amendment makes no substantive changes in the present Part 242.

Interested persons have been afforded an opportunity to participate in the making of this rule, and due consideration has been given to all relevant matters submitted and arguments presented. Since the effect of this amendment is to relieve air taxi operators from an existing restriction, it may be made effective immediately.

In consideration of the foregoing, the Board hereby amends Part 242 of the Economic Regulations, effective November 12, 1953, as follows:

1. By amending the title of the part to read as set forth above.

2. By amending § 242.2 to read as follows:

§ 242.2 *Statistical and flight reports required.* Each large irregular carrier, irregular transport carrier, and noncertificated cargo carrier shall file statistical reports in accordance with § 242.4. Flight reports shall be filed with the Board by each large irregular carrier or irregular transport carrier in accordance with § 242.4 and by each noncertificated carro carrier in accordance with § 242.6. Each such large irregular carrier, irregular transport carrier, and noncertificated cargo carrier shall keep all accounts, records, and memoranda (including accounts, records and memoranda of the movement of traffic as well as the receipts and expenditures of money), which are needed in order to accomplish full compliance with the reporting requirements of this part. Such accounts, records, and memoranda as relate to statistical reports shall be preserved for three years, and such as relate to flight reports shall be preserved for one year. The reports to be filed by such carriers shall be prepared in accordance with the following provisions and shall be certified to be correct by the responsible officers of the reporting carriers.

3. By striking § 242.3.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply sec. 407, 52 Stat. 1000; 49 U. S. C. 487)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
*Secretary.*

[F. R. Doc. 53-9674; Filed, Nov. 16, 1953; 8:51 a. m.]

## TITLE 15—COMMERCE AND FOREIGN TRADE

### Chapter III—Bureau of Foreign and Domestic Commerce, Department of Commerce

#### Subchapter C—Bureau of Foreign Commerce

[6th Gen. Rev. of Export Regs., Amdt. 71[1]]

PART 371—GENERAL LICENSES

PART 373—LICENSING POLICIES AND RELATED SPECIAL PROVISIONS

MISCELLANEOUS AMENDMENTS

1. Section 371.18 *Return of certain commodities imported into the United States GLR* is amended in the following particulars:

a. The introductory paragraph is amended to read as follows:

A general license designated GLR is hereby established authorizing exportations described in this section. When exportations are made under this general license, the entry number and the port of entry covering the importation of the goods into the United States must be shown on the shipper's export declaration.

b. Paragraph (c) *Containers returned empty* is amended to read as follows:

(c) *Containers.* Exportation may be made of metal drums, gas cylinders, bags and other containers (whether manufactured in the United States or a foreign country) which are imported into the United States for the purpose of transporting contained commodities to or from the United States to any destination other than Hong Kong, Macao, or Subgroup A countries, whether such container is exported (1) empty, or (2) filled with any commodity which may be exported under a general license or (3) filled with any commodity for which a validated license has been issued by the Department of Commerce.

This part of the amendment shall become effective as of December 5, 1953.

2. Section 371.23 *General License GHK* is amended to read as follows:

§ 371.23 *General License GHK.* A general license, GHK, is hereby established authorizing the exportation to Hong Kong of commodities listed below:

| Schedule B No. | Commodity |
|---|---|
| 00100-001990 | Animals, edible. |
| | Meat and meat products: |
| 002000, 002100 | Beef and veal, except canned. |
| 002200 | Pork, except canned, fresh or frozen. |
| 002400 | Lamb and mutton, except canned. |
| 002500 | Sausage, prepared sausage meats, bologna, and frankfurters, except canned. |
| 002601 | Chicken, canned. |
| 002800 | Canned baby food, meat, or chief value meat, strained or chopped. |
| 002910 | Chickens, capons, fresh or frozen. |
| 002950 | Other poultry and game, fresh or frozen. |
| 003200 | Other meats, except canned (including edible animal organs). |
| 001600-003950 | Sausage casings, natural: bladders, bungs, middles, rounds or weasands. |
| 003998 | Sausage casings, artificial. |
| | Dairy products: |
| 004000 | Milk and cream, fresh. |
| 004050 | Butter. |
| 004850 | Infants' and dietetic foods, chiefly milk base. |
| 004901 | Malted milk, compounds and mixtures (powder or paste only). |
| 004903 | Ice cream powder, mix and preparations (powder or paste only). |

[1] This amendment was published in Current Export Bulletin No. 718, dated November 5, 1953, and in the reprint pages, dated November 5, 1953.

| Schedule B No. | Commodity |
|---|---|
| | Fish and fish products: |
| 037000-037600 | Fish and fish fish, fresh or frozen, however packed |
| 037700-038000 | Fish and shellfish, salted, pickled, or dry-cured, except canned. |
| 038191 | Fish, smoked, or kippered, exactly canned |
| 038470-038484 | Fish, canned in oil, in [illegible] containers, mapped, shells: |
| | [illegible] (including pilchards). |
| | Herring. |
| | Mackerel (including large jack mackerel). |
| | Other [illegible], [illegible], paste, sauce, caviar and roes. |
| 038700-038805 | Shellfish, canned, in oil, in [illegible] containers, [illegible] cans. |
| 038960 | Fish, shellfish, and other marine animal products, prepared or preserved, n. e. c. |
| 039200-039600 | Other edible animal products. |
| Leather: | |
| 031210-031950 | Patent upper leather. |
| 035700 | Reconstituted and similar leather, for all purposes. |
| Leather manufactures: | |
| 064710-064795 | Boots, shoes, and other footwear with leather uppers, now: |
| | Women's and girls'. |
| | Infants' and children's. |
| 068800-068900 | Wallets and similar flat pocket books, pocket books, and purses (except change purses), all materials. |
| 069200-069600 | Card cases, change purses, wallets, and similar articles, all materials. |
| 071800-072300 | Furs and manufactures. |
| Other inedible animal and animal products: | |
| 094205-094298 | Glue of animal origin. |
| Grains and preparations: | |
| 101300 | Barley flour. |
| 102100 | Buckwheat. |
| 103700 | Corn cereal foods, ready to eat. |
| 104400 | Oatmeal, groats, and rolled oats in packages. |
| 107700 | Macaroni and macaroni products. |
| 107810 | Bakery products. |
| 107900 | Prepared flour mixes. |
| 108000 | Wheat cereal foods, ready to eat. |
| 109500 | Breakfast cereal foods, n. e. c. |
| 106800 | Grains and preparations, n. e. c. |
| Fodders and feeds, n. e. c.: | |
| 110100 | Hay. |
| 118500 | Other prepared and mixed feeds. |
| 119000 | Feeds, n. e. c. |
| Vegetables and preparations, edible: | |
| 120710-123000 | Vegetables, fresh, frozen and dehydrated. |
| | Vegetables, canned: |
| 124100 | Asparagus. |
| 124300 | Corn. |
| 124400 | Peas. |
| 124510 | Soups, n. e. c. |
| 124700 | Tomato paste and puree (pulp). |
| 124800 | Tomato juice. |
| 124910 | Beans, string or snap, less. |
| 124950 | Spinach. |
| 124970 | Baby food vegetables, strained or chopped. |
| 124980 | Vegetables and juices, canned, n. e. c. |
| 125400 | Pickles, cucumber. |
| 125100-125298 | Sauce and relishes. |
| 125920 | Vegetable seasonings. |
| 125998 | Vegetable preparations, n. e. c. |
| Fruits and preparations: | |
| 130100-132000 | Fruits, fresh and frozen. |
| | Fruits, dried and evaporated: |
| 132200 | Pears. |
| 132500 | Apples. |
| 132600 | Apricots. |
| 132700 | Peaches. |
| 133005 | Figs. |
| 133098 | Fruits, dried and evaporated, n. e. c. |
| 133100 | Dates, fresh, dried or otherwise prepared. |
| 133450 | Olives, green and ripe. |
| 133200-134700 | Fruits, canned. |
| 134900 | Preserves, jellies, pastes, and fruit butters. |
| 137015-137099 | Fruit juices, except pineapple, canned and frozen. |
| 137098 | Fruit preparations, n. e. c. |
| 137400-137945 | Nuts and preparations. |
| 150700-151740 | Cocoa, coffee, tea, and substitutes. |
| 151 | Spices: |
| 154901-154906 | Cassia (including cinnamon), cassia; cloves; and nutmeg (ground or unground). |
| 154915 | Natural herbs (including [illegible]), ground. |
| 154993 | Spices, [illegible] (including [illegible]). |

| Schedule B No. | Commodity |
|---|---|
| | Sugar and related products: |
| 163100 | Syrup for table use, and edible molasses. |
| | Honey. |
| 163400-163700 | Candy. |
| 163810 | Chewing gum. |
| 163900-164700 | Confections and desserts. |
| 174000-178000 | Beverages. |
| | Rubber (natural, allied gums, and synthetics) and manufactures: |
| 284010 | Rubber toys, balls, and novelty balloons, except dolls, golf and tennis balls. |
| 290410 | Rubber tiling and flooring. |
| | Drugs, herbs, leaves, and roots, crude: |
| 220510 | Cascara bark. |
| 220600 | Ginseng. |
| 220698 | Crude drugs, herbs, leaves and roots, n. e. c. |
| 220800-220900 | Vegetable oils, fats, and waxes, crude: |
| 227110-227190 | Peppermint oil, spearmint and other mint oils, n. e. c. |
| | Citrus oils. |
| 240110-240198 | Seeds, except cereals, grass and field seeds. |
| 240200-240298 | Nursery and floral stock. |
| | Cotton manufactures: |
| 301000 | Crochet, darning and embroidery cotton. |
| | Piece goods, cloth, bleached, dyed, printed, stiffened, or otherwise converted, and colored yarn fabrics: |
| | Carded goods, except fine carded: |
| 301000-301710 | Drills, twills, sateens and sheeting. |
| | Print cloth yarn fabrics: |
| 301800-301820 | Carded broadcloth. |
| 301710-301720 | Print cloth yarn fabrics, construction count above 36 x 32. |
| 301510-301580 | Napped fabrics. |
| | Colored yarn fabrics: |
| 302000 | Chambrays, cheviots, and shirtings. |
| 302010 | Colored yarn fabrics, n. e. c. |
| | Fine good and combed cotton fabrics, bleached, dyed, printed, flockdot, or clipped: |
| | Fine carded, combed and part combed goods: |
| 306700 | Voiles, organdies, lawns, and batistes. |
| 307000-307700 | Piques; marquisettes; broadcloth, pongee; and oxford. |
| 307 [illegible] | Cotton and wool mixtures, n. e. c. |
| 307900 | Cotton and rayon mixtures, n. e. c. |
| | Cotton fabrics, n. e. c.: |
| 308000 | Knit fabric, in the piece. |
| 308200 | Table damask, in the piece. |
| 308[illegible] | Tapestry and other upholstery and drapery materials, plain, jacquard, and dobby-woven. |
| 308700-308800 | Plushes and pile fabrics. |
| | Cotton wearing apparel: |
| 309000 | Handkerchiefs. |
| 309[illegible] | Gloves and mitts, except fabric work gloves and mitts. |
| 309400-309600 | Knit goods. |
| | Garments of woven fabrics: |
| 311500-311[illegible] | Underwear and underwear, men's and boys'. |
| 311720 | Shirts, men's and boys', except work shirts. |
| 312000 | Clothing of cotton woven fabrics, men's and boys', n. e. c. |
| 312300-312600 | Women's and children's apparel of woven fabrics, n. e. c. |
| 313200 | Laces, embroideries, and articles thereof, n. e. c. |
| 314000-314100 | Cotton narrow fabrics, nonelastic, not over 12 inches wide, except woven belts and belting, industrial. |
| 317100-318000 | Cotton house furnishings. |
| Vegetable fibers and manufactures: | |
| 320705 | Hemp. |
| 320[illegible] | Unmanufactured vegetable fibers, n. e. c. |
| 330[illegible] | Handkerchiefs, linen. |
| Silk and manufactures: | |
| 370300 | Raw silk. |
| 371700 | Sewing, embroidery, and crochet silk. |
| 379100-379700 | Wearing apparel, including hosiery. |
| 379900 | Silk manufactures, n. e. c. |
| Man-made synthetic fibers and manufactures: | |
| 381600-381601 | Braid woven goods: |
| 381603 | Pile fabrics. |
| 381[illegible] | Upholstery and drapery fabrics, wider than 12 inches, woven, except pile. |
| 381929-381931 | Woven filament yarn fabrics, wholly of rayon or acetate, n. e. c., gray (unfinished) and printed. |
| 381[illegible]-381472 | Woven spun yarn fabrics, wholly of rayon or acetate, n. e. c. |
| 381481 | Braid woven fabrics of mixed or blended fibers, chiefly rayon or acetate, n. e. c. |
| 381[illegible] | Knit fabric in the piece. |
| 381[illegible] | Ribbons, woven with fast selvages. |
| 382201-382729 | Wearing apparel. |
| 3826[illegible] | House furnishings. |

| Schedule B No. | Commodity |
|---|---|
| | Metal manufactures—Continued: |
| | Hardware, tools or parts, and forgings, fabricated parts, n. e. c.: |
| 611[illegible] | Metal, except precious: |
| 621[illegible] | Castings, forgings, and [illegible] parts, n. e. c. |
| 6[illegible] | Tubular [illegible] and [illegible], and specially fabricated parts, n. e. c. |
| 6[illegible] | Wire products, n. e. c., and specially fabricated parts, n. e. c. |
| 6[illegible] | Tinware and other sheet metal ware, n. e. c. (including galvanized), and specially fabricated parts, n. e. c. |
| | Furniture and fixtures of all metals: |
| 612[illegible] | Metal cases, cabinets, counters, and other fixtures, n. e. c., and specially fabricated parts, n. e. c. |
| 613110-613[illegible] | Vertical record filing cabinets with exposed drawers or trays. |
| 613[illegible] | Vertical record filing cabinets. |
| 613[illegible] | Safes, one-piece, with or without interior equipment. |
| 613[illegible] | Vault doors, vault liners or equipment, and specially fabricated parts, n. e. c. |
| 613510-613540 | Office desks, tables, and chairs. |
| 613601-613650 | Metal household furniture, and specially fabricated parts, n. e. c. |
| | Hardware: |
| 617010-617[illegible] | Locks (all metals). |
| 617[illegible] | Hinges and butts (all metals). |
| 617[illegible] | Hardware, n. e. c., metals other than iron, steel, or copperbase alloys. |
| 618871-618[illegible] | Plumbing fixtures and fittings, n. e. c. |
| 618[illegible]-618[illegible] | Sash, sashes, and frames, door and window. |
| 618[illegible]-618[illegible] | Venetian blinds (including slats and strip), and specially fabricated parts, n. e. c. |
| 619[illegible]-619[illegible] | Vertical files, except electric. |
| 619[illegible] | Silver-plated manufactures, n. e. c. |
| | Electrical machinery and apparatus: |
| 706[illegible] | Electric commercial cooking and food service equipment, n. e. c., and specially fabricated parts, n. e. c. |
| | Other industrial machines, and parts: |
| 7[illegible] | Laundry machines, n. e. c., and specially fabricated parts, n. e. c. |
| 7[illegible] | Sewing machines, n. e. c., and specially fabricated parts, n. e. c. |
| 7[illegible]-7[illegible] | Bottling, bottle-washing, and bottle-labeling machines, and specially fabricated parts, n. e. c. |
| 7[illegible] | Meat and other food cutting, chopping and slicing, power-driven machines, n. e. c., and specially fabricated parts, n. e. c. |
| 7[illegible] | Canning and preserving, and tobacco processing machines, n. e. c., and specially fabricated parts, n. e. c. |
| 7[illegible] | Laundry machines, and specially fabricated parts, n. e. c. |
| 7[illegible] | Commercial laundry and dry cleaning equipment (including power-driven machines) and parts. |
| 77[illegible] | Household sewing machines. |
| Other vehicles and parts: | |
| 795[illegible] | Bicycles, and specially fabricated parts and accessories, n. e. c. |
| 7[illegible] | Logging wagons, drays, and trailers. |
| 7[illegible] | Vehicles, n. e. c., and specially fabricated parts, n. e. c., except logging wagons, motor scooters, bicycles and [illegible] trailers. |
| Chemicals: | |
| 8[illegible] | Coating materials: |
| | Organic pigments, n. e. c. (the following only: In [illegible] mixtures of 2 ounces or less dye [illegible] water colors, except [illegible] vegetable origin; [illegible] used by [illegible] household purposes and dyes). |
| Medicinal and pharmaceutical preparations: | |
| 811893 | Mouth washes, gargles, and personal antiseptics. |
| Chemical specialties: | |
| 8[illegible] | Baking powder. |
| 825100 | Cleaning preparations for retarding, sealing, and [illegible] (the following only: automobile [illegible] dye cement [illegible] cement, [illegible] rubber, rug [illegible] cement, and [illegible] type). |
| 825[illegible] | Specialty cleaning and washing compounds, the following only, not exceeding one pound or less [illegible] cleaner, cleaning powders, [illegible] and [illegible], and removers, powder, except [illegible] vegetable [illegible] cleaner, wall cleaners, and wallpaper cleaners. |
| | Perfumes: |
| 8[illegible] | Cream, pastes. |
| 8[illegible] | [illegible] pastes and shoe cleaners. |
| 8[illegible] | Toilet preparations. |
| 8[illegible] | Antiseptics and germicides, containing natural and synthetic [illegible] oils and [illegible] chemicals (natural and [illegible] or used for perfumery). |
| 8[illegible]-8[illegible] | Flavors and flavoring extracts, natural and synthetic. |
| 8[illegible] | Pearl essence. |
| Paint and paint preparations: | |
| 8[illegible] | Chemical specialty compounds, n. e. c., the following only: Brewers' finings, brewers' sugar, [illegible] compounds, for [illegible] [illegible] cream, [illegible] preparation for [illegible] [illegible] powder, [illegible] [illegible] [illegible]

6. Section 373.71 *Supplement 1: Time schedules for submission of applications for licenses to export certain Positive List commodities* is amended by the addition of the following schedules for the Fifth Quarter, 1954:

| Part and Schedule B No. | Commodity | Shipments to be First (quarter) | |
|---|---|---|---|
| [illegible] | [illegible] | [illegible] | [illegible] |
| [illegible] | [illegible] | Nov. 30–Dec. 11, 1953. | |
| [illegible] | [illegible] | Dec. 16–Dec. 31, 1953. | |

This part of the amendment shall become effective as of November 5, 1953.

(Sec. 3, 63 Stat. 7; 65 Stat. 43; 67 Stat. 62; 50 U. S. C. App. Sup. 2023. E. O. 9630, Sept. 27, 1945, 10 F. R. 12245, 3 CFR, 1945 Supp.; E. O. 9919, Jan. 3, 1948, 13 F. R. 59, 3 CFR, 1948 Supp.)

## PART 399—POSITIVE LIST OF COMMODITIES AND RELATED MATTERS

### MISCELLANEOUS AMENDMENTS

Section 399.1 *Appendix A—Positive List of Commodities* is amended in the following particulars:

1. The following commodities are added to the Positive List:

| Part or Schedule B No. | Commodity | Unit | Processing code and related country group | GLV dollar-value limits | Validated license required |
|---|---|---|---|---|---|
| 771[illegible] | Parts, n. e. c., specifically fabricated for valve bodies included in the Positive List under Schedule B Nos. 771[illegible] and 771[illegible] (see Schedule B number of valve bodies for which parts are specifically fabricated), except forgings, castings, and machined forgings or castings for valve bodies, all of which [illegible] as defined in Appendix A | [illegible] | GIEq 5 | | RO |

[1] These commodities are still subject to IC DV requirements (see § 373.2), effective Dec. 21, 1953.

This part of the amendment shall become effective as of 12:01 a. m., November 12, 1953.

(Sec. 3, 63 Stat. 7; 65 Stat. 43; 67 Stat. 62; 50 U. S. C. App. Sup. 2023. E. O. 9630, Sept. 27, 1945, 10 F. R. 12245, 3 CFR, 1945 Supp.; E. O. 9919, Jan. 3, 1948, 13 F. R. 59, 3 CFR, 1948 Supp.)

This part of the amendment shall become effective as of November 5, 1953.

3. Section 373.13 *Applicability of multiple commodity group provisions to Commodity Group O commodities* is deleted.

This part of the amendment shall become effective as of October 30, 1953.

4. Section 373.14 *Wet cattle hides* is deleted.

This part of the amendment shall become effective as of October 30, 1953.

5. Section 373.53 *Vessels to be scrapped abroad* paragraph (d) *Shipper's export declaration* is amended to read as follows:

(d) *Shipper's export declaration.* A license issued under this section will require submission of the fourth copy of the shipper's export declaration to the collector of customs in connection with each shipment.

2. The following commodities are deleted from the Positive List:

| Part or Schedule B No. | Commodity |
|---|---|
| [illegible] | Abrasive products: |
| [illegible] | Iron and steel shot, chilled |
| [illegible] | Pig iron, all grades (excess grade) |
| [illegible] | Steel ingots, blooms, billets, slabs, sheet bars, and tin-plate bars: |
| [illegible] | Carbon steel: |
| [illegible] | Ingots |
| [illegible] | Billets, except projectile and shell steel, blooms, slabs, sheet bars, and tin-plate bars. |
| [illegible] | Wire rods, carbon steel. |
| [illegible] | Steel bars, including bar size shapes: |
| [illegible] | Bars, cold finished (all cold drawn or cold rolled flats, rounds or special sections in coils or cut lengths) |
| [illegible] | Tool steel bars, except forged. |
| [illegible] | Other carbon steel bars |
| [illegible] | Bars, hot rolled, except tool and hollow drill steel bars (all rounds, bars as, hexagonal sections and bar shapes under 3 inches) (report tool steel bars in [illegible] and hollow drill steel bars in [illegible]) |
| [illegible] | Carbon steel: |
| [illegible] | Tool steel bars |
| [illegible] | Other carbon steel bars. |
| [illegible] | Structural shapes and piling: |
| [illegible] | Structural shapes, not fabricated: |
| [illegible] | Carbon steel. |
| [illegible] | Sheet piling (all steel grades, except fence). |
| [illegible] | Fabricated steel products: |
| [illegible] | Towers and poles, fabricated (specify by name). |
| [illegible] | Other structural shapes, fabricated (specify by name). |
| [illegible] | Plates, fabricated for condensing water purposes (fabricated boiler shell steel plate). |
| [illegible] | Curved steel sections, consisting of or plain, corrugated or ribbed, with or without accessories. |
| [illegible] | Plates, punched, formed or bent, with or without accessories. |
| [illegible] | Bars, structural, except rounds, grade bars, sash sections (specify by name). |
| [illegible] | Hollow blocks, steel filled with fill or other materials (specify type and use of bearing). |

This part of the amendment shall become effective as of 12:01 a. m., November 5, 1953.

Shipments of any commodities removed from general license to Country Group R or Country Group O destinations as a result of changes set forth in item 1 of this amendment, which were on dock, on lighter, laden aboard an exporting carrier, or in transit to a port of exit pursuant to actual orders for export prior to 12:01 a. m., November 12, 1953, may be exported under the previous general license provisions up to and including December 5, 1953. Any such shipment not laden aboard the exporting carrier on or before December 5, 1953, requires a validated license for export.

(Sec. 3, 63 Stat. 7; 65 Stat. 43; 67 Stat. 62; 50 U. S. C. App. Sup. 2023. E. O. 9630, Sept. 27, 1945, 10 F. R. 12245, 3 CFR, 1945 Supp.; E. O. 9919, Jan. 3, 1948, 13 F. R. 59, 3 CFR, 1948 Supp.)

# TITLE 24—HOUSING AND HOUSING CREDIT

## Subtitle A—Office of the Administrator, Housing and Home Finance Agency

### PART 1—TIME FOR DISPOSITION OF LANHAM ACT HOUSING

#### EXCEPTIONS

Housing and Home Finance Administrator's regulation, Part 1—Time for Disposition of Lanham Act Housing (published at 18 F. R. 4043, July 10, 1953) issued pursuant to delegation of authority under Executive Order 10462, dated June 19, 1953 (18 F. R. 3613) to perform the functions vested in the President by section 611 of Public Law 849, 76th Congress, 54 Stat. 1125, as amended (42 U. S. C., 1946 ed., 1521), is hereby amended by adding a new § 1.5 to read as follows:

§ 1.5 *Exceptions.* Notwithstanding any other provision in this part, the Housing and Home Finance Administrator may extend with respect to a particular housing project or projects, the time within which any action is required or permitted to be taken by § 1.1 or § 1.2 where he determines (after considering the needs of national defense and the effect of such extension upon the general housing situation and the national economy) that special circumstances warrant such extension in the public interest.

(Sec. 11, 54 Stat. 1128; 42 U. S. C. and Sup. 1548. E. O. 10462, 18 F. R. 3613)

Effective as of the 17th day of November 1953.

B. T. FITZPATRICK,
*Acting Housing and Home Finance Administrator.*

# TITLE 26—INTERNAL REVENUE

## Chapter I—Internal Revenue Service, Department of the Treasury

### Subchapter C—Miscellaneous Excise Taxes

[T. D. 6052, Regs. 8]

### PART 140—TAXES ON TOBACCO, SNUFF, CIGARS, CIGARETTES, CIGARETTE PAPERS, AND TUBES, AND PURCHASE AND SALE OF LEAF TOBACCO

### Subchapter E—Administrative Provisions Common to Various Taxes

[T. D. 6052, Regs. 34]

### PART 150—WITHDRAWAL OF FILLED CHEESE AND PLAYING CARDS, FROM FACTORIES, FREE OF TAX, FOR USE OF THE UNITED STATES

### SHIPMENTS OF TAX-FREE TOBACCO PRODUCTS, ALSO CIGARETTE PAPERS AND TUBES, FOR USE OF THE UNITED STATES

On July 1, 1953, notice of proposed rule-making, relating to the removal tax-free of manufactured tobacco, snuff, cigars, cigarettes, and cigarette papers and tubes, from domestic factories for use of the United States, was published in the FEDERAL REGISTER (18 F. R. 3758). No comments having been received in regard to the rules proposed, the regulations set forth below are hereby adopted.

PARAGRAPH 1. Regulations 8 (26 CFR Part 140), but only as prescribed and made applicable to the Internal Revenue Code by Treasury Decision 4835, approved February 11, 1939, are amended by renumbering § 140.215 (article 215), as last renumbered by Treasury Decision 5368 (16 F. R. 11998), as § 140.225 (article 225).

PAR. 2. Regulations 8 (26 CFR Part 140) are further amended by adding, immediately following § 140.211, a new Subpart P, Tax-Free Shipment of Tobacco, Snuff, Cigars, Cigarettes, and Cigarette Papers and Tubes For Use of United States, as follows:

SUBPART P—TAX-FREE SHIPMENT OF TOBACCO, SNUFF, CIGARS, CIGARETTES, AND CIGARETTE PAPERS AND TUBES, FOR USE OF UNITED STATES

Sec.
140.212 Shipments restricted.
140.213 Federal requisition.

BOND

140.214 Manufacturer of tobacco products.
140.215 Manufacturer of cigarette papers and tubes.

NOTICE OF SHIPMENT FROM FACTORY

140.216 Notice of shipment.

PACKING AND LABELING

140.217 Tobacco products.
140.218 Cigarette papers and tubes.

ENTRIES IN MANUFACTURER'S RECORDS

140.219 Manufacturer of tobacco products.
140.220 Manufacturer of cigarette papers and tubes.

EVIDENCE OF DELIVERY REQUIRED

140.221 Certificate of receipt.

AUTHORITY: §§ 140.212 to 140.221 issued under 53 Stat. 467, 26 U. S. C. 3781.

SEC. 3331. INTERNAL REVENUE CODE EXEMPTION FROM TAX OF DOMESTIC GOODS PURCHASED FOR THE UNITED STATES.

The privilege existing by provision of law on December 1, 1873, or thereafter of purchasing supplies of goods imported from foreign countries for use of the United States, duty free, shall be extended, under such regulations as the Secretary may prescribe, to all articles of domestic production which are subject to tax by the provisions of this subtitle.

§ 140.212 *Shipments restricted.* Manufacturers of tobacco, snuff, cigars, cigarettes, and cigarette papers and tubes, may ship such articles tax-free from their factories, in accordance with this subpart, to Federal agencies and institutions for gratuitous distribution. Shipments of such articles for sale by Federal agencies or institutions are not within the meaning of the law authorizing the purchase of articles tax-free for use of the United States. Institutions owned or controlled by the Governments of the several States, Territories, or the District of Columbia, are not entitled to receive such articles tax-free.

§ 140.213 *Federal requisition.* Whenever manufactured tobacco, snuff, cigars, cigarettes, and cigarette papers or tubes, are purchased by a Federal agency or institution for the use of the United States, and it is proposed to ship such articles from the place of manufacture, tax-free, the agency or institution desiring the product shall prepare a requisition on Form 7996, in quadruplicate. All of the information called for by the headings of the various columns and lines on the form and the instructions printed thereon or issued in respect thereto, and as required by this subpart shall be furnished. Each of the four copies of the form must agree in every respect, and shall be signed and approved by the head of the agency or institution or by a person duly authorized to sign and approve for such officer. The agency or institution shall retain one copy of the form and transmit the remaining three copies to the manufacturer concerned at the time of placing its order for the merchandise. Immediately after removal of the shipment from the factory, the manufacturer shall forward two copies of the requisition, Form 7996, with two copies of the notice of shipment, Form 7997, as required in this subpart, to the Assistant Regional Commissioner for the region in which the factory is located. The remaining copy of the Form 7996 shall be retained by the manufacturer at the factory from which the shipment is made, with a copy of the Form 7997, for his records and for inspection, upon demand, by any internal revenue officer.

BOND

§ 140.214 *Manufacturer of tobacco products.* A shipment of tax-free tobacco, snuff, cigars, or cigarettes made by a manufacturer of such articles under this subpart, shall be charged against the bond, Form 40 or Form 71, furnished by the manufacturer to cover the operation of his factory from which the shipment is removed.

§ 140.215 *Manufacturer of cigarette papers and tubes.* A manufacturer of cigarette papers and tubes desiring to remove cigarette papers in packages, books, or sets, of more than 25 papers each, and any cigarette tubes, from his factory, tax-free, under this subpart, shall furnish to the Assistant Regional Commissioner for the region in which his factory is located, a bond on Form 7999, with acceptable corporate surety, or at least two individual sureties, or collateral, as required by this part. Bond, Form 7999, shall be prepared and executed, in triplicate, in accordance with this subpart, as supplemented by the instructions printed on the form, or issued in respect thereto. If given with individual sureties, the manufacturer shall furnish from each such individual surety an affidavit on Form 33, in triplicate, to show his qualification to act as such surety, a copy of which affidavit shall be attached to each copy of the related bond when filed by the manufacturer. A separate bond shall be furnished for each such factory from which tax-free removals under this subpart are to be made.

(a) *Penal sum.* The bond must be in a penal sum sufficient to cover the estimated amount of tax which may at any time constitute a charge against the bond: *Provided*, That the penal sum of the bond furnished under this section shall not exceed $25,000 nor be less than $500. The bond shall be a continuing one, and the liability thereof subject to increase as successive withdrawals are made thereunder, and to decrease as evidence of delivery, as required by this subpart, is received by the Assistant Regional Commissioner. When the limit of liability under a bond given in less than the maximum penal sum has been reached, no further shipments may be made under such bond, until an additional or strengthening bond, with the same surety as that on the original bond, or a new or superseding bond, has been filed to cover further shipments of such articles from the factory.

(b) *Action on the bond.* The Assistant Regional Commissioner shall, if the bond meets with his approval, make endorsement to that effect on all three copies. He shall retain one copy, forward one copy promptly to the Commissioner of Internal Revenue, and transmit the remaining copy to the manufacturer as notice of approval of the bond and authority to make tax-free shipments of the articles covered by the bond. The copy of the bond, together with copies of any Forms 33 or any other documents returned to him in connection therewith, shall be retained by the manufacturer at the factory from which such tax-free shipments are to be made, for his records and for inspection, upon demand, by any internal revenue officer.

NOTICE OF SHIPMENT FROM FACTORY

§ 140.216 *Notice of shipment.* For each shipment of tax-free tobacco products or cigarette papers or tubes removed from his factory under this subpart, the manufacturer shall prepare a notice of shipment on Form 7997, in triplicate. All of the information called for by the headings of the various columns and lines on the form and the instructions printed thereon or issued in respect thereto, and as required by this subpart, shall be furnished. The manufacturer shall assign to each notice of shipment a serial number, which shall begin with No. 1 with respect to the first shipment made under this subpart and begin again with No. 1 with respect to the first shipment made on January 1 of each year thereafter, which serial number shall be the same on all three copies of the notice. Immediately after removal of the shipment from the factory, the manufacturer shall forward two copies of the notice of shipment, Form 7997, with two copies of the requisition, Form 7996, as required in this subpart, to the Assistant Regional Commissioner for the region in which the factory is located. The remaining copy of the Form 7997 shall be retained by the manufacturer at the factory from which the shipment is made, with a copy of the Form 7996, for his records and for inspection, upon demand, by any internal revenue officer.

PACKING AND LABELING

§ 140.217 *Tobacco products.* Manufactured tobacco, snuff, cigars, and cigarettes shipped from a factory under this subpart, must be put up in packages of the same sizes prescribed by law for such articles removed taxpaid for domestic sale or consumption. Each package must show either the name of the manufacturer or the identity of his factory by number and State, which may appear in the form of the caution notice and or factory brand required to be affixed to each package removed from the factory for taxable purposes. There shall be affixed to each package a label or sticker, clearly distinguishable from an internal revenue stamp, on which shall be printed in legible letters the words "Free of Tax—Use of U. S. Not to be Sold". Printing of any additional words, inscription, or legend on such label may be permitted, when approved by the Assistant Regional Commissioner for the region in which the factory is located.

§ 140.218 *Cigarette papers and tubes.* When cigarette papers and tubes are shipped by a manufacturer under this subpart, such articles may be put up in packages, books or sets of any sizes desired. Packages, books or sets containing more than 25 cigarette papers each, and all packages of cigarette paper tubes, must bear the name and address of the manufacturer and a label or sticker, clearly distinguishable from an internal revenue stamp, on which shall be printed in legible letters the words "Free of Tax—Use of U. S. Not to be Sold". Printing of any additional words, inscription, or legend on such label may be permitted, when approved by the Assistant Regional Commissioner for the region in which the factory is located.

ENTRIES IN MANUFACTURER'S RECORDS

§ 140.219 *Manufacturer of tobacco products.* Entry of each shipment of tax-free tobacco, snuff, cigars, or cigarettes, actually removed from his factory under this subpart shall be made by the manufacturer in the proper column in the prescribed revenue book, Form 73, Part 1 or 2, or Form 74, as the case may be. Such shipment shall also be included in the revenue book in the recapitulation or account of manufactured tobacco and snuff, or cigars or cigarettes, for the month in which the shipment was removed.

§ 140.220 *Manufacturer of cigarette papers and tubes.* Appropriate entry of each shipment of cigarette papers and tubes actually removed from his factory under this subpart shall be made by the manufacturer in the revenue book required to be kept by him. Such entry shall carry a notation "For use of U. S.". With respect to the manufacturer's return, Form 734, cigarette papers so shipped shall be reported in the appropriate column, under cigarette papers removed, with the notation "For use of U. S.", while cigarette tubes so shipped shall be reported on the return in the column covering tubes delivered tax-free, with a similar notation to appear through or across the columns headed "Factory No." and "District".

EVIDENCE OF DELIVERY REQUIRED

§ 140.221 *Certificate of receipt.* The officer responsible for receiving a shipment of tax-free tobacco products, or cigarette papers and tubes, delivered to a Federal agency or institution, for use of the United States, shall, upon receipt of the shipment, inspect it in order that he may certify as to the quantity and class of product actually received and date of receipt. Such certificate shall be executed on Form 7998, to be prepared in triplicate. All of the information called for by the headings of the various columns and lines on the form and the instructions printed thereon or issued in respect thereto, and as required by this subpart, shall be furnished. The receiving officer shall retain one copy of such certificate and transmit the other two copies promptly to the manufacturer who made the shipment. The manufacturer shall keep one copy of the certificate, Form 7998, at the factory from which the shipment was removed, for his records and for inspection, upon demand, by any internal revenue officer. The other copy of the Form 7998 shall be forwarded by the manufacturer to the Assistant Regional Commissioner for the region in which the factory is located, in order that the manufacturer may be relieved of liability to tax on the product actually received by the agency or institution. Where there is a loss of goods in transit, or there is any difference between the quantity of product withdrawn from the factory as described on the notice of shipment and that certified by the receiving officer as having been delivered to the Federal agency or institution, the manufacturer making the shipment shall be liable for the tax on such shortage or difference.

PAR. 3. Regulations 34 (26 CFR Part 450), but only as prescribed and made applicable to the Internal Revenue Code by Treasury Decision 4884, approved February 11, 1939, are amended to remove therefrom all references to tobacco, snuff, cigars, and cigarettes, as follows:

(A) The headnote of Part 450 (Regulations No. 34, Revised) is amended to read as follows: Part 450—Withdrawal of Filled Cheese and Playing Cards, From Factories, Free of Tax, For Use of the United States.

(B) The first sentence of the preamble (26 CFR 450.0), as last amended by Treasury Decision 5818 (15 F. R. 8819), is further amended by striking out ", tobacco, snuff, cigars, and cigarettes" and by inserting the word "and" between the words "filled cheese" and "playing cards".

(C) The first sentence of article 2 (26 CFR 450.2), as last amended by Treasury Decision 5818 (15 F. R. 8819), is further amended by striking out "tobacco, snuff, cigars, and cigarettes.".

(D) Article 5 (26 CFR 450.5), as last amended by Treasury Decision 5818 (15 F. R. 8819), is further amended by striking out paragraph (b) and by relettering paragraph (c) as (b).

(E) The second sentence of the second paragraph of article 8 (a) (26 CFR 450.8 (a) (2)), as last amended by Treasury Decision 5818 (15 F. R. 8819), is further amended by striking out "and tobacco manufactures".

This Treasury decision shall be effective on the 31st day after publication in the FEDERAL REGISTER.

(53 Stat. 467; 26 U. S. C. 3791)

[SEAL] JUSTIN F. WINKLE,
*Acting Commissioner of Internal Revenue.*

Approved: November 10, 1953.

M. B. FOLSOM,
*Acting Secretary of the Treasury.*

# PROPOSED RULE MAKING

## DEPARTMENT OF THE TREASURY

### United States Coast Guard

### [ 33 CFR Part 92 ]

[CGFR 53-47]

SPEED LIMITS OF VESSELS IN ST. MARYS RIVER CHANNEL FROM FRYING PAN ISLAND TO PIPE ISLAND SHOAL, MICHIGAN

PUBLIC HEARING ON PROPOSED SPEED LIMITS

1. The Commander of the 9th Coast Guard District will hold a public hearing on Thursday, January 7, 1954, commencing at 10:00 a. m., in Room 1712, B. F. Keith Building, 1621 Euclid Avenue, Cleveland 15, Ohio, to consider the establishment of a maximum speed limit of 12 statute miles per hour over the ground in the St. Marys River, Michigan, from Frying Pan Island to Pipe Island Shoal, and for the purpose of receiving comments, views, and data, relating thereto for submission to the Merchant Marine Council at Coast Guard Headquarters, Washington, D. C.

2. The rules and regulations in 33 CFR Part 92 contain the requirements governing the movements and anchorage of vessels and crafts on the St. Marys River, Michigan, from Point Iroquois on Lake Superior to Point Detour on Lake Huron. These rules and regulations are also published by the Coast Guard in CG-172, "Pilot Rules for the Great Lakes and Their Connecting and Tributary Waters and the St. Marys River."

3. The citizens of the Village of Detour, Michigan, submitted the following resolution to the Commandant:

We, the undersigned property owners on the St. Mary's River, Detour Township, are deeply concerned about property damage in the matter of washing away our shore lines, destroying our boat landings and docks, endangering life to fishermen in small craft, due to the excessive speed of the new diesel powered carriers operating through the St. Mary's channel from Sweets Point to Point DeTour or one mile south of Coast Guard Station. The waves created by the speeding carriers lash our shores with stormlike proportion and constitute a day and night hazard.

We are confident that proper regulation of 10 miles per hour is adequate to safeguard our property rights and unite to call with emphasis this violation to your attention, appealing to your efficient patrol staff to use their good offices to enforce proper regulation of speed of the large diesel powered carriers, which by observation we consider the chief offenders in this instance. If immediate measures are not taken to check this violation of regulation and total disregard to our property rights, it will be necessary to approach our definite problem on a higher level.

4. In order to protect the shore property at Detour, Michigan, it is proposed to establish a maximum speed limit of 12 statute miles over the ground for vessels navigating the St. Mary's River channel, Michigan, between Frying Pan Island Dock Light and Pipe Island Shoal Lighted Buoy No. 7 for upbound vessels and between Pipe Island Light and Frying Pan Island Dock Light for downbound vessels. To accomplish this, it is proposed to amend 33 CFR 92.49 (a) by changing the heading and by adding new subdivisions (iii) to paragraph (a) (1) and (2), so that this paragraph reads as follows:

§ 92.49 *Speed limit on the St. Marys River.* (a) Except as modified by paragraph (c) of this section, and §§ 92.51, 92.53, and 92.55, a vessel of 50 gross tons or over shall at no time exceed a speed of 12 statute miles per hour over the ground between the following points in the St. Marys River:

(1) Upbound:

(i) Everens Point and Lake Nicolet Lighted Buoys Nos. 63 and 64.

(ii) Six-Mile Point Range Rear Light and Big Point.

(iii) Frying Pan Island Dock Light and Pipe Island Shoal Lighted Buoy No. 7.

(2) Downbound:

(i) Big Point and Six-Mile Point Range Rear Light.

(ii) Nine-Mile Point and lower end of West Neebish Channel.

(iii) Pipe Island Light and Frying Pan Island Dock Light.

(Secs. 1-3, 29 Stat. 54, 55 as amended; 33 U. S. C. 474)

5. Copies of the proposed regulation are being mailed to persons and organizations who have expressed an active interest in this subject. Copies of the proposed regulation may be obtained from the Commander, 9th Coast Guard District, United States Coast Guard, B. F. Keith Building, 1621 Euclid Avenue, Cleveland 15, Ohio, or from the Commandant (CMC), United States Coast Guard, Washington 25, D. C., so long as they are available.

6. Comments on the proposed regulation are invited. All persons who desire to submit written comments, data, and

views prior to the hearing for consideration in connection with the proposed speed limit should submit them in writing for receipt prior to January 5, 1954, by the Commander, 9th Coast Guard District, or comments, data, and views may be presented orally or in writing at the public hearing. In order to insure consideration of comments and to facilitate checking and recording, it is essential that each comment on the proposed regulation shall be submitted in duplicate on Form CG-3287, showing the section and paragraph number, proposed change, the reason or basis (if any), and the name, business firm or organization (if any), and the address of the submitter. Copies of Form CG-3287 may be obtained upon request from the Commander, 9th Coast Guard District, or from the Commandant (CMG), Coast Guard Headquarters.

Dated: November 10, 1953.

[SEAL] MERLIN O'NEILL,
*Vice Admiral, U. S. Coast Guard,*
*Commandant.*

## CIVIL AERONAUTICS BOARD

### [14 CFR Parts 40, 41, 42, 43, 60]

[Draft Release No. 53-25]

ANTI-COLLISION LIGHTS FOR LARGE AIRCRAFT OPERATING AT NIGHT

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the Civil Aeronautics Board has under consideration the adoption of proposed amendments to the Civil Air Regulations as hereinafter set forth.

Interested persons may participate in the making of the proposed rules by submitting such written data, views, or arguments as they may desire. Communications should be submitted in duplicate to the Civil Aeronautics Board, attention Bureau of Safety Regulation, Washington 25, D. C. In order to insure their consideration by the Board before taking further action on the proposed rules, communications must be received by January 15, 1954. Copies of such communications will be available after January 19, 1954, for examination by interested persons at the Docket Section of the Board, Room 5412, Department of Commerce Building, Washington, D. C.

The problem of conspicuity of aircraft flying at night has been recognized for a long time. For many years the standard method of making airplanes distinguishable at night has been by means of aircraft position lights. Some fifteen years ago tests revealed that the conspicuity of position lights was increased when these lights were made to flash. As a result the regulations were amended to require the installation of flashing position lights as a type certification requirement for transport category airplanes. However, continued experimentation indicated that the flashing position light systems in use could be improved and, because the need for improvement of conspicuity became apparent, further effort was expended by Government agencies and the industry in experimentations with position light systems. Experiments in recent years revealed that high intensity rotating lights, commonly referred to as anti-collision lights, increase conspicuity to the point where safety of air navigation can be materially increased if aircraft are equipped with such lights. In order to enable operators, in particular the scheduled air carriers, to evaluate thoroughly this and other systems of aircraft exterior lighting, the Board promulgated Special Civil Air Regulations Nos. SR-361, effective March 9, 1951, SR-390, effective January 1, 1953, and SR-392, effective May 16, 1953.

The progress made by manufacturers of lighting systems and by the operators was such that early in 1952 certain of the scheduled air carriers indicated their desire to install anti-collision lights on their fleets. The Civil Aeronautics Board was advised at that time that the air carrier operators would prefer to make these installations as early as practicable and on a voluntary basis without regulatory compulsion.

Since it appeared that these air carrier operators considered satisfactory those types of anti-collision lights which were then available to them, the Board introduced a broad objective standard for anti-collision lights which would be applicable to future designs of transport category airplanes. The adoption of this standard was for the purpose of assuring a reasonable degree of standardization of anti-collision lights.

The Board, in consideration of the air carrier's viewpoint, did not make the installation of anti-collision lights mandatory on presently operated airplanes, although the Board was in receipt of recommendations from other sources to adopt a mandatory requirement.

Recent indications reveal that relatively little progress has been made by the air carriers in installing anti-collision lights. It is estimated that, since the beginning of the program about a year ago, only a small percentage of the airplanes utilized in air carrier operations are equipped with anti-collision lights even though the lights are available in ample quantity. This progress does not meet the Board's expectations. At the same time experience shows, and recent near accidents emphasize, that the use of anti-collision lights would increase conspicuity and contribute materially to the safety of night operations. The Board believes that the installation of anti-collision lights is of sufficient importance that they should be made mandatory.

In view of the fact that the problems associated with the safety of night operations are not applicable solely to air carrier aircraft, the Board believes that the requirement of anti-collision lights should not be limited to airplanes used in air carrier operations. Since a substantial percentage of aircraft operated at night in or near areas of high air traffic density are large aircraft, it is believed that the requirement of anti-collision lights on all large airplanes should be of benefit in improving safety during night operations. In addition, the present stage of development of anti-collision lights does not present serious installation problems for large airplanes, but does present such problems with regard to installations on small airplanes. Additional study is being made with respect to the practicability of similar types of lights for small airplanes. In view of the foregoing, this proposal would require the installation of anti-collision lights on all aircraft of over 12,500 pounds maximum certificated weight.

Accordingly, notice is hereby given that the Board proposes to amend the operating parts of the Civil Air Regulations to provide that anti-collision lights, meeting the specifications of § 4b.637 of Part 4b, must be installed on all aircraft of over 12,500 pounds maximum certificated weight not later than September 30, 1954, and used between sunset and sunrise.

These amendments are proposed under the authority of Title VI of the Civil Aeronautics Act of 1938, as amended. The proposal may be changed in the light of comments received in response to this notice of proposed rule making.

(Sec. 205 (a), 52 Stat. 984; 40 U. S. C. 425 (a). Interpret or apply secs. 601-610, 52 Stat. 1007-1012, as amended; 49 U. S. C. 551-560).

Dated November 10, 1953 at Washington, D. C.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
*Secretary.*

## FEDERAL POWER COMMISSION

### [18 CFR Parts 1, 4, 5, 6, 9, 16, 24, 25]

[Docket No. R-128]

MISCELLANEOUS AMENDMENTS TO CHAPTER

NOTICE OF PROPOSED RULE MAKING

NOVEMBER 5, 1953.

Amendment of Part 1, Rules of Practice and Procedure, and of Parts 4, 6, 9, 24 and 25 of Subchapter B, Regulations Under the Federal Power Act Relating to Applications for Licenses, Permits, and Amendments, Surrender or Termination of License, Transfer of License or Lease of Project Property, Declarations of Intention and Applications for Vacation of Withdrawal and for Determination Permitting Restoration to Entry.

1. Notice is hereby given of proposed rule making in the above-entitled matter.

2. It is proposed to amend Part 1, entitled "Rules of Practice and Procedure" of Subchapter A, General Rules, Chapter I of Title 18, Code of Federal Regulations to prescribe therein (in lieu of existing sections or the indicated portions thereof) amended §§ 1.8 (f) (2), 1.14 (a) (2), 1.17 (a), 1.17 (b), 1.20 (h), 1.20 (k), 1.30 (c) (1), 1.30 (d) (5), 1.31 (a), 1.31 (b), and 1.35, to read as set forth below.

3. The changes proposed in paragraph 2 are primarily for the purpose of clarifying the existing provisions or to remove minor inconsistencies.

4. It is also proposed to amend Subchapter B, Regulations Under the Federal Power Act, Chapter I of Title 18, Code of Federal Regulations to prescribe therein (in lieu of existing sections or the indicated portions thereof) amended §§ 4.30, 4.31, 4.32, 4.33, 4.40, 4.40 (g), 4.40 (h), 4.41, Exhibits A, B, E, F, H, I, J, K, L, M and N, §§ 4.42, 4.81, 4.82 (opening paragraph only), § 4.82 (g), § 4.82 (k), Exhibits A, B, H, and I, §§ 4.83, 4.84, 4.85, 5.4 (new), 6.2, 6.5, 9.3, 16.1, 16.2, 24.1, 25.1, to read as set forth below and to eliminate § 4.75 which is no longer applicable.

5. The changes proposed in paragraph 4 are necessary to correct inconsistencies relating to the number of copies of applications for licenses and other authorizations under Part I of the Federal Power Act, and accompanying documents to be filed, to describe procedures designed to expedite final action on applications, to eliminate requirements for information not now pertinent, to expand the requirements to provide additional information found necessary through experience, to liberalize and improve the requirements for project area maps, to include the requirement of satisfactory restoration of lands of the United States upon surrender of license, and to require transferees to assume responsibility for payment of annual charges accruing prior to the date of transfer.

6. The accompanying amendments to the Commission's regulations are proposed to be issued under authority granted the Federal Power Commission by the Federal Power Act, as amended, particularly section 309 thereof (49 Stat. 858; 16 U. S. C. 825 (h)).

7. Any interested person may submit on or before the 10th day of December, 1953, to the Federal Power Commission, Washington 25, D. C., data, views and comments in writing concerning the proposed amendments. The Commission will consider these written submittals before acting upon the proposed amendments.

[SEAL] LEON M. FUQUAY,
*Secretary.*

1. In § 1.8 add the following at the end of paragraph (f) (2): "Interventions will be granted under this section only for the purpose of allowing the intervener to offer at the hearing on the pending matter competent evidence of its interest in the proceeding and in support of its position as set forth in its petition to intervene. Failure of an intervener to adduce into said hearing competent evidence of its interest in the proceeding shall constitute grounds for rescission, by the Commission, of the intervention. Interventions granted under this section will be limited to matters affecting asserted rights and interests specifically set forth in the petition."

2. In § 1.14 delete paragraph (a) (2) and substitute therefor:

(2) *Acceptance for filing.* There will be accepted for filing only such applications, pleadings, and other papers as conform to the requirements of these rules, and any other applicable rule, regulation, or order of the Commission or applicable statute; applications, pleadings or other papers tendered for filing which fail so to conform may be refused acceptance for filing and may be returned by the Secretary with an indication of the deficiencies of the tendered filing and the reasons for non-acceptance and return. Acceptance for filing shall not waive any failure to comply with the rules, and such failure may be cause for striking all or any part of such filing.

3. In § 1.17 delete first sentence of paragraph (a) and substitute therefor:

(a) *By the Commission.* Applications, formal complaints, petitions other than intervening petitions and applications and petitions for amendment or modification of orders, orders and all forms of Commission action shall be served by the Secretary by registered mail, except when service by other method shall be specifically required by the Commission, by registering and mailing a copy thereof to the person, partnership, corporation, trust, association, or other organized group to be served, addressed to the person or persons designated in the initial pleadings, at his or its principal office or place of business.

4. In § 1.17 delete paragraph (b) and substitute therefor:

(b) *By parties.* Applications and petitions for amendment or modification of orders, answers, protests, intervening petitions, supplements or amendments thereto or to applications, complaints or petitions, motions, briefs, notices, and all other papers, except depositions, filed in proceedings pending before the Commission upon its docket, when filed or tendered to the Commission for filing, shall show service thereof upon all participants to the proceeding. Such service shall be made by delivering in person or by mailing, properly addressed with postage prepaid, one copy to each participant.

5. § 1.20 delete the proviso in the first sentence of paragraph (h) and substitute therefor:

(h) *Prepared expert testimony.* * * * *Provided*, That copies of such prepared testimony shall have been served upon all parties to the proceeding or their attorneys of record, including staff counsel of record, at least five days in advance of the session of the hearing at which such testimony is offered, unless all the parties and staff counsel shall have expressly waived their right to be supplied with such copies in advance, or all counsel, including staff counsel, shall have agreed mutually that such copies may be served a lesser number of days in advance.

6. In § 1.20 change the period at the end of paragraph (k) to a comma and add the words: "or upon motion to the presiding officer or the Commission as provided for in § 1.12 (d)."

7. In § 1.30 delete the first sentence of paragraph (c) (1) and substitute therefor:

(1) In lieu of any intermediate decision (initial by presiding officer, recommended by presiding officer or designated responsible officer, or tentative by the Commission), any party or staff counsel in any proceeding may request that the Commission forthwith render the final decision; and if all other parties and staff counsel join or concur in such request, it shall be deemed to have been granted unless the Commission denies such request within 10 days next following its submission or filing.

8. In § 1.30 delete paragraph (d) (5) and substitute therefor:

(5) Decisions by the Commission in proceedings in which the intermediate decision procedure has been omitted in accordance with paragraph (c) (1) and (3) of this section.

9. In § 1.31 add the following at the end of paragraph (a): "Exceptions shall conform to the requirements of §§ 1.15, 1.16 and 1.17, but need not be verified under oath."

10. In § 1.31 delete the last sentence of paragraph (b) and substitute therefor: "Supporting reasons for the exceptions, may, if desired, be submitted in a separate document."

11. In § 1.35 change period at end of section to a comma and add the words: "except that five conformed copies of such notice shall be filed in lieu of the fourteen conformed copies required by § 1.15 (b)."

12. Except where otherwise noted, delete the existing section or paragraph and substitute the following:

PART 4—LICENSES, PERMITS, AND DETERMINATION OF PROJECT COST

§ 4.30 *Who may file.* An application for license may be filed by any citizen, association of citizens, corporation, State, or municipality desirous of obtaining a license pursuant to the act.

§ 4.31 *Acceptance for filing or rejection of applications.* When an application which conforms to the requirements of § 1.15 of this chapter is received, it will be given a filing number, notice of receipt thereof and filing number given thereto will be furnished applicant, and notices will be given in accordance with the requirements of section 4 of the act (49 Stat. 839; 16 U. S. C. 797), § 1.37 of this chapter, and the Wildlife Resources Act of 1946 (60 Stat. 1080). Notice will also be given to the appropriate office of the Department of the Interior as to the public lands affected, if any, so that withdrawals from entry may be recorded, unless such action has been taken in connection with a preliminary permit. An application may be acceptable for filing for processing prior to final Commission action thereon, provided it contains the information required under § 4.40 (a), (b), (c), (d), (e), (f), and (h), together with Exhibits A, B, E, G, J, K, L, M, and O, required under § 4.41. Such application may include as Exhibit K, a project area map with such information with respect to lands affected as is readily available without a detailed survey, and as Exhibit L, the tentative design of the project works proposed. An application which fails to meet these requirements will be rejected by the Secretary as pro-

vided by § 1.14 of this chapter. However, the applicant may be required to furnish the balance of the information required under §§ 4.40 and 4.41 at such time as the Secretary directs and failure to furnish same will constitute grounds for rejection of the application by the Secretary as provided by § 1.14 of this chapter. The Commission may require as a condition of license that the licensee furnish additional or revised exhibits by a specified time and failure to furnish such information within the time specified or an extension thereof granted by the Commission shall constitute a violation of the license and cause for action under section 20 of the Federal Power Act. In case any information, documents or exhibits required to be filed with an application are already on file with the Commission, in current form and substance, the same may be incorporated in the application by reference.

§ 4.32 *Hearing on application.* A hearing upon an application may be ordered by the Commission, in its discretion, either upon its own motion or upon the motion of any party in interest. The hearing shall be limited to the issues specified in the order fixing the hearing.

§ 4.33 *Issuance and acknowledgment of acceptance.* When the Commission shall have issued a license or an amendment thereof, the same shall be forwarded to the applicant for acknowledgment of acceptance. Unless an application for rehearing is filed, or unless the order is stayed by the Commission, the order issuing the license or an amendment thereof shall become final thirty (30) days from date of issuance and the acknowledgment of acceptance shall be filed in triplicate with the Commission within sixty (60) days from date of issuance of the license or the amendment.

§ 4.40 *Contents.* Each application for license for a complete project of more than 100 horsepower installed capacity, to be constructed, or for a minor part of such project shall be verified, shall conform to § 131.2 of this chapter, and shall set forth in appropriate detail the following information in the order indicated. Unless otherwise specified, the application and all accompanying documents shall be submitted, in sextuplet, with one additional copy for each interested State Commission.

* * * * *

(g) The lands and reservations of the United States which will be affected by the proposed project.

(h) A description of the proposed initial and ultimate scheme of development including installed capacities, and a concise statement with regard to the adaptability of the project to a comprehensive scheme of improvement and utilization for the purpose of navigation of waterpower development, of aiding flood control, and of other beneficial public uses.

§ 4.41 *Required exhibits.* There shall be filed with the application for license and as a part thereof the following exhibits, certified in conformity with § 131.4 of this chapter:

*Exhibit A.* If applicant is a corporation: One copy of charter or certificate and articles of incorporation, with all the amendments thereto, duly certified by the secretary of state of the State where organized, or other proper authority, and the required number of additional uncertified copies: one certified and the required number of additional uncertified copies of the by-laws; and a certificate of organization in quintuplet with one additional copy for each interested State commission in conformity with § 131.3 of this chapter. If the project is located in another State than that in which the corporation is organized, a certificate and the required additional copies shall be submitted from the secretary of state or other proper authority of the State in which the project is located, showing compliance with the laws relating to foreign corporations.

If the applicant is a State: Copies of the laws under authority of which the application is made, or reference thereto.

If the applicant is a municipality as defined in the Federal Power Act: One copy of its charter or other organization papers, duly certified by the secretary of state of the State in which it is located, or other proper authority, and the required number of additional uncertified copies. Copies of, or reference to, the State laws authorizing the operations contemplated by the application.

If the applicant is a natural person: An affidavit by applicant that he is a citizen of the United States, and the required number of additional copies thereof.

If the applicant is an association: One verified copy and the required number of additional copies of its articles of association. If there are no articles of association, that fact shall be stated over the signature of each member of the association and the required additional copies of the statement submitted. A complete list of members and a statement of the citizenship of each must be given in an affidavit by one of them, and an original and the required number of additional copies submitted.

*Exhibit B.* Copy of all minutes, resolutions of stockholders or directors, or other representatives of the applicant, properly attested, and the required additional copies, authorizing the filing of application.

*Exhibit E.* The nature, extent, and ownership of water rights which the applicant proposes to use in the development of the project covered by application, together with satisfactory evidence that the applicant has proceeded as far as practicable in perfecting its rights to use sufficient water for proper operation of the project works. A certificate from the proper State agency setting forth the extent and validity of the applicant's water rights shall be appended if practicable. In case the approval or permission of one or more State agencies is required by State law as a condition precedent to the applicant's right to take or use the water for the operation of the project works, duly certified evidence of such approval or permission, or a showing of cause why such evidence cannot be reasonably submitted shall also be filed. When a State certificate is involved, one certified copy and the required additional uncertified copies shall be submitted.

*Exhibit F.* Full details as to lands owned by applicant, and as to applicant's plans for acquiring title to or the right to occupy and use lands other than those owned by the applicant or by the United States, necessary or essential for carrying out the project covered by the application. If the applicant, at the time of filing application, has by easement, lease, franchise, or otherwise acquired the right to occupy and use lands owned by others, the statement should show with respect to each separate right of occupancy and use—

(1) From whom acquired.

(2) The date acquired.

(3) Nature and extent of the right acquired.

(4) Whether perpetual or limited term.

(5) If of limited term, when such term expires.

(6) For each parcel acquired, the area inside of the project boundary and the area outside of the project boundary, and a reference to Exhibit K.

*Exhibit H.* Statement of the proposed operation of the project works during times of low, normal and flood flows of the stream, including a statement of the minimum flow proposed to be released during periods of low water and full exposition of any proposed use of the project for the conservation and utilization in the public interest of the available water resources for the purposes of power, navigation, irrigation reclamation, flood control, and municipal water supply. Statement as to whether in relation to existing and probable future projects in the same or related watersheds, the highest practicable utilization of the water, storage possibilities, and head available will be made possible. Furnish operating rule for reservoirs with draw-down and usable storage, state criteria for determining spillway capacity.

*Exhibit I.* Estimate of the dependable capacity and average annual energy output to be generated by the project (dependable capacity is measured by the amount of other additional capacity from an alternate source which would be required to meet the load during the critical flow period if the proposed hydro-project were not constructed). Specify the period of critical stream flow used in determining the dependable capacity and describe the load into which the power generated by the project will be utilized. Furnish the following engineering data: A flow duration curve indicating the period of record and gaging stations used in deriving this curve, a tailwater rating curve, a curve showing estimated plant capability versus head, and an outline of plan for future proposed hydro-projects on the stream involved and their approximate location and ultimate installed capacity. When pertinent, state assumptions used for evaporation, leakage and head losses.

*Exhibit J.* General map covering the entire project area, showing on a single sheet and to an appropriate scale the location of the following:

(1) Principal structures and other important features of the project, including such roads, railways, tramways, and bridges as it is proposed shall become part of the project works and be placed under the license.

(2) All transmission lines, substations, switchyards, and telephone lines, which it is proposed shall become a part of the project works and be placed under license, as well as general layout of the transmission system, if any, with which the project may be connected, indicating prominently by appropriate symbol the portion or portions of the transmission lines or system covered by application for license.

(3) State and county lines, reservations of the United States, towns, streams, stream gaging stations, railroads, power plants, irrigation systems and other features in the vicinity of the proposed development information concerning which will aid in arriving at a general comprehension of the project.

(4) Reference to the detail map (Exhibit K) indicating by outline the portion shown on each sheet.

(5) If all features cannot be shown with sufficient distinctness on one sheet, two general maps may be furnished, one for the power plant and appurtenant works, and one for the transmission system. (See specifications for drawings § 4.42.)

*Exhibit K.* Detail map covering entire project area. Scale shall be such as to show clearly, but without unnecessary multiplicity of sheets, the essential details of surveys and of notes as to ownership or right of occupancy of lands within the project area. In general, a scale of approximately 400 feet to the inch is appropriate for features containing a relatively large amount of detail, and scales of 1,000 or 2,000 feet to the inch where there is little detail, as is frequently the case with respect to transmission and telephone lines, roads, and railways. Elevations shall be tied to Government bench marks whenever available, and shall be referred to mean sea level except that in the case of projects in navigable waters having a datum accepted for local use by the Office of the Chief of Engineers, Department of the Army, such local datum shall be used. If more than one sheet is used the sheets shall be numbered consecutively, and each shall bear a small diagram showing the entire map and indicating the portions shown on each sheet. Several sections of a conduit, transmission line, telephone line, road, railway, etc., may be shown upon a single sheet, each so placed or limited as to avoid crowding or confusion. Except to the extent and in such particulars as the requirements may be expressly waived or modified by the Commission the detail map to be filed as this exhibit shall conform to the specifications for drawings, § 4.42, and the following requirements:

(i) It shall show the project area and the project boundary.

(ii) The project boundary for reservoirs may be shown by metes and bounds, or by a contour, or if the project lands are covered by the public land survey by lines along or parallel to lines of the public land survey. Where a flowage easement or right of use involving other than a conveyance in fee for a reservoir applies to a whole tract of land and is not otherwise defined, the project boundary may enclose the entire tract.

(iii) The project boundary for continuous structures, such as transmission lines, telephone and control lines, conduits, roads, etc., may be described by center or offset lines of survey specifying distances of the project boundary therefrom.

(iii) Unless satisfactory reasons are given to the contrary, the project boundary shall not be more than 200 feet (horizontal measurement) from the exterior margin (in general, high-water level) of reservoirs, nor shall the width of the project area for canals, ditches, pipe lines, transmission lines, roads, and other so-called continuous structures exceed 200 feet. The project boundary shall be shown on the map in such manner that it can be readily identified on the ground. There shall be shown the location and description of monuments and other marks with reference lines therefrom to permanent objects in accordance with good practice in land surveying.

(iv) If the project boundary is located on lands covered by the public land survey there shall be shown a reference line from the initial point of the project boundary survey by distances and bearings to an established corner if one can be identified within a distance of 2 miles. At each intersection of the project boundary with an identified line of the public land survey, there shall be shown the station number on the boundary survey, and the bearing and distance to the nearest identified corner in each direction on the public land survey line crossed, if such distance does not exceed one mile. The station number of the boundary survey shall be shown at points of entering and leaving lands of the United States or lands in which the United States has an interest.

(v) The project boundary, if described other than by a contour, shall be accurately plotted on the map with courses and distances fully and legibly shown either along the plotted boundary or in tabular form on the map. The project boundary if described by a contour, shall be accurately plotted on the map with such data as completely and accurately fixes its location and permits its recovery in the field.

(vi) If a contour project boundary is located on lands covered by the public land survey, a permanent monument shall be established at each intersection of the boundary with an identified line of the public land survey. The map shall have the location of all such monuments with the bearing distance from each monument to nearest identified corner in each direction if such distance does not exceed one mile.

(vii) Wherever a Federal survey monument will be destroyed or rendered unusable by the proposed development, at least two permanent, marked witness monuments shall be established at accessible points. The map shall show a description of the monument destroyed or rendered unusable and location of the witness monuments with the connecting courses and distances to the original monument. Similarly where Federal bench marks are destroyed or rendered unusable, witness bench marks shall be established at accessible points. The map shall show the location and elevation of the original and witness bench marks with connecting courses and distances.

(viii) There shall be shown the status as to ownership, and the boundary lines and area of each parcel of land within, or partly within, the project area, designating separately lands owned by the applicant, lands to be acquired by the applicant, lands for which the applicant holds rights of use and occupancy for purposes of the project, reservations (indicating separately each reservation), and public lands (indicating separately lands, full title to which remains in the United States, and lands in which the United States retains only an interest). Where the project works occupy lands not owned by the applicant, but as to which the applicant holds only an easement, franchise, lease, or other right of occupancy and use, the map shall show the nature of such right and shall give appropriate reference to Exhibit F for further details.

(ix) Each map shall have thereon a statement by the person who makes or supervises the survey that the survey was accurately made and is correctly shown on the map. Each map shall have thereon a statement that the person who makes or supervises the survey has been employed by the applicant to make the survey.

(2) The location shall be accurately shown of all project works, such as—

(i) Dams.

(ii) Reservoirs. Show the flow lines for maximum and minimum water levels and for elevation of spillway crest, and give tables or diagrams of areas and capacities for maximum and minimum water levels and for each contour line.

(iii) Water conduits. Show center line, grade, and elevation of bottom at each change of grade, and designate lengths of each type of conduit, i. e., flume, ditch tunnel, pipe, etc.

(iv) Powerhouses, substations, and switchyards.

(v) Transmission lines and appurtenances, telephone lines, roads, railways, trails, tramways and bridges.

(vi) Navigation structures.

(vii) Channel approaches to navigation structures. Indicate elevation of bottom for distance of not less than 1,000 feet above and below the structures.

(3) Show contour lines with contour intervals of not more than 10 feet for the entire project area, except such portions as will be occupied only by such project works as are enumerated in (2) (v), or as will be included in reservoirs below the minimum elevation to which the water may be drawn down. Profiles of tunnel lines may be substituted for contours along such lines. (See specifications for drawings in § 4.42.)

*Exhibit L.* General design drawings showing plans, elevations, and sections of all principal structures and appurtenant works or other features of the project. These drawings shall be in sufficient detail and shall be accompanied by sufficient information relating to controlling factors (such as character of foundations and explorations thereof, materials and types of construction, important elevations, gradation of filter and riprap material, design and ultimate strengths for concrete and steel, stress and or stability analysis for important structures, water levels, spillway rating curves, etc.) to enable the Commission to have a full understanding of the project and to check safety, adequacy, and desirability in the development of the resources involved.

Scales are not specified, but it is desired that they be no larger than necessary to show clearly the information required. Drawings should be simple. Details are desired only as necessary to show features of importance in determining safety, adequacy, and suitability of design. Working drawings are not desired as part of application, but should be prepared for purposes of construction and retained as a record of the work when completed. In this exhibit shall be included—

(1) Dams and appurtenances, such as spillways, fishways, outlet works, etc.

(2) Navigation structures and approaches thereto, including locks, lock gates, operating machinery, etc.

(3) Conduits including forebays, intake works, surge tanks, and other pressure relief devices, etc.

(4) Powerhouses and substations (See specifications as in § 4.42).

*Exhibit M.* General descriptions of mechanical, electrical, and transmission equipment and their appurtenances in sufficient detail to enable the Commission to have a full understanding of the project, to determine the installed capacity in horsepower and kilowatts, and to determine the safety of the project works and their adequacy and suitability for the development and utilization of the resources involved, also name plate ratings for generators and turbines, and when required by the Commission or the Secretary performance data for generators and turbines and general specifications of mechanical, electrical, and transmission equipment.

*Exhibit N.* Estimate of the cost of developing the project including the following items:

Land and land rights;
Power plant structures and improvements;
Reservoirs, dams and waterways;
Water wheels, turbines and generators;
Accessory electric equipment;
Miscellaneous power plant equipment;
Roads, railroads, and bridges (Permanent facilities); and
Transmission facilities.

When required by the Commission or the Secretary, under each item show quantities, unit costs and total costs; indirect construction costs such as construction equipment, camp and commissary, etc., if the work is not to be done under contract; or if under contract include the indirect costs among the various cost items above; overhead construction costs such as engineering, supervision of construction, legal expense, taxes and interest during construction and administrative and general expense, and a contingent item, if necessary.

When required by the Commission or the Secretary, furnish an estimate of the annual cost including the following:

Rate of return or interest;
Local, State and Federal taxes;
Depreciation;
Insurance; and
Operation, maintenance and general or administrative expense.

When required by the Commission or the Secretary, furnish information as to the

method used in evaluating the power output from the project or the cost of obtaining an equivalent amount of power from an alternate source expressed in terms of dollars per kilowatt year of capacity and mills per kilowatt hour of average annual energy.

§ 4.42 *Specifications for drawings.* All maps and other drawings required in connection with licenses and preliminary permits shall conform to the following specifications:

(a) They shall be original black-ink drawings on tracing linen, cut to uniform size not smaller than 24 by 36 inches and not larger than 28 by 40 inches, the latter size being preferred, and shall be so drawn and lettered as to be legible when reduced by photography to 10½ inches in small dimension. Lithographed official maps issued by Federal or State agencies may be used to furnish supplemental data when desired and when so used, one copy for permanent record shall be mounted on linen. Process tracings will be accepted if legible and of durable quality. If not of durable quality, process tracings will be returned, and ink tracings required.

(b) Each drawing shall have a clear border of one-half inch on three sides and 2½ inches on one of the shorter sides, which shall be the left-hand border.

(c) Each drawing shall have a numerical scale and a graphical scale, the latter not less than 6 inches in length.

(d) Each map shall have true and magnetic meridians indicated thereon.

(e) There shall be provided a space 5 inches high by 7 inches wide in the lower right corner of each drawing, the upper half of which shall bear the title, scale, etc., and the lower half shall be left clear.

(f) The maps shall show State, county and town lines, and boundaries of reservations of the United States.

(g) If the project affects lands covered by the public-land survey the maps shall show the location of all lines of such survey crossing the project area, and all official subdivisions of sections including lots and irregular tracts, correctly designated as on the latest governing official plats of survey, copies of which can be obtained from the Bureau of Land Management, Washington, D. C., or examined in the local land office. If the project affects unsurveyed public lands or reservations, the protraction of townships and section lines shall be shown; such protractions whenever available to be those recognized by the agency of the United States having jurisdiction over the lands.

(h) The tracing of each drawing and a print therefrom for each copy of the application shall be filed with the Commission.

§ 4.75 *Application for license for electric lines (11 000 volts or less) in national forests.* [Delete this section.]

§ 4.81 *Acceptance for filing or rejection of applications.* When an application which conforms to the requirements of § 1.15 of this chapter is received, it will be given a filing number, receipt thereof and filing number given thereto will be furnished applicant, and notices will be given in accordance with the requirements of section 4 of the act (49 Stat. 830; 16 U. S. C. 797) and § 1.37 of this chapter. Notice will also be given to the appropriate office of the Department of the Interior as to the public lands affected, if any, so that withdrawals from entry may be recorded. An application may be acceptable for filing for processing prior to final Commission action thereon, provided it contains the information required under § 4.82 (a), (b), (c), (d), (e), (f), (g), and (k), together with Exhibits A, B, C, D, H, and I. An application which fails to meet these requirements will be rejected by the Secretary as provided by § 1.14 of this chapter. However, the applicant may be required to furnish the balance of the information required under this section and § 4.82 at such time as the Secretary directs and failure to furnish same will constitute grounds for rejection of the application by the Secretary as provided by § 1.14 of this chapter. In case any information, documents or exhibits required to be filed with an application are already on file with the Commission, in current form and substance, the same may be incorporated in the application by reference.

* * * * *

§ 4.82 *Contents of application.* Each application for preliminary permit shall be submitted as prescribed in § 131.10 of this chapter, and shall set forth in appropriate detail the following information in the order indicated. Unless otherwise specified, the application and all accompanying documents shall be submitted in sextuplet, with one additional copy for each interested State Commission. [Revision of opening paragraph.]

* * * * *

(g) A concise general description of the project and the proposed scheme of development including an estimate of the proposed installed capacity, and the average annual output.

* * * * *

(k) (Required exhibits.) There shall be filed with the application and as a part thereof the following exhibits, certified in conformity with § 131.4 of this chapter.

*Exhibit A.* If the applicant is a corporation: One copy of charter or certificate, and articles of incorporation, with all amendments thereto, duly certified by the secretary of state of the State where organized, or other proper authority, and the required additional uncertified copies, one copy of the by-laws, duly certified, and the required additional uncertified copies; and a certificate of organization as provided in § 131.3 of this chapter with the required additional copy for each interested State commission.

If the project is located in another State than that in which the corporation is organized, a certificate and the required additional copies thereof shall be submitted from the secretary of state or other proper authority of the state in which the project is located, showing compliance with the laws relating to foreign corporations.

If the applicant is a State: Copies of the laws under authority of which the application is made, or reference thereto.

If the applicant is a municipality as defined in the Federal Power Act: One copy of its charter or other organization papers, duly certified by the secretary of state of the State in which it is located, or other proper authority, and the required additional uncertified copies. Copies of, or reference to, the State laws authorizing the operations contemplated by the application.

If the applicant is a natural person: An affidavit by each applicant that he is a citizen of the United States and the required additional copies thereof. (See § 131.10 of this chapter.)

If the applicant is an association: The association shall submit a verified copy of its articles of association, and the required additional copies thereof. If there are no articles of association, that fact shall be stated over the signature of each member of the association and an original and the required additional copies shall be submitted. A complete list of members and a statement of the citizenship of each shall be given in an affidavit by one of them together with the required additional copies. (See § 131.10 of this chapter.)

*Exhibit B.* A copy of all minutes, resolutions of stockholders or directors, or other representatives of the applicant authorizing the filing of application, one copy properly attested, and the required additional copies.

*Exhibit H.* A general map showing the nature of the proposed project, its principal features and their location and the location of the project as a whole with reference to some well-known town or stream. On this map shall be placed a line indicating the approximate project boundary of the area to be occupied by the principal project works such as, dams, reservoirs, forebays, waterways and powerhouses, but excluding transmission lines, and if necessary in order to determine location of the project on the ground, there shall be shown on the map the approximate distances and bearings of points on the project boundary from natural objects or permanent monuments that can be readily found or recognized from descriptions thereof noted on the map, such points to be located at sufficiently frequent intervals to serve such purposes. If the project is on land covered by public land survey such distances and bearings shall be shown from the nearest existing corners of such survey. (See specifications for drawings, § 4.42.)

*Exhibit I.* This exhibit shall be submitted only if public lands or reservations are affected and shall be a map of the proposed project showing principal project works in a manner similar to the preceding exhibit H, except that such map shall show and shall be on a scale to present effectively the project boundary which shall be the line enclosing all quarter-quarter sections, lots and other smallest legal subdivisions of public-land survey which may be occupied or used in whole or in part by the project. It shall also show the status of lands, indicating separately lands patented, lands entered or otherwise embraced in any unperfected claim under the public-land laws, unreserved public lands and lands of each and every reservation affected. (See specifications for drawings, § 4.42.) If desired a single map may be submitted for exhibits H and I provided it shows all the information required for both.)

§ 4.83 *Hearing on application.* A hearing upon an application may be ordered by the Commission, in its discretion, either upon its own motion or upon the motion of any party in interest. The hearing shall be limited to the issues specified in the order fixing the hearing.

§ 4.84 *Amendments.* Applications for amendments of preliminary permits shall follow the form prescribed for original applications, as far as applicable. If an application for an amendment embraces sites or areas not covered by the original permit, notice of such application will be given in the manner required for the original application. Unless otherwise specified, an original and five conformed copies of the application and all accompanying documents shall be submitted, with one additional copy for each interested State commission.

§ 4.85 *Issuance and acknowledgment of acceptance.* When the Commission shall have issued a preliminary permit or an amendment thereof, the same shall be forwarded to the applicant for acknowledgment of acceptance. Unless application for rehearing is filed, or unless the order is stayed by the Commission, the order issuing the permit shall become final thirty (30) days from date of issuance and the acceptance shall be filed in triplicate with the Commission within sixty (60) days from date of issuance of the permit or the amendment. [New section]

PART 5—APPLICATION FOR AMENDMENT OF LICENSE

§ 5.4 *Issuance and acknowledgment of acceptance.* Section 4.33 is applicable.

PART 6—SURRENDER OR TERMINATION OF LICENSE

§ 6.2 *Surrender of license.* Licenses may be surrendered only upon the fulfillment by the licensee of such obligations under the license as the Commission may prescribe, and, if the project works authorized under the license have been constructed in whole or in part, upon such conditions with respect to the disposition of such works as may be determined by the Commission. Where project works have been constructed on lands of the United States the licensee will be required to restore the lands to a condition satisfactory to the Department having supervision over such lands and annual charges will continue until such restoration has been satisfactorily completed.

§ 6.5 *Annual charges.* Annual charges arising under a license surrendered or terminated shall continue until the effective date set forth in the Commission's order with respect to such surrender or termination.

PART 9—TRANSFER OF LICENSE OR LEASE OF PROJECT PROPERTY

§ 9.3 *Transfer.* (a) Approval by the Commission of transfer of a license is contingent upon the transfer of title to the properties under license, delivery of all license instruments, and a showing that such transfer is in the public interest. The transferee shall be subject to all the conditions of the license and to all the provisions and conditions of the act, as though such transferee were the original licensee and shall be responsible for the payment of annual charges which accrue prior to the date of transfer.

(b) When the Commission shall have approved the transfer of the license, its order of approval shall be forwarded to the transferee for acknowledgment of acceptance. Unless application for rehearing is filed, or unless the order is stayed by the Commission, the order shall become final thirty (30) days from date of issuance and the acknowledgment of acceptance shall be filed in triplicate with the Commission within sixty (60) days from date of issuance accompanied by a certified copy of the deed of conveyance or other instrument evidencing transfer of the property under license, together with evidence of the recording thereof.

PART 16—APPLICATION FOR LICENSE FOR PROJECT UNDER LICENSE WHICH EXPIRES ON SPECIFIED DATE

§ 16.1 *Contents.* Each application for a new or annual license for a project already under license which is about to expire shall be submitted at least 3 months prior to the expiration of license and shall set forth in appropriate detail the following information in the order indicated. Unless otherwise specified, an original and five conformed copies of the application, duly subscribed and verified under oath, and all accompanying documents, together with one additional conformed copy for each interested State commission, shall be submitted

(a) The exact name of the applicant.

(b) The license number of the project.

(c) The date on which the license expires.

(d) If licensee is a corporation, list of the officers and directors.

(e) The name, title, and post-office address of the person to whom correspondence in regard to the application shall be addressed.

§ 16.2 *Required exhibits.* There shall be filed with the application, and as a part thereof revised exhibits to reflect changes in project as described in the license.

PART 24—DECLARATION OF INTENTION

§ 24.1 *Filing.* An original and five conformed copies of each declaration of intention under the provisions of section 23 (b) of the act shall be filed. The declaration shall give the name and post-office address of the person to whom correspondence in regard to it shall be addressed, and shall be accompanied by:

(a) A brief description of the proposed project and its purposes, including such data as maximum height of the dams, a storage capacity curve of the reservoir or reservoirs showing the maximum, average, and minimum operating pool levels, the initial and ultimate installed capacity of the project, the rated horsepower and head on the turbines, and a curve of turbine discharge versus output at average and minimum operating heads.

(b) (1) A general map (one tracing and three prints) of any convenient size and scale, showing the stream or streams to be utilized and the approximate location and the general plan of the project.

(2) Also a detailed map of the proposed project area showing all Federal lands, and lands owned by States, if any, occupied by the project.

(3) A profile of the river within the vicinity of the project showing the location of the proposed project and any existing improvements in the river.

(4) A duration curve and hydrograph for the natural and proposed regulated flows at the dam site. Furnish references to the published stream flow records used and submit copies of any unpublished records used in preparation of these curves.

(c) (1) A definite statement of the proposed method of utilizing storage or pondage seasonally, weekly and daily, during periods of low and normal flows after the plant is in operation and the system load has grown to the extent that the capacity of the plant is required to meet the load. For example, furnish:

(i) Hydrographs covering a 10-day low water period showing the natural flow of the stream and the effect thereon caused by operations of the proposed power plant;

(ii) Similar hydrographs covering a 10-day period during which the discharge of the stream approximates average recorded yearly flow; and

(iii) Similar hydrographs covering a low water year using average monthly flows.

(2) A system load curve, both daily and monthly, and the position on the load curve that the proposed project would have occupied had it been in operation.

(3) A proposed annual rule of operation for the storage reservoir or reservoirs.

PART 25—APPLICATION FOR VACATION OF WITHDRAWAL AND FOR DETERMINATION PERMITTING RESTORATION TO ENTRY

§ 25.1 *Contents of application.* An application for vacation of a reservation effected by the filing of an application for preliminary permit or license, or for a determination permitting restoration to entry under the provisions of section 24 of the act, of such lands, or lands reserved or classified as power sites, may be filed directly with the Commission at its offices in Washington, D. C., at any of its regional or field representatives' offices, or at local land offices, for forwarding to the Commission. Such application shall contain the following data: (a) Full name of applicant; (b) post-office address; (c) description of land by legal subdivisions, including section, township, range, meridian, county, State, and river basin (both main and tributary) in which the land is located; (d) public land act under which entry is intended to be made if land is restored to entry; (e) the use to which it is proposed to put the land, and a statement as to its suitability for the intended use.

[F. R. Doc. 53-9662; Filed, Nov. 16, 1953; 8:49 a. m.]

# NOTICES

## ATOMIC ENERGY COMMISSION

CANCER SUPPORT PROGRAM FOR FISCAL YEAR 1954

Pursuant to section 3 of the Administrative Procedure Act, the following notice is published:

Subject to budgetary limitations and the availability of appropriations, the Atomic Energy Commission has authorized the delivery of radioisotopes by its distributors during fiscal year 1954 (ending June 30, 1954), for approved cancer programs at 20 percent of the price listed for each radioisotope in current catalogs issued by the Commission or its distributors.

Further information regarding the cancer support program may be obtained by writing to the U. S. Atomic Energy Commission, P. O. Box E, Oak Ridge, Tennessee, Attention: Isotopes Division.

CREDIT FOR SHIPMENTS BY SUPPLIERS

A supplier (any person or firm other than an AEC distributor, who furnishes radioisotopes on authorization of the Commission) may request a credit for authorized price reductions allowed by such supplier on radioisotopes obtained from the Commission or an AEC distributor and delivered by such supplier to persons holding valid authorizations issued by the Commission for cancer research, diagnosis, and/or therapy permitting deliveries at such reduced prices.

1. *Procedure for requesting credit.* A supplier desiring credit for deliveries at reduced prices, as permitted by AEC authorizations for cancer research, diagnosis, and/or therapy, shall file a "Radioisotope Credit Request," Form AEC-353, in duplicate, with the Isotopes Division, giving the information called for on the form. The "Radioisotope Credit Request" for such deliveries made by suppliers in fiscal year 1954 shall be filed with the Isotopes Division no later than July 31, 1954. Supporting documents, such as shipping memoranda or shipping tabulations, shall be attached to the "Radioisotope Credit Request." Such documents or papers shall include the following pertinent information as to each such delivery:

a. Name of customer who received radioisotopes at authorized price reductions;

b. Customer's authorization number;

c. Type and quantity of radioisotopes delivered;

d. Date of such delivery;

e. Evidence of price reduction to said customer for approved cancer research, diagnosis, and/or therapy.

2. *Limitations.* If such "Radioisotope Credit Request" is approved by the AEC, the credit thus approved shall be subject to the following limitations:

a. The credit issued shall not be valid for a cash rebate;

b. The credit issued shall be applied only as a credit in trade toward purchase of radioisotopes from the AEC or an AEC distributor;

c. The credit issued shall be valid until September 30, 1954, at which time any unused credit, or unused portion thereof, shall become invalid and ineffective for any purpose.

Dated at Washington, D. C., this 3d day of November 1953.

WALTER J. WILLIAMS,
*Deputy General Manager.*

[F. R. Doc. 53-9643; Filed, Nov. 16, 1953; 8:45 a. m.]

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

CALIFORNIA

CLASSIFICATION ORDER

NOVEMBER 10, 1953.

1. Pursuant to the authority delegated to me by the Regional Administrator, Region II, Bureau of Land Management, by Order No. 1, Amendment No. 2, dated January 29, 1953 (18 F. R. 23), I hereby classify under the Small Tract Act of June 1, 1938 (52 Stat. 609), as amended July 14, 1945 (59 Stat. 467, 43 U. S. C. 682a), as hereinafter indicated, the following described land in the Los Angeles land district, embracing approximately 40 acres,

CALIFORNIA SMALL TRACT CLASSIFICATION NO. 391

For lease and sale for homesite purposes only:

T. 13 S., R. 2 E., S. B. M., Sec. 8, NW¼NW¼.

The land is located in San Diego County, California, in the foothills of the Laguna Mountains about 3½ miles easterly from the Town of Ramona. The topography is rolling to hilly and the native vegetation is a chaparral type. An intermittent stream crosses the land. Warm, dry summer and mild winter temperatures are typical of this area.

2. As to applications regularly filed prior to 9:30 a. m., October 28, 1953, which describe tracts in accordance with the provisions contained herein, this order shall be effective immediately.

3. This order shall not otherwise become effective to change the status of such lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to applications under the Small Tract Act as follows:

(a) *Ninety-one day period for preference-right filings.* For a period of 91 days, commencing at the hour and on the day specified above, the public lands affected by this order shall be subject only to application under the Small Tract Act of June 1, 1938, 52 Stat. 609 (43 U. S. C. 682a), as amended, by qualified veterans of World War II, subject to the requirements of applicable law. All applications filed under this paragraph either at or before 10:00 a. m. on the 35th day after the date of this order shall be treated as though filed simultaneously at that time. All applications filed under this paragraph after 10:00 a. m. on the said 35th day shall be considered in the order of filing.

(b) *Date for non-preference-right filings.* Commencing at 10:00 a. m. on the 126th day after the date of this order, any lands remaining unappropriated shall become subject to disposal under the Small Tract Act only. All such applications filed either at or before 10:00 a. m. on the 126th day after the date of this order, shall be treated as though filed simultaneously at the hour specified on such 126th day. All applications filed thereafter shall be considered in the order of filing.

4. A veteran shall accompany his application with a complete photostatic or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their application by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

5. All of the lands will be leased in tracts of approximately 5 acres with approximate dimensions of 660 feet east and west and 330 feet north and south, each tract forming an aliquot part of the official survey of the section.

6. Preference right leases referred to in paragraph 2 will be issued only if the tract applied for conforms to or is amended to conform to the area, dimensions and orientation specified in paragraph 5.

7. Leases will be issued for a period of three years at an annual rental of $5.00 payable for the entire lease period in advance of issuance of the lease. Leases will contain an option to purchase clause at the appraised value of $100.00 per tract. Application to purchase may be filed during the term of the lease but not more than 30 days prior to the expiration of one year from the date of the lease issuance.

8. Tracts will be subject to all existing rights-of-way and to rights-of-way 33 feet in width along the boundaries thereof for road purposes and public utilities. Such rights-of-way may be utilized by the Federal Government, or the State, county or municipality in which the tract is situated, or by any agency thereof. The rights-of-way may in the discretion of the authorized officer of the Bureau of Land Management, be definitely located prior to the issuance of the patent. If not so located, they may be subject to location after patent is issued.

9. All inquiries relating to these lands should be addressed to the Manager, Land Office, Los Angeles, California.

E. I. ROWLAND,
*Regional Chief,*
*Division of Lands.*

[F. R. Doc. 53-9670; Filed, Nov. 16, 1953; 8:50 a. m.]

### Bureau of Reclamation

BOISE PROJECT, IDAHO

ORDER OF REVOCATION

FEBRUARY 15, 1952.

Pursuant to the authority delegated by Departmental Order No. 2515 of April 7, 1949 (14 F. R. 1937), I hereby revoke Departmental Order of December 22, 1903, insofar as said order affects the following described land: *Provided, however,* That such revocation shall not affect the withdrawal of any other lands by said order or affect any other orders withdrawing or reserving the land hereinafter described:

BOISE MERIDIAN, IDAHO

T. 2 N., R. 4 W.,
Sec. 25, NE¼SW¼.

The above area aggregates 40 acres.

G. W. LINEWEAVER,
*Acting Commissioner.*

I concur. The records of the Bureau of Land Management will be noted accordingly.

The soil is a sandy loam covered with large rock boulders. The lands are not suitable for cultivation. It is unlikely that they will be classified for any disposition other than by public sale, selection, or exchange, but any application that is filed will be considered on its merits. The lands will not be subject to occupancy or disposition until they have been classified.

This order shall not become effective to change the status of the described lands until 10:00 a. m. on the 35th day after date of this order. At that time the said lands shall become subject to application, petition, location and selection under the applicable public land laws, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable laws, and the 91-day preference right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284), as amended.

Information showing the periods during which, and the conditions under which, veterans and others may file applications for these lands may be obtained on request from the Manager of the Land and Survey Office, Bureau of Land Management, Boise, Idaho.

WILLIAM PINCUS,
*Assistant Director,*
*Bureau of Land Management.*

NOVEMBER 10, 1953.

[F. R. Doc. 53-9661; Filed, Nov. 16, 1953; 8:48 a. m.]

COLORADO RIVER STORAGE PROJECT, NEVADA

FIRST FORM RECLAMATION WITHDRAWAL

JUNE 3, 1953.

Pursuant to the authority delegated by Departmental Order No. 2515 of April 7, 1949, I hereby withdraw the following described lands from public entry under the first form of withdrawal as provided by section 3 of the act of June 17, 1902, (32 Stat. 388).

MOUNT DIABLO MERIDIAN, NEVADA

T. 32 S., R. 66 E., Sec. 1, Lots 1 and 4.

The above area aggregates 87.86 acres.

G. W. LINEWEAVER,
*Assistant Commissioner.*

I concur. The records of the Bureau of Land Management and the District Land Office will be noted accordingly.

EDWARD WOOZLEY,
*Director,*
*Bureau of Land Management.*

OCTOBER 28, 1953.

*Notice for Filing Objections to Order Withdrawing Public Lands for Davis Dam Project, Nevada*

JUNE 3, 1953.

Notice is hereby given that for a period of 30 days from the date of publication of this notice, persons having cause to object to the terms of the above order withdrawing certain public lands in the State of Nevada, for use in connection with the Davis Dam Project, Nevada, may present their objections to the Secretary of the Interior. Such objections should be in writing, should be addressed to the Secretary of the Interior, and should be filed in duplicate in the Department of the Interior, Washington, D. C.

In case any objection is filed and the nature of the opposition is such as to warrant it, a public hearing will be held at a convenient time and place, which will be announced, where opponents to the order may state their views and where the proponents of the order can explain its purpose, intent, and extent. Should any objection be filed, notice of the determination by the Secretary as to whether the order should be rescinded, modified, or let stand will be given to all interested parties of record and the general public.

G. W. LINEWEAVER,
*Assistant Commissioner.*

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

FAIR AND REASONABLE WAGE RATES FOR PERSONS EMPLOYED IN PRODUCTION, CULTIVATION OR HARVESTING OF SUGAR BEETS IN CERTAIN AREAS

NOTICE OF HEARINGS AND DESIGNATION OF PRESIDING OFFICERS

Pursuant to the authority contained in subsections (c) (1) and (c) (2) of section 301 of the Sugar Act of 1948, as amended (61 Stat. 929; 7 U. S. C. Sup. 1131), notice is hereby given that public hearings will be held as follows:

At Detroit, Michigan, November 30, 1953, 10:00 a. m., Court Room 859, Federal Building;

At St. Paul, Minnesota, December 2, 1953, 10:00 a. m., Ryan Hotel, Sixth and Robert Street;

At Billings, Montana, December 4, 1953, 10:00 a. m., Roosevelt School, Fourth Avenue and Twenty-third Street;

At Salt Lake City, Utah, December 7, 1953, 10:00 a. m., Room 230, Post Office Building;

At Greeley, Colorado, December 9, 1953, 10:00 a. m., V. F. W. Hall, Seventh Avenue and Twenty-fifth Street.

The purpose of these hearings is to receive evidence likely to be of assistance to the Secretary of Agriculture in determining (1), pursuant to the provisions of section 301 (c) (1) of the act, fair and reasonable wage rates for persons employed in the production, cultivation, or harvesting of sugar beets in regions other than the State of California, Southwestern Arizona, Southern Oregon, and Western Nevada, for the 1954 crop on farms with respect to which applications for payments under the act are made, and (2), pursuant to the provisions of section 301 (c) (2) of the act, fair and reasonable prices for the 1954 crop of sugar beets in regions other than those noted above to be paid under either purchase or toll agreements by producers who process sugar beets grown by other producers and who apply for payments under the act.

In order to obtain the best possible information, the Department requests that all interested parties appear at the hearing to express their views and to present appropriate data with respect to all points relative to the subject matters of the hearings.

The hearings, after being called to order at the times and places mentioned herein, may be continued from day to day within the discretion of the presiding officers and may be adjourned to a later day or to a different place without notice other than the announcement thereof at the hearings by the presiding officers.

A. A. Greenwood and Ward S. Stevenson are hereby designated as presiding officers to conduct either jointly or severally the foregoing hearings.

Issued this 10th day of November 1953.

[SEAL] LAWRENCE MYERS,
*Director,*
*Sugar Branch.*

## FEDERAL POWER COMMISSION

[Docket No. G-2287]

HOME GAS CO.

NOTICE OF APPLICATION

NOVEMBER 10, 1953.

Take notice that on October 21, 1953, Home Gas Company (Applicant), a New York corporation, address, Pittsburgh, Pennsylvania, filed an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act authorizing the construction and operation of approximately 24.3 miles of 12-inch natural-gas transmission pipeline between the Town of Maine, Broome County, New York and a point in the Town of Tioga, Tioga County, New York; and approximately 25.4 miles of 12-inch pipeline between Deposit, Delaware County, New York and Port Dickinson, Broome County, New York, said sections of 12-inch pipeline to parallel Applicant's existing multiple 6-inch pipelines between Quackenbush Hill and Port Jervis in New York.

The proposed facilities constitute sections which will complete a continuous 12-inch pipeline between Quackenbush Hill and Port Jervis, and after the completion and activation of said facilities Applicant plans to retire its existing system of multiple 6-inch lines from Quackenbush Hill to its Hugenot Station near Port Jervis. Applicant proposes the construction and operation of the proposed facilities to enable it to handle additional volumes of natural gas which it anticipates will be available commencing with the winter of 1954–1955 from the pooled supply of the operating subsidiaries of The Columbia Gas System, Inc. Applicant states that said facilities are required to transport its available gas supply to existing markets. No new markets are proposed to be served by means of the proposed facilities.

The estimated total overall capital cost of the proposed facilities is $2,160,500. Applicant proposes to finance such cost with funds to be provided by its parent, The Columbia Gas System, Inc., which will purchase Applicant's notes and common stock and make capital contributions to Applicant as funds are required to meet construction costs.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 30th day of November, 1953. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 53-9645; Filed, Nov. 16, 1953; 8:46 a. m.]

[Docket No. G-2288]

OHIO FUEL GAS CO.

NOTICE OF APPLICATION

NOVEMBER 10, 1953.

Take notice that on October 21, 1953, The Ohio Fuel Gas Company (Applicant), an Ohio corporation, address, Columbus, Ohio, filed an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of natural-gas transmission pipeline facilities in Pickaway, Madison, Erie, Huron, Seneca, Hancock, Hardin and Wood Counties, in Ohio, and for an order pursuant to section 7 (b) of the Natural Gas Act authorizing and approving the abandonment of certain natural-gas transmission facilities in connection therewith.

Applicant proposes to construct and operate approximately 14.4 miles of 26-inch pipeline looping its existing facilities between its Crawford and its Mount Sterling Compressor Stations, to provide additional capacity for service to the Dayton, Cincinnati and Springfield, Ohio, area; approximately 6.6 miles of 16-inch pipeline looping its existing facilities near Kenton, Ohio, to provide additional capacity for service to the Lima and Kenton, Ohio areas; approximately 11.0 miles of 20-inch and 10.5 miles of 16-inch pipeline near New Baltimore, Ohio, to provide additional capacity for service to the Toledo, Findlay and Fostoria, Ohio, areas, and approximately 13.3 miles of 16-inch pipeline to replace Applicant's existing Line "T" from North Baltimore to Bowling Green Ohio, to provide added capacity for service in the same area, among others; and approximately 7.5 miles of 16-inch pipeline to replace portions of its Line "D" between Berlin Heights and Norwalk, Ohio, to provide additional capacity for service in the Milan, Monroeville, Belleville, Clyde, and Fremont, Ohio areas. In connection with the proposed construction, Applicant proposes to retire approximately 34.6 miles of existing 8⅝ inch, 10¾ inch, and 12¾ inch pipeline which is not suitable for continued service.

Applicant proposes to construct and operate the proposed facilities to enable it to transport additional volumes of natural gas to be made available to Applicant in the fall of 1954, and thereafter, from the general pooled gas supplies of the operating subsidiaries of The Columbia Gas System, Inc. The proposed facilities are designed to maintain continuity of service to existing retail and wholesale markets of Applicant, and to provide capacity for adequate service during the winter of 1954–1955. No service to new markets is proposed to be rendered by means of the said facilities.

The estimated total overall capital cost of the proposed facilities is $2,668,000. The proposed retirement of facilities is expected to cost $104,400, and will result in a credit to fixed capital of $246,600. The estimated salvage value of the facilities to be retired is $139,400. Applicant proposes to finance the cost of constructing the proposed facilities with funds to be provided by its parent, The Columbia Gas System, Inc., through sale of Applicant's notes and common stock to The Columbia Gas System, Inc., as funds are required to meet construction costs.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 30th day of November 1953. The application is on filed with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 53-9646; Filed, Nov. 16, 1953; 8:46 a. m.]

[Docket No. G-2289]

MANUFACTURERS LIGHT AND HEAT CO.

NOTICE OF APPLICATION

NOVEMBER 10, 1953.

Take notice that on October 21, 1953, The Manufacturers Light and Heat Company (Applicant), a Pennsylvania corporation, address, Pittsburgh, Pennsylvania, filed an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of approximately 3.65 miles of 12-inch and 23.3 miles of 12-inch loop pipeline; approximately 14.4 miles of 10-inch, 18.5 miles of 20-inch, 5.6 miles of 24-inch, and 10.22 miles of 26-inch replacement pipelines; a new 3300 horsepower compressor station to be located near Downington, Chester County, Pennsylvania, and the installation of 880 additional horsepower in Applicant's existing Eagle Compressor Station in Chester County, Pennsylvania, a total of eight separate jobs, and for an order pursuant to section 7 (b) of the Natural Gas Act authorizing and approving the abandonment of certain facilities to be replaced by reason of some of the new construction.

Applicant proposes to construct and operate the proposed facilities to enable it to handle additional volumes of natural gas which it anticipates will be available to it beginning with the winter of 1954–1955 from the pooled gas supply of the operating subsidiaries of The Columbia Gas System, Inc. No new markets are proposed to be served by means of the proposed facilities. Applicant states that the market requirements of the areas to be served by the proposed facilities in every case exceed the maximum capabilities of the existing facilities to be replaced.

The estimated total overall capital cost of the proposed facilities is $5,792,550. The cost of retiring existing facilities is estimated to be $900, and the salvage value of the facilities to be replaced is estimated to be $101,650. Applicant proposes to finance the cost of construction with funds to be provided by its parent, The Columbia Gas System, Inc., which will purchase Applicant's notes and common stock and make capital contributions to Applicant as funds are required to meet construction costs.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 30th day of November, 1953. The application is on filed with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[Docket No. G-2291]

PACIFIC GAS AND ELECTRIC CO.

NOTICE OF APPLICATION

NOVEMBER 10, 1953.

Take notice that on October 23, 1953, Pacific Gas and Electric Company (Applicant), a California corporation having its principal place of business at 245 Market Street, San Francisco, California, filed an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of certain natural pipelines facilities in the State of California hereinafter described.

Applicant proposes the construction and operation of: (1) A tap on its 20-inch Kettlemen-Milpitas pipeline near Milpitas terminal together with regulator facilities to serve the Ford Motor Company Milpitas plant with natural gas on an interruptible basis; (2) a tap on its 22-inch pipeline near Livermore together with regulator facilities to serve the University of California Radiation Laboratory at Livermore with natural gas on an interruptible basis; and (3) a tap on its 22-inch pipeline near Warm Springs approximately 3 miles north of Milpitas together with regulator facilities to serve the Harbison-Walker Company brick manufacturing plant in Warm Springs with natural gas on an interruptible basis.

Applicant estimates the cost of facilities at $26,014, and proposes to finance their construction with available corporate funds as part of its continuing construction program.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 30th day of November 1953. The application is on file with the Commission for public inspection.

## SECURITIES AND EXCHANGE COMMISSION

[File Nos. 54-164, 59-14]

INTERNATIONAL HYDRO-ELECTRIC SYSTEM

MEMORANDUM OPINION AND ORDER DENYING PETITION FOR REHEARING AND RELATED RELIEF

NOVEMBER 6, 1953.

We heretofore approved Part III of the First Amendment to the Second Plan ("Trustee's Plan") filed by Bartholomew A. Brickley, Trustee of International Hydro-Electric System ("IHES"), a registered holding company, and issued our Findings and Opinion with respect thereto.[1] In brief, Part III of the Trustee's Plan, which essentially incorporates the terms of a compromise proposal agreed upon by represenatives of holders of the preferred and Class A stocks of IHES, its only outstanding securities, provides for the compulsory exchange of the IHES preferred stock on the basis of 5½ common shares of Gatineau Power Company ("Gatineau"), a subsidiary of IHES, for each share of preferred stock, with certain cash adjustments.

Following the issuance of our Findings and Opinion, Cameron Biewend, a Class A stockholder who had not previously appeared in the proceedings, filed an application and petition requesting that our Order approving Part III of the Trustee's Plan be withdrawn; that we seek remand of the case from the United States District Court for the District of Massachusetts where the Trustee's Plan has been submitted for approval; that the hearings be reopened for the purpose of taking evidence in regard to the earning power of Gatineau and on the question of whether Part III of the Plan is fair and equitable; and that Biewend be granted leave to be heard and to participate in such hearings. We heard oral argument on the application and petition.

In support of his requests Biewend refers to an announcement made by Gatineau on October 22, 1953, that there had been an improvement in water conditions which would increase 1953 estimated earnings per common share from $1.62 to $1.66, that an upward revision had been effected in charges for power under long-term contracts with Canadian International Paper Company and a subsidiary of that company, that Gatineau had transferred certain property to that subsidiary, and that as a result Gatineau received cash payments of $3,678,000.[2] The announcement further stated that adjustment of Gatineau's estimate of 1953 earnings to reflect the contract and related changes as of January 1, 1953, would add approximately 16 cents to annual earnings per common share.

Granted the power to approve a plan providing for the distribution of the securities of one issuer in exchange for the securities of another, there will always remain the problem of changing circumstances. We do not agree with Biewend that the recent occurrences to which he refers are of such a nature as to require modification of our conclusion that the Trustee's Plan falls within the range of fairness to all stockholders affected.

[1] International Hydro-Electric System, Holding Company Act Release Nos. 12150 (September 30, 1953) and 12193 (October 29, 1953).

[2] Gatineau applied the cash to the retirement of its 3 percent debentures due June 1, 1954, in the amount of $2,500,000 and the purchase of $500,000 short-term Canadian Government securities, and has added the balance to working capital.

In our Findings and Opinion we expressly considered the effect on estimated earnings of possible changes in water conditions.[3] And although the other changes Biewend stresses did not crystallize until after the close of the record, we were cognizant of them and their impact on estimated earnings, and we specifically referred to them in our Findings and Opinion.[4] Gatineau had for a long time claimed that its contract with the Paper Company called for additional charges, and all the persons (other than Biewend) who appeared at the argument on Biewend's applications herein have stated that they were fully apprised of the existence and character of extended negotiations looking to a settlement of these claims.[5] It was stated in the record of these proceedings that the negotiations would have no adverse effect on Gatineau, but on the contrary it was indicated that they would be of benefit to that company. In this connection it may be noted that although Biewend has alleged that if certain stockholders had known the magnitude of the benefits to Gatineau from the revised contract they would not have joined in the compromise which the Trustee's Plan embodies, all the parties to the compromise apeared at oral argument and argued against Biewend's request and all continued in their support of the Trustee's Plan. No one joined Biewend in his request.

In our opinion Biewend overestimates the significance of the revised earnings estimate and capital changes. He assumes that, if the Trustee's Plan were not carried out, the benefits from increased earnings would redound to the exclusive advantage of the Class A stockholders, and disregards the fact that they would also enhance the position of the preferred stock of IHES, more than 60 percent of the income of which is derived from Gatineau. While the enhancement in the value of the IHES preferred stock would not be as large as that in the Gatineau stock itself, the difference in our opinion is not sufficient to require revision in the allocations proposed in the Trustee's Plan. As we pointed out in our Findings and Opinion, we have not attempted nor is it necessary to fix specific dollar values for the preferred stock or the Gatineau stock to be given in exchange. Our finding that the allocation proposed in the Trustee's Plan is fair and equitable was in effect a finding that it falls within a reasonable range of fairness, and we are of the opinion that the changes which have taken place are not of such material character as to take the allocation from within that range.[6]

*Accordingly, it is ordered*, That the Application of Cameron Biewend for Leave to Adduce Additional Evidence, and Petition for Rehearing, and Application for Leave to be Heard on Rehearing be, and they hereby are, denied.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F. R. Doc. 53-9640; Filed, Nov. 16, 1953; 8:47 a. m.]

[3] We stated (Holding Company Act Release No. 12193, at p. 14): "The record indicates that Gatineau's earnings are affected by water conditions, and Brittain [vice president and treasurer of Gatineau] * * * stated that if water conditions in 1953, which were good only until May, had been as favorable as those experienced in 1952, the 1953 estimate of earnings of $1.62 per share of common stock would be increased to $1.87. On the other hand, had poor water conditions prevailed throughout the year, the forecasted earnings would be $1.32. In Brittain's opinion, per share earnings of $1.62 are 'not very far from normal.'"

[4] We stated (Holding Company Act Release No. 12153, note 27, at p. 15): "After the close of the record, a settlement was worked out in the power negotiations. Adjustment of Brittain's estimate of 1953 earnings to reflect the settlement as of January 1, 1953, and improved water conditions, would in Gatineau's opinion add approximately 20¢ to annual earnings per common share."

[5] At the argument it was pointed out that the market price of Gatineau common shares has not increased following Gatineau's announcement of the changes referred to, and it was asserted that this evidenced a general knowledge and discounting of such changes prior to their occurrence.

[6] While we referred in our Findings and Opinion to earnings of approximately $3 that would be applicable to the Gatineau common shares to be exchanged for the preferred stock, we were not unmindful of the increased earnings stemming from the changes, and recognized that even if the estimated earnings were adjusted to reflect these changes the allocation would not be rendered unfair.

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28631]

PHOSPHATE ROCK FROM FLORIDA TO MISSOURI

APPLICATION FOR RELIEF

NOVEMBER 10, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedules listed below.

Commodities involved: Phosphate rock, carloads.

From: Bartow, Fla., and points in Florida taking same rates.

To: Booth, Bowling Green, Laddonia, and Powersville, Mo.

Grounds for relief: Rail competition, circuity, to maintain grouping, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: Atlantic Coast Line Railroad Company's tariff I. C. C. No. B-3232, supp. 91; Seaboard Air Line Railroad Company's tariff I. C. C. No. A-8153, supp. 85.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

[F. R. Doc. 53-9621; Filed, Nov. 12, 1953; 8:52 a. m.]

[4th Sec. Application 28632]

PHOSPHATE ROCK FROM FLORIDA TO LOWVILLE, N. Y., GROUP

APPLICATION FOR RELIEF

NOVEMBER 10, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent for carriers parties to schedules listed below.

Commodities involved: Phosphate rock, carloads.

From: Bartow, Fla., and points in Florida taking same rates.

To: Lowville, N. Y., and points grouped therewith.

Grounds for relief: Rail competition, circuity, grouping, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: Atlantic Coast Line Railroad Company, I. C. C. No. B-3232, supp. 91; Seaboard Air Line Railroad Company, I. C. C. No. A-8153, supp. 85.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 28633]

PHOSPHATE ROCK FROM FLORIDA TO GREENWOOD, MISS.

APPLICATION FOR RELIEF

NOVEMBER 10, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedules listed below.

Commodities involved: Phosphate rock, carloads.

From: Bartow, Fla., and points in Florida taking same rates.

To: Greenwood, Miss.

Grounds for relief: Rail competition, circuity, and additional routes.

Schedules filed containing proposed rates: Atlantic Coast Line Railroad Company, I. C. C. No. B-3232, supp. 91; Seaboard Air Line Railroad Company, I. C. C. No. A-8153, supp. 85.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 28638]

WHOLE CORN AND SORGHUM GRAINS FROM KANSAS AND COLORADO TO COLORADO AND WYOMING

APPLICATION FOR RELIEF

NOVEMBER 12, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: The Missouri Pacific Railroad Company for itself and on behalf of carriers parties to schedule listed below.

Commodities involved: Whole corn and sorghum grains, carloads.

From: Points in Kansas and Colorado.

To: Points in Colorado and Wyoming.

Grounds for relief: Competition with rail carriers, circuitous routes, and market competition.

Schedules filed containing proposed rates: Missouri Pacific Railroad Company, I. C. C. No. A-10238, supp. 20.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

SODA ASH FROM OHIO, NEW YORK AND MICHIGAN TO GEORGETOWN, S. C., SAVANNAH AND PORT WENTWORTH, GA.

APPLICATION FOR RELIEF

NOVEMBER 12, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: H. R. Hinsch, Alternate Agent, for carriers parties to schedules listed below.

Commodities involved: Soda ash (other than modified soda ash), in carloads.

From: Points in Ohio, New York and Michigan.

To: Georgetown, S. C., Savannah and Port Wentworth, Ga.

Grounds for relief: Competition with rail carriers, competition with water carriers, and market competition.

Schedules filed containing proposed rates: H. R. Hinsch, Alternate Agent, I. C. C. No. 4510, supp. 31; C. W. Boin, Agent, I. C. C. No. A-908, supp. 22.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. CHEESE FROM MCMINNVILLE, TENN., TO THE SOUTH

APPLICATION FOR RELIEF

NOVEMBER 12, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Cheese, in carloads.

From: McMinnville, Tenn.

To: Points in southern territory.

Grounds for relief: Competition with rail carriers, circuitous routes, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1331, supp. 9.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

[4th Sec. Application 28643]

BREWERS RICE FROM BATON ROUGE AND NEW ORLEANS, LA., AND MEMPHIS, TENN., TO WAVERLY AND NEWARK, N. J.

APPLICATION FOR RELIEF

NOVEMBER 12, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to Agent W. P. Emerson, Jr.'s tariff I. C. C. No. 386 and Agent C. A. Spaninger's I. C. C. No. 1324, pursuant to fourth-section order No. 16101.

Commodities involved: Brewers rice and rice screenings, carloads.

From: Baton Rouge and New Orleans, La., and Memphis, Tenn.

To: Newark and Waverly, N. J.

Grounds for relief: Competition with rail carriers, circuitous routes, and operation through higher-rated territory.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

# FEDERAL REGISTER

VOLUME 18 NUMBER 225

*Washington, Wednesday, November 18, 1953*

## TITLE 6—AGRICULTURAL CREDIT

### Chapter IV—Production and Marketing Administration and Commodity Credit Corporation, Department of Agriculture

Subchapter C—Loans, Purchases, and Other Operations

[1953 C. C. C. Grain Price Support Bulletin 1, Supp. 1, Amdt. 2, Rice]

PART 601—GRAINS AND RELATED COMMODITIES

SUBPART—1953-CROP RICE LOAN AND PURCHASE AGREEMENT PROGRAM

AVAILABILITY OF PRICE SUPPORT; ELIGIBLE RICE; TENNESSEE

Regulations issued by the Commodity Credit Corporation and the Production and Marketing Administration published in 18 F. R. 3981 and 4874, and containing the requirements for the 1953-Crop Rice Price Support Program are hereby amended as follows:

1. Section 601.177 *Availability of price support* paragraph (b) *Area* is amended by adding Tennessee to the States in which loans and purchase agreements will be available so that the amended paragraph reads as follows:

§ 601.177 *Availability of price support.* • • •

(b) *Area.* Farm-storage and warehouse-storage loans and purchase agreements will be available on eligible rice produced in the States of Arizona, Arkansas, California, Florida, Louisiana, Mississippi, Missouri, South Carolina, Tennessee, and Texas.

2. Section 601.178 *Eligible rice* paragraph (a) is amended by adding Tennessee to the States in which rice must be produced in 1953 if it is to meet the eligibility requirements, so that the amended paragraph reads as follows:

§ 601.178 *Eligible rice.* • • •

(a) The rice must have been produced in 1953 in the States of Arizona, Arkansas, California, Florida, Louisiana, Mississippi, Missouri, South Carolina, Tennessee, or Texas.

(Sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. Sup. 714b. Interprets or applies sec. 5, 62 Stat. 1072, secs. 101, 401, 63 Stat. 1051, 1054; 15 U. S. C. Sup. 714c, 7 U. S. C. Sup. 1441, 1421)

Issued this 13th day of November 1953.

[SEAL] HOWARD H. GORDON, *President, Commodity Credit Corporation.*

[1953 CCC Tung Nut Bulletin, 721 Tung Nuts-53-1]

PART 643—OILSEEDS

SUBPART—1953 CROP TUNG NUT PRICE SUPPORT PROGRAM

This bulletin states the requirements with respect to the 1953 Crop Tung Nut Price Support Program under which the Secretary of Agriculture makes price support available through the Commodity Credit Corporation and the Production and Marketing Administration thereinafter referred to as "CCC" and "PMA", respectively).

Sec.
643.935 Administration.
643.936 Availability.
643.937 Eligible producer.
643.938 Eligible tung nuts and tung oil.
643.939 Disbursement of loans.
643.940 Approved lending agencies.
643.941 Approved storage facilities.
643.942 Maturity date of loans and period of notification to sell under purchase agreement.
643.943 Applicable forms.
643.944 Personal liability of the producer.
643.945 Determination of quantity.
643.946 Determination of quality under purchase agreement.
643.947 Liens.
643.948 Service charges.
643.949 Insurance.
643.950 Set-offs.
643.951 Interest rate.
643.952 Transfer of producer's right of equity.
643.953 Release of tung oil under loan.
643.954 Liquidation of the loan and delivery under purchase agreement.
643.955 Purchase of notes.
643.956 Storage and handling charges.
643.957 Support prices.
643.958 PMA Commodity Office.

AUTHORITY: §§ 643.935 to 643.958 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. Sup., 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 201, 401, 63 Stat. 1051, 1054; 15 U. S. C. Sup., 714c, 7 U. S. C. Sup., 1446, 1421.

§ 643.935 *Administration.* (a) The program will be administered by PMA, under the general direction and supervision of the President, CCC. In the field, the program will be carried out through State and County PMA Committees (hereinafter called State and County Committees) and the New Orleans PMA Commodity Office.

(b) It will be the responsibility of the State Committee in each State to carry out the provisions of the 1953 tung nut price support program in such a manner that price support will be available to all eligible producers of tung nuts.

(c) Forms will be distributed through the offices of State and County Committees. All documents in connection with warehouse storage loans on tung oil and purchase agreements on tung nuts and tung oil will be approved by the County Committee which will retain copies of all such documents. The County Committee may authorize the county office manager to prepare and approve purchase agreement and loan documents on behalf of the Committee.

(d) State and County Committees and the New Orleans PMA Commodity Office do not have authority to modify or waive any of the provisions of this subpart or any amendments or supplements to this subpart.

§ 643.936 *Availability—(a) Methods of price support.* Price support will be available to eligible producers of tung nuts by means of purchase agreements for eligible tung nuts and tung oil and nonrecourse loans on eligible tung oil stored in approved storage facilities.

(b) *Area.* The program will be available in the States of Alabama, Georgia, Florida, Louisiana, Mississippi, and Texas.

(c) *When to apply.* Purchase agreements covering tung nuts will be available from the beginning of the marketing year, November 1, 1953, through January 31, 1954. Loans and purchase agreements covering tung oil will be available from November 1, 1953, through June 30, 1954.

(d) *Where to apply.* Application for price support should be made through the office of the County Committee which keeps the farm program records for the farm.

§ 643.937 *Eligible producer—(a)* An eligible producer shall be an individual, partnership, corporation, or other legal entity producing tung nuts of the 1953 crop as landowner, landlord, tenant, or share-cropper. The beneficial interest in the tung nuts and the resultant tung oil must be in the producer tendering tung nuts or tung oil for purchase under a purchase agreement or tung oil as security for loan and must have always been in such producer or in such producer and a former producer whom such producer succeeded either as landowner, landlord, tenant, or share-cropper before the tung nuts were harvested. Any eligible producer or group of eligible producers may designate in writing on the form or forms prescribed by CCC, an agent to act on the producer's behalf or on the joint behalf of a group of producers in obtaining price support under this program.

(b) Any cooperative association (hereinafter called cooperative) which normally handles or crushes the tung nuts of its producer-members shall be considered an eligible producer with respect to tung oil processed by it from 1953 crop tung nuts delivered to it by eligible producer-members: *Provided,* That:

(1) The beneficial interest in such nuts processed and in the resultant tung oil is and always has been in such producer-members or in such producer-members and former producers whom such producer-members succeeded either as landowner, landlord, tenant, or share-cropper, before such tung nuts were harvested;

(2) The major part of the tung oil marketed by the cooperative is produced from tung nuts delivered by members who are eligible producers;

(3) The members share proportionately in the proceeds from marketings according to the quantity and quality of tung nuts each delivers to the cooperative;

(4) The cooperative has the legal right to pledge the tung oil as security for a loan as well as the authority to sell such tung oil under purchase agreement;

(5) The cooperative shall maintain a record of the total quantity of tung oil processed by it from tung nuts obtained from all sources and a separate record of the quantity of eligible tung oil processed from 1953 crop tung nuts delivered to the cooperative by eligible producer-members; and the cooperative shall make its books available to CCC for inspection at all reasonable times through June 1956.

§ 643.938 *Eligible tung nuts and tung oil—(a) Tung nuts.* Tung nuts must be from the 1953 crop, and must be matured, air dried with hard hulls, dark in color, and suitable for milling.

(b) *Tung oil.* Tung oil must have been extracted from the 1953 tung nut crop and must meet Federal Specifications No. TT-O-395 dated February 3, 1948, except those specifications pertaining to packaging. The eligibility of tung oil delivered under this program must be evidenced by a certification signed by the producer or an agent designated as provided in § 643.943 (f) or in the case of a cooperative by an authorized officer thereof in the form prescribed in § 643.943 (d) or (e) whichever form is appropriate.

§ 643.939 *Disbursement of loans.* Disbursement of loans on tung oil will be made to producers by approved lending agencies operating under an agreement with CCC, or by PMA County Offices by means of sight drafts drawn on CCC. Disbursements shall not be made later than 15 days after the final date of the availability of loans, unless a longer period is approved by the President, CCC. The producer shall not present the loan documents for disbursement unless the tung oil represented by the loan documents is in existence and in good condition. If the tung oil is not in existence and in good condition at the time of disbursement, the loan proceeds shall be refused or promptly refunded by the producer. In the event the amount disbursed exceeds the amount authorized, the producer shall be personally liable for repayment of the amount of such excess.

§ 643.940 *Approved lending agencies.* An approved lending agency shall be any bank, cooperative, corporation, partnership, individual, or other legal entity with which CCC has entered into a Lending Agency Agreement on CCC Form 292, or other form prescribed by CCC.

§ 643.941 *Approved storage facilities.* Approved facilities shall consist of storage facilities made available by tung oil mills and others having adequate facilities for handling and storing tung oil for which a tung oil storage agreement on

warehouse storage loans on tung oil and purchase agreements on tung nuts and tung oil will be approved by the County Committee which will retain copies of all such documents. The County Committee may authorize the county office manager to prepare and approve purchase agreement and loan documents on behalf of the Committee.

(d) State and County Committees and the New Orleans PMA Commodity Office do not have authority to modify or waive any of the provisions of this subpart or any amendments or supplements to this subpart.

§ 643.936 *Availability—(a) Methods of price support.* Price support will be available to eligible producers of tung nuts by means of purchase agreements for eligible tung nuts and tung oil and nonrecourse loans on eligible tung oil stored in approved storage facilities.

(b) *Area.* The program will be available in the States of Alabama, Georgia, Florida, Louisiana, Mississippi, and Texas.

(c) *When to apply.* Purchase agreements covering tung nuts will be available from the beginning of the marketing year, November 1, 1953, through January 31, 1954. Loans and purchase agreements covering tung oil will be available from November 1, 1953, through June 30, 1954.

(d) *Where to apply.* Application for price support should be made through the office of the County Committee which keeps the farm program records for the farm.

§ 643.937 *Eligible producer—(a)* An eligible producer shall be an individual, partnership, corporation, or other legal entity producing tung nuts of the 1953 crop as landowner, landlord, tenant, or share-cropper. The beneficial interest in the tung nuts and the resultant tung oil must be in the producer tendering tung nuts or tung oil for purchase under a purchase agreement or tung oil as security for loan and must have always been in such producer or in such producer and a former producer whom such producer succeeded either as landowner, landlord, tenant, or share-cropper before the tung nuts were harvested. Any eligible producer or group of eligible producers may designate in writing on the form or forms prescribed by CCC, an agent to act on the producer's behalf or on the joint behalf of a group of producers in obtaining price support under this program.

(b) Any cooperative association (hereinafter called cooperative) which normally handles or crushes the tung nuts of its producer-members shall be considered an eligible producer with respect to tung oil processed by it from 1953 crop tung nuts delivered to it by eligible producer-members: *Provided,* That:

(1) The beneficial interest in such nuts processed and in the resultant tung oil is and always has been in such producer-members or in such producer-members and former producers whom such producer-members succeeded either as landowner, landlord, tenant, or share-cropper, before such tung nuts were harvested;

(2) The major part of the tung oil marketed by the cooperative is produced from tung nuts delivered by members who are eligible producers;

(3) The members share proportionately in the proceeds from marketings according to the quantity and quality of tung nuts each delivers to the cooperative;

(4) The cooperative has the legal right to pledge the tung oil as security for a loan as well as the authority to sell such tung oil under purchase agreement;

(5) The cooperative shall maintain a record of the total quantity of tung oil processed by it from tung nuts obtained from all sources and a separate record of the quantity of eligible tung oil processed from 1953 crop tung nuts delivered to the cooperative by eligible producer-members; and the cooperative shall make its books available to CCC for inspection at all reasonable times through June 1956.

§ 643.938 *Eligible tung nuts and tung oil—(a) Tung nuts.* Tung nuts must be from the 1953 crop, and must be matured, air dried with hard hulls, dark in color, and suitable for milling.

(b) *Tung oil.* Tung oil must have been extracted from the 1953 tung nut crop and must meet Federal Specifications No. TT-O-395 dated February 3, 1948, except those specifications pertaining to packaging. The eligibility of tung oil delivered under this program must be evidenced by a certification signed by the producer or an agent designated as provided in § 643.943 (f) or in the case of a cooperative by an authorized officer thereof in the form prescribed in § 643.943 (d) or (e) whichever form is appropriate.

§ 643.939 *Disbursement of loans.* Disbursement of loans on tung oil will be made to producers by approved lending agencies operating under an agreement with CCC, or by PMA County Offices by means of sight drafts drawn on CCC. Disbursements shall not be made later than 15 days after the final date of the availability of loans, unless a longer period is approved by the President, CCC. The producer shall not present the loan documents for disbursement unless the tung oil represented by the loan documents is in existence and in good condition. If the tung oil is not in existence and in good condition at the time of disbursement, the loan proceeds shall be refused or promptly refunded by the producer. In the event the amount disbursed exceeds the amount authorized, the producer shall be personally liable for repayment of the amount of such excess.

§ 643.940 *Approved lending agencies.* An approved lending agency shall be any bank, cooperative, corporation, partnership, individual, or other legal entity with which CCC has entered into a Lending Agency Agreement on CCC Form 292, or other form prescribed by CCC.

§ 643.941 *Approved storage facilities.* Approved facilities shall consist of storage facilities made available by tung oil mills and others having adequate facilities for handling and storing tung oil for which a tung oil storage agreement on

CCC Form 77 (Revised October 1, 1953) for the 1953 crop has been entered into with CCC through the New Orleans PMA Commodity Office. The names of owners or operators of approved facilities may be obtained from the New Orleans PMA Commodity Office and State and County Offices.

§ 643.942 *Maturity date of loans and period of notification to sell under purchase agreement.* (a) Loans on tung oil mature on October 31, 1954, or on such earlier date as may be prescribed by CCC.

(b) Producers who elect to sell tung nuts under a purchase agreement must notify the County Committee of their intentions within the 30-day period ending March 31, 1954 or ending on such earlier date as may be prescribed by CCC. Producers who elect to sell tung oil under a purchase agreement must notify the County Committee of their intentions within the 30-day period ending October 31, 1954, or ending on such earlier date as may be prescribed by CCC.

§ 643.943 *Applicable forms.* The approved forms consist of the purchase agreement forms, loan forms, and such other forms and documents as may be required, which together with the provisions of this subpart, and any supplements and amendments to this subpart, govern the rights and responsibilities of the producer. Note and loan agreements must have State documentary and revenue stamps affixed thereto when required by law. Purchase agreement or loan documents executed by an administrator, executor, or trustee, will be acceptable only where legally valid.

(a) *Purchase agreement documents.* The purchase agreement forms shall consist of the Purchase Agreement (Commodity Purchase Form 1), Delivery Instructions (Commodity Purchase Form 3), Purchase Agreement Settlement (Commodity Purchase Form 4), Lien Waiver for Purchases (Commodity Purchase Form 5) and other applicable forms prescribed in paragraph (c) of this section.

(b) *Loan documents.* Loan forms shall consist of the Producer's Note and Loan Agreement (Commodity Form B) and other applicable forms prescribed in paragraph (c) of this section.

(c) *Other forms.* Warehouse receipts, chemical analysis certificates issued by approved chemists, certification of eligibility of tung oil, producer's designation of agent, and such other forms as may be prescribed by CCC.

(d) *Producer's certification of eligibilty of tung oil.* Before a loan is made on tung oil to a producer, other than a cooperative, or before delivery of tung oil from such producer under a purchase agreement can be accepted by the County Committee, the producer, or his agent designated as provided in paragraph (f) of this section, must sign a statement in substantially the following form:

I hereby certify as follows:

(1) That the ____ pounds of tung oil located in _____

(Name of storage facility)

at _____

(Address)

which I am pledging to CCC as collateral for loan (or am tendering for delivery to CCC under purchase agreement) was delivered to me as oil processed for my account by _____ out

(Name of plant)

of ____ pounds of 1953 crop tung nuts produced by me which I delivered to such plant for toll processing;

(2) That the beneficial interest in such tung nuts and in the resultant tung oil described above is and always has been in me or in me and a former producer whom I succeeded either as landowner, landlord, tenant or sharecropper, before such tung nuts were harvested.

(Signature) _____

(Producer)

By _____

(Agent)

_____

(Date)

(e) *Cooperative's certification of eligibility of tung oil.* Before a loan is made to a cooperative or delivery of tung oil from such cooperative under a purchase agreement can be accepted by the County Committee, the manager or the official empowered to sign contracts for or on behalf of the cooperative must sign a statement in substantially the following form:

I hereby certify as follows:

(1) That the ____ pounds of tung oil located in _____ at _____ which

(Warehouse) (Address)

is being pledged to CCC as collateral for a loan (or is being tendered for delivery to CCC under purchase agreement) was processed at the cooperative's mill from ____ pounds of 1953 crop tung nuts delivered to the cooperative by eligible producer members;

(2) That the beneficial interest in such tung nuts and in the resultant tung oil described above is and always has been in such producer-members or in such producer-members and former producers whom such producer-members succeeded, either as landowner, landlord, tenant, or share-cropper, before such tung nuts were harvested.

_____

(Name of cooperative)

By _____

Title _____

_____

(Date)

(f) *Designation of agent by a producer or group of producers.* A single eligible producer may designate an agent to act on behalf of the producer in obtaining price support or two or more eligible producers may designate an agent to act in their joint behalf in obtaining price support. In such event the producer or group of producers shall execute CCC Tung Nut Form 1 (1953) for purchase agreements or CCC Tung Nut Form 1–A (1953) for loans. A copy of each designation of agent signed by the producer or producers and indicating the maximum quantity of eligible tung nuts which the producer, or each producer in the case of a group, will produce on the producer's own farm, and on which price support is desired, must be delivered to the County Committee before any purchase agreement or loan documents on behalf of a single producer or group of producers are approved by the County Committee. A separate certification of eligibility must be executed for or on behalf of each producer.

(g) *Warehouse receipts.* Warehouse receipts representing tung oil in approved warehouse-storage to be placed under loan or to be delivered under a purchase agreement, must meet the following requirements:

(1) Must be issued in the name of the producer, describe the quantity and quality of tung oil delivered to the warehouseman, be signed by the warehouseman and be properly endorsed in blank by the producer so as to vest title in the holder.

(2) Must guarantee that when delivered out by the warehouse, the oil will meet Federal Specifications No. TT-O-395 dated February 3, 1948, except those specifications pertaining to packaging.

(3) Must contain a statement showing the insurance coverage carried by the warehouseman on the oil. If such insurance was not effective as of the date of deposit of the tung oil in the warehouse, the warehouseman must certify as to the effective date of the insurance and that the oil is in the warehouse and undamaged.

(4) Must show the date of issue.

(5) Must carry an endorsement in substantially the following form:

Warehouse charges through October 31, 1954, on the tung oil represented by this warehouse receipt have been paid or otherwise provided for and the warehouseman has no lien upon such tung oil for such charges.

(6) Must contain such other terms and conditions as CCC may require in its tung oil storage agreement with approved warehouseman.

§ 643.944 *Personal liability of the producer.* Any fraudulent representation made by any producer or agent of the producer in executing any of the purchase agreement or loan documents or in obtaining the purchase agreement or loan proceeds, or the conversion or unlawful disposition of any portion of the commodity by the producer, will render the producer or agent subject to criminal prosecution under Federal Law and liable for any damages suffered by CCC as a result of purchase of the commodity, for the amount of the loan (including interest), and for any resulting expense incurred by any holder of the note.

§ 643.945 *Determination of quantity*—(a) *Tung nuts.* The quantity of tung nuts delivered under purchase agreement shall be determined on the basis of net weight at point of delivery to CCC with foreign material and bagging excluded.

(b) *Tung oil.* Where the tung oil pledged to secure a loan or tendered under a purchase agreement is represented by warehouse receipts issued by approved warehouses, the determination of quantity shall be based on the net weight specified on such warehouse receipts. Where tung oil tendered under a purchase agreement is not stored in an approved warehouse, the quantity of such tung oil shall be determined on the basis of approved scale weight at destination.

§ 643.946 *Determination of quality*—(a) The determination of the oil content of the tung nuts and the quality of tung oil not stored in approved warehouses which is delivered under purchase agreement shall be made on the basis of samples taken by inspectors authorized or licensed by the Secretary of Agriculture. The samples shall be analyzed by chemists approved by the Department of Agriculture (hereinafter referred to as "approved chemists"). The oil content of the tung nuts shall be determined on the basis of a sample drawn as of the time of delivery of the tung nuts to CCC. The time of determining the quality of the tung oil and evidence of such quality shall be as provided in § 643.954 (b) (5). The cost of sampling and analysis shall be borne by the producer.

(b) In the case of tung oil stored in approved warehouses where appropriate warehouse receipts are delivered to CCC in connection with a purchase agreement or a loan on such tung oil, the quality of such tung oil shall be the quality shown on the warehouse receipts.

§ 643.947 *Liens.* If there are any liens or encumbrances on the tung nuts or tung oil, waivers acceptable to the County Committee must be obtained.

§ 643.948 *Service charges.* Producers shall pay to the County Committee service charges on the quantity placed under loan or specified in the purchase agreement, computed at the following rates:

| | Rate | Minimum charges |
|---|---|---|
| Tung oil | 6 cents per hundredweight | $1 50 |
| Tung nuts | 1 cents per ton | 1 50 |

No service charges will be refunded.

§ 643.949 *Insurance.* Tung oil tendered for loan or under purchase agreement which is stored in an approved warehouse on a commingled basis must be insured by the warehouseman for not less than the full market value against loss or damage by fire, lightning, inherent explosion, windstorm, hurricane, tornado, and such other hazards as are normally insured against by the warehouseman or required by statute.

§ 643.950 *Set-offs.* (a) If the producer is indebted to CCC on any accrued obligation, or if any installments on any loan made available by CCC on farm storage facilities or mobile drying equipment are past due or are payable or prepayable under the provisions of the note evidencing such loan out of the proceeds of the price support loan or purchase, such producer must designate CCC or the lending agency holding such note as the payee of the proceeds of the purchase or loan to the extent of such indebtedness or installments, but not to exceed that portion of the proceeds remaining after deduction of service charges and amounts due prior lienholders. In the case of a cooperative, the cooperative must designate CCC, or the lending agency holding the note evidencing a loan on farm storage facilities or mobile drying equipment, as the payee of the proceeds of the purchase or loan to the extent of any such indebtedness or installments due by any individual producer who delivered to the cooperative the tung nuts from which was processed the oil constituting the basis for the loan or the purchase agreement. For purposes of this provision the cooperative must deliver to the county committee a list of the individual producers who delivered the tung nuts to the cooperative together with the quantity of oil processed for each producer. The county committee will furnish the cooperative with the names of such producers which appear on the county debt register and the amounts of their indebtedness.

(b) If the producer is indebted to any other agency of the United States, and such indebtedness is listed on the county debt register, he must designate such agency as the payee of the proceeds as provided in paragraph (a) of this section. Indebtedness owing to CCC or to a lending agency as provided above shall be given first consideration after payment of service charges and claims of prior lienholders.

(c) Compliance with the provisions of this section shall not constitute a waiver of any right of the producer to contest the justness of the indebtedness involved either by administrative appeal or legal action.

§ 643.951 *Interest rate.* Loans shall bear interest at the rate of 4 percent per annum from the date of disbursement to the date of repayment.

§ 643.952 *Transfer of producer's right or equity*—(a) *Loans.* The right of a producer to transfer either his right to redeem the tung oil under loan or his remaining interest may be restricted by CCC.

(b) *Purchase agreements.* The producer may not assign his interest in the purchase agreement.

§ 643.953 *Release of tung oil under loan.* A producer may at any time obtain release of the tung oil under loan by paying to the holder of the note and loan agreement, the principal amount thereof, plus charges and accrued interest. All charges in connection with the collection of the note shall be paid by the producer. Partial release prior to maturity may be arranged with the County Committee by paying to the holder of the note the amount of the loan, plus charges and accrued interest, represented by the quantity of the commodity to be released. However, the quantity to be released must be equal to the quantity covered by one or more warehouse receipts.

§ 643.954 *Liquidation of the loans and delivery under purchase agreement*—(a) *Liquidation of the loan.* If the producer does not repay his loan by maturity, CCC shall have the right to sell or pool the tung oil to satisfy the loan in accordance with the provisions of the note and loan agreement and this section. If tung oil is pooled, the producer has no right of redemption after the date the pool is established, but shall share ratably in any overplus remaining upon liquidation of the pool. CCC shall have the right to treat pooled tung oil as a reserve supply to be marketed under such sales policies as CCC determines will promote orderly marketing, protect the interests of producers and consumers, and not unduly impair the market for the current crop of the commodity, even though part or all of such pooled tung oil is disposed of under such policies at prices less than the current domestic price for such commodity. Any payment due the producer as a result of the sale of the commodity, or out of the proceeds of insurance on the commodity, or any ratable share resulting from the liquidation of a pool, will be made by the New Orleans PMA Commodity Office and shall be payable only to the producer without right of assignment by him.

(b) *Delivery and payment under purchase agreement.* (1) A producer who signs a purchase agreement (Commodity Purchase Form 1) will not be obligated to sell any quantity of tung nuts or tung oil to CCC but shall have the option of delivering to CCC at the support price any quantity of tung nuts or oil within the maximum of tung nuts or tung oil specified in the purchase agreement executed by him.

(2) A producer who has signed a purchase agreement in terms of tung nuts may, at his option, deliver in lieu of tung nuts an equivalent quantity of eligible tung oil: *Provided*, That such tung oil shall be delivered in accordance with subparagraph (4) or (5) of this paragraph, whichever is applicable.

(3) Eligible tung nuts will be purchased on the basis of the weight and oil content as shown by a chemical analysis. CCC will not accept delivery until a determination of eligibility has been made and a sample for chemical analysis has been drawn. The producer shall deliver tung nuts to CCC in accordance with instructions issued by the County Committee on or after March 31, 1954. If the producer is required by such instructions to make delivery to a point more distant from the farm than his usual milling point, CCC will pay the difference, if any, between the cost of transportation from the farm to the designated delivery point and the cost of transportation from the farm to the usual milling point but not in excess of an amount which the County Committee determines is a reasonable difference in cost for such services. The producer must complete delivery of tung nuts within a 15-day period immediately following the date the County Committee issues delivery instructions unless the County Committee determines that more time is needed for delivery.

(4) In the case of tung oil stored in approved storage facilities, the producer must, not later than the day following the final date of the 30-day notification period prescribed in § 643.942 (b), or during such period of time thereafter as may be specified by CCC, submit to the County Committee warehouse receipts issued in the form prescribed in § 643.943 (g). The total quantity of oil represented by such warehouse receipts shall not exceed the quantity shown on Commodity Purchase Form 1. CCC will not accept delivery of less than the total quantity of tung oil covered by a warehouse receipt. The producer's certification of the eligibility of tung oil as provided in § 643.943 (d) or (e), whichever is applicable, must accompany the warehouse receipt. Notwithstanding the above provisions, in case the producer

and the warehouseman are the same person, delivery may be made in accordance with subparagraph (5) of this paragraph.

(5) In the case of tung oil stored in storage facilities which have not been approved, delivery will be accepted only f. o. b. tank cars. The County Committee will on or after the final date of the 30-day notification period prescribed in § 643.942 (b), issue delivery instructions to the producer. Before issuance of such delivery instructions, the producer must submit a chemical analysis certificate (issued by an approved chemist) covering each tank car offered showing that the oil meets Federal Specifications; or if it is found by the County Committee that a submission of these analyses certificates on tank car lots would cause undue delay in shipment, the producer may (i) submit evidence that a sample of each car lot of oil has been properly drawn and submitted to an approved chemist for analysis: *Provided*, That the producer waives his right of appeal of the findings of the approved chemist and he agrees that demurrage incurred as a result of delay in receiving the chemical analysis prior to final acceptance, shall be for the producer's account: *And provided further*, That if the tung oil does not meet Federal Specifications the car shall be rejected with all freight, demurrage, and handling charges reverting to the account of the producer; or (ii) the producer may submit chemical analysis certificates (issued by an approved chemist) showing that the tung oil offered meets Federal Specifications and is stored in sealed identity preserved tanks, provided that the producer agrees to have such tung oil check loaded into tank cars for delivery to CCC and to bear all handling and other costs prior to acceptance by CCC f. o. b. tank cars. The producer must submit a certification of the eligibility of tung oil, as provided in § 643.943 (d) or (e), whichever is applicable, and complete delivery within a 15-day period immediately following the date the County Committee issues delivery instructions unless the County Committee determines that more time is needed for delivery. Notwithstanding the above provisions of this section, delivery of less than tank car lots may be accepted by CCC f. o. b. tank truck or other conveyance in those cases where the New Orleans PMA Commodity Office determines that such action is in the interests of CCC.

(6) The tung nuts or tung oil will be purchased by CCC at the applicable support rate and payment will be made by sight drafts drawn on CCC by the PMA County Office.

§ 643.955 *Purchase of notes.* The County Committees acting on behalf of CCC will purchase from approved lending agencies, notes evidencing approved loans which are secured by warehouse receipts issued by approved warehouses. The purchase price will be the sums of the principal remaining due on such notes, plus an amount to cover interest computed according to the lending agency agreement. Lending agencies are required to submit Commodity Credit Corporation Form 500, CCC Form 238, or such other form as CCC may prescribe, to the County Committee for all payments received on producer's notes held by them and are required to remit to CCC a part of the interest collected, computed according to the lending agency agreement. Lending agencies shall submit notes and reports to the PMA County Committee serving the area.

§ 643.956 *Storage and handling charges*—(a) *Tung nuts.* CCC will not pay or assume any of the costs of transportation (except as provided in § 643.954 (b) (3)), storage, cleaning, insurance premiums, bags and bagging, sampling, testing and analysis reports, and tagging, accruing prior to delivery of the tung nuts to CCC under a purchase agreement, nor will CCC assume the cost of handling or processing expenses which are necessary to prepare the tung nuts to meet eligibility requirements.

(b) *Tung oil.* CCC will not pay or assume the cost of transportation, sampling, insurance, testing and analysis accruing on the tung oil prior to delivery under a purchase agreement or prior to the maturity date of the loan on tung oil placed under loan, nor any handling or processing charges which are necessary to prepare the tung oil to meet eligibility requirements, except as specifically authorized by CCC. Storage charges on tung oil stored in approved warehouses shall be paid by the producer through October 31, 1954. Storage charges accruing on such tung oil after such date will be for the account of CCC. All storage charges on tung oil stored in unapproved warehouses shall be for the account of the producer.

(c) *Unexpired storage time and services.* CCC and any subsequent holders of warehouse receipts covering tung oil shall be entitled to any unexpired portion of the storage time and outloading services to which the producer became entitled under any contract between the producer and the warehouseman.

§ 643.957 *Support prices*—(a) *Tung nuts.* The support price for tung nuts containing 18.5 percent oil (original moisture basis) shall be $63.38 per ton in all areas. This price shall be adjusted upward or downward by 34 cents per ton for each variation of $\frac{1}{10}$ of 1 percent oil from the base of 18.5 percent oil content (original moisture basis) on the basis of chemical analysis certificate issued by an approved chemist.

(b) *Tung oil.* The support price for eligible tung oil will be 23.9 cents per pound in all areas.

§ 643.958 *PMA Commodity Offices.* The New Orleans PMA Commodity Office will serve the tung area and the States served by it are shown below:

| *Address and State* |
|---|
| Wirth Bldg., 120 Marais Street, New Orleans 16, La.: Alabama, Florida, Louisiana, Georgia, Mississippi, and Texas. |

Issued this 13th day of November 1953.

[SEAL] HOWARD H. GORDON,
*President,*
*Commodity Credit Corporation.*

[F. R. Doc. 53-9715; Filed, Nov. 17, 1953; 8:52 a. m.]

## TITLE 7—AGRICULTURE

### Chapter I—Production and Marketing Administration (Standards, Inspections, Marketing Practices), Department of Agriculture

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

SUBPART B—UNITED STATES STANDARDS[1]

GRADES OF FROZEN CONCENTRATE FOR LEMONADE

On August 21, 1953, a notice of proposed rule making was published in the FEDERAL REGISTER (18 F. R. 4996) regarding proposed United States Standards for Grades of Frozen Concentrate for Lemonade. After considering all relevant matters presented, including the proposals set forth in the aforesaid notice, the following United States Standards for Grades of Frozen Concentrate for Lemonade are hereby promulgated under the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621, et seq.), and the Department of Agriculture Appropriation Act, 1954 (Pub. Law 156, 83d Cong., approved July 28, 1953).

§ 52.418 *Frozen concentrate for lemonade.* Frozen concentrate for lemonade is the product prepared from lemon juice and one or more nutritive sweetening ingredients; it may contain added lemon oil or concentrated lemon oil (or their extracts or emulsions) and may or may not contain water in sufficient quantities to standardize the product. The lemon juice is produced from fresh, sound, ripe, and thoroughly cleansed fruit of one or more of the high acid varieties of the species citrus limon (limonia). Such juice may be fresh or frozen or fresh concentrated or frozen concentrated: *Provided*, That not less than 20 percent, by weight, of the acidity of the product is derived from unconcentrated fresh or frozen lemon juice. The concentrate for lemonade is processed in accordance with good commercial practice and is frozen and maintained at temperatures sufficient for the preservation of the product.

(a) *Grades of frozen concentrate for lemonade.* (1) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen concentrate for lemonade which mixes readily into a lemonade that possesses an amount of pulp, cloud, and juice sacs so as to substantially reflect the appearance of lemonade prepared from freshly expressed lemon juice; that possesses a good color; that is practically free from defects; that possesses a good flavor; and that scores not less than 85 points when scored in accordance with the scoring system outlined in this section.

(2) "U. S. Grade B" or "U. S. Choice" is the quality of frozen concentrate for lemonade which mixes readily into a lemonade that possesses at least a slight, but not an excessive, amount of pulp, cloud, and juice sacs so as to reasonably reflect the appearance of lemonade prepared from freshly expressed lemon juice; that possesses a reasonably good color; that is reasonably free from defects; that possesses a reasonably good flavor; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this section.

(3) "Substandard" is the quality of frozen concentrate for lemonade that fails to meet the requirements of "U. S. Grade B" or "U. S. Choice."

(b) *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purpose of these grades. It is recommended that each container be filled as full as practicable with frozen concentrate for lemonade.

(c) *Ascertaining the grade.* (1) The grade of frozen concentrate for lemonade is ascertained by considering the requirements with respect to the ease with which the product mixes into a lemonade and to the amount of pulp, cloud and juice sacs present in the lemonade, which factors are not scored, and the factors of color, absence of defects, and flavor which are scored.

(2) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| (i) Color | 20 |
| (ii) Absence of defects | 20 |
| (iii) Flavor | 60 |
| Total score | 100 |

(3) The scores for the factors of color, absence of defects, and flavor are determined immediately after the product has been prepared as lemonade by thoroughly mixing the frozen concentrate for lemonade with a specific volume of water as directed by the manufacturer.

(d) *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means, 17, 18, 19, or 20 points).

(1) *Color.* (i) Frozen concentrate for lemonade which, when prepared as lemonade, possesses a good color may be given a score of 17 to 20 points. "Good color" means a good bright characteristic color that reflects the appearance of lemonade prepared from freshly expressed lemon juice.

(ii) If the frozen concentrate for lemonade, when prepared as lemonade, possesses a reasonably good color, a score of 14 to 16 points may be given. Frozen concentrate for lemonade that falls into this classification shall not be graded above "U. S. Grade B" or "U. S. Choice," regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means a characteristic color that reflects to a reasonable extent the color of lemonade prepared from freshly expressed lemon juice and is not dark or otherwise discolored for any reason.

(iii) If the lemonade fails to meet the requirements of subdivision (ii) of this subparagraph, a score of 0 to 13 points may be given. Frozen concentrate for lemonade that falls into this classification shall not be graded above "Substandard" regardless of the total score for the product (this is a limiting rule).

(2) *Absence of defects.* The factor of absence of defects refers to the degree of freedom from seeds or portions of seeds, from harmless extraneous material, from objectionable material and from other defects not specifically mentioned that affect the appearance or drinking quality of the product.

(i) "Harmless extraneous material" includes, but is not limited to, embryonic seeds or particles of seeds that measure not more than $\frac{3}{16}$ inch in any dimension, or other similar material which is harmless.

(ii) "Seeds or portions of seeds" means any seed or portion thereof, whether or not fully developed, that measures more than $\frac{3}{16}$ inch in any dimension.

(iii) Frozen concentrate for lemonade which, when prepared as lemonade, is practically free from defects may be given a score of 17 to 20 points. "Practically free from defects" means that there may be present not more than an average of 1 seed or portion of seed for each quart of prepared lemonade; and that the appearance and drinking quality of the lemonade is not materially affected by the presence of seeds, portions of seeds, objectionable material, harmless extraneous material, any other defects not specifically mentioned, or any combination thereof.

(iv) If the lemonade is reasonably free from defects a score of 14 to 16 points may be given. Frozen concentrate for lemonade that falls into this classification shall not be graded above "U. S. Grade B" or "U. S. Choice" regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that there may be present not more than an average of 2 seeds or portions of seeds for each quart of lemonade; and that the appearance and drinking quality of the lemonade is not seriously affected by the presence of seeds, portions of seeds, objectionable material, harmless extraneous material, any other defects not specifically mentioned, or any combination thereof.

(v) If the lemonade fails to meet the requirements of subdivision (iv) of this subparagraph, a score of 0 to 13 points may be given. Frozen concentrate for lemonade that falls into this classification shall not be graded above "Substandard" regardless of the total score for the product (this is a limiting rule).

(3) *Flavor.* (i) Frozen concentrate for lemonade which, when prepared as lemonade, possesses a good flavor, may be given a score of 50 to 60 points. "Good flavor" means a fine, distinct, and substantially typical flavor of lemonade prepared from freshly expressed lemon juice and which flavor is free from terpenic, oxidized, rancid, or other off-flavors. To score in this classification, the lemonade shall test not less than 10.5 degrees Brix; shall contain not less than 0.7 grams of acid per 100 ml of the lemonade; may not contain more than 0.02 ml of recoverable oil per 100 ml of the lemonade; and the Brix-acid ratio shall not exceed 20:1.

(ii) If the prepared lemonade possesses a reasonably good flavor, a score of 42 to 50 points may be given. Frozen concentrate for lemonade that falls into this classification shall not be graded above "U. S. Grade B" or "U. S. Choice" regardless of the total score for the product (this is a limiting rule). "Reasonably good flavor" means a fairly typical flavor of lemonade prepared from freshly expressed lemon juice and which flavor is practically free from terpenic, oxidized, rancid, or other off-flavors and is free from abnormal flavors of any kind. To score in this classification the lemonade shall test not less than 10.5 degrees Brix; shall contain not less than 0.7 gram of acid per 100 ml of the lemonade, may contain not more than 0.03 ml of recoverable oil per 100 ml of the lemonade; and the Brix-acid ratio shall not exceed 20:1.

(iii) If the prepared lemonade fails to meet the requirements of subdivision (ii) of this subparagraph, a score of 0 to 41 points may be given. Frozen concentrate for lemonade that falls into this classification shall not be graded above "Substandard" regardless of the total score for the product (this is a limiting rule).

(e) *Definition of terms.* (1) "Brix" means the degrees Brix of the lemonade when tested with a Brix hydrometer calibrated at 20° C. (68° F.). If used in testing lemonade at a temperature other than 20° C. (68° F.) the applicable temperature correction shall be made to the reading of the scale as prescribed in "Official Methods of Analysis of the Association of Official Agricultural Chemists." The degrees Brix of lemonade may be determined by any other method which gives equivalent results.

(2) "Acid" means the grams of acid (calculated as anhydrous citric acid) per 100 ml of the prepared lemonade determined by titration with standard sodium hydroxide solution using phenolphtalein as an indicator.

(3) "Brix-acid ratio" means the ratio between the degrees "Brix" as determined in this section and the acid in grams per 100 ml of lemonade.

(4) "Dilution factor" is the value obtained by dividing a volume of lemonade by the volume of concentrate for lemonade used in its preparation when such lemonade is prepared in accordance with the manufacturers directions.

(f) *Explanation of analyses.* Recoverable oil is determined by the following method:

(1) *Equipment.*

Oil separatory trap similar to either of those illustrated in Figure 1[2] and Figure 2:[2]
Gas burner or hot plate.
Ringstand and clamps.
Rubber tubing.
3-liter narrow-neck flask.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal, Food, Drug, and Cosmetic Act.

[2] Figures 1 and 2 filed as part of the original document.

(2) *Absence of defects.* The factor of absence of defects refers to the degree of freedom from seeds or portions of seeds, from harmless extraneous material, from objectionable material and from other defects not specifically mentioned that affect the appearance or drinking quality of the product.

(i) "Harmless extraneous material" includes, but is not limited to, embryonic seeds or particles of seeds that measure not more than $\frac{3}{16}$ inch in any dimension, or other similar material which is harmless.

(ii) "Seeds or portions of seeds" means any seed or portion thereof, whether or not fully developed, that measures more than $\frac{3}{16}$ inch in any dimension.

(iii) Frozen concentrate for lemonade which, when prepared as lemonade, is practically free from defects may be given a score of 17 to 20 points. "Practically free from defects" means that there may be present not more than an average of 1 seed or portion of seed for each quart of prepared lemonade; and that the appearance and drinking quality of the lemonade is not materially affected by the presence of seeds, portions of seeds, objectionable material, harmless extraneous material, any other defects not specifically mentioned, or any combination thereof.

(iv) If the lemonade is reasonably free from defects a score of 14 to 16 points may be given. Frozen concentrate for lemonade that falls into this classification shall not be graded above "U. S. Grade B" or "U. S. Choice" regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that there may be present not more than an average of 2 seeds or portions of seeds for each quart of lemonade; and that the appearance and drinking quality of the lemonade is not seriously affected by the presence of seeds, portions of seeds, objectionable material, harmless extraneous material, any other defects not specifically mentioned, or any combination thereof.

(v) If the lemonade fails to meet the requirements of subdivision (iv) of this subparagraph, a score of 0 to 13 points may be given. Frozen concentrate for lemonade that falls into this classification shall not be graded above "Substandard" regardless of the total score for the product (this is a limiting rule).

(3) *Flavor.* (i) Frozen concentrate for lemonade which, when prepared as lemonade, possesses a good flavor, may be given a score of 50 to 60 points. "Good flavor" means a fine, distinct, and substantially typical flavor of lemonade prepared from freshly expressed lemon juice and which flavor is free from terpenic, oxidized, rancid, or other off-flavors. To score in this classification, the lemonade shall test not less than 10.5 degrees Brix; shall contain not less than 0.7 grams of acid per 100 ml of the lemonade; may not contain more than 0.02 ml of recoverable oil per 100 ml of the lemonade; and the Brix-acid ratio shall not exceed 20:1.

(ii) If the prepared lemonade possesses a reasonably good flavor, a score of 42 to 50 points may be given. Frozen concentrate for lemonade that falls into this classification shall not be graded above "U. S. Grade B" or "U. S. Choice" regardless of the total score for the product (this is a limiting rule). "Reasonably good flavor" means a fairly typical flavor of lemonade prepared from freshly expressed lemon juice and which flavor is practically free from terpenic, oxidized, rancid, or other off-flavors and is free from abnormal flavors of any kind. To score in this classification the lemonade shall test not less than 10.5 degrees Brix; shall contain not less than 0.7 gram of acid per 100 ml of the lemonade, may contain not more than 0.03 ml of recoverable oil per 100 ml of the lemonade; and the Brix-acid ratio shall not exceed 20:1.

(iii) If the prepared lemonade fails to meet the requirements of subdivision (ii) of this subparagraph, a score of 0 to 41 points may be given. Frozen concentrate for lemonade that falls into this classification shall not be graded above "Substandard" regardless of the total score for the product (this is a limiting rule).

(e) *Definition of terms.* (1) "Brix" means the degrees Brix of the lemonade when tested with a Brix hydrometer calibrated at 20° C. (68° F.). If used in testing lemonade at a temperature other than 20° C. (68° F.) the applicable temperature correction shall be made to the reading of the scale as prescribed in "Official Methods of Analysis of the Association of Official Agricultural Chemists." The degrees Brix of lemonade may be determined by any other method which gives equivalent results.

(2) "Acid" means the grams of acid (calculated as anhydrous citric acid) per 100 ml of the prepared lemonade determined by titration with standard sodium hydroxide solution using phenolphtalein as an indicator.

(3) "Brix-acid ratio" means the ratio between the degrees "Brix" as determined in this section and the acid in grams per 100 ml of lemonade.

(4) "Dilution factor" is the value obtained by dividing a volume of lemonade by the volume of concentrate for lemonade used in its preparation when such lemonade is prepared in accordance with the manufacturers directions.

(f) *Explanation of analyses.* Recoverable oil is determined by the following method:

(1) *Equipment.*

Oil separatory trap similar to either of those illustrated in Figure 1[2] and Figure 2:[2]
Gas burner or hot plate.
Ringstand and clamps.
Rubber tubing.
3-liter narrow-neck flask.

[2] Figures 1 and 2 filed as part of the original document.

(2) *Procedure.* Place exactly 1 liter of the concentrate for lemonade with approximately 1 liter of water in a 3-liter flask. Close the stopcock, place distilled water in the graduated tube, run cold water through the condenser from bottom to top, and bring the mixture to a boil. Continue boiling for one hour at the rate of approximately 50 drops per minute. By means of the stopcock, lower the oil into the graduated portion of the separatory trap, remove the trap from the flask, allow it to cool, and record the amount of oil recovered. The number of milliliters of oil recovered divided by 10 times the dilution factor is equivalent to the number of milliliters of oil per 100 milliliters of the lemonade.

(g) *Tolerances for certification of officially drawn samples.* (1) When certifying samples that have been officially drawn and which represent a specific lot of frozen concentrate for lemonade the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, with respect to those factors which are scored:

(i) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

(ii) None of the containers falls more than 4 points below the minimum score for the grade indicated by the average of such total scores;

(iii) None of the containers falls more than one grade below the grade indicated by the average of such total scores;

(iv) The average score of all containers for any factor subject to a limiting rule is within the score range of that factor for the grade indicated by the average of the total scores of the containers comprising the sample; and

(2) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

(h) *Score sheet for frozen concentrate for lemonade.*

| | |
|---|---|
| Size and kind of container | ---- |
| Container mark or identification | ---- |
| Label (including dilution factor) | ---- |
| Liquid measure (fluid ounces) | ---- |
| Brix of the lemonade | ---- |
| Anhydrous citric acid in the lemonade (grams per 100 milliliters) | ---- |

## TITLE 21—FOOD AND DRUGS

### Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

PART 141—TESTS AND METHODS OF ASSAY FOR ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

PART 146—CERTIFICATION OF BATCHES OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

MISCELLANEOUS AMENDMENTS

By virtue of the authority vested in the Secretary by the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended by 61 Stat. 11, 63 Stat. 409, 67 Stat. 389; sec. 701, 52 Stat. 1055; 21 U. S. C. 357, 371; 67 Stat. 18), the regulations for tests and methods of assay for antibiotic and antibiotic-containing drugs (21 CFR, 1952 Supp., Part 141; 18 F. R. 2786) and certification of batches of antibiotic and antibiotic-containing drugs (21 CFR, 1952 Supp., Part 146; 18 F. R. 2786, 3533, 5591) are amended as indicated below:

1. Section 141.62 is amended in the following respects:

a. The headnote is changed to read: "§ 141.62 *Dibenzylethylenediamine dipenicillin G and procaine penicillin for aqueous injection*".

b. Paragraph (c) is amended to read:

(c) *pH.* Proceed as directed in § 141.5 (b), using the undiluted aqueous suspension or the suspension prepared as directed in the labeling for the drug.

c. The following new paragraph is added:

(d) *Moisture (dry mixture of the drug).* Proceed as directed in § 141.26 (e).

2. In § 146.39 *Capsules procaine penicillin in oil*, paragraph (a) *Standards of identity* * * * is amended by changing the figure "1.4 percent" to "2.5 percent", in the third sentence.

3. Section 146.51 (c) (1) (vi) is amended to read:

§ 146.51 *Buffered penicillin powder, penicillin powder with buffered aqueous diluent.* * * *

(c) *Labeling.* * * *

(1) * * *.

(vi) The statement "Expiration date ---------," the blank being filled in with the date which is 24 months after the month during which the batch was certified, except that the blank may be filled in with the date which is 36 months after the month during which the batch was certified if it is crystalline penicillin with no other ingredients, or if the person who requests certification has submitted to the Commissioner results of tests and assays showing that after having been stored for such period of time such drug as prepared by him complies with the standards prescribed by paragraph (a) of this section; and

4. In § 146.57 *Procaine penicillin and streptomycin in oil* * * *, paragraph (a) (2) and (3) is amended to read:

(2) It may contain a suitable and harmless salt of cobalt and/or one or more suitable sulfonamides, each of which, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(3) In lieu of the directions prescribed for procaine penicillin in oil by § 146.45 (c) (1) (ii) and (iv), each package shall bear on the outside wrapper or container and the immediate container the number of units of penicillin per milliliter; the number of milligrams of streptomycin or dihydrostreptomycin per milliliter; if it contains one or more of the active ingredients specified in subparagraph (2) of this paragraph, the name and quantity of each; the statement "For udder instillations of cattle only"; and if it is a multiple-dose container, the statement "Shake well." Each package shall also bear on its label and labeling, if it contains one or more of the other active ingredients specified in subparagraph (2) of this paragraph, after the name "Procaine penicillin and streptomycin in oil" or "Procaine penicillin and dihydrostreptomycin in oil," wherever it appears, the words "with ---------- (the blank being filled in with the common or usual name of each such other ingredient)," in juxtaposition with such name.

5. Section 146.86 is amended in the following respects:

a. The headnote and introduction are amended to read:

§ 146.86 *Dibenzylethylenediamine dipenicillin G and procaine penicillin for aqueous injection.* Dibenzylethylenediamine dipenicillin G and procaine penicillin for aqueous injection conforms to all requirements, and is subject to all procedures, prescribed by § 146.77 for dibenzylethylenediamine dipenicillin G for aqueous injection, except that:

* * * * * *

b. Paragraphs (b) (c), and (d) are renumbered as (c), (d), and (e), respectively, and the following new paragraph (b) is inserted between paragraph (a) and renumered paragraph (c):

(b) If it is the dry mixture of the drug, its moisture content is not more than 6.0 percent.

c. Renumbered paragraph (c) is amended to read:

(c) In lieu of the directions for labeling prescribed by § 146.77 (c) (1) (ii) and (iii), each package shall bear on the outside wrapper or container and the immediate container the number of units of dibenzylethylenediamine dipenicillin G and the number of units of procaine penicillin in each milliliter in the immediate container if it is the aqueous suspension of the drug, or the number of units of dibenzylethylenediamine dipenicillin G and the number of units of procaine penicillin in the immediate container if it is the dry mixture of the drug, and the statement "Expiration date ---------," the blank being filled in, if it is the aqueous suspension of the drug, with the date which is 12 months or if it is the dry mixture of the drug, with the date which is 24 months after the month during which the batch was certified.

d. Renumbered paragraph (d), first sentence, is amended by changing the words "in aqueous suspension" to read "for aqueous injection" and by changing the period at the end of the sentence to a comma and adding the following: "if it is the aqueous suspension of the drug, or the number of units of procaine penicillin in each package of the batch, if it is the dry mixture of the drug."

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371. Interpret or apply sec. 507, 59 Stat. 463, as amended; 21 U. S. C. and Sup. 357)

Notice and public procedure are not necessary prerequisites to the promulgation of this order, and I so find, since it was drawn in collaboration with interested members of the affected industry and since it would be against public interest to delay providing for the amendments set forth above.

This order shall become effective upon publication in the FEDERAL REGISTER, since both the public and the affected industry will benefit by the earliest effective date, and I so find.

Dated: November 12, 1953.

[SEAL] OVETA CULP HOBBY,
*Secretary.*

## TITLE 24—HOUSING AND HOUSING CREDIT

### Chapter II—Federal Housing Administration, Housing and Home Finance Agency

Subchapter B—Property Improvement Loans

PART 204—TITLE I MORTGAGE INSURANCE; RIGHTS AND OBLIGATIONS OF MORTGAGEE UNDER INSURANCE CONTRACT

ANNUAL MORTGAGE INSURANCE PREMIUMS; PREPAYMENT PREMIUMS

1. Section 204.3 is hereby amended to read as follows:

§ 204.3 *Annual mortgage insurance premiums.* (a) The mortgagee shall pay to the Commissioner, either in cash or debentures issued under Title I of the National Housing Act at par plus accrued interest, mortgage insurance premiums in accordance with paragraphs (b) and (c) of this section which shall be calculated in accordance with the amortization provisions of the mortgage, without taking into account delinquent payments or prepayments.

(b) The initial mortgage insurance premium shall be paid on the date on which the insurance becomes effective by endorsement and shall cover the period beginning with the date of insurance endorsement and ending one year after the beginning of amortization. Regardless of whether such period is more or less than one year, a payment shall be made to the Commissioner on account of the initial mortgage insurance premium which payment shall be in an amount equal to ½ percent of the average outstanding principal obligation for the first year of amortization under the mortgage. If such payment is less than the minimum premium or more than the maximum premium prescribed by the act, the initial mortgage insurance premium shall be in the minimum amount prescribed by the act, and the amount of the second premium payment shall be adjusted accordingly; but if such payment is within the limitations prescribed by the act, no adjustment shall be made and the amount of the payment shall be retained by the Commissioner as the initial mortgage insurance premium.

(c) After the payment of the initial mortgage insurance premium and until the mortgage is paid in full or the mortgaged property is acquired by the Commissioner, or until the contract of insurance is otherwise terminated, the mortgagee shall continue to pay annual mortgage insurance premiums to the Commissioner. Such annual premium shall be paid on the anniversary date of the beginning of amortization and shall be in an amount equal to ½ percent of the average outstanding principal obligation for the 12-month period following the date on which the premium becomes payable.

(d) For the purpose of this section the term "beginning of amortization" shall mean the date one month prior to the date of the first monthly payment.

2. Section 204.4 is hereby amended to read as follows:

§ 204.4 *Prepayment premiums.* (a) In the event that the principal obligation of any mortgage accepted for insurance is paid in full prior to maturity, the mortgagee shall within 30 days thereafter notify the Commissioner of the date of prepayment and shall pay to the Commissioner an adjusted premium charge of 1 percent of the original principal amount of the prepaid mortgage.

(b) In no event shall the adjusted premium exceed the aggregate amount of premium charges which would have been payable if the mortgage had continued to be insured until maturity.

(c) No adjusted premium shall be due or payable in the following cases:

(1) Where at the time of such prepayment there is placed on the mortgaged property a new insured mortgage;

(2) Where the final maturity specified in the mortgage is accelerated solely by reason of partial prepayments made by the mortgagor which do not exceed in any one calendar year 15 percent of the original face amount of the mortgage; or by reason of partial prepayments made by the mortgagor in excess of 15 percent made during the period from May 27, 1941 through June 30, 1952;

(3) Where the final maturity specified in the mortgage is accelerated solely by reason of payments to principal to compensate for:

(i) Damage to the mortgaged property;

(ii) The conveyance of the mortgaged property pursuant to condemnation proceedings or in lieu of condemnation proceedings; or

(iii) A release of a part of such property if approved by the Commissioner;

(4) Where payment in full is made pursuant to a court order or of a delinquent mortgage on which foreclosure proceedings have been commenced, or for the purpose of avoiding foreclosure if the transaction is approved by the Commissioner; or

(5) Where payment in full is made within 60 days after the date the mortgage is endorsed for insurance, provided the mortgagee submits to the Commissioner a certificate signed by the mortgagor certifying that such payment was made in connection with the sale of the property to a veteran of World War II for his occupancy as a home.

(d) Upon such prepayment the contract of insurance shall terminate and the Commissioner will refund to the mortgagee for the account of the mortgagor an amount equal to the pro-rata portion of the current annual mortgage insurance premium theretofore paid which is applicable to the portion of the year subsequent to such payment, computed from the first day of the month following the month in which such prepayment occurs, provided that no such refund will be made in any case where the prepayment occurs in the twelfth month of the premium year.

(Sec. 2, 48 Stat. 1246, as amended; 12 U. S. C. 1703. Interpret or apply sec. 102, 64 Stat. 48, 12 U. S. C. 1706c)

Issued at Washington, D. C., November 10, 1953.

GUY T. O. HOLLYDAY,
*Federal Housing Commissioner.*

[F. R. Doc. 53-9686; Filed, Nov. 17, 1953; 8:46 a. m.]

Subchapter C—Mutual Mortgage Insurance

PART 222—MUTUAL MORTGAGE INSURANCE; RIGHTS AND OBLIGATIONS OF THE MORTGAGE UNDER INSURANCE CONTRACT

MISCELLANEOUS AMENDMENTS

1. Section 222.3 is hereby amended to read as follows:

§ 222.3 *Annual mortgage insurance premiums.* (a) The mortgagee shall pay to the Commissioner, either in cash or debentures issued under Title II of the National Housing Act at par plus accrued interest, mortgage insurance premiums in accordance with paragraphs (b) and (c) of this section which shall be calculated in accordance with the amortization provisions of the mortgage, without taking into account delinquent payments or prepayments.

(b) The initial mortgage insurance premium shall be paid on the date on which the insurance becomes effective by endorsement and shall cover the period beginning with the date of insurance endorsement and ending one year after the beginning of amortization. Regardless of whether such period is more or less than one year, a payment shall be made to the Commissioner on account of the initial mortgage insurance premium which payment shall be in an amount equal to ½ percent of the average outstanding principal obligation for the first year of amortization under the mortgage. If such payment is less than the minimum premium or more than the maximum premium prescribed by the act, the initial mortgage insurance premium shall be in the minimum amount prescribed by the act, and the amount of the second premium payment shall be adjusted accordingly; but if such payment is within the limitations prescribed by the act, no adjustment shall be made and the amount of the payment shall be retained by the Commissioner as the initial mortgage insurance premium.

(c) After the payment of the initial mortgage insurance premium and until the mortgage is paid in full or the mortgaged property is acquired by the Commissioner, or until the contract of insurance is otherwise terminated, the mortgagee shall continue to pay annual mortgage insurance premiums to the Commissioner. Such annual premium shall be paid on the anniversary date of the beginning of amortization and shall be in an amount equal to ½ percent of the average outstanding principal obligation for the 12-month period following the date on which the premium becomes payable.

(d) For the purpose of this section the term "beginning of amortization" shall mean the date one month prior to the date of the first monthly payment.

2. Section 222.4 is hereby amended to read as follows:

§ 222.4 *Prepayment premiums.* (a) In the event that the principal obligation of any mortgage accepted for insurance is paid in full prior to maturity, the mortgagee shall within 30 days thereafter notify the Commissioner of the date of prepayment and shall pay to the Commissioner an adjusted premium charge of 1 percent of the original principal amount of the prepaid mortgage.

(b) In no event shall the adjusted premium exceed the aggregate amount of premium charges which would have been payable if the mortgage had continued to be insured until maturity.

(c) No adjusted premium shall be due or payable in the following cases:

(1) Where at the time of such prepayment there is placed on the mortgaged property a new insured mortgage;

(2) Where the final maturity specified in the mortgage is accelerated solely by reason of partial prepayments made by the mortgagor which do not exceed in any one calendar year 15 percent of the original face amount of the mortgage; or by reason of partial prepayments made by the mortgagor in excess of 15 percent made during the period from May 27, 1941 through June 30, 1952;

(3) Where the final maturity specified in the mortgage is accelerated solely by reason of payments to principal to compensate for:

(i) Damage to the mortgaged property;

(ii) The conveyance of the mortgaged property pursuant to condemnation proceedings or in lieu of condemnation proceedings; or

(iii) A release of a part of such property if approved by the Commissioner;

(4) Where payment in full is made pursuant to a court order or of a delinquent mortgage on which foreclosure proceedings have been commenced, or for the purpose of avoiding foreclosure if the transaction is approved by the Commissioner; or

(5) Where payment in full is made within 60 days after the date the mortgage is endorsed for insurance, provided the mortgagee submits to the Commissioner a certificate signed by the mortgagor certifying that such payment was made in connection with the sale of the property to a veteran of World War II for his occupancy as a home.

3. Section 222.5 is hereby amended to read as follows:

§ 222.5 *Pro rata refund in event of prepayment.* Upon such prepayment the contract of insurance shall terminate and the Commissioner will refund to the mortgagee for the account of the mortgagor an amount equal to the pro rata portion of the current annual mortgage insurance premium theretofore paid which is applicable to the portion of the year subsequent to such payment, computed from the first day of the month following the month in which such prepayment occurs, provided that no such refund will be made in any case where the prepayment occurs in the twelfth month of the premium year.

(Sec. 211, as added by sec. 3, 52 Stat. 23; 12 U. S. C. 1715b.

Issued at Washington, D. C., November 10, 1953.

GUY T. O. HOLLYDAY,
*Federal Housing Commissioner.*

Subchapter D—Multifamily and Group Housing Insurance

PART 243—COOPERATIVE HOUSING INSURANCE; RIGHTS AND OBLIGATIONS OF MORTGAGEE UNDER INSURANCE CONTRACT

INSURANCE AND ADJUSTED PREMIUMS ON INDIVIDUAL MORTGAGES

1. Section 243.5 is hereby amended to read as follows:

§ 243.5 *Insurance premium on individual mortgages.* (a) The mortgagee shall pay to the Commissioner, either in cash or debentures issued under Title II of the National Housing Act at par plus accrued interest, mortgage insurance premiums in accordance with paragraphs (b) and (c) of this section which shall be calculated in accordance with the amortization provisions of the mortgage, without taking into account delinquent payments or prepayments.

(b) The initial mortgage insurance premium shall be paid on the date on which the insurance becomes effective by endorsement and shall cover the period beginning with the date of insurance endorsement and ending one year after the beginning of amortization. Regardless of whether such period is more or less than one year, a payment shall be made to the Commissioner on account of the initial mortgage insurance premium which payment shall be in an amount equal to ½ percent of the average outstanding principal obligation for the first year of amortization under the mortgage. If such payment is less than the minimum premium or more than the maximum premium prescribed by the act, the initial mortgage insurance premium shall be in the minimum amount prescribed by the act, and the amount of the second premium payment shall be adjusted accordingly; but if such payment is within the limitations prescribed by the act, no adjustment shall be made and the amount of the payment shall be retained by the Commissioner as the initial mortgage insurance premium.

(c) After the payment of the initial mortgage insurance premium and until the mortgage is paid in full or the mortgaged property is acquired by the Commissioner, or until the contract of insurance is otherwise terminated, the mortgagee shall continue to pay annual mortgage insurance premiums to the Commissioner. Such annual premium shall be paid on the anniversary date of the beginning of amortization and shall be in an amount equal to ½ percent of the average outstanding principal obligation for the 12-month period following the date on which the premium becomes payable.

(d) For the purpose of this section the term "beginning of amortization" shall mean the date one month prior to the date of the first monthly payment.

2. Section 243.6 is hereby amended to read as follows:

§ 243.6 *Adjusted premium on individual mortgages.* (a) In the event that the principal obligation of any mortgage accepted for insurance is paid in full prior to maturity, the mortgagee shall within 30 days thereafter notify the Commissioner of the date of prepayment and shall pay to the Commissioner an adjusted premium charge of 1 percent of the original principal amount of the prepaid mortgage.

(b) In no event shall the adjusted premium exceed the aggregate amount of premium charges which would have been payable if the mortgage had continued to be insured until maturity.

(c) No adjusted premium shall be due or payable in the following cases:

(1) Where at the time of such prepayment there is placed on the mortgaged property a new insured mortgage;

(2) Where the final maturity specified in the mortgage is accelerated solely by reason of partial prepayments made by the mortgagor which do not exceed in any one calendar year 15 percent of the original face amount of the mortgage; or by reason of partial prepayments made by the mortgagor in excess of 15 percent made during the period from May 27, 1941 through June 30, 1952;

(3) Where the final maturity specified in the mortgage is accelerated solely by reason of payments to principal to compensate for:

(i) Damage to the mortgaged property;

(ii) The conveyance of the mortgaged property pursuant to condemnation proceedings or in lieu of condemnation proceedings; or

(iii) A release of a part of such property if approved by the Commissioner;

(4) Where payment in full is made pursuant to a court order or of a delinquent mortgage on which foreclosure proceedings have been commenced, or for the purpose of avoiding foreclosure if the transaction is approved by the Commissioner; or

(5) Where payment in full is made within 60 days after the date the mortgage is endorsed for insurance, provided the mortgagee submits to the Commissioner a certificate signed by the mortgagor certifying that such payment was made in connection with the sale of the property to a veteran of World War II for his occupancy as a home.

(d) Upon such prepayment the contract of insurance shall terminate and the Commissioner will refund to the mortgagee for the account of the mortgagor an amount equal to the pro-rata portion of the current annual mortgage insurance premium theretofore paid which is applicable to the portion of the year subsequent to such payment, computed from the first day of the month following the month in which such prepayment occurs, provided that no such refund will be made in any case where the prepayment occurs in the twelfth month of the premium year.

(Sec. 3, 52 Stat. 23; 12 U. S. C. 1715b. Interpret or apply sec. 114, 64 Stat. 54; 12 U. S. C. 1715e)

Issued at Washington, D. C., November 10, 1953.

GUY T. O. HOLLYDAY,
*Federal Housing Commissioner.*

Subchapter H—War Housing Insurance

PART 277—WAR HOUSING INSURANCE; RIGHTS AND OBLIGATIONS OF MORTGAGEE UNDER INSURANCE CONTRACT

PREMIUMS; TRANSFER OF PROPERTY TO THE COMMISSIONER; CONDITIONS OF DEFAULT IN MORTGAGE

1. Section 277.3 is hereby amended to read as follows:

§ 277.3 *Premiums.* (a) The mortgagee shall pay to the Commissioner, either in cash or debentures issued under Title VI of the National Housing Act at par plus accrued interest, mortgage insurance premiums in accordance with paragraphs (b) and (c) of this section which shall be calculated in accordance with the amortization provisions of the mortgage, without taking into account delinquent payments or prepayments.

(b) The initial mortgage insurance premium shall be paid on the date on which the insurance becomes effective by endorsement and shall cover the period beginning with the date of insurance endorsement and ending one year after the beginning of amortization. Regardless of whether such period is more or less than one year, a payment shall be made to the Commissioner on account of the initial mortgage insurance premium which payment shall be in an amount equal to ½ percent of the average outstanding principal obligation for the first year of amortization under the mortgage. If such payment is less than the minimum premium or more than the maximum premium prescribed by the act, the initial mortgage insurance premium shall be in the minimum amount prescribed by the act, and the amount of the second premium payment shall be adjusted accordingly; but if such payment is within the limitations prescribed by the act, no adjustment shall be made and the amount of the payment shall be retained by the Commissioner as the initial mortgage insurance premium.

(c) After the payment of the initial mortgage insurance premium and until the mortgage is paid in full or the mortgaged property is acquired by the Commissioner, or until the contract of insurance is otherwise terminated, the mortgagee shall continue to pay annual mortgage insurance premiums to the Commissioner. Such annual premium shall be paid on the anniversary date of the beginning of amortization and shall be in an amount equal to ½ percent of the average outstanding principal obligation for the 12-month period following the date on which the premium becomes payable.

(d) For the purpose of this section the term "beginning of amortization" shall mean the date one month prior to the date of the first monthly payment.

(e) In the event that the principal obligation of any mortgage accepted for insurance is paid in full prior to maturity, the mortgagee shall within 30 days thereafter notify the Commissioner of the date of prepayment and shall pay to the Commissioner an adjusted premium charge of 1 percent of the original principal amount of the prepaid mortgage.

(f) In no event shall the adjusted premium exceed the aggregate amount of premium charges which would have been payable if the mortgage had continued to be insured until maturity.

(g) No adjusted premium shall be due or payable in the following cases:

(1) Where at the time of such prepayment there is placed on the mortgaged property a new insured mortgage;

(2) Where the final maturity specified in the mortgage is accelerated solely by reason of partial prepayments made by the mortgagor which do not exceed in any one calendar year 15 percent of the original face amount of the mortgage; or by reason of partial prepayments made by the mortgagor in excess of 15 percent made during the period from May 27, 1941 through June 30, 1952;

(3) Where the final maturity specified in the mortgage is accelerated solely by reason of payments to principal to compensate for:

(i) Damage to the mortgaged property;

(ii) The conveyance of the mortgaged property pursuant to condemnation proceedings or in lieu of condemnation proceedings; or

(iii) A release of a part of such property if approved by the Commissioner;

(4) Where payment in full is made pursuant to a court order or of a delinquent mortgage on which foreclosure proceedings have been commenced, or for the purpose of avoiding foreclosure if the transaction is approved by the Commissioner; or

(5) Where payment in full is made within 60 days after the date the mortgage is endorsed for insurance, provided the mortgagee submits to the Commissioner a certificate signed by the mortgagor certifying that such payment was made in connection with the sale of the property to a veteran of World War II for his occupancy as a home.

(h) Upon such prepayment the contract of insurance shall terminate and the Commissioner will refund to the mortgagee for the account of the mortgagor an amount equal to the pro-rata portion of the current annual mortgage insurance premium theretofore paid which is applicable to the portion of the year subsequent to such payment, computed from the first day of the month following the month in which such prepayment occurs, provided that no such refund will be made in any case where the prepayment occurs in the twelfth month of the premium year.

2. Section 277.7 (c) is hereby amended to read as follows:

§ 277.7 *Transfer of property to the Commissioner; conditions of default in mortgage.* * * *

(c) For the purposes of this section, the date of default shall be considered as 30 days after (1) the first uncorrected failure to perform a covenant or obligation, or (2) the first failure to make a monthly payment which subsequent payments by the mortgagor are insufficient to cover when applied to the overdue monthly payments in the order in which they became due: *Provided, however,* That a mortgagee may, with and subject to the written consent of the Commissioner, apply partial payments to delinquent interest at a rate not in excess of the interest rate applicable to debentures to which the mortgagee may be entitled under the provisions of § 277.8 (a) (1), to the exclusion of prior delinquent principal payments, in which event the date of default shall be 30 days after the due date of the earliest monthly payment, any part of which remains unpaid.

(Sec. 607, as added by sec. 1, 55 Stat. 61; 12 U. S. C. and Sup. 1742)

Issued at Washington, D. C., November 10, 1953.

GUY T. O. HOLLYDAY,
*Federal Housing Commissioner.*

[F. R. Doc. 53-9689; Filed, Nov. 17, 1953; 8:47 a. m.]

(b) The initial mortgage insurance premium shall be paid on the date on which the insurance becomes effective by endorsement and shall cover the period beginning with the date of insurance endorsement and ending one year after the beginning of amortization. Regardless of whether such period is more or less than one year, a payment shall be made to the Commissioner on account of the initial mortgage insurance premium which payment shall be in an amount equal to ½ percent of the average outstanding principal obligation for the first year of amortization under the mortgage. If such payment is less than the minimum premium or more than the maximum premium prescribed by the act, the initial mortgage insurance premium shall be in the minimum amount prescribed by the act, and the amount of the second premium payment shall be adjusted accordingly; but if such payment is within the limitations prescribed by the act, no adjustment shall be made and the amount of the payment shall be retained by the Commissioner as the initial mortgage insurance premium.

(c) After the payment of the initial mortgage insurance premium and until the mortgage is paid in full or the mortgaged property is acquired by the Commissioner, or until the contract of insurance is otherwise terminated, the mortgagee shall continue to pay annual mortgage insurance premiums to the Commissioner. Such annual premium shall be paid on the anniversary date of the beginning of amortization and shall be in an amount equal to ½ percent of the average outstanding principal obligation for the 12-month period following the date on which the premium becomes payable.

(d) For the purpose of this section the term "beginning of amortization" shall mean the date one month prior to the date of the first monthly payment.

2. Section 244.4 is hereby amended to read as follows:

§ 244.4 *Prepayment premiums.* (a) In the event that the principal obligation of any mortgage accepted for insurance is paid in full prior to maturity, the mortgagee shall within 30 days thereafter notify the Commissioner of the date of prepayment and shall pay to the Commissioner an adjusted premium charge of 1 percent of the original principal amount of the prepaid mortgage.

(b) In no event shall the adjusted premium exceed the aggregate amount of premium charges which would have been payable if the mortgage had continued to be insured until maturity.

(c) No adjusted premium shall be due or payable in the following cases:

(1) Where at the time of such prepayment there is placed on the mortgaged property a new insured mortgage;

(2) Where the final maturity specified in the mortgage is accelerated solely by reason of partial prepayments made by the mortgagor which do not exceed in any one calendar year 15 percent of the original face amount of the mortgage; or by reason of partial prepayments made by the mortgagor in excess of 15 percent made during the period from May 27, 1941 through June 30, 1952;

(3) Where the final maturity specified in the mortgage is accelerated solely by reason of payments to principal to compensate for:

(i) Damage to the mortgaged property;

(ii) The conveyance of the mortgaged property pursuant to condemnation proceedings or in lieu of condemnation proceedings; or

(iii) A release of a part of such property if approved by the Commissioner;

(4) Where payment in full is made pursuant to a court order or of a delinquent mortgage on which foreclosure proceedings have been commenced, or for the purpose of avoiding foreclosure if the transaction is approved by the Commissioner; or

(5) Where payment in full is made within 60 days after the date the mortgage is endorsed for insurance, provided the mortgagee submits to the Commissioner a certificate signed by the mortgagor certifying that such payment was made in connection with the sale of the property to a veteran of World War II for his occupancy as a home.

(d) Upon such prepayment the contract of insurance shall terminate and the Commissioner will refund to the mortgagee for the account of the mortgagor an amount equal to the pro-rata portion of the current annual mortgage insurance premium theretofore paid which is applicable to the portion of the year subsequent to such payment, computed from the first day of the month following the month in which such prepayment occurs, provided that no such refund will be made in any case where the prepayment occurs in the twelfth month of the premium year.

Subchapter K—Single-Family Project Loans, War Housing Insurance

PART 289—PROJECT AND INDIVIDUAL MORTGAGES; RIGHTS AND OBLIGATIONS OF MORTGAGEE

INSURANCE PREMIUMS AND ADJUSTED PREMIUM CHARGE FOR INDIVIDUAL MORTGAGES

1. Section 289.4 is hereby amended to read as follows:

§ 289.4 *Insurance premiums for individual mortgages.* (a) The mortgagee shall pay to the Commissioner, either in cash or debentures issued under Title VI of the National Housing Act at par plus accrued interest, mortgage insurance premiums in accordance with paragraphs (b) and (c) of this section which shall be calculated in accordance with the amortization provisions of the mortgage, without taking into account delinquent payments or prepayments.

(b) The initial mortgage insurance premium shall be paid on the date on which the insurance becomes effective by endorsement and shall cover the period beginning with the date of insurance endorsement and ending one year after the beginning of amortization. Regardless of whether such period is more or less than one year, a payment shall be made to the Commissioner on account of the initial mortgage insurance premium which payment shall be in an amount equal to ½ percent of the average outstanding principal obligation for the first year of amortization under the mortgage. If such payment is less than the minimum premium or more than the maximum premium prescribed by the act, the initial mortgage insurance premium shall be in the minimum amount prescribed by the act, and the amount of the second premium payment shall be adjusted accordingly; but if such payment is within the limitations prescribed by the act, no adjustment shall be made and the amount of the payment shall be retained by the Commissioner as the initial mortgage insurance premium.

(c) After the payment of the initial mortgage insurance premium and until the mortgage is paid in full or the mortgaged property is acquired by the Commissioner, or until the contract of insurance is otherwise terminated, the mortgagee shall continue to pay annual mortgage insurance premiums to the Commissioner. Such annual premium shall be paid on the anniversary date of the beginning of amortization and shall be in an amount equal to ½ percent of the average outstanding principal obligation for the 12-month period following the date on which the premium becomes payable.

(d) For the purpose of this section the term "beginning of amortization" shall mean the date one month prior to the date of the first monthly payment.

2. Section 289.5 is hereby amended to read as follows:

§ 289.5 *Adjusted premium charge for individual mortgages.* (a) In the event that the principal obligation of any mortgage accepted for insurance is paid in full prior to maturity, the mortgagee shall within 30 days thereafter notify the Commissioner of the date of prepayment and shall pay to the Commissioner an adjusted premium charge of 1 percent of the original principal amount of the prepaid mortgage.

(b) In no event shall the adjusted premium exceed the aggregate amount of premium charges which would have been payable if the mortgage had continued to be insured until maturity.

(c) No adjusted premium shall be due or payable in the following cases:

(1) Where at the time of such prepayment there is placed on the mortgaged property a new insured mortgage;

(2) Where the final maturity specified in the mortgage is accelerated solely by reason of partial prepayments made by the mortgagor which do not exceed in any one calendar year 15 percent of the original face amount of the mortgage; or by reason of partial prepayments made by the mortgagor in excess of 15 percent made during the period from May 27, 1941 through June 30, 1952;

(3) Where the final maturity specified in the mortgage is accelerated solely by reason of payments to principal to compensate for:

(i) Damage to the mortgaged property;

(ii) The conveyance of the mortgaged property pursuant to condemnation proceedings or in lieu of condemnation proceedings; or

(iii) A release of a part of such property if approved by the Commissioner;

(4) Where payment in full is made pursuant to a court order or of a delinquent mortgage on which foreclosure proceedings have been commenced, or for the purpose of avoiding foreclosure if the transaction is approved by the Commissioner; or

(5) Where payment in full is made within 60 days after the date the mortgage is endorsed for insurance, provided the mortgagee submits to the Commissioner a certificate signed by the mortgagor certifying that such payment was made in connection with the sale of the property to a veteran of World War II for his occupancy as a home.

(d) Upon such prepayment the contract of insurance shall terminate and the Commissioner will refund to the mortgagee for the account of the mortgagor an amount equal to the pro-rata portion of the current annual mortgage insurance premium theretofore paid which is applicable to the portion of the year subsequent to such payment, computed from the first day of the month following the month in which such prepayment occurs, provided that no such refund will be made in any case where the prepayment occurs in the twelfth month of the premium year.

Subchapter N—National Defense Housing Insurance

PART 295—NATIONAL DEFENSE HOUSING INSURANCE; RIGHTS AND OBLIGATIONS OF MORTGAGEE UNDER INSURANCE CONTRACT

MISCELLANEOUS AMENDMENTS

1. Section 295.3 is hereby amended to read as follows:

§ 295.3 *Annual mortgage insurance premiums.* (a) The mortgagee shall pay to the Commissioner, either in cash or debentures issued under Title IX of the National Housing Act at par plus accrued interest, mortgage insurance premiums in accordance with paragraphs (b) and (c) of this section which shall be calculated in accordance with the amortization provisions of the mortgage, without taking into account delinquent payments or prepayments.

(b) The initial mortgage insurance premium shall be paid on the date on which the insurance becomes effective by endorsement and shall cover the period beginning with the date of insurance endorsement and ending one year after the begining of amortization. Regardless of whether such period is more or less than one year, a payment shall be made to the Commissioner on account of the initial mortgage insurance premium which payment shall be in an amount equal to ½ percent of the average outstanding principal obligation for the first year of amortization under the mortgage. If such payment is less than the minimum premium or more than the maximum premium prescribed by the act, the initial mortgage insurance premium shall be in the minimum amount prescribed by the act, and the amount of the second premium payment shall be adjusted accordingly; but if such payment is within the limitations prescribed by the act, no adjustment shall be made and the amount of the payment shall be retained by the Commissioner as the initial mortgage insurance premium.

(c) After the payment of the initial mortgage insurance premium and until the mortgage is paid in full or the mortgaged property is acquired by the Commissioner, or until the contract of insurance is otherwise terminated, the mortgagee shall continue to pay annual mortgage insurance premiums to the Commissioner. Such annual premium shall be paid on the anniversary date of the beginning of amortization and shall be in an amount equal to ½ percent of the average outstanding principal obligation for the 12-month period following the date on which the premium becomes payable.

(d) For the purpose of this section the term "beginning of amortization" shall mean the date one month prior to the date of the first monthly payment.

2. Section 295.4 is hereby amended to read as follows:

§ 295.4 *Prepayment premiums.* (a) In the event that the principal obligation of any mortgage accepted for insurance is paid in full prior to maturity, the mortgagee shall within 30 days thereafter notify the Commissioner of the date of prepayment and shall pay to the Commissioner an adjusted premium charge of 1 percent of the original principal amount of the prepaid mortgage.

(b) In no event shall the adjusted premium exceed the aggregate amount of premium charges which would have been payable if the mortgage had continued to be insured until maturity.

(c) No adjusted premium shall be due or payable in the following cases:

(1) Where at the time of such prepayment there is placed on the mortgaged property a new insured mortgage;

(2) Where the final maturity specified in the mortgage is accelerated solely by reason of partial prepayments made by the mortgagor which do not exceed in any one calendar year 15 percent of the original face amount of the mortgage; or by reason of partial prepayments made by the mortgagor in excess of 15 percent made during the period from May 27, 1941 through June 30, 1952;

(3) Where the final maturity specified in the mortgage is accelerated solely by reason of payments to principal to compensate for—

(i) Damage to the mortgaged property;

(ii) The conveyance of the mortgaged property pursuant to condemnation proceedings or in lieu of condemnation proceedings; or

(iii) A release of a part of such property if approved by the Commissioner;

(4) Where payment in full is made pursuant to a court order or of a delinquent mortgage on which foreclosure proceedings have been commenced, or for the purpose of avoiding foreclosure if the transaction is approved by the Commissioner; or

(5) Where payment in full is made within 60 days after the date the mortgage is endorsed for insurance, provided the mortgagee submits to the Commissioner a certificate signed by the mortgagor certifying that such payment was made in connection with the sale of the property to a veteran of World War II for his occupancy as a home.

3. Section 295.5 is hereby amended to read as follows:

§ 295.5 *Pro rata refund in event of prepayment.* Upon such prepayment the contract of insurance shall terminate and the Commissioner will refund to the mortgagee for the account of the mortgagor an amount equal to the pro rata portion of the current annual mortgage insurance premium theretofore paid which is applicable to the portion of the year subsequent to such payment, computed from the first day of the month following the month in which such prepayment occurs, provided that no such refund will be made in any case where the prepayment occurs in the twelfth month of the premium year.

4. Section 295.10 (c) is hereby amended to read as follows:

§ 295.10 *Transfer of property to the Commissioner; conditions of default in mortgage.* • • •

(c) For the purpose of this section, the date of default shall be considered

as 30 days after (a) the first uncorrected failure to perform a covenant or obligation, or (b) the first failure to make a monthly payment which subsequent payments by the mortgagor are insufficient to cover when applied to the overdue monthly payments in the order in which they became due: *Provided, however,* That a mortgagee may, with and subject to the written consent of the Commissioner, apply partial payments to delinquent interest at a rate not in excess of the interest rate applicable to debentures to which the mortgagee may be entitled under the provisions of § 295.11 (a) (1), to the exclusion of prior delinquent principal payments, in which event the date of default shall be 30 days after the due date of the earliest monthly payment, any part of which remains unpaid.

# TITLE 49—TRANSPORTATION

## Chapter I—Interstate Commerce Commission

Subchapter B—Carriers by Motor Vehicle

PART 211—SCOPE OF OPERATING AUTHORITY; ROUTES

SERVICE AT MILITARY INSTALLATIONS BY MOTOR CARRIERS

At a session of the Interstate Commerce Commission, Division 5, held at its office in Washington, D. C., on the 3d day of November A. D. 1953.

The above-entitled matter being under consideration:

It appearing that the Commission has received numerous representations from interested parties, particularly the Department of Defense, urging adoption of rules and regulations to provide, in effect, that if entrance to a military installation can be made through a gate within the scope of a motor carrier's authority and after issuance of the authority such gate is closed or for some other reason not within the carrier's control it is unable to use that entrance, it may use other entrances to continue serving the installation;

It further appearing that in many instances gates through which motor carriers at the time their authority was issued could serve military installations have since been closed or their use prohibited in the transportation of certain commodities, thereby leaving such carriers without authority to continue serving such installation; that in such instances the carriers must either discontinue the service in question or obtain temporary authority from this Commission to continue that service; that the entry of a general order is warranted for the purpose of prescribing and publishing rules and regulations to permit motor carriers in such circumstances to use other gates, without obtaining prior authority therefor, to continue service at such installations; that the publication of such rules and regulations would relieve the carriers and the Commission of the unnecessary burden of processing applications for temporary authority pertaining to such situations; and that few, if any, carriers would be adversely affected by such action;

And it further appearing that the rules and regulations set forth in the next succeeding paragraphs hereof are reasonable; that the use of entrances to military installations through gates not within the scope of authority held by motor carriers, under the conditions described herein below, is or will be required by public convenience and necessity, in the case of common carriers, and consistent with the public interest and the National Transportation Policy declared in the Interstate Commerce Act, in the case of contract carriers, and the Commission so finding; and that as the said rules and regulations merely relieve from a requirement in the public interest, notice and public procedure are unnecessary and undesirable and would only serve to delay the effectiveness of said rules and regulations; *Therefore, it is ordered,* That:

§ 211.9 *Service at military installation by motor carriers.* (a) *Conditions.* If entrance to a military installation can be made through a gate within the scope of authority held by a motor carrier pursuant to a certificate or permit issued by this Commission, or under decisions of the Commission relating to certificates and permits, and thereafter such entrance should be closed or for some other reason beyond the carrier's control it is unable to use that entrance, it may use other gates to continue serving the installation, subject in all instances to the following conditions:

(1) The carrier shall not travel more than 20 highway miles over public highways outside the scope of its certificate or permit or the territory it is permitted to serve under decisions of the Commission relating to certificates and permits.

(2) The carrier shall give notice to the Commission, by letter, (i) of the closing of the gate used by it or of the circumstances beyond its control which prevent the use of such gate by the carrier in serving the particular military installation involved, and (ii) of the duration of the closing of the gate or the condition which prevents its use.

(3) The letter must be accompanied by a map on which shall be clearly shown in one color the exact location of the gate within the scope of the carrier's authority and in another color the gate or gates it proposes to use, with the highway mileage indicated in each instance.

(4) The letter shall contain a statement to the effect that the carrier filing the notice will continue to furnish reasonable and adequate service at all points it is now authorized to serve, that it will not serve new points or points it is not now authorized to serve, and that the use of the gate or gates indicated will not enable the carrier to engage in transportation between any points where because of the circuity of its present route,

or otherwise, such operation is not now practicable.

(5) The right to operate in the manner indicated in this paragraph shall continue only so long as the carrier is performing service authorized under the Interstate Commerce Act, and only so long as the conditions set forth in this paragraph are observed.

(6) Operations conducted pursuant to this section shall be subject to such further terms, conditions, and limitations as the Commission, in the future, may find it necessary to impose or attach to the exercise of the privileges authorized in this paragraph.

The Commission may forbid operations in accordance with this section whenever in its opinion such operations are otherwise unreasonable or undesirable.

*It is further ordered*, That this order shall become effective December 14, 1953, unless prior thereto it is otherwise ordered by this Commission.

Notice of this order shall be given to motor carriers and the general public by depositing a copy in the office of the Secretary of the Commission, Washington, D. C., and by filing a copy thereof with the Director, Division of Federal Register.

(49 Stat. 546, as amended; 49 U. S. C. 304. Interprets or applies 49 Stat. 552, as amended; 553, as amended; 49 U. S. C. 308, 309.)

By the Commission, Division 5.

[SEAL] GEORGE W. LAIRD, *Secretary.*

# PROPOSED RULE MAKING

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

### [ 7 CFR Part 814 ]

1953 SUGAR QUOTA FOR MAINLAND CANE SUGAR AREA

NOTICE OF HEARING ON PROPOSED ALLOTMENT

Pursuant to the authority contained in the Sugar Act of 1948, as amended (61 Stat 922, as amended by 65 Stat. 318, 7 U. S. C. Sup. 1100), and in accordance with the applicable rules of practice and procedure (12 F. R. 8225, 13 F. R. 127, 2063; 7 CFR Part 801, et seq.), notice is hereby given that a public hearing will be held in the Department of Agriculture, Room 240-W, Administration Building, Washington, D. C., on November 24, 1953, beginning at 9:30 a. m., e. s. t.

The purpose of such hearing is to receive evidence relating to the revision of Sugar Regulation 814.20 (18 F. R. 5289) which allots the 1953 sugar quota for the mainland cane sugar area. The sugar quota for the mainland cane sugar area was recently increased by 7,531 short tons, raw value, as a result of an additional deficit in the quota for the domestic beet sugar area, and one allottee under Sugar Regulation 814.20 has notified the Department that it will not market 660 short tons, raw value, of the quantity heretofore allotted to it. It is proposed to revise Sugar Regulation 814.20 by allotting these additional quantities of sugar on the same basis (using the same data) as the original allotments were made.

It is necessary to revise those allotments as soon as possible in order that processors may market within this quota year the additional quantities of sugar to be allotted to them. Accordingly, it is hereby determined that an emergency exists which requires the shorter period of notice provided for herein which is deemed to be reasonable under the circumstances.

Issued this 16th day of November 1953. Witness my hand and seal of the Department of Agriculture.

[SEAL] TRUE D. MORSE, *Acting Secretary of Agriculture.*

[F. R. Doc. 53-9748; Filed, Nov. 17, 1953; 8:57 a. m.]

### [ 7 CFR Part 994 ]

HANDLING OF PECANS GROWN IN GEORGIA, ALABAMA, FLORIDA, MISSISSIPPI, AND SOUTH CAROLINA

EXPENSES OF PECAN ADMINISTRATIVE COMMITTEE AND RATE OF ASSESSMENT FOR FISCAL PERIOD BEGINNING OCTOBER 1, 1953

Notice is hereby given that the Department is considering the issuance of the proposed administrative rule herein set forth pursuant to the provisions of Marketing Agreement No. 111 and Order No. 94, regulating the handling of pecans grown in Georgia, Alabama, Florida, Mississippi, and South Carolina (7 CFR, 1952 Rev., Part 994), effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

Prior to the final issuance of such rule, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing to the Director, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C., and which are received not later than the close of business of the 10th day after publication of this notice in the FEDERAL REGISTER, except that if the 10th day after publication should fall on a holiday, Saturday, or Sunday, such submission may be received by the Director not later than the close of business of the next following work day.

Pursuant to the provisions of the aforesaid agreement and order the Pecan Administrative Committee, the administrative agency thereunder, at its meeting at Albany, Georgia, on September 30, 1953, recommended a budget of expenses of $32,000 and an assessment rate of 16 cents per hundred pounds of pecans handled for the fiscal period beginning October 1, 1953. In making the foregoing recommendations, the Committee took into consideration its estimate that 20,000,000 pounds of pecans will be handled for distribution as unshelled pecans during the aforesaid fiscal period. The proposed rate of assessment of 16 cents per hundred pounds of pecans handled, when applied to this estimated quantity, will provide sufficient funds to cover the proposed expenses of $32,000, and such expenses and rate of assessment appear to be reasonable. The proposed budget of expenses is $1,200 higher, but the proposed rate of assessment is 6 cents per hundred pounds lower, than the respective budget of expenses and rate of assessment approved for the past fiscal period which ended September 20, 1953. Actual expenditures for the past fiscal period approximated $27,600.

The proposed rule is as follows:

§ 994.304 *Expenses for the fiscal period beginning October 1, 1953, and rate of assessment*—(a) *Expenses.* Expenses in the amount of $32,000 are reasonable and likely to be incurred by the Pecan Administrative Committee for its maintenance and functioning during the fiscal period beginning October 1, 1953; and

(b) *Rate of assessment.* The rate of assessment to be paid, in accordance with the applicable provisions of said marketing agreement and order, by each handler who first handles unshelled pecans shall be 16 cents per hundred pounds of assessable unshelled pecans handled by him as the first handler thereof during the fiscal period beginning October 1, 1953.

Issued at Washington, D. C., this 13th day of November 1953.

[SEAL] S. R. SMITH, *Director, Fruit and Vegetable Branch.*

[F. R. Doc. 53-9716; Filed, Nov. 17, 1953, 8:52 a. m.]

## SECURITIES AND EXCHANGE COMMISSION

### [ 17 CFR Part 230 ]

GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

REGULATION C—REGISTRATION

Notice is hereby given that the Securities and Exchange Commission has under consideration proposals to adopt § 230.415 (Rule 415) under the Securities Act of 1933 relating to competitive bidding registration statements, to adopt amendments to §§ 230.424, 230.455, 230.471 and 230.472 (Rules 424, 455, 471 and 472) and to rescind § 230.460 (Rule 460).

The proposals are made pursuant to the provisions of sections 7, 8, 10, and 19 (a) of the Securities Act of 1933.

The present practice where securities are offered at competitive bidding requires that the registration statement become effective prior to the invitation for bids, and a post-effective amendment be filed at the time bids are opened, to reflect the results of the bidding. An order of the Commission is issued declaring the registration statement effective and an order is subsequently issued declaring the post-effective amendment effective. In most cases, the post-effective amendment makes no change in the effective registration statement except to reflect the results of the bidding.

The proposed new Rule 415 would modify the existing procedure by providing that if specified conditions are met the amendment reflecting the results of the bidding would become effective without further order on filing with the Commission or a regional office. In addition, the amended Rule 471 would permit the amendment to be signed by the agent for service and the amended Rule 472 would not require the simultaneous filing of five copies of the prospectus.

The proposed new Rule 415 would codify the existing practice of requiring that the registration statement in all competitive bidding cases contain an undertaking to file an amendment to reflect the results of the bidding. Under the proposed new filing procedure, it would not be possible for the Commission to consider the adequacy of the distribution of bidding prospectuses, as it has in the past (see Release No. 3453, part IV). The rule would, therefore, require an additional undertaking intended to insure a minimum distribution as a condition to the use of the new filing procedure.

Paragraph (c) of the proposed rule would have principally a clarifying effect. The Commission's position is that when a registration statement becomes initially effective, the prohibitions of section 5 (a) of the act cease to apply in the absence of action under section 8 of the act; that the bidding prospectus meets the requirements of section 10 of the act prior to the acceptance of a bid; and that after the acceptance of a bid, a prospectus does not meet the requirements of section 10 of the act unless it reflects the results of the bidding and otherwise complies with the applicable form and regulations. The Commission, moreover, construes section 5 (b) (2) of the act to require that the delivered prospectus meet the requirements of section 10 at the time the security is carried or caused to be carried through the mails or in interstate commerce and similarly construes section 2 (10) (a) of the act to require that the delivered prospectus meet the requirements of section 10 of the act at the time of making the other communication referred to in section 2 (10) (a) of the act.

The proposed rule should simplify the registration procedure in competitive bidding cases to a substantial degree, as well as clarify the status of the registration statement and the prospectuses under section 5 of the act. By eliminating the present practice of requiring an order declaring a post-effective amendment effective, the proposed rule should avoid the delay and attendant uncertainty which now occur between the filing and effectiveness of the amendment. Further, by permitting a filing in a regional office, the rule should permit a more rapid and less onerous filing and effectiveness. If the rule is adopted, the Commission may administratively request that it be advised informally, as at present, of the results of the bidding, as promptly as practicable.

If the proposed Rule 415 is adopted it is proposed to amend Rule 455 to make its filing requirements consistent with those to be set forth in Rule 415.

The Commission also has under consideration proposals (a) to amend Rule 424 to provide for the filing of 25, instead of 20, copies of a prospectus, to make it clear that bidding prospectuses need not usually be filed under the rule, and to permit a revised prospectus to be used if it is filed or mailed for filing prior to its use and (b) to rescind Rule 460. In almost all cases, the statement required by Rule 460 appears no longer to serve a useful purpose since the required information, to the extent that it is meaningful, should appear in a prospectus or in a supplement filed under Rule 424.

The text of the proposed Rule 415 and of the proposed amendments to Rules 424, 455, 471, and 472 are as follows:

§ 230.415 *Competitive bidding registration statements.* (a) A registration statement covering securities to be sold at competitive bidding, the terms of which require that each bid be for the purchase of the entire amount of one or more of the issues registered, shall contain undertakings by the registrant (1) to file an amendment to the registration statement reflecting the results of the bidding and related matters to the extent required by the applicable form, not later than the first use after the acceptance of a bid of a prospectus relating to the registered securities, and (2) to use its best efforts to distribute, as soon as practicable after the registration statement has become effective, to prospective bidders, underwriters, and dealers, a reasonable number of copies of the prospectus contained in the registration statement, together with any supplements thereto. Any order declaring the registration statement effective shall be deemed to declare an amendment to the registration statement filed pursuant to the first such undertaking effective in accordance with paragraph (b) of this section.

(b) An amendment to such a registration statement filed pursuant to the undertaking referred to in paragraph (a) (1) of this section (which may make such other changes in the registration statement as the registrant deems appropriate) shall become effective at the time such amendment is filed with the Commission or with a regional office of the Commission. The amendment shall be accompanied by the consent of the managing underwriter, acting on behalf of all principal underwriters, to the filing thereof.

(c) When such a registration statement becomes effective, the prohibitions of section 5 (a) of the act shall cease to apply to the securities registered in the absence of proceedings under section 8 of the act. A prospectus relating to the registered securities, when used prior to the acceptance of a bid, need not contain information dependent upon the determination of the offering price or the acceptance of the bid, in order to meet the requirements of section 10 of the act. A prospectus, when used after the acceptance of a bid, shall not be deemed to meet the requirements of section 10 of the act unless (1) an amendment to the registration statement has been filed pursuant to the undertaking referred to in paragraph (a) (1) of this section, and (2) the prospectus reflects the information contained in the amendment to the extent required by the applicable form.

§ 230.424 *Filing of prospectuses; number of copies.* • • •

(b) Within 5 days after the commencement of a public offering, 25 copies of each form of prospectus used in connection with such offering shall be filed with the Commission in the exact form in which it was used; *Provided, however*, That this paragraph shall not apply in respect of a form of prospectus contained in a registration statement covering securities to be offered at competitive bidding intended for use prior to the acceptance of a bid.

(c) No prospectus which purports to comply with section 10 of the act and which varies from any form of prospectus filed pursuant to paragraph (b) of this section shall be used until 25 copies thereof have been filed with, or mailed for filing to, the Commission, together with 5 copies of a cross reference sheet similar to that required by § 230.404 (c); *Provided, however*, That this paragraph shall not apply in respect of a form of prospectus contained in a registration statement covering securities to be offered at competitive bidding intended for use prior to the acceptance of a bid.

§ 230.455 *Place of filing.* All registration statements and other papers filed with the Commission shall be filed at its principal office, except as otherwise provided in § 230.415. Such material may be filed by delivery to the Commission through the mails or otherwise.

§ 230.471 *Signatures to amendments.* (a) Except as provided in paragraph (b) of this section and § 230.478, every amendment to a registration statement shall be signed by the persons specified in section 6 (a) of the act. At least one copy of every amendment filed with the Commission shall be signed. If the amendment is typewritten, the original "ribbon" copy shall be signed. Unsigned copies shall be conformed.

(b) A registration statement filed in connection with the registration of securities to be sold at competitive bidding may expressly confer authorization upon the registrant and upon the agent for service named in the registration statement to amend the registration statement in accordance with the undertaking

required by § 230.415 (a) (1). The authorization shall be substantially in the following form:

Each person whose signature appears below hereby authorizes the registrant and the agent for service named in the registration statement to amend the registration statement pursuant to the above undertaking.

§ 230.472 *Filing of amendments; number of copies.* • • •

(b) Where an amendment relates to the prospectus, five copies of the amended prospectus shall be filed in addition to the three copies required by paragraph (a) of this section. If the amendment results in a change in the cross reference sheet filed pursuant to § 230.404 (c) a copy of an amended cross reference sheet shall be filed with each copy of the amended prospectus. The first sentence of this paragraph shall not apply to amendments filed pursuant to the undertaking referred to in § 230.415 (a) (1).

All interested persons are invited to submit data, views and comments on these proposals, in writing, to the Secretary, Securities and Exchange Commission, at its principal office, 425 Second Street NW., Washington 25, D. C., on or before December 11, 1953.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

REGULATION AND EXEMPTION OF VARIOUS FINANCIAL TRANSACTIONS

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the Securities and Exchange Commission has under consideration a proposal to amend § 250.50 (Rule U-50) under the Public Utility Holding Company Act of 1935, which requires with certain exceptions competitive bidding for the purchase or underwriting of securities issued or sold by registered holding companies and subsidiary companies. The proposal to amend Rule U-50 is made pursuant to the provisions of sections 6 (b), 7, 12 (d) and 20 (a) of the Public Utility Holding Company Act of 1935.

The Commission is engaged in a comprehensive review of the rules, regulations, forms and procedures adopted under the various statutes administered by it. It is attempting to eliminate duplication and to simplify its requirements wherever practicable without prejudice to the public interest or the protection of investors. The proposal to amend Rule U-50 is a part of this program, as is the parallel proposal to simplify competitive bidding procedures under the Securities Act of 1933 by adopting Rule 415.

Rule U-50 in its present form was adopted in 1941. Except in the cases specified in paragraph (a) of the rule, it requires that the issue or sale of securities by registered holding companies and subsidiary companies be at competitive bidding. Paragraph (c) of the present rule requires that the results of competitive bidding be submitted to the Commission by an amendment of the application or declaration for final clearance.

The principal proposed change in the rule consists of an amendment to paragraph (c) which would make unnecessary an amendment to the application or declaration and a supplemental order of the Commission with respect to the results of the competitive bidding if at least two bids are submitted. The proposed new paragraph (d) of the rule will, however, keep the Commission informed as to bidding results.

One of the principal reasons for adopting Rule U-50 was to give informed and objective information as to what the price of the securities should be. Jurisdiction was, however, to be reserved over the results of the bidding so that the Commission could appraise the bids. This is the present practice.

The Commission has now had over twelve years of experience with Rule U-50. Over 600 individual financings have been subject to the rule. In over 95 percent of the cases, at least two bids were received and in only one of these was it necessary for the Commission to withhold its approval of the issuance or sale. In that one case, approval was withheld not because the terms of the sale were considered unreasonable, but because of the effect of the sale on related proceedings under section 11 of the act.

It would appear, on the basis of this experience, that competitive bidding, where two or more bids are received, results in financing terms which make it unnecessary for the Commission to make adverse findings under sections 7 (d) or 12 (d) of the Act. The Commission's examination of the results of competitive bidding in such cases has, in recent years, become largely perfunctory and the present requirement of a supplemental filing and order has ceased to serve a useful purpose. It is, therefore, anticipated that the proposed amendment of paragraph (c) would result in a considerable saving of time and expense to issuers or sellers and to the Commission itself without, in practice, adversely affecting the interest of investors or consumers.

The proposed amendment of paragraph (c) provides that if only one bid is received, a further order of the Commission authorizing the issuance or sale must be obtained, in accordance with the present practice. It has been the Commission's experience that in such cases, the competitive bidding procedure may not produce appropriate results, particularly since no comparison of proposed prices can be made. In addition, in some cases the Commission has found an absence of true competition.

It is also proposed to modify paragraph (b) of the rule to shorten from 10 to 6 days the required bidding period. Applications to shorten the period by order in individual cases have been granted in a large number of cases and the shorter period appears to be generally sufficient.

The proposed amendments to Rule U-50, if adopted, would be in the nature of an experiment by the Commission. If after a reasonable period, the rule as so amended were not to produce the expected results, the Commisson would reserve the right to modify or rescind the amendments.

The proposed amendments of Rule U-50 will, of course, not affect the Commission's policies as to the terms of securities issued. The necessary information as to such matters is available to the Commission before it authorizes the invitation for bids.

The text of paragraphs (b), (c) and (d) of Rule U-50 as proposed to be amended would read as follows:

§ 250.50 *Requirement of public invitation of proposals for the purchase or underwriting of securities.* • • •

(b) *Public invitation of proposals.* The Commission will not grant or permit to become effective any application or declaration subject to this section unless the application or declaration states that the applicant or declarant, at least six days prior to entering into any contract or agreement for the issuance or sale of the securities therein proposed, will publicly invite sealed written proposals for the purchase or underwriting of such securities. Such proposals as may be received in response to such invitation shall not be opened at any time or place other than as specified in the invitation. The duly authorized representative of any person making any such proposal shall be entitled to be present at the opening of such proposals and to examine each proposal submitted.

(c) *Sale of securities.* If, pursuant to the public invitation, at least two independent proposals for the purchase or underwriting of the securities are received, the applicant or declarant may without further order of or filing with the Commission, issue or sell the securities in accordance with the terms and conditions contained in the application if granted or in the declaration, if effective; and the applicant or declarant shall be exempt from the provisions of § 250.24 (c) (3) (i) with respect to the issue or sale. In any other event the applicant or declarant shall, as promptly as practicable after the opening of the proposals, file an amendment which shall include the applicable information or documents required by paragraph (d) of this section; and the proposed issuance or sale of the securities shall not be consummated until a further order of the Commission authorizing such issuance or sale has been entered.

(d) *Reports.* If the issuance or sale is consummated without further order of the Commission pursuant to paragraph (c) of this section, the applicant or declarant shall include as part of the certificate filed pursuant to § 250.24 (a) the names of the purchasers or underwriters, the terms of the several proposals received, the names of the persons (or in the case of a joint proposal, of the manager of the group) submitting the proposals, the prospectus being used in connection with the issuance or sale the underwriting agreement with respect thereto, and any indenture or certificate setting forth the definitive terms of the securities. Unless requested by the Commission or required to complete the record as to any matter as to which jurisdiction has been specifically reserved, no further filing with respect to the issuance or sale shall be required.

All interested persons are invited to submit data, views and comments on this proposal in writing to the Secretary, Securities and Exchange Commission, at its principal office 425 Second Street NW., Washington 25, D. C., on or before December 11, 1953.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

## [ 17 CFR Part 250 ]

REGULATION AND EXEMPTION OF VARIOUS FINANCIAL TRANSACTIONS

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the Securities and Exchange Commission has under consideration a proposal to amend paragraph (b) (6) of § 250.45 (Rule U-45) under the Public Utility Holding Company Act of 1935 governing the allocation of consolidated income taxes among the constituent companies of registered holding company systems.

Section 12 (b) of the act prohibits any registered holding company or subsidiary company thereof from lending or extending credit to or indemnifying any company in the same holding company system in contravention of such rules or regulations or orders as the Commission may deem necessary. Rule U-45 (b) (6), promulgated by the Commission under said section of the act, exempts from the general declaration requirements of Rule U-45 a loan or extension of credit or an agreement of indemnity arising out of a consolidated income tax return filed by a holding company and its subsidiaries, provided, among other things, that the top company filing the consolidated return may allocate the consolidated tax liability among the several members of the group in amounts not exceeding, as to any company, that percentage of the consolidated tax liability which the income tax liability of such company on a separate return basis would be of the aggregate income tax liabilities of the individual companies based upon separate returns.

The Commission, having had occasion early in 1953 to consider a specific request filed by a registered holding company for relief from the requirements of Rule U-45 (b) (6) and having deemed the issues raised by the request sufficiently broad in import to warrant reconsideration of the rule, issued Holding Company Act Release No. 11761 on March 12, 1953, inviting comments on the rule. Pursuant to this invitation, comments and recommendations were received from various utility holding companies and from ten regulatory bodies. Certain modifications of the rule were urged by the companies; some regulatory bodies urged retention of the rule, some offered suggestions, and some were noncommittal.

The Commission's Division of Corporate Regulation, having carefully considered all comments and recommendations received on the matter, has submitted to the Commission a proposed amendment to Rule U-45 (b) (6) so as to provide that in the calculation of each company's income tax liability on a separate return basis there shall be excluded from such calculation dividends received from other companies in the group: *Provided, however,* That in no event shall the amount so allocated to any company exceed such company's tax liability on a separate return basis. The amendment to the rule would also delete therefrom certain matter that has become obsolete by the passage of time. As proposed to be amended, Rule U-45 (b) (6) would read as follows: (New matter is italicized; matter to be deleted is enclosed within brackets.)

§ 250.45 *Loans, extensions of credit, donations and capital contributions to associate companies.* • • •

(b) *Exceptions.* The following transactions shall be exempt from the declaration requirements of this section:

• • • • • •

(6) A loan or extension of credit or an agreement of indemnity arising out of a consolidated tax return filed by a holding company (or other parent company) and its subsidiaries: *Provided,* That the top company in the group assumes primary responsibility for the payment of any tax liability involved, subject to the right to contribution from the several members of the group in an amount not exceeding as to any company that percentage of the sum of the normal tax, surtax and excess profits tax on a consolidated basis which the sum of the normal tax, surtax, and excess profits tax of such company if paid on a separate return basis is of the aggregate amount of normal, surtax and excess profits taxes of the individual companies based upon separate returns. [In each instance the amount of excess profits tax shall be computed less the amount of the post-war refund.] In computing each company's tax on a separate return basis, the gross income of each company in the group shall be computed without including therein dividends received from other companies in the group and allowance shall be made for loss carry-over and other adjustments as if the company had always filed its tax returns on a separate return basis with such dividends excluded from gross income. In no event however, shall the liability allocated to an individual company exceed the amount of normal, surtax and excess profits tax of such company based upon a separate return. [The amount of postwar refund bonds which the consolidated group will acquire (under section 780 of the Internal Revenue Code) and the liability therefor shall be allocated to the several members of the group in the ratio that the postwar refund bonds each company would acquire on a separate return basis bears to the sum of the postwar refund bonds which all of the companies would acquire on the basis of separate tax returns.]

All interested persons are invited to submit data, views, and comments on this proposal, in writing, to the Secretary, Securities and Exchange Commission, at its principal office, 425 Second Street NW., Washington 25, D. C., on or before November 30, 1953.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

# NOTICES

## RUBBER PRODUCING FACILITIES DISPOSAL COMMISSION

STATEMENT OF ORGANIZATION

SECTION 1. *Establishment.* The Rubber Producing Facilities Disposal Commission was created by the Rubber Producing Facilities Disposal Act of 1953, approved August 7, 1953 (67 Stat. 408, Pub. Law 205, 83d Cong.), and it has its principal office at 811 Vermont Avenue NW., Washington, D. C.

SEC. 2. *Management.* The management of the Rubber Producing Facilities Disposal Commission is vested, pursuant to the provisions of the Rubber Producing Facilities Disposal Act of 1953, in three Commissioners, appointed by the President from civilian life, one of whom serves as Chairman, and one as Vice Chairman.

SEC. 3. *Functions.* The Commission is charged with the responsibility of formulating a disposal plan for the Government-owned synthetic rubber-producing facilities which will effectuate the objectives enunciated in section 2 of the Rubber Act of 1948, as amended (68 Stat. 101, 5 U. S. C. App. 1921).

SEC. 4. *Officers and employees.* The Chairman, Executive Director, Secretary, General Counsel and Deputy General Counsel, respectively, are the Commission's principal officers, and it has other professional, clerical and stenographic assistance. Pursuant to the enabling statute, the Commission's employees are employed without regard to the Civil Service laws or the Classification Act of 1949; however, the rates of pay for personnel employed by the Commission shall be in accordance with the Classification Act of 1949. The Commissioners may request and upon appropriate consent, receive the assist-

ance of any employee in the Government concerned with the Government-owned rubber-producing facilities. Neither the Commissioners nor any person employed by the Commission as an attorney, agent or employee in activities involving discretion with respect to negotiation or contracts of sale of Government-owned rubber-producing facilities may be employed by any purchaser, or affiliate thereof, during the period of their employment with the Commission or for a period of two years after their employment ceases.

SEC. 5. *Termination of the Commission.* The Commission shall cease to exist thirty (30) days after the termination of the transfer period as provided in the Rubber Producing Facilities Disposal Act of 1953.

FERRIS B. THOMAS,
*Secretary, Rubber Producing Facilities Disposal Commission.*

[F. R. Doc. 53-9691; Filed, Nov. 17, 1953; 8:47 a. m.]

## CERTAIN RUBBER PRODUCING FACILITIES

### INVITATION FOR PROPOSALS TO PURCHASE OR LEASE

Pursuant to the Rubber Producing Facilities Disposal Act of 1953 (Pub. Law 205, 83d Cong., 1st sess., approved August 7, 1953) the Rubber Producing Facilities Disposal Commission announces that it will receive written proposals for the purchase (or, in certain instances indicated below, the lease) of the properties and facilities described below, hereafter collectively referred to as "the rubber-producing facilities." Such proposals may be submitted at any time beginning November 25, 1953 through May 27, 1954 (unless extended by the Commission upon adequate notice), at the Office of the Commission, 811 Vermont Avenue, Washington 25, D. C. Detailed information concerning the form of proposals and the manner in which they are to be submitted may be obtained from the Secretary of the Commission upon request.

*Facilities.* The facilities offered for sale consist of 13 plants for the manufacture of butadiene-styrene type rubber (GR–S), 2 plants for the manufacture of butyl rubber (GR–I), 1 plant for the manufacture of styrene, 8 plants for the manufacture of butadiene, 1 plant for the manufacture of dodecyl mercaptan, a fleet of 448 pressure tank cars (ICC Classification—ICC–104AW) and miscellaneous items of equipment.

The plants which are in operating condition and which are offered for sale as complete operating units are set forth in the following table.

These plants are operated for the account of the Reconstruction Finance Corporation as units in an integrated synthetic rubber industry. The 13 GR–S plants and the 2 GR–I plants are practically the exclusive domestic sources of these types of rubber. All of the butadiene consumed in the domestic manufacture of synthetic rubber is produced in the butadiene plants offered for sale or lease. The styrene plant produces a significant portion of the total requirements of the synthetic rubber program, the remainder being purchased from commercial sources. Dodecyl mercaptan is an ingredient of one type of GR–S, and the plant offered for sale produces the program's requirements for this chemical.

Detailed descriptive brochures relating to each of the plants may be obtained upon application to the Secretary of the Commission. Similarly, descriptive inventory of the miscellaneous facilities hereby offered for sale will be available.

BUTADIENE-STYRENE RUBBER (GR–S) PLANTS

| Plancor No. | Present operator | Location | Maximum annual capacity |
|---|---|---|---|
| | | | *Long tons* |
| 876 | Copolymer Corp | Baton Rouge, La | 40,000 |
| 127 | Firestone Tire & Rubber Co | Akron, Ohio | 30,000 |
| 1050 | do | Lake Charles, La | 90,000 |
| 877 | General Tire & Rubber Co | Baytown, Tex | 44,000 |
| 983 | B. F. Goodrich Co | Port Neches, Tex | 90,000 |
| 980 | do | Institute, W. Va | [1] 22,500 |
| 126 | Goodyear Synthetic Rubber Corp | Akron, Ohio | 12,500 |
| 956 | do | Houston, Tex | 90,000 |
| 1278 | Kentucky Synthetic Rubber Corp | Louisville, Ky | 44,000 |
| 611 | Midland Rubber Co | Los Angeles, Calif | 20,000 |
| 982 | Phillips Chemical Co | Borger, Tex | 60,000 |
| 129 | U. S. Rubber Co | Naugatuck, Conn | 22,500 |
| 983A | do | Port Neches, Tex | 90,000 |

BUTYL RUBBER (GR–I) PLANTS

| | | | |
|---|---|---|---|
| | | | *Long tons* |
| 1082 | Humble Oil & Refining Co | Baytown, Tex | 40,000 |
| 572 | Esso Standard Oil Co | Baton Rouge, La | 45,000 |

BUTADIENE PLANTS—PETROLEUM

| | | | |
|---|---|---|---|
| | | | *Short tons* |
| 706 | Cities Service Refining Corp | Lake Charles, La | 45,000 |
| 172 | Copolymer Corp | Baton Rouge, La | 20,000 |
| 485 | Humble Oil & Refining Co | Baytown, Tex | 40,000 |
| 923 | Neches Butane Products Co | Port Neches, Tex | 105,000 |
| 484 | Phillips Chemical Co | Borger, Tex | 71,200 |
| 1063 | Sinclair Rubber, Inc | Houston, Tex | 78,000 |
| 603 | Shell Chemical Corp | Los Angeles, Calif | 161,000 |
| 1561 | Standard Oil Co. of California | El Segundo, Calif | [2] [3] |

STYRENE PLANT

| | | | |
|---|---|---|---|
| | | | *Short tons* |
| 929 | Dow Chemical Co | Los Angeles, Calif | 57,000 |

OTHER FACILITIES

| | | | |
|---|---|---|---|
| 843 | U. S. Rubber Co | Naugatuck, Conn | [3] |

[1] This facility is now in standby.
[2] Represents a tandem operation whereby Standard Oil Co. of California's production of crude butadiene is transferred to Shell Chemical Corp. for purification along with Shell's crude production.
[3] This facility is erected upon land held under an assignable lease which expires on Feb. 15, 1958, from Standard Oil Co. of California; all other plants are erected on property owned in fee by the government.

In addition to the foregoing, there are offered for sale, or alternatively for lease, 2 plants for the manufacture of butadiene from alcohol, located respectively at Louisville, Kentucky, and Kobuta, Pennsylvania. The plant at Louisville, Kentucky, Plancor 1207, has been operated, and is now being maintained in standby, by Union Carbide and Carbon Corp., and has an annual capacity of 87,000 short tons. The plant at Kobuta, Pennsylvania, Plancor 483, has been operated, and is now being maintained in standby, by the Koppers Company, Inc., and has an annual capacity of 128,000 short tons. These are the only facilities of any sort offered for lease. The Commission will entertain proposals for the leasing of these plants promptly and in advance of consideration of disposal of the other facilities. Such leases may run for not less than 1 nor more than 3 years. Proposals for the purchase of these facilities will be received in the same manner as prescribed for the purchase of the other facilities.

The Rubber Producing Facilities Disposal Act of 1953 prescribes in detail, as well as generally, procedural and substantive standards pursuant to which the sale of these facilities by the Disposal Commission is to be effectuated. To facilitate compliance with these standards the Disposal Commission has prepared Instructions for the Submission of Proposals, which set forth the requirements of the Commission with respect to such proposals, and copies thereof will be available upon application to the Secretary of the Commission. Subject to the foregoing, the following additional information concerning the program of sale is announced:

*Continued operation of plants.* As a condition to sale, the Commission is required to be satisfied that the prospective purchaser actually intends to operate the facility or facilities for the purpose of manufacturing synthetic rubber or its component materials. The purchaser must also agree to comply with the terms of a "National Security Clause", having terms, conditions, restrictions and reservations which will assure the prompt availability of the facilities, or facilities of equivalent capacity, for the production of synthetic rubber and the component materials thereof for a period of 10 years from the date of the contract. In consonance with these requirements, while the Commission will entertain proposals for the acquisition of portions of the productive capacity of particular facilities, as further discussed in the instructions for the Submission of Proposals, it will not entertain proposals for the piece-meal acquisition of individual items of equipment except such items as are listed in the inventory of miscellaneous equipment referred to above.

*Financing.* Proposals for purchase shall provide for the payment of not less than 25 percent of the purchase price in cash, and the remainder may be financed by a first lien purchase money mortgage maturing in not more than 10 years and providing for periodic amortization (amortization in equal annual installments is not required). The interest rate upon the balance of the purchase price represented by the mortgage shall be 4 percent per annum.

Proposals for purchase shall be accompanied by a deposit of cash or United States Government bonds of face amount equal to 2½ per centum of the gross amount proposed to be paid but not exceeding $250,000 for each facility; *Provided, however,* That the deposit required in the case of a proposal for one of a number of facilities on an alternative basis shall be the same as would be required if such proposal were for only the facility for which the highest amount is proposed to be paid. Except in the case of purchasers, deposits shall be refunded without interest. In the case of purchasers, deposits made hereunder shall be applied without interest to the purchase price.

*Procedure subsequent to the submission of proposals.* During a period of 7 months (unless extended by the Commission upon adequate notice to those submitting proposals) following the termination of the period for the receipt of proposals, the Commission will negotiate for the sale of the facilities with those who have submitted proposals. In accordance with the terms of the act, negotiations for the sale of each type of plant (i.e., GR–S, GR–I, Butadiene, et cetera) will be limited to those persons having submitted a proposal for the purchase of such a type plant. Such negotiations will be conducted with due regard to the several purposes of the act that the disposal of the synthetic rubber producing facilities establish a free, competitive, synthetic rubber industry, afford small-business enterprises and other users, the opportunity to obtain a fair share of the end products of the facilities sold and at fair prices, be consistent with national security, and realize full fair value for the facility or facilities, taking into consideration the policy set forth in section 2 of the act.

For further information and details apply to Ferris B. Thomas, Secretary.

The foregoing advertisement was approved by the Rubber Producing Facilities Disposal Commission at a meeting duly held on November 11, 1953, and the Secretary was authorized to effect its publication.

RUBBER PRODUCING FACILITIES DISPOSAL COMMISSION,
FERRIS B. THOMAS,
*Secretary.*

### REDELEGATION OF AUTHORITY WITH RESPECT TO CERTAIN FUNCTIONS

NOVEMBER 10, 1953.

Order 551, as amended (16 F. R. 2939, 2940; 16 F. R. 5456, 5457; 16 F. R. 7467, 7468; 16 F. R. 8252; 17 F. R. 3516, 3517; and 17 F. R. 7552), is further amended as follows, to authorize Area Directors and Acting Area Directors to exercise the authority of the Commissioner in relation to the classes of matters indicated.

1. The following sections, under the heading Functions Relating to Land and Minerals, are amended to read as follows:

SEC. 11. *Tax exemption certificates.* The issuance of tax exemption certificates covering lands designated as tax exempt under the provisions of the acts of June 20, 1936 (49 Stat. 1542), as amended by the act of May 19, 1937 (25 U. S. C., 1946 ed., sec. 412a), and May 10, 1928 (45 Stat. 495), as amended May 24, 1928 (45 Stat. 733).

SEC. 15. *Allotment applications.* The approval and certification of applications for allotments on the public domain under authority of the act of February 8, 1887 (25 U. S. C., 1946 ed., sec. 334), or the acts of February 28, 1891, and June 25, 1910 (25 U. S. C., 1946 ed., sec. 336), and in the national forests pursuant to the act of June 25, 1910 (25 U. S. C., 1946 ed., sec. 337).

2. A new section, to read as follows, is added under the heading Functions Relating to Forest and Range Management:

SEC. 245. *Advertisement and sale of forest products.* Advertisement and sale of lumber and other forest products produced from forests on Indian Reservations, except the Menominee Indian Reservation in Wisconsin and the Red Lake Reservation in Minnesota, by Indian tribal enterprises operated under the supervision of the Bureau of Indian Affairs, pursuant to 25 CFR Part 64.

3. New sections, to read as follows, are added under the heading Functions Relating to Funds and Fiscal Matters:

SEC. 262. *Sioux benefits.* The approval of applications of individual Indians of the Sioux Nation for cash benefits under the acts of March 2, 1889, June 10, 1896, and June 18, 1934 (25 U. S. C., 1946 ed., sec. 474).

SEC. 263. *Payments to tribal attorneys.* The payment of fees and expenses to attorneys in accordance with the terms of contracts between such attorneys and Indian tribes which have been approved pursuant to 25 U. S. C. 81, 82, 83, and 84, and section 16 of the act of June 18, 1934 (25 U. S. C. 476).

4. A new heading and a new section thereunder, to read as follows, are added:

FUNCTIONS RELATING TO PROPERTY MATTERS

SEC. 310. *Disposition and transfer of personal property.* The disposition and transfer of such personal property excess to the needs of the area under his jurisdiction, including the authority to donate and to execute transfers and deliveries of donable property, in accordance with the Federal Property and Administrative Services Act of 1949, as amended, and regulations issued thereunder by the Administrator of General Services.

W. BARTON GREENWOOD,
*Acting Commissioner.*

## Bureau of Reclamation

### MISSOURI RIVER BASIN PROJECT, WYOMING

### FIRST FORM RECLAMATION WITHDRAWAL

SEPTEMBER 10, 1953.

Pursuant to the authority delegated by Departmental Order No. 2515 of April 7, 1949, I hereby withdraw the following described lands from public entry, under first form of withdrawal, as provided by section 3 of the act of June 17, 1902 (32 Stat. 388):

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 38 N., R. 94 W.,
Sec. 17, N½NE¼.
Sec. 18, Lots 1 and 2.
T. 39 N., R. 94 W.,
Sec. 30, Lots 1 to 4, incl.
T. 40 N., R. 94 W.,
Sec. 31, Lots 3 and 4.

The above areas aggregate 315.10 acres.

G. W. LINEWEAVER,
*Assistant Commissioner.*

OCTOBER 22, 1953.

I concur. The records of the Bureau of Land Management will be noted accordingly.

EDWARD WOOZLEY,
*Director,*
*Bureau of Land Management.*

*Notice for Filing Objections to Order Withdrawing Public Lands for Missouri River Basin Project, Wyoming*

SEPTEMBER 10, 1953.

Notice is hereby given that for a period of 30 days from the date of publication of this notice, persons having cause to object to the terms of the above order withdrawing certain public lands in the State of Wyoming, for use in connection with the Boyson Reservoir, Boysen Unit, Boysen Division, Missouri River Basin Project, may present their objections to the Secretary of the Interior. Such objections should be in writing, should be

addressed to the Secretary of the Interior, and should be filed in duplicate in the Department of the Interior, Washington 25, D. C.

In case any objection is filed and the nature of the opposition is such as to warrant it, a public hearing will be held at a convenient time and place, which will be announced, where opponents to the order may state their views and where the proponents of the order can explain its purpose, intent, and extent. Should any objection be filed, notice of the determination by the Secretary as to whether the order should be rescinded, modified or let stand will be given to all interested parties of record and the general public.

G. W. Lineweaver,
*Assistant Commissioner.*

## DEPARTMENT OF COMMERCE

### Federal Maritime Board

NORTHWEST MARINE TERMINAL ASSOCIATION

NOTICE OF AGREEMENT FILED FOR APPROVAL

Notice is hereby given that the following described agreement has been filed with the Board for approval pursuant to section 15 of the Shipping Act, 1916, as amended; 39 Stat. 733, 46 U. S. C. section 814.

Agreement No. 6785-7 between the parties of the Northwest Marine Terminal Association modifies the basic agreement of the Association to provide that a member in good standing may appoint and designate an alternate or proxy to act in his place at association meetings.

Interested parties may inspect this agreement and obtain copies thereof at the Regulation Office, Federal Maritime Board, Washington, D. C., and may submit, within 20 days after publication of this notice in the FEDERAL REGISTER, written statements with reference to this agreement and their position as to approval, disapproval, or modification, together with request for hearing should such hearing be desired.

Dated: November 13, 1953.

By order of the Federal Maritime Board.

A. J. Williams,
*Secretary.*

## CIVIL AERONAUTICS BOARD

[Docket No. SA-287]

ACCIDENT OCCURRING NEAR HALF MOON BAY, CALIFORNIA

NOTICE OF HEARING

In the matter of investigation of accident involving aircraft of Australian registration VHBPE, which occurred near Half Moon Bay, California, on October 29, 1953.

Notice is hereby given, pursuant to the Civil Aeronautics Act of 1938, as amended, particularly section 702 of said act, in the above-entitled proceeding that hearing is hereby assigned to be held on Tuesday, November 17, 1953, at 9:00 a. m. (local time), at the Alameda Hotel, Central Street and Broadway Avenue, Alameda, California.

Dated at Washington, D. C., November 9, 1953.

Van R. O'Brien,
*Presiding Officer.*

## FEDERAL POWER COMMISSION

[Docket No. G-2256]

EL PASO NATURAL GAS CO.

NOTICE OF AMENDED APPLICATION

NOVEMBER 12, 1953.

Take notice that on October 30, 1953, El Paso Natural Gas Company (Applicant) filed an amendment, entitled Second Supplement to Original Application, to its application in Docket No. G-2256 filed on September 23, 1953, in which amendment it is requested that it be permitted to deliver natural gas to Colorado Interstate Gas Company on an exchange basis in volumes up to 60,000,000 cubic feet per day until at least December 31, 1953, and for such additional time thereafter as may be agreed upon between Applicant and Colorado Interstate Gas Company, in lieu of the delivery of up to 50,000,000 cubic feet per day as requested in the original application. Applicant states that it is informed by Colorado Interstate Gas Company that the latter urgently needs at least 60,000,000 cubic feet of gas per day and that it has available for delivery such volumes of gas during the period specified.

Protests or petitions to intervene relating to the application, as amended, may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 2d day of December 1953. The application, as amended and supplemented, is on file with the Commission and open to public inspection.

Leon M. Fuquay,
*Secretary.*

## HOUSING AND HOME FINANCE AGENCY

### Office of the Administrator

REGIONAL ADMINISTRATIVE OFFICER REGION III (CHICAGO)

REDELEGATION OF AUTHORITY TO EXECUTE CERTAIN CONTRACTS AND AGREEMENTS WITH RESPECT TO ADMINISTRATIVE MATTERS

The Regional Administrative Officer, Region III (Chicago), Office of the Administrator, Housing and Home Finance Agency, is hereby authorized to take the following action with respect to administrative matters within such Region:

Execute contracts and agreements for supplies, equipment, and services (except purely personal services) necessary for the operation and maintenance of field offices in the Region.

(Reorg. Plan No. 3 of 1947, 61 Stat. 954 (1947); 62 Stat. 1283 (1948), as amended by 64 Stat. 80 (1950), 12 U. S. C., Sup. V 1701c; Deleg of Authority, effective August 14, 1953, 18 F. R. 6812 (Oct. 28, 1953))

Effective as of the 1st day of October 1953.

John P. McHollum,
*Regional Representative, Region III.*

[F. R. Doc. 53-9711; Filed, Nov. 17, 1953; 8:51 a. m.]

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28644]

PHOSPHATIC FEED SUPPLEMENTS FROM SOUTHERN TERRITORY TO KRAUSE AND MILLSTADT, ILL.

APPLICATION FOR RELIEF

NOVEMBER 13, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., agent, for carriers parties to Agent C. A Spaninger's tariff I. C. C. No. 1395.

Commodities involved: Phosphatic feed supplements, carloads.

From: Points in southern territory.

To: Krause and Millstadt, Illinois.

Grounds for relief: Competition with rail carriers, circuitous routes, and to maintain grouping.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

George W. Laird,
*Secretary.*

[4th Sec. Application 28645]

SAND AND GRAVEL FROM DICKASON PIT, IND., TO TUSCOLA, ILL.

APPLICATION FOR RELIEF

NOVEMBER 13, 1953

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. G. Raasch, Agent, for the Chicago and Eastern Illinois Railroad Company.

Commodities involved: Sand and gravel, unwashed, pit run, carloads.

From: Dickason Pit, Ind.

To: Tuscola, Ill.

Grounds for relief: Wayside pit competition.

Schedules filed containing proposed rate: Chicago & Eastern Illinois Railroad Company, I. C. C. No. 144, supp. 31.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 28646]

PLASTER AND RELATED ARTICLES FROM BLUE RAPIDS AND MEDICINE LODGE, KANS., TO WESTERN TRUNK-LINE AND ILLINOIS TERRITORIES

APPLICATION FOR RELIEF

NOVEMBER 13, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: W. J. Prueter, Agent, for carriers parties to schedule listed below.

Commodities involved: Plaster and related articles, carloads.

From: Blue Rapids and Medicine Lodge, Kans.

To: Points in western trunk-line and Illinois territories.

Grounds for relief: Rail competition, circuity, to maintain grouping and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: W. J. Prueter, Agent, I. C. C. No. A-3917, supp. 29.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

LIQUID FERTILIZER FROM INDIANAPOLIS, IND., TO FLORIDA

APPLICATION FOR RELIEF

NOVEMBER 13, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: H. R. Hinsch, Alternate Agent, for carriers parties to schedule listed below.

Commodities involved: Liquid fertilizer, as described in the application, in tank-car loads.

From: Indianapolis, Ind.

To: Jacksonville, South Jacksonville, Hollywood, Homestead, Peters and Ocala, Fla.

Grounds for relief: Competition with rail carriers, circuitous routes, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates; C. W. Boin, Agent, I. C. C. No. A-984, supp. 4.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. LIQUID CAUSTIC SODA FROM HUNTSVILLE AND REDSTONE ARSENAL, ALA., TO QUINCY, ILL.

APPLICATION FOR RELIEF

NOVEMBER 13, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Liquid caustic soda, in tank-car loads.

From: Huntsville and Redstone Arsenal, Ala.

To: Quincy, Ill.

Grounds for relief: Competition with rail carriers, circuitous routes, to apply rates constructed on the basis of the short line distance formula, and additional destination.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1351, supp. 37.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. PIPE OR TUBING FROM MINNEQUA, COLO., TO TEXAS GULF POINTS

APPLICATION FOR RELIEF

NOVEMBER 13, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedule listed below.

Commodities involved: Pipe or tubing, iron or steel, and related articles, carloads.

From: Minnequa, Colo.

To: Texas Gulf Ports and adjacent points in Texas grouped therewith.

Grounds for relief: Competition with rail carriers, circuitous routes, and market competition.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3443, supp. 180.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. ORGANIZATION AND ASSIGNMENT OF WORK

REHEARINGS AND FURTHER PROCEEDINGS

At a general session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 12th day of November A. D. 1953.

It appearing that by order of October 1, 1953, the order of June 8, 1942, as amended, Organization of Divisions and Assignment of Work, Business, and Functions, was further amended to provide, among other things, to refer effective November 16, 1953, to the Motor Carrier Board, (1) applications for temporary authority for service by common or contract carriers by motor vehicle under section 210a (a) and (2) applications for transfer of certificates or permits of carriers by motor vehicle under section 212 (b) and designating Division Five as an appellate division to which applications or petitions for reconsideration or review of any order, action, or requirement of the Motor Carrier Board shall be assigned;

And it further appearing, that Division Five should be continued for a time as an appellate division for the consideration and disposition of applications for rehearing, reargument, or reconsideration of any decision, order, or requirement of an individual Commissioner made prior to November 16, 1953, in section 210a (a) or section 212 (b) applications:

*It is ordered*, That the said order of October 1, 1953, be, and it is hereby amended, by postponing the effective date of that part of the order which deletes the third and fourth paragraphs in the section *Rehearings and further proceedings* from November 16, 1953, to March 1, 1954.

By the Commission.

## TITLE 21—FOOD AND DRUGS

### Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

PART 141—TESTS AND METHODS OF ASSAY FOR ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

PART 146—CERTIFICATION OF BATCHES OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

MISCELLANEOUS AMENDMENTS

By virtue of the authority vested in the Secretary by the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended by 61 Stat. 11, 63 Stat. 409, 67 Stat. 389; sec. 701, 52 Stat. 1055; 21 U. S. C. 357, 371; 67 Stat. 18), the regulations for tests and methods of assay for antibiotic and antibiotic-containing drugs (21 CFR, 1952 Supp., Part 141; 18 F. R. 3533, 5366) and certification of batches of antibiotic and antibiotic-containing drugs (21 CFR, 1952 Supp., Part 146; 18 F. R. 2337, 3533, 5366, 5440, 5591) are amended as indicated below:

1. In § 141.204, the section headnote and paragraph (a) are amended to read:

§ 141.204 *Chlortetracycline capsules; tetracycline capsules*—(a) *Potency.* Using 1 capsule of 250 milligrams or 5 capsules of 50 milligrams for each assay and 500 milliliters of water in the blender, proceed as directed in § 141.203 (a) if it is chlortetracycline, or § 141.218 (a) if it is tetracycline. The average potency of the drug is satisfactory if it contains not less than 85 percent of the number of milligrams it is represented to contain.

2a. In § 141.205, the section headnote and the first sentence of paragraph (a) are amended to read:

§ 141.205 *Chlortetracycline powder; tetracycline powder*—(a) *Potency.* Using a 3-gram sample for each determination, proceed as directed in § 141.203 (a) if it is chlortetracycline powder, or as directed in § 141.218 (a) if it is tetracycline powder. • • •

b. Paragraph (a) is further amended by changing the word "chlortetracycline" in the second sentence to read "chlortetracycline or tetracycline".

3. In § 141.207, the section headnote and paragraph (a) are amended to read:

§ 141.207 *Chlortetracycline tablets; tetracycline tablets*—(a) *Potency.* Proceed as directed in § 141.204 (a). The average potency of the drug is satisfactory if it contains not less than 85 percent of the number of milligrams it is represented to contain.

4. Part 141 is amended by adding the following new section:

§ 141.218 *Tetracycline hydrochloride*—(a) *Potency.* Using the tetracycline hydrochloride working standard as a standard of comparison, proceed as directed in § 141.201 (a), except in the preparation of the standard curve for the turbidimetric assay proceed as follows:

(1) Dilute the stock solution to contain 0.4 microgram per milliliter in lieu of 0.1 microgram per milliliter.

(2) Prepare 10 tubes each of the minimum (0.04 microgram per milliliter) and maximum (0.4 microgram per milliliter) concentrations diluted for the standard curve and use these solutions to adjust the photoelectric colorimeter.

(3) Use the 0.24 microgram per milliliter concentration of the standard curve as the reference point.

(4) Dilute the sample to be tested to contain an estimated concentration of 0.24 microgram per milliliter in lieu of 0.06 microgram per milliliter.

(b) *Sterility and toxicity.* Proceed as directed in § 141.201 (b) and (c).

(c) *Pyrogens.* Proceed as directed in § 141.3, using as a test dose 1.0 milliliter per kilogram of an aqueous solution containing 500 micrograms per milliliter.

(d) *Histamine, moisture, pH, and crystallinity.* Proceed as directed in § 141.201 (e), (f), and (g) and § 141.5 (c).

(e) *Extinction coefficient.* Dissolve approximately 40 milliliters of the

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the Code of Federal Regulations, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended August 5, 1953.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15¢) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

sample, accurately weighed, in approximately 150 milliliters of distilled water by mixing thoroughly. Dilute to exactly 250 milliliters with distilled water and mix thoroughly. Transfer a 10.0-milliliter aliquot of this solution to a 100-milliliter volumetric flask, add about 75 milliliters of distilled water and 5.0 milliliters of 5 *N* NaOH, and then make to 100 milliliters with water and mix thoroughly. Exactly 6 minutes after the addition of the NaOH, determine the absorbency of the solution at 380 mμ compared with distilled water as a blank. Use a suitable spectrophotometer for the absorbency measurements.

$$E^{1\%}_{1\ cm} \text{ of the sample} = \frac{\text{Absorbency at 380 m}\mu \times 25{,}000}{\text{Weight of sample in milligrams}}$$

5 Section 146.204 is amended as follows:

a. The headnote is amended to read: "§ 146.204 *Chlortetracycline capsules (chlortetracycline hydrochloride capsules); tetracycline capsules (tetracycline hydrochloride capsules).*"

b. In paragraph (a) *Standards of identity* * * *, the first sentence is amended to read: "Chlortetracycline capsules and tetracycline capsules are capsules composed of crystalline chlortetracycline or tetracycline, with or without one or more suitable sufonamides and with or without one or more suitable and harmless buffer substances, preservatives, diluents, binders, lubricants, colorings and flavorings, enclosed in a gelatin capsule."

c. Paragraph (a) is further amended by inserting the following new sentence between the fourth and fifth sentences: "The tetracycline used conforms to the requirements of § 146.218 (a), except subparagraphs (2), (4), and (5) of that paragraph."

d. In paragraph (b) *Packaging*, first sentence, the word "chlortetracycline" is deleted.

e. In the introduction of paragraph (c) *Labeling*, the words "of chlortetracycline capsules" are deleted.

f. Paragraph (c) (1) (iv) is amended to read:

(iv) The statement "Expiration date ——," the blank being filled in with the date which is 48 months after the month during which the batch was certified if it is chlortetracycline hydrochloride, or with the date which is 24 months after the month during which the batch was certified if it is tetracycline hydrochloride.

g. In paragraph (c) (3) the words "'chlortetracycline capsules'" are changed to read "'chlortetracycline capsules or tetracycline capsules'".

h. In subparagraph (1) of paragraph (d) *Request for certification* * * *, the words "of chlortetracycline capsules" are deleted and the words "the chlortetracycline used" are changed to read "the chlortetracycline or tetracycline used".

i. In paragraph (d) (2) (ii) and (3) (ii) the words "The chlortetracycline used" are changed to read "The chlortetracycline or tetracycline used".

j. In the introduction of paragraph (e) *Fees*, the words "of chlortetracycline capsules" are deleted.

6 Section 146.205 is amended as follows:

a. The headnote is amended to read: "§ 146.205 *Chlortetracycline powder (chlortetracycline hydrochloride powder); tetracycline powder (tetracycline hydrochloride powder).*"

b. In paragraph (a) *Standards of identity* * * *, the first clause in the first sentence is changed to read: "Chlortetracycline powder and tetracycline powder is crystalline chlortetracycline or tetracycline,".

c. In paragraph (a), second sentence, the word "chlortetracycline" is changed to read "chlortetracycline or tetracycline".

d. Paragraph (a) is further amended by inserting the following new sentence between the fourth and fifth sentences: "The tetracycline used conforms to the requirements of § 146.218 (a), except subparagraphs (2), (4), and (5) of that paragraph."

e. In paragraph (b) *Packaging*, first sentence, the words "of chlortetracycline powder" are deleted.

f. In the introduction of paragraph (c) *Labeling*, delete the words "of chlortetracycline powder".

g. In paragraph (c) (1) (ii) the word "chlortetracycline" is changed to read "chlortetracycline or tetracycline", in both places that it appears.

h. In subparagraph (1) of paragraph (d) *Request for certification* * * *, delete the words "of chlortetracycline powder" and change the words "chlortetracycline used" to read "chlortetracycline or tetracycline used".

i. In paragraph (d) *Request for certification* * * *, subparagraphs (2) (ii) and (3) (ii) are amended by changing the words "The chlortetracycline used" to read "The chlortetracycline or tetracycline used".

j. In the introduction of paragraph (e) *Fees*, the words "of chlortetracycline powder" are deleted.

7. Section 146.207 is amended to read:

§ 146.207 *Chlortetracycline tablets (chlortetracycline hydrochloride tablets); tetracycline tablets (tetracycline hydrochloride tablets).* Chlortetracycline tablets and tetracycline tablets are tablets that conform to all requirements, and are subject to all procedures prescribed by § 146.204 for chlortetracycline capsules and tetracycline capsules.

8. Part 146 is amended by adding the following new section:

§ 146.218 *Tetracycline hydrochloride*—(a) *Standards of identity, strength, quality, and purity.* Tetracycline hydrochloride is the crystalline hydrochloride salt of the deschloro derivative of a kind of chlortetracycline or a mixture of two or more such salts. It is so purified and dried that:

(1) Its potency is not less than 900 micrograms per milligram.

(2) It is sterile.

(3) It is nontoxic.

(4) It is nonpyrogenic.

(5) It contains no histamine nor histamine-like substance.

(6) Its moisture content is not more than 2 percent.

(7) Its pH in a saturated aqueous solution is not less than 1.8 and not more than 2.8, except if it is intended for use by injection its pH is not less than 2.0 and not more than 3.0.

(8) Its extinction coefficient $E^{1\%}_{1\ cm}$ is 372 ±15 at 380 mμ.

(b) *Packaging; labeling; request for certification, check tests and assays, samples; fees.* Tetracycline hydrochloride conforms to all the requirements and procedures prescribed for chlortetracycline hydrochloride by § 146.201 (b), (c), (d), and (e), except that it shall be labeled with an expiration date which is 24 months after the month during which the batch was certified.

(Sec. 701, 52 Stat. 1055, 21 U. S. C. 371)

Notice and public procedure are not necessary prerequisites to the promulgation of this order, and I so find, since it was drawn in collaboration with interested members of the affected industry and since it would be against public interest to delay providing for the amendments set forth above.

This order shall become effective upon publication in the FEDERAL REGISTER, since both the public and the affected industry will benefit by the earliest effective date, and I so find.

Dated: November 13, 1953.

[SEAL] NELSON A. ROCKEFELLER,
*Acting Secretary.*

[F R Doc 53-9749; Filed, Nov. 18 1953; 8:50 a. m.]

## TITLE 32—NATIONAL DEFENSE

### Chapter IV—Joint Regulations of the Armed Forces

Subchapter A—Armed Services Procurement Regulation

PART 406—CONTRACT CLAUSES AND FORMS

SUBPART B—CLAUSES FOR COST-REIMBURSEMENT TYPE SUPPLY CONTRACTS

A new Subpart B of this part has been added prescribing uniform clauses for cost-reimbursement type supply contracts entered into on a cost or cost-plus-a-fixed-fee basis for supplies other than (a) the construction, alteration, or repair of buildings, bridges, roads, or other kinds of real property, (b) experimental, developmental or research work, or (c) facilities to be provided by the Government under a facilities contract. These contract clauses, as set forth in § 467.201 shall be inserted in all cost-reimbursement type supply contracts executed on or after January 1, 1954, or with respect to which procurement is initiated on or after December 1953. Use of such contract clauses is authorized from the date of issuance of this revision.

Sec.
406.200 Scope of subpart.
406.201 Effective date of subpart.
406.202 Applicability.

Sec.
406.203 Required clauses.
406.203-1 Definitions.
406.203-2 Changes.

406.205-4 Authorization and consent.
406.205-5 Bill of materials.
406.205-6 Federal, State, and local taxes.

AUTHORITY: §§ 406.200 to 406.205-6 issued under R. S. 161; 5 U. S. C. 22. Interpret or apply 62 Stat. 21, 41 U. S. C. 151-161.

§ 406.200 *Scope of subpart.* This subpart sets forth uniform contract clauses for use in cost-reimbursement type supply contracts as defined in § 406.202.

§ 406.201 *Effective date of subpart.* Notwithstanding any earlier effective date prescribed elsewhere in this subchapter, the contract clauses set forth or referred to in this subpart shall be inserted, as hereinafter prescribed, in all cost-reimbursement type supply contracts executed on or after 1 January 1954 or with respect to which procurement is initiated on or after 1 December 1953. Use of the contract clauses set forth or referred to herein is authorized from the date of issuance.

§ 406.202 *Applicability.* As used throughout this subpart, the term "cost reimbursement type supply contract" shall mean any contract (other than a letter contract, letter of intent, preliminary notice of award, or amendment or modification to a contract) entered into on a cost or cost-plus-a-fixed-fee basis as covered in §§ 402.404 to 402.406 of this subchapter for supplies other than (a) the construction, alteration or repair of buildings, bridges, roads, or other kinds of real property, (b) experimental, developmental, or research work, or (c) facilities to be provided by the Government under a "facilities contract" as defined in Part 412 of this subchapter.

§ 406.203 *Required clauses.* The following clauses shall be inserted in all cost-reimbursement type supply contracts.

§ 406.203-1 *Definitions.* Insert the contract clause set forth in § 406.103-1. Additional definitions may be included in such clause provided they are not inconsistent with such clause or the provisions of this subchapter.

§ 406.203-2 *Changes.*

CHANGES

The Contracting Officer may at any time, by a written order, and without notice to the sureties, if any, make changes, within the general scope of this contract, in any one or more of the following: (i) drawings, designs, or specifications, where the supplies to be furnished are to be specially manufactured for the Government in accordance therewith; (ii) method of shipment or packing, (iii) place of delivery; and (iv) the amount of Government-furnished property. If any such change causes an increase or decrease in the estimated cost of, or the time required for, performance of this contract, or otherwise affects any other provision of this contract, an equitable adjustment shall be made (i) in the estimated cost or delivery schedule, or both, (ii) in the amount of any fixed fee to be paid to the Contractor, and (iii) in such other provisions of the contract as may be so affected, and the contract shall be modified in writing accordingly. Any claim by the Contractor for adjustment under this clause must be asserted within thirty (30) days from the date of receipt by the Contractor of the notification of change; provided, however, that the Contracting Officer, if he decides that the facts justify such action, may receive and act upon any such claim asserted at any time prior to final payment under this contract. Failure to agree to any adjustment shall be a dispute concerning a question of fact within the meaning of the clause of this contract entitled "Disputes." However, nothing in this clause shall excuse the Contractor from proceeding with the contract as changed.

In the foregoing clause, the period of "thirty (30) days" within which any claim for adjustment must be asserted may be varied in accordance with Department procedures.

In the interest of economy, the Government has a basic responsibility fully to utilize its property. Consistent therewith the Government has reserved the right in the above clause to make changes in the amount of Government-furnished property, including the right to increase the amount of Government-furnished property. Prior to exercising the right to increase the amount of Government-furnished property, Contracting Officers will consider fully any inequities which may result to the Contractor as against the net benefits which may accrue to the Government.

§ 406.203-3 *Limitation of cost.*

LIMITATION OF COST

(a) It is estimated that the total cost to the Government, exclusive of any fixed fee, for the performance of this contract will not exceed the estimated cost set forth in the Schedule, and the Contractor agrees to use its best efforts to perform the work specified in the Schedule and all obligations under this contract within such estimated cost. If at any time the Contractor has reason to believe that the costs which it expects to incur in the performance of this contract in the next succeeding thirty (30) days, when added to all costs previously incurred will exceed eighty-five percent (85%) of the estimated cost then set forth in the Schedule, or if at any time, the Contractor has reason to believe that the total cost to the Government, exclusive of any fixed fee, for the performance of this contract will be substantially greater or less than the then estimated cost thereof, the Contractor shall notify the Contracting Officer in writing to that effect, giving its revised estimate of such total cost for the performance of this contract.

(b) The Government shall not be obligated to reimburse the Contractor for costs incurred in excess of the estimated cost set forth in the Schedule, and the Contractor shall not be obligated to continue performance under the contract or to incur costs in excess of the estimated cost set forth in the Schedule, unless and until the Contracting Officer shall have notified the Contractor in writing that such estimated cost has been increased and shall have specified in such notice a revised estimated cost which shall thereupon constitute the estimated cost of performance of this contract. When and to the extent that the estimated cost set forth in the Schedule has been increased, any costs incurred by the Contractor in excess of such estimated cost prior to the increase in estimated cost shall be allowable to the same extent as if such costs had been incurred after such increase in estimated cost.

§ 406.203-4 *Allowable cost, fixed fee, and payment.*

ALLOWABLE COST, FIXED FEE, AND PAYMENT

(a) For the performance of this contract the Government shall pay to the Contractor the cost thereof determined by ------* to be allowable in accordance with Subpart B of Part 414 of the Armed Services Procurement Regulation as in effect on the date of this contract and the Schedule (hereinafter referred to as "Allowable Cost"), plus such fixed fee, if any, as may be provided for in the Schedule.

(b) Once each month (or at more frequent intervals, if approved by ------*) the Contractor may submit to an authorized representative of ----------*, in such form and reasonable detail as such representative may require, an invoice or public voucher supported by a statement of cost incurred by the Contractor in the performance of this contract and claimed to constitute Allowable Cost. Each statement of cost shall be certified by an officer or other responsible official of the Contractor authorized by it to certify such statements.

(c) As promptly as may be practicable after receipt of each invoice or voucher and statement of cost, the Government shall, except as hereinafter provided and subject to the provisions of paragraph (d) below, make payment thereon as approved by ------*. After payment of eighty-five percent (85%) of the fixed fee set forth in the Schedule, as from time to time amended, further payment on account of the fixed fee shall be withheld until a reserve of either (i) fifteen percent (15%) of the total fixed fee or (ii) $100,000, whichever amount is less, shall have been set aside, such reserve or the balance thereof to be retained until the execution and delivery of a release by the Contractor as provided in paragraph (e) hereof.

(d) At any time or times prior to final payment under this contract ------* may cause to be made such audit of the invoices or vouchers and statements of cost as shall be deemed necessary. Each payment theretofore made shall be subject to reduction to the extent of amounts included in the related invoice or voucher and statement of cost which are found by ------* on the basis of such audit not to constitute Allowable Cost, and shall also be subject to reduction for overpayments or to increase for underpayments on preceding invoices or vouchers. On receipt of the voucher or invoice designated by the Contractor as the "completion voucher" or "completion invoice" and statement of cost, which shall be submitted by the Contractor as promptly as may be practicable following completion of the work under this contract but in no event later than one (1) year (or such longer period as the Contracting Officer may, in his discretion, approve in writing) from the date of such completion, and following compliance by the Contractor with all provisions of this contract (including, without limitation, provisions relating to patents and the provisions of paragraphs (e) and (f) of this clause), the Government shall as promptly as may be practicable pay any balance of Allowable Cost.

(e) The Contractor and each assignee under an assignment entered into under this contract and in effect at the time of final payment under this contract shall execute and deliver at the time of and as a condition precedent to final payment under this contract, a release discharging the Government, its officers, agents and employees of and from all liabilities, obligations, and claims a rising out of or under this contract, subject only to the following exceptions:

(1) Specified claims in stated amounts or in estimated amounts where the amounts are not susceptible of exact statement by the Contractor.

(2) Claims together with reasonable expenses incidental thereto, based upon the liabilities of the Contractor to third parties arising out of the performance of the contract, which are not known to the Contractor on the date of the execution of the release, and of which the Contractor gives notice in writing to the Contracting Officer not more than six (6) years after the date of the release or the date of any notice to the Contractor that the Government is prepared to make final payment, whichever is earlier.

(3) Claims for reimbursement of costs (other than expenses of the Contractor by reason of its indemnification of the Government against patent liability), including reasonable expenses incidental thereto, incurred by the Contractor under the provisions of the contract relating to patents.

(f) The Contractor agrees that any refunds, rebates or credits (including any interest thereon) accruing to or received by the Contractor or any assignee which arise out of the performance of this contract and on account of which the Contractor has received reimbursement shall be paid by the Contractor to the Government. The Contractor and each assignee under an assignment entered into under this contract and in effect at the time of final payment under this contract shall execute and deliver at the time of and as a condition precedent to final payment under this contract, an assignment to the Government of refunds, rebates or credits (including any interest thereon) arising out of the performance of this contract, in form and substance satisfactory to the Contracting Officer. Reasonable expenses incurred by the Contractor for the purpose of securing any such refunds, rebates or credits shall constitute Allowable Cost when approved by the Contracting Officer.

(g) Any cost incurred by the Contractor under the terms of this contract which would constitute Allowable Cost under the provisions of this clause shall be included in determining the amount payable under this contract, notwithstanding any provisions contained in the specifications or other documents incorporated in this contract by reference, designating services to be performed or materials to be furnished by the Contractor at its expense or without cost to the Government.

(h) Payment of the fixed fee shall be made to the Contractor as provided in the Schedule subject, however, to the withholding provisions of paragraph (c) hereof.

In the foregoing clause, insert, in contracts of the Department of the Army and the Department of the Air Force, the words "the Contracting Officer," and insert, in contracts of the Department of the Navy, the words "the Bureau of Supplies and Accounts (Cost Inspection Service)," in the space designated by an asterisk (------*).

This clause may be varied in accordance with Department procedures by insertion in the Schedule of appropriate provisions relating to negotiated overhead rates.

In paragraph (c) of the foregoing clause, the percentages and amounts set forth therein may be varied in accordance with Department procedures.

In paragraph (e) (2) of the foregoing clause, the period of six (6) years may be increased to correspond with any statutory period of limitation applicable to claims of third parties against the Contractor provided that a corresponding increase is made in the period for retention of records required in paragraph (a) (4) of the clause set forth in § 406.203-7.

In the case of cost-reimbursement type supply contracts without fee (a) insert the following sentence in lieu of the second sentence of paragraph (c) of the foregoing clause: "After payment of eighty percent (80%) of the total estimated cost of performance of this contract, as from time to time amended, further payment on account of Allowable Cost shall be withheld until a reserve of either (i) one percent (1%) of such total estimated cost or (ii) $100,000, whichever amount is less, shall have been set aside, such reserve or the balance thereof to be retained until the execution and delivery of a release by the Contractor as provided in paragraph (e) hereof."

and (b) delete paragraph (h) of the foregoing clause.

§ 406.203-5 *Inspection of supplies and correction of defects.*

INSPECTION OF SUPPLIES AND CORRECTION OF DEFECTS

(a) All supplies (which term throughout this clause includes without limitation raw materials, components, intermediate assemblies, and end products) shall be subject to inspection and test by the Government, to the extent practicable at all times and places including the period of manufacture, and in any event prior to final acceptance. The Contractor shall provide and maintain an inspection system acceptable to the Government covering the supplies, fabricating methods, and special tooling hereunder. The Government, through any authorized representative, may inspect the plant or plants of the Contractor or of any of its subcontractors engaged in the performance of this contract.

If any inspection or test is made by the Government on the premises of the Contractor or a subcontractor, the Contractor shall provide and shall require subcontractors to provide all reasonable facilities and assistance for the safety and convenience of the Government inspectors in the performance of their duties. All inspections and tests by the Government shall be performed in such a manner as will not unduly delay the work. Except as otherwise provided in this contract, final acceptance of any supplies or lots of supplies shall be made as promptly as practicable after delivery thereof and shall be deemed to have been made no later than sixty (60) days after the date of such delivery if final acceptance has not been made earlier within such period.

(b) At any time during performance of this contract, but not later than six (6) months (or such other period as may be provided in the Schedule) after final acceptance of the supplies or lots of supplies last delivered in accordance with the requirements of this contract, the Government may require the Contractor to remedy by correction or replacement, as directed by the Contracting Officer, any supplies or lots of supplies which at the time of delivery thereof are defective in material or workmanship or otherwise not in conformity with the requirements of this contract. Except as otherwise provided in paragraph (c) hereof, the cost of any such replacement or correction shall be included in Allowable Cost determined as provided in the clause of this contract entitled "Allowable Cost, Fixed Fee and Payment," but no additional fee shall be payable with respect thereto. Such supplies or lots of supplies shall not be tendered again for acceptance, unless the former tender and the requirement of correction is disclosed. If the Contractor fails to proceed with reasonable promptness to replace or correct such supplies or lots of supplies, the Government (i) may by contract or otherwise replace or correct such supplies and charge to the Contractor any increased cost occasioned the Government thereby, or may reduce any fixed fee payable under this contract (or require repayment of any fixed fee theretofore paid) in such amount as may be equitable under the circumstances, or (ii) in the case of supplies not delivered, may require the delivery of such supplies, and shall have the right to reduce any fixed fee payable under this contract (or to require repayment of any fixed fee theretofore paid) in such amount as may be equitable under the circumstances, or (iii) may terminate this contract for default as provided in the clause of this contract entitled "Termination." Failure to agree to the amount of any such increased cost to be charged to the Contractor or to such reduction in, or repayment of, the fixed fee shall be a dispute concerning a question of fact within the meaning of the clause of this contract entitled "Disputes."

(c) Notwithstanding the provisions of paragraph (b) hereof, the Government may at any time require the correction or replacement by the Contractor, without cost to the Government, of supplies or lots of supplies which are defective in material or workmanship, or otherwise not in conformity with the requirements of this contract, if such defects or failures are due to fraud, lack of good faith or willful misconduct on the part of any of the Contractor's directors or officers, or on the part of any of its managers, superintendents, or other equivalent representatives, who has supervision or direction of (i) all or substantially all of the Contractor's business, or (ii) all or substantially all of the Contractor's operations at any one plant or separate location in which this contract is being performed, or (iii) a separate and complete major industrial operation in connection with the performance of this contract. Fraud, lack of good faith or willful misconduct on the part of any of

such supervisory personnel shall be deemed to include the selection of individual employees or the retention of employees after any of such supervisory personnel has reason to believe that such employees are habitually careless of otherwise unqualified.

(d) Corrected supplies or replaced supplies shall be subject to the provisions of this clause in the same manner and to the same extent as supplies originally delivered under this contract.

(e) The Contractor shall make its records of all inspection work available to the Government during the performance of this contract and for such longer period as may be specified in this contract.

(f) Except as provided in this clause and as may be provided in the Schedule, the Contractor shall have no obligation or liability to correct or replace supplies or lots of supplies which at the time of delivery are defective in material or workmanship or otherwise not in conformity with the requirements of this contract.

(g) Except as otherwise provided in the Schedule, the Contractor's obligation to correct or replace Government-furnished property (which is property in the possession of or acquired directly by the Government and delivered or otherwise made available to the Contractor) shall be governed by the provisions of the clause of this contract entitled "Government Property."

§ 406.203–6 *Assignment of claims.* In accordance with the instructions set forth in § 406.103–8, insert the contract clause set forth in § 406.103–8.

§ 406.203–7 *Records.*

RECORDS

(a) (1) The Contractor agrees to maintain books, records, documents and other evidence pertaining to the costs and expenses of this contract (hereinafter collectively called the "records") to the extent and in such detail as will properly reflect all net costs, direct and indirect, of labor, materials, equipment, supplies and services, and other costs and expenses of whatever nature for which reimbursement is claimed under the provisions of this contract. The Contractor's accounting procedures and practices shall be subject to the approval of ------*: *Provided, however,* That no material change will be required to be made in the Contractor's accounting procedures and practices if they conform to generally accepted accounting practices and if the costs properly applicable to this contract are readily ascertainable therefrom.

(2) The Contractor agrees to make available at the office of the Contractor at all reasonable times during the period set forth in subparagraph (4) below any of the records for inspection, audit or reproduction by any authorized representative of the Department or of the Comptroller General.

(3) In the event the Comptroller General or any of his duly authorized representatives determines that his audit of the amounts reimbursed under this contract as transportation charges will be made at a place other than the office of the Contractor, the Contractor agrees to deliver, with the reimbursement voucher covering such charges or as may be otherwise specified within two years after reimbursement of charges covered by any such voucher, to such representative as may be designated for that purpose through ------* such documentary evidence in support of transportation costs as may be required by the Comptroller General or any of his duly authorized representatives.

(4) Except for documentary evidence delivered to the Government pursuant to subparagraph (3) above, the Contractor shall preserve and make available its records for a period of six years (unless a longer period of time is provided by applicable statute) from the date of the voucher or invoice submitted by the Contractor after the completion of the work under the contract and designated by the Contractor as the "completion voucher" or "completion invoice" or, in the event this contract has been completely terminated, from the date of the termination settlement agreement: *Provided, however,* That records which relate to (A) appeals under the clause of this contract entitled "Disputes," (B) litigation or the settlement of claims arising out of the performance of this contract, or (C) costs or expenses of the contract as to which exception has been taken by the Comptroller General or any of his duly authorized representatives, shall be retained by the Contractor until such appeals, litigation, claims or exceptions have been disposed of, but in no event for less than the six-year period mentioned above.

(5) Except for documentary evidence delivered pursuant to subparagraph (3) above, and the records described in the proviso of subparagraph (4) above, the Contractor may in fulfillment of its obligation to retain its records as required by this clause substitute photographs, microphotographs or other authentic reproductions of such records, after the expiration of two years following the last day of the month of reimbursement to the Contractor of the invoice or voucher to which such records relate, unless a shorter period is authorized by the Contracting Officer with the concurrence of the Comptroller General or his duly authorized representative.

(6) The provisions of this paragraph (a), including this subparagraph (6), shall be applicable to and included in each subcontract hereunder which is on a cost, cost-plus-a-fixed-fee, time-and-material or labor-hour basis.

(b) The Contractor further agrees to include in each of his subcontracts hereunder, other than those set forth in subparagraph (a) (6) above, a provision to the effect that the subcontractor agrees that the Comptroller General or the Department, or any of their duly authorized representatives, shall, until the expiration of three years after final payment under the subcontract, have access to and the right to examine any directly pertinent books, documents, papers, and records of such subcontractor involving transactions related to the subcontract. The term "subcontract," as used in this paragraph (b) only, excludes (i) purchase orders not exceeding $1,000 and (ii) subcontracts or purchase orders for public utility services at rates established for uniform applicability to the general public.

In the foregoing clause, insert, in contracts of the Department of the Army and the Department of the Air Force, the words "the Contracting Officer," and insert, in contracts of the Department of the Navy, the words "the Bureau of Supplies and Accounts (Cost Inspection Service)," in the space designated by an asterisk (------*).

§ 406.203–8 *Subcontracts.*

(a) The Contractor shall give advance notification to the Contracting Officer of any proposed subcontract hereunder which (i) is on a cost or cost-plus-a-fixed-fee basis, or (ii) is on a fixed-price basis exceeding in dollar amount either $25,000 or five percent (5%) of the total estimated cost of this contract.

(b) The Contractor shall not, without the prior written consent of the Contracting Officer place any subcontract which (i) is on a cost or cost-plus-a-fixed-fee basis, or (ii) is on a fixed-price basis exceeding in dollar amount either $25,000 or five percent (5%) of the total estimated cost of this contract, or (iii) provides for the fabrication, purchase, rental, installation or other acquisition, of any item of industrial facilities, or of special tooling having a value in excess of $1,000, or (iv) is on a time-and-material or labor-hour basis. The Contracting Officer may, in his discretion, ratify in writing any such subcontract; such action shall constitute the consent of the Contracting Officer as required by this paragraph (b).

(c) The Contractor agrees that no subcontract placed under this contract shall provide for payment on a cost-plus-a-percentage-of-cost basis.

(d) The Contracting Officer may, in his discretion, specifically approve in writing any of the provisions of a subcontract. However, such approval or the consent of the Contracting Officer obtained as required by this clause shall not be construed to constitute a determination of the allowability of any cost under this contract, unless such approval specifically provides that it constitutes a determination of the allowability of such cost.

(e) The Contractor shall give the Contracting Officer immediate notice in writing of any action or suit filed, and prompt notice of any claim made against the Contractor by any subcontractor or vendor which, in the opinion of the Contractor, may result in litigation, related in any way to this contract with respect to which the Contractor may be entitled to reimbursement from the Government.

In paragraph (a) of the foregoing clause, the percentage and amount set forth therein may be revised downward only in accordance with Department procedures. In paragraph (b) of the foregoing clause, the percentage and amount set forth in (ii) thereof may be varied, the dollar amount set forth in (iii) may be increased, and in (i) and (iv) thereof dollar amounts may be established below which the prior written consent of the Contracting Officer need not be obtained, in accordance with Department procedures.

§ 406.203–9 *Utilization of small business concerns.* Insert the contract clause set forth in § 406.104–14, except in those contracts entered into with foreign contractors which are to be performed outside of the continental limits of the United States, its territories and possessions.

§ 406.203–10 *Termination.* Insert the contract clause set forth in § 407.702 of this subchapter, deleting from such clause paragraph (k) thereof.

§ 406.203–11 *Excusable delays.*

The Contractor shall not be in default by reason of any failure in performance of this contract in accordance with its terms (including any failure by the Contractor to make progress in the prosecution of the work hereunder which endangers such performance) if such failure arises out of causes beyond the control and without the fault or negligence of the Contractor. Such causes include, but are not restricted to: acts of God or of the public enemy; acts of the Government; fires; floods; epidemics; quarantine restrictions; strikes; freight embargoes; unusually severe weather; and failure of subcontractors to perform or make progress due to such causes, unless the Contracting Officer shall have determined that the supplies or services to be furnished under the subcontract were obtainable from other sources and shall have ordered the Contractor in writing to procure such services or supplies from such other sources, and the Contractor shall have failed reasonably to comply with such order. Upon request of the Contractor, the Contracting Officer shall ascertain the facts and extent of such failure and, if he shall determine that such failure was occasioned

by any one or more of the said causes, the delivery schedule shall be revised accordingly.

§ 406.203–12 *Disputes.* Insert the contract clause set forth in § 406.103–12. In accordance with Department procedures, the foregoing clause may be modified to provide for (a) decision by the activity within a Department performing audit functions of any dispute concerning a question as to allowability of cost, and (b) intermediate appeal to the Head of the Procuring Activity concerned. The decision of the Contracting Officer or of the Activity performing the audit function shall, if mailed, be sent by registered mail return receipt requested.

§ 406.203–13 *Notice and assistance regarding patent infringement.* Insert the contract clause set forth in § 408.102 of this subchapter.

§ 406.203–14 *Buy American Act.* Insert the contract clause set forth in § 411.103–14.

§ 406.203–15 *Convict labor.* Insert the contract clause set forth in § 411.203 of this subchapter.

§ 406.203–16 *Eight-Hour Law of 1912.* Insert the contract clause set forth in § 411.303–1 of this subchapter. Note the mandatory provision required by § 411.303–2 of this subchapter in the case of contracts with a State or political subdivision thereof.

§ 406.203–17 *Walsh-Healey Public Contracts Act.* Insert the contract clause set forth in § 411.604 of this subchapter.

§ 406.203–18 *Nondiscrimination in employment.* Insert the contract clause set forth in § 411.603 of this subchapter.

§ 406.203–19 *Officials not to benefit.* Insert the contract clause set forth in § 406.103–19.

§ 406.203–20 *Covenant against contingent fees.* Insert the contract clause set forth in § 406.103–20.

§ 406.203–21 *Government property.* Insert the contract clause set forth in § 407.703 of this subchapter.

§ 406.203–22 *Insurance; liability to third persons.*

(a) The Contractor shall procure and thereafter maintain workmen's compensation, employer's liability, comprehensive general liability (bodily injury) and comprehensive automobile liability (bodily injury and property damage) insurance, with respect to performance under this contract, and such other insurance as ------* may from time to time require with respect to performance under this contract, provided, that the Contractor in fulfillment of its obligation to procure workmen's compensation insurance may, with the approval of ------*, and pursuant to statutory authority, maintain a self-insurance program. All insurance required pursuant to the provisions of this paragraph shall be in such form, in such amounts, and for such periods of time as ------* may from time to time require or approve, and with insurers approved by ------*.

(b) The Contractor agrees to the extent and in the manner required by ------* to submit for the approval of ------* any other insurance maintained by the Contractor in connection with the performance of this contract and for which the Contractor seeks reimbursement hereunder.

(c) The Contractor shall be reimbursed: (i) For the portion allocable to this contract of the reasonable cost of insurance as required or approved pursuant to the provisions of this clause, and (ii) for liabilities to third persons for loss or damage to property (other than property (A) owned, occupied or used by the Contractor or rented to the Contractor or (B) in the care, custody, or control of the Contractor), or for death or bodily injury, not compensated by insurance or otherwise, arising out of the performance of this contract, whether or not caused by the negligence of the Contractor, its agents, servants or employees, provided such liabilities are represented by final judgments or by settlements approved in writing by the Government, and expenses incidental to such liabilities (except liabilities (i) for which the Contractor is otherwise responsible under the express terms of the clause or clauses, if any, specified in the Schedule, or (ii) with respect to which the Contractor has failed to insure as required or maintain insurance as approved by ------*, or (iii) which result from willful misconduct or lack of good faith on the part of any of the Contractor's directors or officers, or on the part of any of the managers, superintendents, or other equivalent representative, who has supervision or direction of (1) all or substantially all of the Contractor's business or (2) all or substantially all of the Contractor's operations at any one plant or separate location in which this contract is performed, or (3) a separate and complete major industrial operation in connection with the performance of this contract. The foregoing shall not restrict the right of the Contractor to be reimbursed for the cost of workmen's compensation insurance required by the statutes of any State in which such statutes are applicable to operations performed hereunder, or for such self-insurance as may be approved by ------*, or for such other insurance as may be required by law in connection with the performance of this contract, to the extent that the cost and expense of such insurance are reasonable in the circumstances and not contrary to the provisions of this contract and the risk of which is not otherwise insured or which is assumed by the Government: *Provided, however,* That the Contractor shall not be reimbursed by the Government in an amount in excess of any amounts received by the Contractor as indemnity covered under the insurance, or otherwise, on account of any risk with respect to which the Contractor is required to maintain insurance hereunder.

In the foregoing clause, insert, in the contracts of the Department of the Army and the Department of the Air Force, the words "the Contracting Officer," and insert, in the contracts of the Department of the Navy, the words "the Department," in the space designated by an asterisk (------*).

§ 406.204 *Clauses to be used when applicable.*

§ 406.204–1 *Davis-Bacon Act.* In accordance with the requirements of Subpart D of Part 411 of this subchapter, insert the applicable contract clauses set forth in § 411.403–1 or § 411.403–4 of this subchapter, as the case may be.

§ 406.204–2 *Copeland Act.* In accordance with the requirements of Subpart D of Part 411 of this subchapter, insert the applicable contract clauses set forth in § 411.403–1 or § 411.403–4 of this subchapter, as the case may be.

§ 406.204–3 *Employment of aliens.* In accordance with the requirements of § 406.104–3, insert the contract clause set forth in § 406.104–3.

§ 406.204–4 *Neutrality Act of 1939.* In accordance with the requirements of § 406.104–4 insert the contract clause set forth in § 406.104–4.

§ 406.204–5 *Filing of patent applications.* In accordance with the requirements of § 408.104 of this subchapter, insert the contract clause set forth in § 408.104 of this subchapter.

§ 406.204–6 *Patent indemnity.* In accordance with the requirements of § 408.105 of this subchapter, insert the contract clause set forth in § 408.105 of this subchapter.

§ 406.204–7 *Renegotiation.* In accordance with the requirements of § 418.103 of this subchapter, insert the contract clause set forth in § 418.103 of this subchapter.

§ 406.204–8 *Competition in subcontracting.* In accordance with the requirements of Subpart B of Part 409 of this subchapter, insert the contract clause set forth in § 409.204 of this subchapter, as the case may be.

§ 406.204–9 *Renegotiation.* In accordance with the requirements set forth in § 406.104–10, insert the contract clause set forth in § 406.104–10.

§ 406.204–10 *Walsh-Healey Act.* In accordance with the instructions set forth in § 406.104–11 insert the appropriate contract clause set forth in § 406.104–11.

§ 406.204–11 *Military security requirements.* In accordance with the requirements of § 406.104–12, insert the contract clause set forth in § 406.104–12, deleting paragraphs (c) and (f) therefrom and substituting therefor the following paragraphs (c) and (f):

(c) Subsequent to the date of this contract, the security classifications or requirements under this contract are changed by the Government as provided in this clause, and if such changes cause an increase or decrease in the estimated cost of performance of this contract, the estimated cost and fixed fee, if any, shall, to the extent appropriate, be subject to an equitable adjustment. Any such equitable adjustment shall be accomplished in the manner set forth in the clause of this contract entitled "Changes."

(f) The Contractor agrees to insert in all subcontracts hereunder which involve access to classified security information, provisions which shall conform substantially to the language of this clause, including this paragraph (f) but excluding paragraph (c) of this clause. The Contractor may insert in any such subcontract and any such subcontract entered into thereunder may contain, in turn

of paragraph (e) of this clause, provisions which permit equitable adjustments to be made in the subcontract price or in the estimated cost and fixed fee of the subcontract (as appropriate to the type of subcontract involved) on account of changes in security classifications or requirements made under the provisions of this clause subsequent to the date of the subcontract involved.

§ 406.204-12 *Domestic food or clothing.* In accordance with the requirements of § 406.104-13, insert the contract clause set forth in § 406.104-13.

§ 406.204-13 *Gratuities.* In accordance with the requirements of § 406.104-16, insert the contract clause set forth in § 406.104-16.

§ 406.205 *Additional clauses.* The following clauses shall be inserted in cost-reimbursement type supply contracts in accordance with Department procedures when it is desired to cover the subject matter thereof in such contracts.

§ 406.205-1 *Alteration in contract.* The contract clause set forth in § 406.105-1 may be inserted.

§ 406.205-2 *Approval of contract.* The contract clause set forth in § 406.105-2 may be inserted.

§ 406.205-3 *Notice to the Government of labor disputes.* The contract clause set forth in § 406.105-3 may be inserted.

§ 406.205-4 *Authorization and consent.* The contract clause set forth in § 406.106 of this subchapter may be inserted pursuant to the provisions of § 406.106 of this subchapter.

§ 406.205-5 *Bill of materials.* The contract clause set forth in § 406.106-7 of this regulation may be inserted pursuant to the provisions of § 406.106-7.

§ 406.205-6 *Federal, State, and local taxes.* [Reserved]

T. P. FIKE,
*Deputy Assistant Secretary of Defense.*

[F. R. Doc. 53-9724; Filed, Nov. 13, 1953; 8:46 a. m.]

## Chapter VI—Department of the Navy

### Subchapter F—Islands Under Navy Jurisdiction

### PART 761—GUAM NAVAL DEFENSIVE SEA AREA AND NAVAL AIRSPACE RESERVATION

Part 761 is revised to read as follows:

Sec.
761.1 Entry of persons into the Guam Island Naval Defensive Sea Area.
761.2 Navigation of vessels or other craft other than public vessels of the United States, into the Guam Island Naval Defensive Sea Area.
761.3 Navigation of aircraft, other than public aircraft of the United States, into the Naval Airspace Reservation.
761.4 Naval defensive sea area closed between sunset and sunrise.
761.5 Inspection and search of vessels.
761.6 Laws and regulations must be obeyed.
761.7 Commander U. S. Naval Forces Marianas shall take steps to apprehend vessels, aircraft or persons violating Executive Order.
761.8 Commander U. S. Naval Forces Marianas shall formulate additional rules and regulations and instructions.
761.9 Commander U. S. Naval Forces Marianas designated representative of Secretary of the Navy in enforcement of Executive Order, rules and regulations.

AUTHORITY: §§ 761.1 to 761.9 issued under 44 Stat. 570; sec. 1, 62 Stat. 799, 49 U. S. C. 174; 18 U. S. C. 2152.

§ 761.1 *Entry of persons into the Guam Island Naval Defensive Sea Area.* At no time shall any persons, other than persons on public vessels of the United States, enter the Guam Island Naval Defensive Sea Area unless authorized by the Secretary of the Navy. The Chief of Naval Operations, the Commander in Chief, U. S. Pacific Fleet and the Commander U. S. Naval Forces Marianas have been empowered by the Secretary of the Navy to act in this matter.

§ 761.2 *Navigation of vessels or other craft, other than public vessels of the United States, into the Guam Island Naval Defensive Sea Area.* At no time shall any vessel or other craft, except public vessels of the United States, be navigated into the Guam Island Naval Defensive Sea Area unless authorized by the Secretary of the Navy. The Chief of Naval Operations has been empowered by the Secretary of the Navy to act in this matter.

§ 761.3 *Navigation of aircraft, other than public aircraft of the United States, into the Naval Airspace Reservation.* At no time shall any aircraft, other than public aircraft of the United States, be navigated to, via, or over the Island of Guam or in the Guam Island Naval Airspace Reservation unless authorized by the Secretary of the Navy. The Chief of Naval Operations and the Commander in Chief, U. S. Pacific Fleet, have been empowered by the Secretary of the Navy to act in this matter.

§ 761.4 *Naval defensive sea area closed between sunset and sunrise.* Passage of any vessel into or out of the Guam Island Naval Defensive Sea Area between the hours of sunset and sunrise is prohibited, except when specifically permitted by the Commander U. S. Naval Forces Marianas.

§ 761.5 *Inspection and search of vessels.* The entrance of all vessels or other craft, other than public vessels of the United States, will be granted only on the condition that their owners, charterers, operators or masters:

(a) Consent to inspection and search of all vessels or other craft whenever the local naval commander considers such action necessary for military security of the area.

(b) Execute a "hold harmless" agreement under which no liability shall be incurred by the Navy Department, its agents or representatives for damage to vessels or other craft, their cargo, or for any demurrage charges which may arise out of or in connection with any inspection or search while in the exercise of due care.

§ 761.6 *Laws and regulations must be obeyed.* All persons, vessels and aircraft entering the Guam Island Naval Defensive Sea Area or the Guam Island Naval Airspace Reservation, whether or not in violation of Executive Order 8683 (3 CFR, 1943 Cum. Supp.), as corrected by Executive Order 8729 (3 CFR, 1943 Cum. Supp.), shall be governed by such regulations and restrictions upon their conduct and movements as may be established by the Commander U. S. Naval Forces Marianas whether by general regulation or by special instructions in any case.

§ 761.7 *Commander U. S. Naval Forces Marianas shall take steps to apprehend vessels, aircraft or persons violating Executive Order.* The Commander U. S. Naval Forces Marianas shall take all practical measures to apprehend vessels, aircraft and persons violating the provisions of Executive Order 8683 (3 CFR, 1943 Cum. Supp.), as corrected by Executive Order 8729 (3 CFR, 1943 Cum. Supp.), and shall hold each such vessel in custody pending receipt of instructions from the Secretary of the Navy.

§ 761.8 *Commander U. S. Naval Forces Marianas shall formulate additional rules and regulations and instructions.* The Commander U. S. Naval Forces Marianas shall establish and maintain such further rules and regulations and shall issue such special instructions in each case, as he may deem necessary for carrying out the provisions of Executive Order 8683 (3 CFR, 1943 Cum. Supp.), as corrected by Executive Order 8729 (3 CFR, 1943 Cum. Supp.).

§ 761.9 *Commander U. S. Naval Forces Marianas designated representative of Secretary of the Navy in enforcement of Executive Order, rules and regulations.* In all matters pertaining to the local administration of the Guam Island Naval Defensive Sea Area and the Guam Island Naval Airspace Reservation, the Commander U. S. Naval Forces Marianas is hereby designated as the representative of the Secretary of the Navy, with full authority to enforce the provisions of Executive Order 8683 (3 CFR, 1943 Cum. Supp.), as corrected by Executive Order 8729 (3 CFR, 1943 Cum. Supp.), and all regulations issued pursuant thereto.

R. B. ANDERSON,
*Secretary of the Navy.*

NOVEMBER 12, 1953.

[F. R. Doc. 53-9725; Filed, Nov. 18, 1953; 8:46 a. m.]

## Chapter VII—Department of the Air Force

### Subchapter F—Reserve Forces

### PART 861—OFFICERS' RESERVE

### PART 862—AIR FORCE RESERVE OFFICERS' TRAINING CORPS

### Subchapter G—Personnel

### PART 871—ENLISTMENT IN THE REGULAR AIR FORCE

MISCELLANEOUS AMENDMENTS

1. Paragraph (b) (1) and the introductory text of paragraph (b) (3) of § 861.1101 are changed as follows:

§ 861.1101 *Purpose and policy.* * * *

(b) *Policy*—(1) *Assignment.* Reservists assigned to program elements within Training Categories A, B, and C are eligible to receive inactive duty training pay.

* * * * *

(3) *Assignments for which pay may be received.* To the extent of available funds, Reservists in the following types of assignments are eligible to receive inactive duty training pay:

* * * * *

2. Paragraphs (a) and (b) of § 861.1102 are changed as follows:

§ 861.1102 *Definitions*—(a) *Training period.* A duly authorized period of instruction performed by persons who are training as individuals. Such training will be of at least two hours' duration and normally will be of four hours' duration. This term will include authorized attendance at a scheduled class of instructions under the contract school training program.

(b) *Unit training assembly.* A duly authorized and scheduled period of instruction conducted by Table of Organization, Table of Distribution, and non-Table of Organization, composite-type units. Such unit training assemblies will be of at least two hours' duration and normally will be of four hours' duration.

* * * * *

3. Paragraphs (b) (1) and (2) of § 861.1103 are changed as follows:

§ 861.1103 *Methods of qualifying.* * * *

(b) *Officers.* Officers of the Air Force Reserve will be eligible for inactive duty training pay when pursuant to competent orders authorizing inactive duty training pay:

(1) They are present and perform duties during a duly authorized unit training assembly of the unit to which assigned, and if assigned to a combat, combat support, or flying training unit, at least 60 percent of the adjusted strength of the unit was present, or

(2) They perform equivalent duties pursuant to competent orders, within 30 days immediately following the date of the authorized unit training assembly of the unit to which assigned, and for which equivalent duty has been authorized in place of attendance, provided that at least 60 percent of the adjusted strength of the unit (if a Training Category A unit) was present for the unit training assembly for which equivalent duty has been authorized in place of attendance there-at.

* * * * *

4. Paragraph (b) of § 861.1104 is changed as follows:

§ 861.1104 *Mobilization assignees.* * * *

(b) *Number of training periods authorized.* Not more than 12 paid training periods in each fiscal year will be authorized personnel with mobilization assignments.

* * * * *

5. Paragraph (a) of § 861.1105 is changed as follows:

§ 861.1105 *Specialist training units*—(a) *Eligibility.* All Reservists assigned to specialist training units, provided that they have executed the signed statement referred to in § 861.1101 (b) (3) (ii), are eligible to receive inactive duty training pay.

* * * * *

6. Paragraph (c) is added to § 861.1107 as follows:

§ 861.1107 *Maximum number of paid training periods or unit training assemblies.* * * *

(c) *Training Category C.* A maximum of four training periods or unit training assemblies will be authorized for pay purposes in any one calendar month or quarter of a fiscal year for personnel assigned to program elements in Training Category C in which 12 paid drills each year are authorized.

7. Section 861.1114 is added to Part 861 as follows:

§ 861.1114 *Rations in kind for airmen.* Air Force Reserve airmen participating in inactive duty training are entitled to rations in kind or a portion thereof at Government expense while serving in an inactive duty pay status and when instruction or duty period(s) total eight or more hours in any one calendar day. The payment of a monetary allowance in lieu of rations in kind is not authorized.

8. Section 861.1115 is added to Part 861 as follows:

§ 861.1115 *Uniform maintenance allowance.* Air Force Reserve officers participating in inactive duty training in a pay status are entitled to a monetary uniform maintenance allowance after completing prescribed periods of active and inactive duty training.

(Sec. 251, 66 Stat. 495; 50 U. S. C. 1002. Interpret or apply secs. 101, 259, 601, 603, 66 Stat. 481, 496, 501; 50 U. S. C. 901-1010, 1031-1033)

9. Sections 862.50 to 862.66, Training Camps, are revoked.

(R. S. 161, sec. 202, 61 Stat. 500, as amended; 5 U. S. C. 22, 171a)

10. Paragraphs (e) and (f) of § 871.2 are changed as follows:

§ 871.2 *Qualifications.* * * *

(e) *Police clearance.* Prior to enlistment of males, except those persons who enlist within 90 days from date of discharge from any of the Armed Forces, recruiting installations will communicate with the police in each locality where the applicant has resided for a period of 6 months or more in the previous 3-year period. When reply from police is not received within 21 days, the applicant may be enlisted provided that he is the type desired by the Air Force and every effort has been made to check his character through local sources.

(f) *Enlistment of persons with dependents*—(1) *Male.* (i) Applicants with one dependent may be enlisted in any grade if otherwise qualified.

(ii) Applicants with two dependents may be enlisted only if qualified to enlist in grade E-4 (Airman 1st Class) or higher.

(iii) Applicants with three or more dependents may be enlisted only if qualified to enlist in grade E-5 (Staff Sergeant) or higher, or are authorized to enlist in a lower permanent grade and be immediately promoted to a temporary grade of E-5 or higher.

(iv) Male airmen currently serving, including members of Reserve components on extended active duty, who reenlist within 90 days from date of separation may be enlisted without regard to dependency restrictions.

(2) *Female.* (i) The provisions of subparagraph (1) of this paragraph apply to women.

(ii) Married women without prior service will not be enlisted.

(iii) Women with minor dependents as indicated in (a) through (c) of this subdivision are not eligible to enlist.

(a) Women who are parents by birth or adoption of a child under 18 years of age of whom they have personal or legal custody.

(b) Women who are stepparents of a child under 18 years of age and if the child is within their household for a period of more than 30 days a year.

(c) Women who have personal custody of any child under 18 years of age.

(3) *Waivers.* Waivers of any of the restrictive conditions in subparagraphs (1) and (2) of this paragraph are not authorized.

11. Paragraph (a) of § 871.3 is changed as follows:

§ 871.3 *Persons ineligible.* * * *

(a) *Persons overseas.* Persons with or without prior service, except those currently serving, will not be enlisted in overseas commands. Within United States Territories and Possessions, bona fide male territorial residents, who have had prior active service in any of the Armed Forces, may be enlisted.

(R. S. 161, sec. 202, 61 Stat. 500, as amended; 5 U. S. C. 22, 171a. Interpret or apply R. S. 1118, as amended, sec. 2, 28 Stat. 216, as amended, sec. 4, 30 Stat. 978, sec. 1, 37 Stat. 396, sec. 27, 39 Stat. 185, as amended, 59 Stat. 230, as amended, sec. 5, 59 Stat. 539, sec. 106, 62 Stat. 360; 10 U. In F. R. Doc. 53-9633, appearing at page 7240 of the issue for Saturday, November 14, 1953, the following changes should be made in the Table of Assignments in § 3.606 (b):

1. The Channel No. for Selma, Alabama, should read: 8—, 58+.

2. The Channel No. for Merced, California, should read: 34—, 66.

3. The Channel No. for Modesto, California, should read: 14+, 58.

## PROPOSED RULE MAKING

### DEPARTMENT OF THE INTERIOR

#### Fish and Wildlife Service

[ 50 CFR Part 8 ]

PRESQUILE NATIONAL WILDLIFE REFUGE, VIRGINIA

NOTICE OF INTENTION TO DESIGNATE CERTAIN ADJACENT WATERS AS CLOSED AREA

Pursuant to section 4 (a) of the Administrative Procedure Act, approved June 11, 1946 (60 Stat. 238, 5 U. S. C. 1003), and the authority contained in section 3 of the Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755, 16 U. S. C. 704), as amended, notice is hereby given that the Secretary of the Interior intends to issue an order designating as a closed area in which the pursuing, hunting, taking, capture, or killing of migratory birds or attempting to take, capture, or kill migratory birds will not be permitted, all the bed of the James River including all areas thereof under water or exposed in that part of the river in Charles City and Henrico Counties, Virginia, immediately contiguous to and abutting upon lands of the United States comprising the Presquile National Wildlife Refuge and extending from the southern point of Turkey Island Cutoff, upstream approximately six and one-quarter miles to the southwest point of Turkey Island, at the upper end of Turkey Island Cutoff, about one and one-half miles above the mouth of Curles Neck Creek.

All interested persons are hereby afforded an opportunity to participate in the formulation of the proposed designating order by submitting their views, data, or arguments in writing to John L. Farley, Director, Fish and Wildlife Service, Washington 25, D. C., on or before November 30, 1953.

DOUGLAS MCKAY,
*Secretary of the Interior.*

NOVEMBER 13, 1953.

### DEPARTMENT OF AGRICULTURE

#### Production and Marketing Administration

[ 7 CFR Part 928 ]

HANDLING OF MILK IN THE NEOSHO VALLEY MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENTS AND PROPOSED ORDERS AMENDING THE ORDER, AS AMENDED

Pursuant to the provision of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), public hearings were conducted at Pittsburg, Kansas, on August 4–6, 1952, and March 6, 1953, pursuant to notices thereof which were issued on July 16, 1952 (17 F. R. 6671) and February 19, 1953 (18 F. R. 1090).

By a decision of the Secretary issued August 20, 1952, action has been taken on the record of the hearing held August 4–6, 1952, with respect to the pricing of Class I milk for the months of September 1952 through January 1953. Testimony was received with respect to a number of other proposed amendments, including the pricing of milk for more extensive periods of time, changes in the marketing area, the pooling and allocation of milk, the obligations of handlers subject to other Federal orders, and administrative features of the order. The Assistant Administrator, Production and Marketing Administration, on January 23, 1953, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision with respect to these remaining issues and opportunity to file written exceptions thereto was published in the FEDERAL REGISTER on January 29, 1953 (18 F. R. 633).

The Assistant Administrator, Production and Marketing Administration, on August 17, 1953, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision with respect to the issues of the hearing held March 6, 1953, and opportunity to file written exceptions thereto was published in the FEDERAL REGISTER on August 21, 1953 (18 F. R. 5008).

*Findings and conclusions.* 1. No further action should be taken on the record of the public hearing held August 4–6, 1952.

Information received from interested parties and reports from the administrator of the order indicate that substantial changes in milk supply, marketing and other conditions in the Neosho Valley market have occurred since the date of the August 4–6, 1952 hearing. Such changes could not reasonably have been anticipated at the time of the hearing. Under these circumstances it does not appear advisable to base a further decision concerning any proposals on the record of this hearing. It is therefore concluded that the record of this hearing should be closed without further action.

2. The method of determining the price for Class II milk should not be changed on the basis of the record of the hearing of March 6, 1953.

The price for Class II milk under the Neosho Valley order is determined by the paying prices of four condenseries, three of which are located in the 12-county marketing area, and the fourth of which is located in an adjoining county.

While proposals for specific changes were not detailed in the notice of hearing, testimony was received in support of the following changes:

(a) The substitution of a formula price based on market values of butter and spray process nonfat dry milk solids;

(b) The use of the paying prices of other milk manufacturing plants; and

(c) Provision for a reduced price for milk transferred or diverted to manufacturing plants or to other handlers for processing.

In common with most areas of the country the Neosho Valley market experienced a substantial increase in milk supplies in the late months of 1952 and early months of 1953. Handlers without facilities for manufacturing surplus milk into storable dairy products found difficulty in disposing of their receipts in excess of the needs of their fluid trade. As a consequence some handlers discontinued receiving the milk of some of their producers. At the time of the hearing a cooperative association was diverting for its own account the milk of 35 to 40 producers to manufacturing plants. The cooperative association was not able to realize the full Class II price at which it was required to account to the pool on part of this milk.

A cooperative association with manufacturing facilities of its own proposed that a formula price based on market values of butter and spray process nonfat dry milk solids be substituted for the paying prices of the local condenseries. While this butter-powder price would have averaged 17 cents less per hundredweight than the Class II price for the year 1952 it would have been 18 cents more than the Class II price for February 1953, and this relationship has continued, but with greater difference.

While the record indicated that some manufacturing milk plants in the area and others in nearby areas had paid prices for manufacturing milk somewhat less than those of the four plants used as the basis for the Class II price, it also showed that under current marketing conditions this difference was narrowing. By far the majority of the manufacturing milk produced in the area is priced at approximately the Class II price of the order.

The record does not establish the need for a reduced price for milk transferred or diverted to manufacturing plants or to other handlers for processing. Handlers without manufacturing facilities to handle the seasonal surpluses of milk associated with the supply necessary for their fluid business must expect to incur some expense in handling such milk. The record shows that much of the uncertainty which had made it difficult for handlers and cooperatives to find outlets for surplus milk had been relieved by the announcement of the 1953 support price program just prior to the hearing.

It is concluded that this record does not provide a basis for establishing a different method of pricing Class II milk.

*Rulings on exceptions.* Within the period reserved therefor exceptions were filed on behalf of certain handlers subject to the order to the recommended decision filed January 23, 1953, which recommended closing the record of the August 4–6, 1953, hearing without further action. The principal exception was the failure to take action on the basis of this record with respect to the pricing of Class II milk. This matter was the subject of the public hearing held March 6, 1953, at Pittsburg, Kansas, and findings and conclusions based on the record of that hearing are contained in this decision. Other exceptions are hereby overruled for the reasons stated herein. No exceptions were filed to the recommended decision with respect to the issue of the March 6, 1953, hearing.

It is hereby ordered that this decision be published in the FEDERAL REGISTER.

This decision filed at Washington, D. C., this 13th day of November 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

[ 7 CFR Part 930 ]

[Docket No. AO-72-A18]

HANDLING OF MILK IN THE TOLEDO, OHIO, MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED AMENDMENT TO TENTATIVE MARKETING AGREEMENT AND TO ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of the recommended decision of the Assistant Administrator, Production and Marketing Administration, United States Department of Agriculture, with respect to a proposed amendment to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Toledo, Ohio, marketing area. Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C., not later than the close of business the 15th day after publication of this decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

*Preliminary statement.* The hearing, on the record of which the proposed amendment to the tentative marketing agreement and to the order, as amended, was formulated, was conducted at Toledo, Ohio, on July 30 and 31, 1953, pursuant to notice thereof which was issued on July 20, 1953 (18 F. R. 4311).

The material issues of record were concerned with the following:

(1) Modifying the level of the Class I price differential by increasing the amount of the fixed or standard Class I price differential and revising the supply-demand adjustment;

(2) Modifying the seasonal variation in the Class I differential;

(3) Revising the butter-cheese formula used as one of the basic formula prices;

(4) Classifying cream in Class I and modifying the butterfat differentials applicable to such classification;

(5) Changing the method of computing the rate at which advance payments are made to producers; and

(6) Modifying the provision relating to payments to cooperative associations for services performed on behalf of producer-members.

*Findings and conclusions.* The following findings and conclusions on the material issues decided herein are hereby made upon the basis of the record of the hearing:

1 *Level of the Class I price differential.* The stated Class I price differentials should be increased by 20 cents per hundredweight in the six months of short supply, but no change should be made in the computation of the supply-demand adjustment.

The Class I price differentials specified in the order have remained unchanged since September 1, 1951. The supply-demand adjustment was instituted at that time and only minor modifications (effective April 1, 1953) have been made. The supply-demand adjustment utilizes as normal the relationship between receipts of milk from producers and gross sales of Class I and Class II milk which prevailed during the period June 1949 through May 1950. During that period October was the month of shortest supplies, and sales were equal to 95.2 percent of producer receipts. June was the month of greatest supplies, and sales were only 75.2 percent of receipts from producers. However, supplies have been substantially less in relation to sales in each year since the base period. In 1950 November was the month of shortest supply, and sales were 108 percent of producer receipts; in October 1951 sales were 124 percent of receipts; and in October of 1952 sales were 119 percent of receipts. As a result of these shortages the supply-demand adjustment operated to increase the Class I differential to the allowable limit during the fall and winter seasons of 1951–52 and 1952–53. The undersupply of milk has been less pronounced since the fall of

1952 than in the previous season. Supplies have increased relative to sales as a result of (1) the increased production per farm which has characterized the Toledo milk shed and the country as a whole from November 1952 through June 1953, (2) the addition of new shippers at existing plants, and (3) the addition of a country supply plant to the regular, inspected supply of milk for the Toledo market.

The producers proposed that the stated Class I differentials be increased by 50 cents to a total of $1.70 per hundredweight during the 6-month period of lowest production and by 25 cents to a total of $1.25 during the 4 months of intermediate supply. It was proposed that the differential of 75 cents during May and June be retained. It was maintained that this schedule of differentials was substantially equal to the prices, exclusive of the supply-demand adjustment, which had prevailed since September 1, 1951, and that they were comparable with the stated Class I differentials provided by the Federal order for the Cleveland, Ohio, marketing area after allowing for the location adjustment provided by the Cleveland order at locations competitive with Toledo. Producers also proposed that the level of normal supply adopted as a standard for the computation of the supply-demand adjustment be lowered by 8 percentage points to reflect the larger supplies which have characterized the market in the past several months.

Supply-demand adjustments of the type included in the Toledo order are designed to operate in conjunction with stated Class I differentials which are established at such levels as will attract an adequate supply of milk under normal conditions. If the stated differentials fulfill their function of attracting a normal supply of milk, the supply-demand adjustment will neither add to nor subtract from the price except in response to some change in condition. The long-continued undersupply of producer milk in the Toledo market has resulted in substantial additions to the Class I price. To the extent that these higher prices and other factors in the market have encouraged increased supplies of producer milk, the Class I price differentials are reduced. The problem therefore, is one of establishing a new level of stated Class I differentials at such levels as will bring forth a normal supply. At the same time, it is also necessary to reassess the appropriate level of the normal supply. It was pointed out above that the supply of producer milk for the Toledo market has been substantially less than the sales of Class I and Class II milk during the fall and winter months of the past three seasons. However, it appears that supplies have increased in the past several months. Part of the increase results from an unusually high rate of deliveries per producer resulting from favorable weather and abundant feed supplies. This rate may not be sustained. However, the number of producers has also increased, the 2,006 shippers during June 1953 representing a 7 percent increase over the number of shippers in June 1952. It was testified that the elimination from the order of each handlers' option of prorating other source milk whenever his receipts of milk from producers were less than 120 percent of his Class I sales tended to encourage handlers to add producers. It was further testified that the health authorities have requested handlers to increase their efforts to obtain a full supply of milk from locally inspected sources.

Despite these recent increases in supply, it is apparent that the market has not yet achieved a normal supply and price relationship. Official notice is taken of data issued by the market administrator which discloses that Class I and Class II sales during July 1953 were 86.4 percent of producer receipts (2.0 percent above normal), during August were 92.7 percent (4.5 percent above normal), and during September were 100.7 percent (8.9 percent above normal). This evidence that sales are higher than normal in relation to supplies results in an addition of 10 cents per hundredweight to the Class I price differential for September 1953 and 26 cents for October under the terms of the supply-demand adjustment. It was testified at the hearing that if recent trends in sales and in daily average receipts from producers are maintained, the sales-receipts ratio for September and October will range from 8 to 16 percent above normal. This would result in a supply-demand adjustment for November ranging between 26 and 50 cents. It is clear that these evidences of continued prospective undersupply provide no basis for changing the standard utilization percentages to reflect larger supplies.

On the other hand, the stated Class I differentials, exclusive of the supply-demand adjustment, are too low to assure an adequate supply for Toledo in competition with adjacent markets. The annual average Class I differential in Toledo is $1.06 per hundredweight as compared with a Cleveland differential (less 22 cents location adjustment) of $1.34, Detroit, Michigan, $1.43, Lima, Ohio, $1.225 and Fort Wayne, Indiana, $1.21. The seasonally high Class I differentials which prevail in these same markets during the months of shortest supply are $1.20 in Toledo, $1.68 in Cleveland, $1.45 in Lima and $1.65 in Fort Wayne. In the Detroit market the seasonal problem is dealt with by a base-rating plan rather than by seasonal variation in the Class I differential so only the annual average comparisons are appropriate.

It is concluded that the stated Class I differentials in the Toledo market should be increased to a level which, inclusive of modifications resulting from the current and prospective operation of the supply-demand adjustment, will maintain prices at levels equal to those in prospect in the competitive marketing areas. This increase should be added only during the 6 months of lowest production, in order to encourage producers to supply additional milk at the season when it is most needed to meet fluid milk and cream requirements. An increase of 20 cents per hundredweight during these six months would raise the annual average Class I differential to $1.14. This is still below the differentials in adjacent markets cited above, but the supply-demand adjustment seems likely to continue to add to the differential for some months to come. Official notice is taken of the fact that in September the Class I differential for Toledo is $1.30, comprised of a stated differential of $1.20 and a supply-demand adjustment of plus 10 cents, whereas the Cleveland differential in the Toledo zone is $1.49, consisting of a stated differential of $1.68 and a supply-demand adjustment of minus 19 cents, and the differential in Lima is $1.45. These differentials are comparable to the extent that they are at their seasonal high in all three markets. The recommended increase in the Toledo differential would raise it to a total of $1.50.

2. *Seasonal variation in the Class I price differential.* Market requirements for fluid milk and cream are comparatively constant in all months of the year. However, production is normally highest in the summer months when favorable weather, the availability of pasture, and other natural conditions are favorable. In order to encourage as even a production of milk as possible in all months of the year the Toledo order relies upon the device of providing the highest Class I differentials during the months of normally lowest production and the lowest differentials during the flush production months.

Producers proposed that the peak differentials be applied during the months of August through January instead of September through February. They suggested that May and June be retained as the months when the lowest differential should apply and that an intermediate rate be paid during the four remaining months.

It is desirable that the seasonal variation in the Toledo differentials correspond with the seasonal pattern with those in adjacent markets which utilize the same method of encouraging level production. In Toledo, October and November are the months when supplies are lowest in relation to sales. Under the terms of the order the September Class I price is not announced until early October and producers are not paid for September deliveries until October 15. To the extent that producers respond to actual payments paid for milk rather than to advance knowledge of what the differentials will be, it would appear desirable to have the price change come to the producers' attention earlier than October 15. With regard to the flush season, a review of the data discloses that May and June are the months when supplies are largest in relation to sales. It would appear desirable for the lower pay prices to precede rather than follow this peak production period.

It is concluded that the lowest rate of Class I differential, 75 cents per hundredweight, should apply during the months of April, May, and June; the intermediate rate of $1.00 per hundred during the months of February, March, and July; and the peak rate of $1.40 during the months of August through January. The months during which these changes occur are the same as those provided

under the Cleveland and Lima orders. In Fort Wayne the highest rate of differential is confined to October, November, and December, the lowest rate applies in April, May, and June, and the intermediate rate applies in the other six months.

3. *Basic formula price.* The portion of the basic formula price known as the "butter-cheese" formula should be deleted, and a new formula substituted therefor. The new formula should represent the value of milk used for cheese-making.

The basic formula price is now determined by choosing the higher of the prices calculated on the basis of a formula which reflects the value of milk used for butter and nonfat dry milk solids and the average of prices paid by certain condenseries in addition to the "butter-cheese" formula. Two of the major outlets for manufacturing milk are represented by the first two of these alternative prices. Substitution of the formula herein recommended for the latter of these alternatives will provide more direct reflection of the value of milk for cheese, which is the third major outlet for manufacturing grade milk.

The Class I price differential is designed to provide the premium over manufacturing grade milk necessary to insure the market of an adequate supply of pure and wholesome milk. This premium must be added to the value of milk for the highest priced manufacturing outlet in order to avoid impairment of the differential. If one outlet for manufacturing milk were to yield a higher return to farmers than other outlets over a period of time and such higher return were not reflected in increased Class I prices, the incentive to producers for producing milk for the fluid market as compared to manufacturing milk would be reduced. The supplies of milk for the market might suffer as a result.

The present butter-cheese formula is inadequate for this purpose since it gives primary weight to the butter value. In addition, changes in the value of the solids-not-fat portion of the milk are largely overlooked by the butter-cheese formula. The value of solids-not-fat has increased considerably since the time when this formula was first incorporated into the order. For this reason, the price now reflected by the formula is unrealistic.

The cheese formula herein recommended estimates the value of milk for cheese manufacture on the basis of the monthly price for cheddar cheese in primary markets in Wisconsin, and the price of 92 score butter in Chicago. The 92 score butter price at Chicago is widely recognized and is now used for various purposes in the order. The price quotation for cheese in the primary markets of Wisconsin is based on a substantially larger volume of trading than other available quotations. The price data are gathered and reported by the official price reporting service of the Department of Agriculture. These quotations are considered to be the best available for the purpose.

A multiple correlation analysis was undertaken to determine the mathematical relationship which these cheese and butter quotations bear to the prices actually paid to farmers for milk of 3.5 percent butterfat content delivered to Wisconsin cheese plants, as reported by the Bureau of Agricultural Economics. It was found that the actual pay prices are most closely approximated when the cheese price is multiplied by 8.53, the butter price by 0.902, and 34.3 cents is deducted from the sum of the two products. These results are in line with the normal yields of cheese and butter per hundredweight of milk. At such yields, the 34.3 cents constitutes a reasonable make allowance.

Since the purchase of milk for cheese is highly competitive in the State of Wisconsin, the changes in value of milk for cheese making can be expected to be reflected promptly in the cheese factory pay prices in that state. A substantial proportion of the cheese made in this country is made in Wisconsin and quotations of prices paid in Wisconsin can be considered to be based on an adequate sample of the market for milk for cheese making.

Comparison with Wisconsin prices is considered appropriate also because most of the condenseries included in one of the other basic formula factors are located in Wisconsin.

4. *Classification of cream.* Fluid cream should be classified as Class I instead of Class II, and the butterfat differential to handlers on Class I utilization should be reduced to 1.25 times the price of butter.

Fluid cream is now classified as Class II. The Class II price is 30 cents per hundredweight less than the Class I price for milk of 3.5 percent butterfat content. The butterfat differential to handlers is 1.25 times the price per pound of 92-score butter at Chicago as compared with a multiplier of 1.30 for Class I butterfat.

Producers proposed that fluid cream be included in Class I and that the Class I butterfat differential be reduced to the level formerly applicable to Class II. It was shown that the health requirements applicable to the milk from which fluid cream must be derived are the same as those applicable to milk for fluid use. Cream is obtained from producer sources in the Toledo market. It is also clear that the proposed reclassification and change in the butterfat differentials will increase the cost of cream to handlers by such a small amount as to constitute no significant problem in the sale of cream.

At the average prices prevailing under the order for cream, skim milk, and butterfat in 1952 the proposed reclassification would raise the cost of butterfat and skim milk in a quart of light cream (20 percent butterfat) by only six-tenths of a cent per quart, or seven-tenths of one percent of the average retail price of light cream in the market. If, however, the cream were reclassified without lowering the Class I butterfat differential, the increase would have been 2.1 cents per quart, or 2.4 percent of the retail value. It is apparent that the proposed change in the butterfat differentials is of greater importance in determining the cost to handlers of light cream than the proposed elimination of the 30-cent per hundredweight discount.

It was testified that the Class I butterfat differential on products other than cream should also be reduced. In the Toledo market, and throughout the country, the demand for the solids-not-fat portion of milk has been increasing relative to the demand for the butterfat content of milk and a larger share of the per hundredweight value of Class I milk should therefore be allocated to the skim milk component.

It is concluded, therefore, that the butterfat differential to handlers of the Class I utilization should be reduced to 1.25 times the price of butter and that fluid cream should be classified as Class I and priced without any discount.

5. *Partial payments.* The order now provides that each handler shall pay producers for milk received during the first 15 days of the delivery month at a rate of 50 cents less than the uniform price during the preceding month. This payment is designed to serve as an advance to producers, the final payment for the deliveries during the entire month being made on or before the 15th of the following month.

The rate at which advance payments are computed under the order has occasionally caused difficulty. These problems are particularly likely to arise during the spring months when Class I prices decline seasonally. In such circumstances a partial payment based upon the previous month's prices accounts for considerably more than half of the total amount due for the month. In occasional instances, when a producer's deliveries during the second half of the month are substantially less than deliveries during the first 15 days, a producer may actually receive a greater partial payment than the total amount due him for the entire month.

The partial payments should be so computed as to make the partial payments more accurately reflect prices during the delivery month. No specific means of accomplishing this objective was discussed at the hearing, but in their brief, the producers suggested that the rate of partial payment be 75 cents less than the preceding month's uniform price. This rate would be further subject to adjustment by any changes in the Class I price differential. For example, the stated Class I differential for May is 25 cents less than that prevailing during April. Exclusive of any possible effects of the supply-demand adjustment, therefore, the rate of advance payment in May would be $1.00 per hundredweight below the uniform price for April. It was further proposed that the rate be rounded off to the nearest 10 cents in order to facilitate computations.

It is concluded that the above mentioned technique will provide an equitable rate of partial payments and should be adopted.

6. *Cooperative associations.* The order now provides that under certain circumstances handlers shall make such deductions from the payments due to producer-members of a cooperative association "as may be authorized by such producers" and pay the funds so deducted to the cooperative association.

An association must fulfill the several requirements contained in the definition of a cooperative association under the order and, for this particular purpose, must also provide for its members certain minimum marketing services as determined by the market administrator. However, the deductions here involved are the deductions incidental to membership status. Hence they are usually of a sufficient amount to support all the activities of the association and are not limited to those necessary to the performance of the more limited marketing service functions performed by the market administrator for non-member producers. In cases where the membership contract or agreement or other conditions of membership provides for deductions, the deductions authorized in accordance therewith have been considered by the Secretary as having been appropriately authorized by the individual producers.

It was proposed by the producers' association that the order language be made more definite by deleting the phrase "as may be authorized by such producers" and substituting therefor the phrase "as may be properly authorized by such cooperative association." It was testified that handlers had questioned whether the membership contract between the association and the producer members was sufficient authorization by the producers for such deductions to be made under the order. It was further testified that all handlers are making deductions at the rate specified by the association and remitting such deductions to the association.

The handlers' principal objection to accepting the membership agreement as constituting authorization by the producer is that this permits the directors and officers of the association to act in their own interest, without regard to the interests of the producer members of the association.

Within the limitations, if any, of the state statute under which a cooperative association is organized, producers are at liberty to determine for themselves, through the adoption of by-laws and their amendment from time to time or through the provisions of a membership contract, or both, what contributions are to be made by members to support their organization and how such amounts may be changed. By accepting membership, new members accept previously established requirements and these new members also become participants in the making of subsequent changes. Should directors or officers exceed their authority under such instruments of organization, an adequate remedy lies within the organization itself rather than with a third party. On the other hand, the authority to require handlers to make such deductions and pay them over to the association resides in the act and not in the contracts or arrangements between the cooperative and its member producer.

Handlers offered no specific evidence of any failure of the management of the association to properly represent its producer members or of any misrepresentation in matters pertaining to the authorized rate of deductions. On the other hand the determination by the Secretary, which is one element of the definition of a cooperative association, is concerned with factors relating to the exercise of control of the association by its members.

There is one potential problem which was not specifically dealt with in the producers' proposal. This relates to possible errors in the list of producer-member names submitted to the handler. If, as a result of change in status, lack of sufficient identification, or otherwise, a handler pays to the association a deduction subsequently found to be owing to a non-member producer, the association should reimburse the handler the amount erroneously paid to it.

It is concluded that the order should be revised to specify that action taken by cooperative association, in accordance with stated conditions, constitutes appropriate authorization for deductions on behalf of its producer-members.

*General findings.* (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the marketing area and the minimum prices specified in the proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

*Rulings on proposed findings and conclusions.* Briefs were filed on behalf of producers and handlers. The briefs contained statements of fact, proposed findings and conclusions, and arguments with respect to the provisions of the proposed amendment. Every point covered in the briefs was carefully considered along with the evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that the findings and conclusions proposed in the briefs are inconsistent with the findings and conclusions contained herein, the request to make such findings or to reach such conclusions is denied on the basis of the facts found and stated in connection with the conclusions in this recommended decision.

*Recommended marketing agreement and amendments to the order.* The following amendments to the order, as amended, are recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be identical with those contained in the order, as amended, and as hereby proposed to be further amended.

1. Delete paragraphs (a) and (b) of § 930.41 and substitute therefor the following:

(a) Class I milk shall be all skim milk and butterfat (1) disposed of in fluid form as milk, skim milk or buttermilk (except for livestock feed), flavored milk or flavored milk drinks, sweet or sour cream, any cream product in fluid form which contains less than the minimum butterfat required for fluid cream, or eggnog; (2) used to produce concentrated milk disposed of for fluid consumption; and (3) not accounted for as Class II milk.

2. Redesignate paragraph (c) of § 930.41 as paragraph (b), delete the phrase "Class III milk shall be", and substitute therefor the phrase "Class II milk shall be."

3. Amend § 930.42 to read as follows:

§ 930.42 *Interhandler and nonhandler transfers.* (a) Skim milk and butterfat disposed of by a handler to another handler as any item listed in paragraph (a) of § 930.41 shall be Class I milk unless Class II utilization is mutually indicated in writing to the market administrator by both handlers on or before the 5th day after the end of the month within which such transfer was made: *Provided*, That in no event shall the amount so classified as Class II be greater than the amount used in such class by the receiving handler.

(b) Skim milk and butterfat disposed of in the form of milk, skim milk or cream by a handler to a nonhandler's plant located less than 100 miles from the City Hall at Toledo, Ohio, by the shortest highway distance as determined by the market administrator, shall be Class I milk, unless (1) utilization in Class II is mutually indicated in writing to the market administrator by both the handler and nonhandler on or before the 5th day after the end of the month within which such transfer was made, and (2) the nonhandler maintains books and records showing the utilization of all skim milk and butterfat at his plant which are made available if requested by the market administrator for the verification of such mutually indicated utilization.

(c) Skim milk and butterfat disposed of in the form of milk, skim milk, or cream by a handler to a nonhandler's plant located 100 miles or more from the City Hall at Toledo, by the shortest highway distance as determined by the market administrator, shall be Class I milk.

4. In § 930.44 delete the phrase "Class I milk, Class II milk, and Class III milk" and substitute therefor the phrase "Class I milk and Class II milk."

5. In paragraphs (a) and (d) of § 930.45 delete the phrase "Class III milk" and substitute therefor the phrase "Class II milk".

6. Amend the tabulation in § 930.50 (a) (1) to read as follows:

| Delivery period: | *Amount* |
|---|---|
| April, May, and June | $0.75 |
| February, March, and July | 1.00 |
| All others | 1.40 |

7. In subdivision (i) of § 930.50 (a) (2) delete the phrase, "Class I and Class II milk," and substitute therefor the phrase, "Class I milk."

8. Delete paragraphs (b) and (c) of § 930.50 and substitute therefor the following:

(b) *Class II milk price.* The Class II milk price shall be the average (computed to the nearest tenth of a cent) of the basic (or field) prices per hundredweight for milk for 3.5 percent butterfat content received from farmers during the month at the following locations for which prices have been reported to the market administrator or to the Department of Agriculture on or before the 5th day after the end of the month by the companies indicated below:

*Company and Location*

Pet Milk Co., Delta, Ohio.
Defiance Milk Products Co., Defiance, Ohio.
Pet Milk Co., Hudson, Michigan.

9. Amend § 930.51 (b) to read as follows:

(b) The price per hundredweight computed as follows:

(1) Multiply by 8.53 the average of the daily prices per pound of cheese at Wisconsin primary markets ("Cheddars", f. o. b. Wisconsin assembling points, cars or truckloads) as reported by the Department of Agriculture during the month;

(2) Add 0.902 times the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago as reported by the Department of Agriculture during the month; and

(3) Subtract 34.3 cents.

10. In § 930.52 (a) delete the figure "1.3" and substitute therefor "1.25."

11. Delete paragraphs (b) and (c) of § 930.52 and substitute therefor the following:

(b) *Class II milk.* Multiply by 1.2 the average daily wholesale price per pound of 92-score butter in the Chicago market, as reported by the Department of Agriculture during the month, and divide the result by 10.

12. Amend § 930.71 to read as follows:

§ 930.71 *Partial payments.* On or before the last day of each month each handler shall pay each producer for milk received from him during the first fifteen days of each month at a rate computed as follows:

(a) Deduct 75 cents from the uniform price for such handler for the preceding month.

(b) Add or subtract any amount by which the Class I price differential for the current month is greater than or less than, respectively, the differential for the preceding month.

(c) Round off the result to the nearest multiple of 10 cents.

*Provided*, That in the event a producer discontinues shipping to the market during the month, such partial payments shall not be made and full payment for all milk received from such producer during the month shall be made pursuant to the provisions of § 930.70.

13. In § 930.73 delete the phrase "or Class II milk."

14. Amend § 930.75 to read as follows:

§ 930.75 *Cooperative association.* (a) Each association of producers which is actually performing the services described in § 930.74, as determined by the market administrator, may file with a handler a claim for authorized deductions from the payments otherwise due to its producer members for milk delivered to such handler. Such claim shall contain a list of the producers for which such deductions apply, an agreement to indemnify the handler in the making of the deductions, and a certification that the association has an unterminated membership contract with each producer authorizing the claimed deduction.

(b) In making payments to producers for milk received during the month, each handler shall make deductions in accordance with the association's claim and shall pay the amount deducted to the association within 15 days after the end of the month.

Filed at Washington, D. C., this 16th day of November 1953.

[SEAL] ROY W. LENNARTSON,
*Assistant Administrator.*

### IRISH POTATOES GROWN IN THE COUNTIES OF CROOK, DESCHUTES, JEFFERSON, KLAMATH, AND LAKE IN OREGON, AND MODOC AND SISKIYOU IN CALIFORNIA

### NOTICE OF PROPOSED BUDGET AND RATE OF ASSESSMENT

Notice is hereby given that the Secretary of Agriculture is considering the approval of the budget and rate of assessment hereinafter set forth which were recommended by the Oregon-California Potato Committee, established pursuant to Marketing Agreement No. 114 and Order No. 59, as amended (7 CFR Part 959), regulating the handling of Irish potatoes grown in the counties of Crook, Deschutes, Jefferson, Klamath, and Lake in the State of Oregon, and Modoc and Siskiyou in the State of California issued under the Agricultural Marketing Agreement Act of 1937, as amended (43 Stat. 31, as amended, 7 U. S. C. 601 et seq.).

Consideration will be given to any data, views, or arguments pertaining thereto which are filed in triplicate with the Director, Fruit and Vegetable Branch, Production and Marketing Administration, U. S. Department of Agriculture, Washington 25, D. C., not later than 15 days following publication in the FEDERAL REGISTER. The proposals are as follows:

§ 959.206 *Budget of expenses and rate of assessment.* (a) The expenses necessary to be incurred by the Oregon-California Potato Committee, established pursuant to Marketing Agreement No. 114 and Order No. 59, as amended (§§ 959.1 to 959.88), to enable such committee to carry out its functions pursuant to the provisions of the aforesaid marketing agreement and amended order during the fiscal year ending June 30, 1954, will amount to $14,400;

(b) The rate of assessment to be paid by each handler who first ships potatoes shall be one-fourth of one cent ($0.0025) per hundredweight handled by him as the first handler thereof during said fiscal year; and

(c) The terms used in this section shall have the same meaning as when used in Marketing Agreement No. 114 and Order No. 59, as amended (§§ 959.1 to 959.88).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 13th day of November 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

## DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

### Food and Drug Administration

## [ 21 CFR Part 36 ]

[Docket No. FDC-43 (a)]

### SHELLFISH; DEFINITIONS AND STANDARDS OF IDENTITY

### NOTICE OF PROPOSED RULE MAKING

In the matter of amending the definitions and standards of identity for Pacific oysters, raw Pacific oysters, shucked Pacific oysters:

By virtue of the authority vested in the Secretary of Health, Education, and Welfare by the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1046, 1055; 21 U. S. C. 341, 371; 67 Stat. 18), and upon the basis of substantial evidence received at the public hearing held pursuant to the notice published in the FEDERAL REGISTER on September 18, 1953 (18 F. R. 6827), it is proposed that the following order be made.

*Findings of fact.*[1] 1. The existing definitions and standards of identity for raw Pacific oysters were promulgated on evidence received at a public hearing held in 1945. At that time a substantial volume of the production of raw Pacific oysters was packed for sale on contract to the armed services. The basis of bids for Government orders required that the size of raw Pacific oysters be indicated by count per pound or pint. Raw Pacific oysters packed for the civilian market

[1] The citations following each finding of fact refer to the pages of the transcript of the testimony and the exhibits received in evidence at the hearing.

were packed in pint jars, and there was no general usage of containers smaller than pints. The standards promulgated upon the basis of evidence received at the hearing held in 1945 specified names for the various sizes of raw Pacific oysters as follows: "Pacific oysters size ------ per pint," "Raw Pacific oysters size ------ per pint," or "Shucked Pacific oysters size ------ per pint," the blank in each instance being filled in with "5 to 8," "8 to 10," "10 to 12," "12 to 15," "15 to 18," or "over 18," depending upon the size of the oysters in the container. Beginning in September 1952, packers of raw Pacific oysters began to pack their product in 12-fluidounce jars. Within a short time only a small portion of the production of raw Pacific oysters was packed in pint jars, while approximately 80 percent of the production was distributed in 12-fluidounce jars. The labeling of raw Pacific oysters packed in 12-fluidounce jars, with the names showing the count per pint as specified in the standard, proved to be confusing and misleading to consumers. (R. 20–30, 32–35, 41, 71–72, 75–77, 79–81, 83–84, 86, 91, 99–101; Ex. 2–3, 5–7, 9–12, 19, 22, 27, 30.)

2. Although existing definitions and standards of identity applicable to raw Pacific oysters provide for six size categories, based upon count per pint, producers of raw Pacific oysters do not customarily pack their product in more than three or four size categories. In displaying offerings of raw Pacific oysters in retail outlets, retailers have employed the terms "large," "medium," "small," and "extra small" to describe the sizes of Pacific oysters available. Retail dealers have also used these terms in their advertisements. Designation of the size of raw Pacific oysters by the terms "large," "medium," "small," and "extra small" is suitable not only for pints but is equally suitable for containers of other sizes. Recipes for oysters in most cookbooks recite cooking times based on the time required to cook raw oysters that come from the Atlantic and Gulf Coasts. Pacific oysters are significantly larger than oysters harvested on the Atlantic and Gulf Coasts and require slower and longer cooking to be rendered palatable. Housewives need recipes that give directions for cooking Pacific oysters. Amending the existing standards to provide for using the size designations "large," "medium," "small," and "extra small" will facilitate writing such recipes for distribution to housewives. (R. 21, 36, 39–40, 56, 62–63, 65, 70, 74, 76, 81, 83, 96–97; Ex. 6, 8, 14, 20–22, 25, 27, 30.)

3. Evidence was adduced that the division of raw Pacific oysters into six size categories, as provided for in the existing standards, results in considerable overlapping of sizes to the disadvantage of consumer purchasers. Reduction of the number of size categories to four would reduce such overlapping. (R. 56, 62, 70, 82, 85, 95; Ex. 13, 16–17, 23, 26, 28, 30.)

4. The term "large," as applied to raw Pacific oysters, applies to oysters of such size that a gallon contains not more than 64 such oysters. The term "medium," as applied to raw Pacific oysters, applies to oysters of such size that a gallon contains more than 64 and not more than 96 such oysters. The term "small," as applied to raw Pacific oysters, applies to oysters of such size that a gallon contains more than 96 and not more than 144 such oysters. The term "extra small," as applied to raw Pacific oysters, applies to oysters of such size that a gallon contains more than 144 such oysters. The oysters in each of the above size categories are of such uniform size that the largest oyster in the container is not more than twice the weight of the smallest oyster therein. (R. 88–89; Ex. 1.)

It is concluded that it will promote honesty and fair dealing in the interest of consumers to amend the definitions and standards of identity applicable to raw Pacific oysters by revoking §§ 36.17 to 36.22, inclusive (21 CFR 36.17–36.22, inclusive), and by promulgating new sections to read as follows:

§ 36.17 *Large Pacific oysters, large raw Pacific oysters, large shucked Pacific oysters; identity.* Large Pacific oysters, large raw Pacific oysters, large shucked Pacific oysters, are of the species Ostrea gigas and conform to the definitions and standards of identity prescribed for oysters by § 36.10 and are of such size that 1 gallon contains not more than 64 oysters, and the largest oyster in the container is not more than twice the weight of the smallest oyster therein.

§ 36.18 *Medium Pacific oysters, medium raw Pacific oysters, medium shucked Pacific oysters; identity.* Medium Pacific oysters, medium raw Pacific oysters, medium shucked Pacific oysters, are of the species Ostrea gigas and conform to the definition and standard of identity prescribed for oysters by § 36.10 and are of such size that 1 gallon contains more than 64 oysters, and not more than 96 oysters, and the largest oyster in the container is not more than twice the weight of the smallest oyster therein.

§ 36.19 *Small Pacific oysters, small raw Pacific oysters small shucked Pacific oysters; identity.* Small Pacific oysters, small raw Pacific oysters, small shucked Pacific oysters, are of the species Ostrea gigas and conform to the definition and standard of identity prescribed for oysters by § 36.10 and are of such size that 1 gallon contains more than 96 oysters and not more than 144 oysters, and the largest oyster in the container is not more than twice the weight of the smallest oyster therein.

§ 36.20 *Extra small Pacific oysters, extra small raw Pacific oysters, extra small shucked Pacific oysters.* Extra small Pacific oysters, extra small raw Pacific oysters, extra small shucked Pacific oysters are of the species Ostrea gigas and conform to the definition and standard of identity prescribed for oysters by § 36.10 and are of such size that 1 gallon contains more than 144 oysters, and the largest oyster in the container is not more than twice the weight of the smallest oyster therein.

Any interested person whose appearance was filed at the hearing may, within 30 days from the date of the publication of this tentative order in the FEDERAL REGISTER, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, Health, Education, and Welfare Building, 330 Independence Avenue SW., Washington, D. C., written exceptions thereto. Exceptions shall point out with particularity the alleged errors in this tentative order and shall contain specific references to the pages of the transcript of the testimony or to the exhibits on which such exceptions are based. Such exceptions may be accompanied by a memorandum or brief in support thereof. Exceptions and accompanying memoranda or briefs shall be submitted in quintuplicate.

Dated: November 13, 1953.

OVETA CULP HOBBY,
*Secretary.*

## CIVIL AERONAUTICS BOARD

### [ 14 CFR Parts 21, 40 ]

SCHEDULED INTERSTATE AIR CARRIER CERTIFICATION AND OPERATION RULES

NOTICE OF PROPOSED RULE MAKING

Pursuant to authority delegated by the Civil Aeronautics Board to the Bureau of Safety Regulation, notice is hereby given that the Bureau will propose to the Board amendments to Part 21 and revised Part 40 of the Civil Air Regulations in substance as hereinafter set forth.

Interested persons may participate in the making of the proposed amendments by submitting such written data, views, or arguments as they may desire. Communications should be submitted in duplicate to the Civil Aeronautics Board, attention Bureau of Safety Regulation, Washington 25, D. C. In order to insure their consideration by the Board before taking further action on the proposed amendments, communications must be received by December 16, 1953. Copies of such communications will be available after December 18, 1953, for examination by interested persons at the Docket Section of the Board, Room 5412, Department of Commerce Building, Washington, D. C.

Revised Part 40 was adopted by the Civil Aeronautics Board April 13, 1953; this part is to become effective January 1, 1954. Since the adoption of this part, the Civil Aeronautics Administration has been engaged in the preparation of Civil Aeronautics Manual material and other administrative documents, the purpose of which is to establish policy and interpretation, and to promulgate those supplemental regulations, authority for which has been delegated to the Administrator. The air carriers, on the other hand, have been engaged in the preparation of company manuals and other personnel training media in order to insure that the necessary administrative changes will have been accomplished in sufficient time and that the personnel to be affected by the provisions of this part will have been fully familiarized with respect to their details. In the course of these activities, detailed re-examination of the provisions of revised Part 40

was inevitable. Certain errors of a typographical or clerical nature were discovered. Certain ambiguities heretofore unnoticed were recognized. Some unintended restrictions were discovered to result from inadvertent construction of certain regulations. In still other instances relief has been requested from certain provisions which, although intended by the Board to become applicable, had not previously been recognized as creating undue hardship upon the persons affected. The Bureau has consolidated into this notice of proposed rule making the many suggestions for further improvement or correction of revised Part 40 which have been received by the Board.

Section 40.301 requires a pilot before he may be used in scheduled air transportation to have made within the preceding 90 days at least 3 take-offs and 3 landings in the airplane of the particular type on which he is to serve. In adopting revised Part 40, the Board eliminated a previous requirement, applicable to pilots serving in air transportation, that one of the 3 landings and take-offs be accomplished at night if the pilot is to serve in scheduled air transportation between the hours of sunset and sunrise. However, Part 21 also contains a recent experience requirement which includes a requirement for a landing and take-off at night. Since the Board has decided the requirement for a night landing and take-off no longer appears to be justified, it is proposed that Part 21 be amended to remove this requirement.

The Board's attention has been called to the fact that § 40.34 has been construed by some persons so as to impose an absolute condition upon air carrier communications. The "reliable and rapid communications" required by this section was intended to be subject to a determination by the Administrator that the reliability and rapidity are reasonably assured in the light of the current state of the aeronautical and communications arts. Since some difficulty has been experienced in the interpretation of this requirement, it is proposed that the words "under normal operating conditions" be added to protect against an unreasonable restrictiveness in its enforcement.

The Board contemplated that approximately three months was required after the effective date of revised Part 40 for compliance with certain requirements resulting in modification of aircraft. Inasmuch as the effective date of revised Part 40 has been extended from October 1, 1953, to January 1, 1954, a comparable extension of the compliance date of certain sections appears desirable. Moreover, the Board has been advised that requirements for certain new equipment and instruments imposed by revised Part 40 may in certain instances require extensive fleet modifications. In some instances the instruments and equipment involved will require several months for procurement. Since it is considered desirable that air carriers be permitted to schedule necessary modifications consistent with normal maintenance schedules, additional time should be provided to permit compliance with such requirements. Also, the requirement for duplicate sources of power and power distribution systems in Part 40 is a new requirement. This requirement parallels current requirements of the airworthiness parts of the Civil Air Regulations relating to transport category airplanes. The Board's attention has been drawn to the fact, however, that certain existing aircraft types do not now meet these provisions and in order to insure compliance must be subjected to considerable engineering study and probable subsequent modification. Requirements for duplicate sources of energy for certain flight instruments on the other hand have been contained in the operating parts of the Civil Air Regulations for a considerable period of time. It would appear, therefore, that additional time should be allowed for compliance with the provisions applicable to required instruments and equipment other than flight instruments. In view of the foregoing, it is proposed to extend the date for compliance with §§ 40.172 (k) and 40.173 (d) until January 1, 1955, § 40.173 (b) (3) until November 1, 1954, § 40.175 (c) until July 1, 1955, § 40.175 (d) until December 1, 1954, and § 40.178 (b) until March 1, 1954.

The nontransport category performance operating limitations of revised Part 40 contain no landing distance requirement specifically applicable to alternate airports. The Board has been advised that the absence of a landing distance requirement directed specifically to alternate airports has given rise to a question as to whether the landing distance at alternate airports was intended to be the same as that for airports of intended destination. The Board did not intend that the requirement concerning runway margins in the nontransport category performance limitation be any more stringent than that contained in the transport category performance limitations. It is proposed to clarify this intent by inserting a new § 40.94 prescribing the same landing distance limitations at alternate airports for the nontransport category operating limitations as are presently prescribed for transport category airplanes.

Section 40.175 (f) provides that any airplane door between passenger compartments and other compartments which is a means of access to a required passenger emergency exit must be open during take-off and landing. The purpose of this provision was to insure accessibility of emergency exits under circumstances requiring rapid evacuation of the airplane. Such circumstances would be encountered only in the event of an accident or other eventuality. Arguments in favor of this requirement contend that since an accident is frequently accompanied by distortion of the fuselage, a door in a closed position may become jammed and for this reason should not be closed during take-off and landing.

The Board has been advised that in certain airplane models literal compliance with § 40.175 (f) would require that the door between passenger compartments and forward compartments of the airplane be secured in such a position as to block one section of seats. Furthermore, it has been maintained that the principal purpose to be served by such a requirement is that the door be capable of being opened and that this purpose is adequately served by the use of the word "unlocked". It is proposed that § 40.175 (f) be amended to require that such doors be "unlocked" rather than "open" and comment is specifically invited concerning the merit of this proposal.

The Board's attention has been drawn to the fact that § 40.176 implies major differences in cockpit procedures between certain aircraft of the same type operated by the same air carrier. It appears that a greater contribution to safety is made when cockpit check procedures are standardized to the extent practicable and that the language of this section appears to render such standardization more difficult. It is proposed, therefore, that the portion of the requirement tending to discourage standardization be deleted.

The Board's attention has been directed to the fact that the language of §§ 40.231 and 40.232 literally requires a duplication of equipment not intended by the Board. The various requirements of this section were intended to define functions to be served by the radio equipment carried aboard aircraft and duplication of equipment for each function was intended to be required only where a reference to duplication is explicitly made. For instance, should a range receiver be capable of satisfying the requirement of § 40.231 (a) (3), that receiver may also satisfy the requirement for radio navigation receivers contained in § 40.231 (b). It is proposed to amend §§ 40.231 and 40.232 to clarify the functional nature of the requirements and avoid unintended duplication.

The Board's attention has been called to the fact that certain existing labor contracts would be voided by the fact that the equivalent duty provision contained in current Part 61 does not exist in revised Part 40. Since it does not appear that safety will be compromised by continuing the flexibility currently provided in Part 61, and since such flexibility appears to be desirable under existing contractual arrangements between air carriers and certain mechanical employee groups, it appears advisable to amend §§ 40.243 and 40.340 (b) (3) to include an equivalent duty provision.

Since it is intended that an aircraft the maximum certificated weight of which is exactly 12,500 pounds be regarded as a "small aircraft" it is proposed to amend § 40.261 (c) to bring this section in accord with the definition of large aircraft elsewhere in the Civil Air Regulations.

The Board has been advised that § 40.303 (c) is susceptible of an interpretation which would require the pilot making an entry into an airport for the purpose of airport qualification to manipulate the controls of the aircraft during the take-off and landing. Such manipulation of controls is not essential to the purpose of this regulation and may in fact under certain circumstances result in the preoccupation of the pilot to the extent that visual survey of the airport and its environs may not be as com-

plete as may be desired. It is proposed that § 40.303 (c) be amended to clarify this intent.

Paragraph (d) of § 40.303 was not intended to be applied to routes on which facilities are adequate for instrument flight and on which instrument operation has been authorized in the operations specifications. It is proposed to amend this paragraph to clarify this intent.

In order for a pilot to maintain route and airport qualifications for particular trips as pilot in command, § 40.304 (a) requires that, during the preceding 12 months he (1) make at least one trip as pilot or other member of the crew between terminals into which he is scheduled to fly, (2) make one actual or one simulated entry utilizing a synthetic trainer into each regular, provisional, or refueling airport into which he is scheduled to fly, and (3) if applicable, comply with the provisions of § 40.303 (d). The Board has received comment from several air carriers contending that the requirement for an actual entry or a simulated entry into each airport constitutes an undue administrative burden. These carriers have argued that the questionable contribution to safety which this requirement makes can scarcely justify the administrative burden it creates. In re-examining this requirement it appears that the clerical problem created is indeed a considerable one in that the compilation of a great number of additional records will be necessary and a continuous review of these records required in order to insure continued compliance. It is proposed that the requirement in § 40.304 (a) for an actual entry or a simulated entry into each airport every 12 months be deleted. The Bureau is desirous of obtaining additional information to assist in determining whether this proposed amendment should be adopted.

The preamble of revised Part 40 makes clear that the Board intended in this part "to continue in effect the (weekly) limitation as contained in Part 61." Section 40.320 (a) (3), however, renders the thirty-hour limitation application on a "calendar week" basis rather than a "seven consecutive days" basis. Until such time as it is possible for the Board to complete certain separate rule-making procedures in the matter of flight time limitations, the provisions contained in current Part 61 should be retained. It is proposed to amend § 40.320 (a) (3) to bring the weekly flight time limitations into accord with the current requirements of Part 61.

Section 60.46 of Part 60 authorizes air traffic control to clear aircraft for instrument approach in accordance with procedures which differ from procedures contained in either air carrier operations specifications or in the Civil Aeronautics Administration Flight Information Manual. This authorization is essential to expedite traffic during certain weather conditions. This procedure is currently followed by air traffic control and has proved satisfactory. It is proposed to amend § 40.364 to clarify that the Part 60 authorization is applicable to Part 40 operations.

The Board's attention has been called to the fact that § 40.509 (c) is susceptible of an interpretation requiring Mechanical Interpretation Summary Reports to include reports of propeller featherings which are accomplished for training, experimentation, or demonstration purposes. The Board intended that this requirement be applicable only to propeller featherings required as a result of an actual or suspected engine malfunction. It is proposed that § 40.509 (c) be amended to make this intent apparent.

Accordingly, notice is hereby given that the Bureau has under consideration the amendment of Part 21 and revised Part 40 of the Civil Air Regulations, as follows:

1. By amending § 21.42 (a) by deleting the last sentence thereof.

2. By amending the definition of "dispatch release" in § 40.5 by adding the word "release" after the word "dispatch" in the text thereof.

3. By amending § 40.34 by adding the words "under normal operating conditions" between the words "communications" and "over".

4. By amending § 40.51 (a) (16) by deleting the word "and" before the word "standards" and substituting in lieu thereof the word "or".

5. By amending § 40.90 by deleting the reference "40.93" and substituting "40.94" in lieu thereof in each place where it appears.

6. By adding a new § 40.94 to read as follows:

§ 40.94 *Landing distance limitations: alternate airports.* No airport shall be designated as an alternate airport in a dispatch release unless the airplane at the weight anticipated at the time of arrival at such airport can comply with the requirements of § 40.93: *Provided*, That the airplane can be brought to rest within 70 percent of the effective length of the runway.

7. By amending § 40.172 (k) by deleting "December 31, 1953" and substituting "December 31, 1954" in lieu thereof.

8. By amending § 40.173 (b) (3) by adding "On and after November 1, 1954," at the beginning thereof.

9. By amending § 40.173 (d) by adding "On and after January 1, 1955," at the beginning thereof.

10. By amending § 40.175 (c) by adding at the end thereof the following: "*And provided further*, That the provisions of this paragraph with respect to required instruments and equipment other than flight instruments shall not be mandatory prior to July 1, 1955."

11. By amending § 40.175 (d) by adding "On and after December 1, 1954," at the beginning thereof.

12. By amending § 40.175 (f) by deleting the word "open" in the third sentence and substituting in lieu thereof the word "unlocked".

13. By amending § 40.176 by deleting the words "adapted to each operation in which the airplane is to be utilized" in the first sentence thereof.

14. By amending § 40.178 (b) by adding the words "On and after March 1, 1954," at the beginning thereof.

15. By amending § 40.231 (b) to read as follows:

§ 40.231 *Radio equipment for operations under VFR over routes not navigated by pilotage.* • • •

(b) For all operations at night conducted under VFR over routes on which navigation can be accomplished by pilotage, each airplane shall be equipped with such radio equipment as is necessary under normal operating conditions to fulfill the functions specified in paragraph (a) of this section and to receive radio navigation signals applicable to the route flown except that no marker beacon receiver or ILS receiver need be provided.

16. By amending § 40.232 (a) to read as follows:

§ 40.232 *Radio equipment for operations under VFR over routes not navigated by pilotage or for operations under IFR or over-the-top.* (a) For operations conducted under VFR over routes on which navigation cannot be accomplished by pilotage or for operations conducted under IFR or over-the-top each airplane shall be equipped with such radio equipment as is necessary under normal operating conditions to fulfill the functions specified in § 40.231 (a) and to receive satisfactorily by either of two independent systems, radio navigational signals from all primary en route and approach navigational facilities intended to be used, except that only one marker beacon receiver which provides visual and aural signals and one ILS receiver need be provided. Equipment provided to receive signals en route may be used to receive signals on approach if it is capable of receiving both signals.

17. By amending § 40.243 by adding the words "or equivalent thereof" at the end thereof.

18. By amending § 40.261 (c) by deleting the words "12,500 pounds or more" and substituting in lieu thereof the words "more than 12,500 pounds".

19. By amending § 40.282 (a) by deleting the words "all pilots" and substituting in lieu thereof the words "each pilot".

20. By amending § 40.303 (c) to read as follows:

§ 40.303 *Pilot route and airport qualification requirements.* • • •

(c) Each pilot shall make an entry as a member of the flight crew at each regular, provisional, and refueling airport into which he is scheduled to fly. Unless impracticable, such entry shall include a landing and take-off under day VFR to permit the qualifying pilot to observe the airport and surrounding terrain, including any obstructions to landing and take-off. The qualifying pilot shall occupy a seat in the pilot compartment and shall be accompanied by a pilot who is qualified at the airport.

21. By amending § 40.303 (d) by deleting the words "Where an en route operation" and substituting in lieu thereof "On routes on which navigation must be accomplished by pilotage and on which flight".

22. By amending § 40.304 (a) to read as follows:

§ 40.304 *Maintenance and reestablishment of pilot route and airport qualifications for particular trips.* (a) To maintain pilot route and airport qualifications, each pilot being utilized as pilot in command, within the preceding 12-month period, shall have made at least one trip as pilot or other member of the flight crew between terminals into which he is scheduled to fly and shall have complied with the provisions of § 40.303 (d), if applicable.

23. By amending § 40.304 (b) by deleting the proviso at the end thereof.

24. By amending § 40.320 (a) (3) by deleting the word "week" and substituting in lieu thereof the words "seven consecutive days".

25. By amending § 40.340 (b) (3) by adding the words "or the equivalent thereof" at the end thereof.

26. By amending § 40.363 (b) (2) by deleting the word "feathered" and substituting in lieu thereof the word "inoperative".

27. By amending § 40.364 by adding at the end thereof the following: "*Provided*, That at airports at which air traffic control services are provided, a different instrument approach procedure may be authorized by air traffic control subject to such conditions as the Administrator may prescribe."

28. By amending § 40.385 by deleting the word "aircraft" and substituting in lieu thereof the word "airplane".

29. By amending § 40.387 by deleting the word "aircraft" and substituting in lieu thereof the word "airplanes".

30. By amending § 40.388 (a) by deleting the proviso and substituting in lieu thereof the following: "*Provided*, That such alternate need not be selected if the ceiling and visibility respectively at the take-off airport are at least 300 feet and one mile, 400 feet and three-quarters mile, or 500 feet and one-half mile."

31. By amending § 40.389 (a) by deleting the proviso and substituting in lieu thereof the following: "*Provided*, That no alternate need be designated when, for the period two hours before to two hours after the estimated time of arrival, the ceiling at the airport to which the flight is dispatched is forecast to be at least 1,000 feet above the minimum initial approach altitude applicable to such airport and the visibility at such airport is forecast to be at least three miles."

32. By amending § 40.391 (a) by deleting the word "aircraft" and substituting in lieu thereof the word "airplane".

33. By amending § 40.393 (c) by deleting the word "flight" wherever it appears before the word "release" and substituting in lieu thereof the word "dispatch" and by deleting the word "aircraft" and substituting in lieu thereof the word "airplane".

34. By amending § 40.393 (d) by deleting the word "flight" and substituting in lieu thereof the word "dispatch" and by deleting the word "aircraft" and substituting in lieu thereof the word "airplane".

35. By amending § 40.406 (a) by deleting the word "aircraft" and substituting in lieu thereof the word "airplane".

36. By amending § 40.509 (c) by adding a sentence at the end thereof to read as follows: "Propeller featherings accomplished for training, demonstration, or flight check purposes need not be reported."

These amendments are proposed under the authority of Title VI of the Civil Aeronautics Act of 1938, as amended. The proposals may be changed in the light of comments received in response to this notice of proposed rule making.

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

NEW MEXICO

STOCK DRIVEWAY WITHDRAWAL NO. 254 NEW MEXICO NO. 14, REDUCED

NOVEMBER 12, 1953.

By virtue of the authority contained in section 10 of the act of December 29, 1916, 39 Stat. 865, as amended by the act of January 29, 1929, 45 Stat. 1144 (43 U. S. C. 300) and pursuant to the authority delegated to me by the Director, Bureau of Land Management, in section 2.22 (a) (1) of Order No. 427, dated August 16, 1950, 15 F. R. 5639, it is ordered as follows:

Departmental orders of February 14, 1919, and January 6, 1939, establishing and modifying Stock Driveway No. 254, New Mexico No. 14, are hereby revoked so far as they affect the following described lands:

NEW MEXICO PRINCIPAL MERIDIAN

T. 31 N., R. 8 E.,
Sec. 1, E½;
Sec. 3, S½, E½NE¼;
Sec. 12, E½;
Sec. 13, E½;
Sec. 24, E½;
Sec. 25, all.
T. 32 N., R. 8 E.
Sec. 24, SE¼SE¼;
Sec. 25, S½, NE¼, S½NW¼;
Sec. 26, SE¼NE¼, SE¼;
Sec. 34, SE¼SE¼;
Sec. 35, S½, NE¼.
T. 31 N., R. 9 E.,
Sec. 6, W½.
T. 32 N., R. 9 E.,
Sec. 19, lots 1, 5, SE¼SW¼, S½SE¼;
Sec. 20, lots 6 to 11, inclusive;
Sec. 30, W½;
Sec. 31, W½.

The areas described aggregate 4,975.17 acres.

The lands are located in a broken mesa area underlain with lava. They are chiefly valuable for grazing. The lands will not be subject to occupancy or disposition until they have been classified. It is unlikely that these lands will be classified as suitable for homestead or desert land use.

This order shall not otherwise become effective to change the status of such lands until 10:30 a. m. on the 35th day after the date of this order. At that time the said lands shall become subject to application, petition, location, and selection, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable law, and the 90-day preference right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284), as amended.

Information showing the periods during which and the conditions under which veterans and others may file applications for these lands may be obtained on request from the Land and Survey Office, Santa Fe, New Mexico.

E. R. SMITH, *Regional Administrator.*

[Misc. 5 5]

NEW MEXICO

ORDER PROVIDING FOR OPENING OF PUBLIC LANDS

NOVEMBER 10, 1953.

In an exchange of lands made under the provisions of section 8 of the act of June 28, 1934 (48 Stat. 1269), as amended June 26, 1936 (49 Stat. 1976, 43 U. S. C. sec. 315g), the following described lands have been reconveyed to the United States:

NEW MEXICO PRINCIPAL MERIDIAN

T. 21 S., R. 24 E.,
Sec. 32.
T. 19 S., R. 27 E.,
Sec. 32;
Sec. 36, NW¼SW¼, S½SW¼, N½NE¼, SE¼NE¼.
T. 25 S., R. 31 E.,
Sec. 2, N½S½, S½SW¼, SW¼SE¼.
T. 26 S., R. 25 E.,
Sec. 2, N½, N½S½, SW¼SW¼, S½SE¼.

The land is desert, rolling to partly mountainous, with desert shrub vegetation. There is no surface water and the land is not irrigable from any known source of water supply. It is primarily suitable for grazing.

No application for this land may be allowed under the homestead, small tract, desert-land, or any other nonmineral public land law, unless the land has already been classified as valuable or suitable for such type of application, or shall be so classified upon consideration of an application. It is unlikely that this land will be classified for homestead, small tract, or desert-land use.

which the claim for preference is based

with the provisions of the marketing or-

## ARMED SERVICES PATENT

This order shall not otherwise become effective to change the status of such lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to application, petition, location, and selection as follows:

(a) *Ninety-one day period for preference-right filings.* For a period of 91 days, commencing at the hour and on the day specified above, the public lands affected by this order shall be subject only to (1) application under the homestead or the desert-land laws or the Small Tract Act of June 1, 1938, 52 Stat. 609 (43 U. S. C. 682a), as amended, by qualified veterans of World War II and other qualified persons entitled to preference under the act of September 27, 1944, 58 Stat. 747 (43 U. S. C. 279–284), as amended, subject to the requirements of applicable law, and (2) application under any applicable public-land law, based on prior existing valid settlement rights and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. Applications under subdivision (1) of this paragraph shall be subject to applications and claims of the classes described in subdivision (2) of this paragraph. All applications filed under this paragraph either at or before 10:00 a. m. on the 35th day after the date of this order shall be treated as though filed simultaneously at that time. All applications filed under this paragraph after 10:00 a. m. on the said 35th day shall be considered in the order of filing.

(b) *Date for non-preference-right filings.* Commencing at 10:00 a. m. on the 126th day after the date of this order, any lands remaining unappropriated shall become subject to such application, petition, location, selection, or other appropriation by the public generally as may be authorized by the public-land laws. All such applications filed either at or before 10:00 a. m. on the 126th day after the date of this order, shall be treated as though filed simultaneously at the hour specified on such 126th day. All applications filed thereafter shall be considered in the order of filing.

A veteran shall accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

Applications for these lands, which shall be filed in the Land and Survey Office, Santa Fe, New Mexico, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations and Part 296 of that title, to the extent that such regulations are applicable. Applications under the homestead laws shall be governed by the regulations contained in Parts 166 to 170, inclusive, of Title 43 of the Code of Federal Regulations, and applications under the desert-land laws and the said Small Tract Act of June 1, 1938, shall be governed by the regulations contained in Parts 232 and 257, respectively, of that title.

Inquiries concerning these lands shall be addressed to the Manager, Land and Survey Office, Santa Fe, New Mexico.

E. R. SMITH,
*Regional Administrator.*

ARIZONA

ORDER PROVIDING FOR OPENING OF PUBLIC LANDS

NOVEMBER 10, 1953.

In an exchange of lands made under the provisions of section 8 of the act of June 28, 1934 (48 Stat. 1269), as amended June 26, 1936 (49 Stat. 1976, 43 U. S. C. Sec. 315g), the following described lands have been reconveyed to the United States:

GILA AND SALT RIVER MERIDIAN

T. 19 N., R. 12 W.,
Sec. 21, S½, W½NW¼, SE¼NW¼.
T. 19 N., R. 13 W.,
Sec. 7.
T. 23 N., R. 14 W.,
Sec. 2, E½, SW¼.
T. 20 N., R. 16 W.,
Sec. 32, N½SW¼, SE¼NW¼.
T. 19 N., R. 17 W.,
Sec. 16, W½NE¼, E½SE¼, SW¼SW¼.
T. 22 N., R. 18 W.,
Secs. 3 and 5;
Sec. 7, E½;
Sec. 13, W½SW¼, SE¼SW¼;
Secs. 15, 16 and 17;
Sec. 19, NE¼, NE¼;
Secs. 21 and 23;
Sec. 25, lots 1, 2, 3, 4, 5, 6, W½SE¼, W½;
Secs. 27, 29, 32, 33, 35 and 36.
T. 22 N., R. 19 W.,
Secs. 16 and 36.
T. 24 N., R. 19 W.,
Sec. 8, SW¼NW¼.
T. 22 N., R. 20 W.,
Sec. 16, E½, SW¼;
Sec. 32, E½, NW¼, NE¼SW¼;
Sec. 36, N½, SW¼, NW¼SE¼.
T. 23 N., R. 21 W.,
Sec. 35, N½.
T. 24 N., R. 21 W.,
Sec. 7;
Sec. 17, W½, W½E½;
Sec. 19;
Sec. 25, W½, W½, SE¼, SW¼;
Secs. 29 and 31;
Sec. 35, N½, SE¼, NE¼SW¼;
Sec. 5, lot 4.

The SW¼NW¼ sec. 8, T. 24 N., R. 19 W., is located in an open pasture area approximately 30 miles northwest of Kingman, Arizona, and about 1 mile west of the Kingman-Boulder City highway.

The lands in T. 22 N., R. 18 W. are for the most part flat to gently rolling with desert type vegetation.

The remaining lands described in this order are rough and mountainous and covered with desert type vegetation. All of the lands are primarily suitable for grazing.

No applications for these lands may be allowed under the homestead, small tract, desert land, or other non-mineral public-land laws, unless the lands have already been classified as valuable or suitable for such type of application or shall be so classified upon consideration of an application. It is unlikely that the lands will be classified for homestead, small tract, or desert land use.

This order shall not otherwise become effective to change the status of such lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to application, petition, location, and selection as follows:

(a) *Ninety-one day period for preference-right filings.* For a period of 91 days, commencing at the hour and on the day specified above, the public lands affected by this order shall be subject only to (1) application under the homestead or the desert-land laws or the Small Tract Act of June 1, 1938, 52 Stat. 609 (43 U. S. C. 682a), as amended by qualified veterans of World War II and other qualified persons entitled to preference under the act of September 27, 1944, 58 Stat. 747 (43 U. S. C. 279–284), as amended, subject to the requirements of applicable law, and (2) application under any applicable public-land law, based on prior existing valid settlement rights and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. Applications under subdivision (1) of this paragraph shall be subject to applications and claims of the classes described in subdivision (2) of this paragraph. All applications filed under this paragraph either at or before 10:00 a. m. on the 35th day after the date of this order shall be treated as though filed simultaneously at that time. All applications filed under this paragraph after 10:00 a. m. on the said 35th day shall be considered in the order of filing.

(b) *Date for non-preference-right filings.* Commencing at 10:00 a. m. on the 126th day after the date of this order, any lands remaining unappropriated shall become subject to such application, petition, location, selection, or other appropriation by the public generally as may be authorized by the public-land laws. All such applications filed either at or before 10:00 a. m. on the 126th day after the date of this order, shall be treated as though filed simultaneously at the hour specified on such 126th day. All applications filed thereafter shall be considered in the order of filing.

A veteran shall accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon

which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

Applications for these lands, which shall be filed in the Land and Survey Office, Phoenix, Arizona, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations and Part 296 of that title, to the extent that such regulations are applicable. Applications under the homestead laws shall be governed by the regulations contained in Parts 166 to 170, inclusive, of Title 43 of the Code of Federal Regulations, and applications under the desert-land laws and the said Small Tract Act of June 1, 1938, shall be governed by the regulations contained in Parts 232 and 257, respectively, of that title.

Inquiries concerning these lands shall be addressed to the Manager, Land and Survey Office, Phoenix, Arizona.

E. R. SMITH,
*Regional Administrator.*

HANDLING OF HOPS GROWN IN OREGON, CALIFORNIA, WASHINGTON, AND IDAHO, AND OF HOP PRODUCTS PRODUCED THEREFROM IN THESE STATES

ORDER DISCHARGING TRUSTEES FOR LIQUIDATION ACTION

Pursuant to the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), the provisions of Marketing Agreement No. 107, as amended, and of Marketing Order No. 85, as amended (17 F. R. 1022), both of which are hereinafter referred to as the "marketing order," were terminated by an order (17 F. R. 11...) which was issued on December 29, 1952, and which became effective on June 1, 1953. It was provided, in § 98...7 (c) of the marketing order, that upon the termination of such program the members of the Hop Control Board then functioning should continue as trustees for the purpose of liquidating the affairs that their activities in that connection should be as prescribed by the Secretary of Agriculture. In implementation of the provisions last referred to, there was issued on May 6, 1953, prescribing detailed procedures for the liquidation action.

The members of the Hop Control Board constituted at the effective time of the termination action (i. e., July 1, 1953), as such trustees, liquidated and pro...ly distributed, in accordance with the provisions of the marketing order and the supplementary orders which are referred to above, all of the assets under the aforesaid program. In addition, they have had the prescribed audit made, and all books and records of the Hop Control Board and of the said trustees, together with the file cabinets or other containers, have been delivered to the designated representative of this Department. There is no further duty to be performed in connection with the liquidation action by the said trustees.

*It is, therefore, hereby ordered*, That the aforesaid trustees be, and they hereby are, discharged and released from any further obligations to serve as such pursuant to said orders.

(Sec. 5, 48 Stat. 31, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 13th day of November 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

## DEPARTMENT OF COMMERCE

### Business and Defense Services Administration

[FDEA Notice 1]

SOURCE AND CRITICAL MATERIALS AUTHORIZED FOR GENERAL DISTRIBUTION IN THE CIVILIAN MARKET

Pursuant to section 101 (b) of the Defense Production Act of 1950 as amended by section 3 of the Defense Production Act Amendments of 1953, section 201 of Executive Order 10480 dated August 14, 1953, paragraph 1 of Defense Mobilization Order No. 30 dated August 14, 1953, and section 3 of Department of Commerce Order 152 dated October 1, 1953, I hereby authorize the control of the general distribution in the civilian market of the materials listed in Schedule A below and find (1) that they are scarce and critical materials essential to the national defense, and (2) that the requirements of the national defense for such materials cannot otherwise be met without creating a significant dislocation of the normal distribution of such materials in the civilian market to such a degree as to create appreciable hardship.

This notice shall take effect November 18, 1953.

BUSINESS AND DEFENSE SERVICES ADMINISTRATION,

## ARMED SERVICES PATENT ADVISORY BOARD

ORGANIZATION AND FUNCTIONS

SECTION I. *Introduction.* Pursuant to the authorities vested in the Secretaries of the Army, Navy and Air Force by the National Security Act of 1947, as amended; by section 8 of Public Law 256, 82d Cong.; by section 188 of Title 35, United States Code, as enacted by Public Law 593, 82d Cong.; and by delegation of authority from the Secretary of Defense in Department of Defense directive 5535.2 dated July 15, 1953, and in order to assure uninterrupted administration of sections 1, 2 and 4 of Public Law 256, 82d Cong., and sections 181, 182 and 184 of Title 35, United States Code, as enacted by Public Law 593, 82d Cong., there is hereby continued within the Department of Defense an Armed Services Patent Advisory Board (hereinafter called "the Board"), with membership, authority, duties and relationships as set forth below. The Board shall be a joint agency of the three military departments, subject to the authority, direction and control of the Secretary of Defense and under the management control of the Department of the Army.

SEC. II. *Membership.* The Board shall be composed of an Army Section, a Navy Section, an Air Force Section and a Chairman and Secretary selected by the Board from the membership of the sections. Each section of the Board shall consist of not more than four members and one alternate for each member appointed by the Secretaries or other duly authorized officials of the respective military departments. The alternate, in the absence of a member, is authorized to act in his stead with full powers.

SEC. III. *Authority*—A. *Authority of the Board.* Within its jurisdiction, as defined in this charter or as may be further directed, the Board shall be the agency of the military departments responsible for performing the duties set forth in Section IV, below. Accordingly, the authorities vested in the Secretary of the Army, the Secretary of the Navy and the Secretary of the Air Force by sections 1, 2 and 4 of Public Law 256, 82d Cong., by sections 181, 182, and 184 of Title 35, United States Code, as enacted by Public Law 593, 82d Cong., and by delegation of authority from the Secretary of Defense in Department of Defense directive 5535.2 dated July 15, 1953, are hereby delegated or redelegated, as appropriate, to the Army Section, Navy Section and Air Force Section of the Board, respectively. These delegations of authority are effective as of February 1, 1952.

B. *Authority of the Chairman.* (1) The Chairman shall have authority to take executive action in carrying out the decisions of the Board and may, without being relieved of his responsibility therefor, perform any of his duties with or through the aid of such members or officials of the Board as the Chairman may designate or as may be indicated herein.

(2) The Chairman in accordance with the established Department of Defense policies, is authorized to establish such continuing or temporary committees and working groups as may be necessary to conduct studies, assemble information, make recommendations and otherwise to assist in carrying out the responsibilities of the Board.

SEC. IV. *Duties—A. Duties of the Board.* (1) In the case of patent applications made available to the Board by the Commissioner of Patents, the Board shall decide all matters relative to the issuance, rescission, modification or lapse of secrecy orders in the administration of sections 1, 2, and 4 of Public Law 256, 82d Cong., and sections 181, 182, and 184 of Title 35, United States Code, as enacted by Public Law 593, 82d Cong.; *Provided*, That no action shall be taken by the Board which would result in the rescission or lapse of a secrecy order without the concurrence of all interested members of the Board.

(2) In the case of patent applications which are not made available to the Board by the Commissioner of Patents, the Board acting through the Army, Navy or Air Force Section of the Board or individual members thereof, based on the advice of technical and security personnel of competent authority, shall where appropriate notify the Commissioner of Patents that the publication or disclosure of the subject matter of specified applications would be detrimental to the national security and such notification shall have the same force and effect as if issued by a Secretary of a military department.

B. *Duties of the Chairman.* (1) The Chairman shall be responsible for establishing written procedures to govern the operation of the Board and written procedures for facilitating the production of patent applications for the purpose of determining the military security classification thereof.

(2) The Chairman shall also be responsible for establishing, with the advice of technical and security personnel, categories of inventions the publication or disclosure of which might be detrimental to the national security and of advising the Commissioner of Patents thereof so that he may make patent applications covering such inventions available for inspection by the military departments.

(3) The Chairman shall represent or arrange for the representation of the Department of Defense before and with other Governmental departments and agencies on all matters for which the Board has responsibility under the provisions of this charter.

C. *Duties of the Secretary.* (1) The Secretary of the Board shall make available to interested Board members all written communications received from the Commissioner of Patents in the administration of sections 1, 2 and 4 of Public Law 256, 82d Cong., and sections 181, 182 and 184 of Title 35, United States Code, as enacted by Public Law 593, 82d Cong., and shall notify the Commissioner of Patents of decisions of the Board on the matters referred to the Board by these communications.

(2) The Secretary of the Board shall also prepare the minutes of the Board meetings, and shall maintain complete records of all actions taken by the Board, the Army, Navy and Air Force Sections of the Board and the individual members of the Board in the administration of sections 1, 2 and 4 of Public Law 256, 82d Cong., and sections 181, 182, and 184 of Title 35, United States Code, as enacted by Public Law 593, 82d Cong.

SEC. V. *Administration.* A. The Secretary of the Army, as management agent, shall be responsible for the determination and provision, within the limits of resources available to the Department of the Army for such purposes, of adequate administrative support for the operation of the Board. The term "administrative support" as used in this charter is defined to include budgeting, funding, fiscal control, manpower control and utilization, personnel administration, security administration, space, facilities, supplies, other administrative provision and services and mobilization planning relating thereto. The Secretary of the Army as management agent, may redelegate authorities in connection with these responsibilities within the command structure of the Department of the Army.

B. *Arrangements for the Furnishing of the Board's Activities* are subject to the approval of the Assistant Secretary of Defense (Comptroller).

C. *The Board* shall establish its own rules of procedure and shall meet at the call of the Chairman or such time as it may fix and the presence of a member or his duly designated alternate from each of the military departments shall constitute a quorum. Such matters which cannot be readily resolved by the Board will be referred promptly to the Secretary of the Army, as management agent, for resolution by the Secretaries of the three military departments or for presentation to the Secretary of Defense for decision.

SEC. VI. *Relationships.* A. The Chairman and the Board are authorized and expected to communicate directly and expeditiously with any activities of the military departments concerning any matter within its jurisdiction and in which there exists a mutual interest or responsibility.

B. The Board shall coordinate its efforts with all agencies within and outside the military departments which have a mutual interest or responsibility with respect to any matter within its jurisdiction and will determine what formal concurrences, if any, are required.

Approved: September 28, 1953.

R. T. STEVENS,
*Secretary of the Army.*
R. B. ANDERSON,
*Secretary of the Navy.*
H. E. TALBOTT,
*Secretary of the Air Force.*

## CIVIL AERONAUTICS BOARD

[Docket No. 5592 et al.]

CENTRAL AIRLINES, INC., ET AL. SERVICE TO FAYETTEVILLE, ARK.

NOTICE OF HEARING

In the matter of the joint application of the City of Fayetteville, Arkansas, and the Fayetteville Chamber of Commerce for the authorization of air service to Fayetteville, Arkansas (Docket No. 5592), the applications of Central Airlines, Inc. and Trans-Texas Airways for amendment of certificates of public convenience and necessity (Docket Nos. 6017 and 6233), the application of Braniff Airways, Inc. for an order authorizing temporary suspension of service at Muskogee Oklahoma, on route Nos. 9 and 26, and an investigation (Docket No. 6214) of suspension of Braniff's services to Muskogee, Oklahoma, and of authorization of service by Braniff to Fayetteville, Arkansas.

Notice is hereby given, pursuant to the Civil Aeronautics Act of 1938, as amended particularly sections 401 and 1001 of said act, that a hearing in the above-entitled proceeding will be held December 1, 1953, at 10:00 a. m., e. s. t., in the District Court Room, Washington County Courthouse, Muskogee, Oklahoma, before Examiner Ralph L. Wiser.

Without limiting the scope of issues presented by the applications, the matters and things involved therein will be considered to the following extent:

1. Whether the public convenience and necessity require the amendment of the certificates of public convenience and necessity held by Central Airlines, Inc. for route No. 9 and of the certificate held by Braniff Airways, Inc. for route No. 26 so as to authorize the temporary suspension of service to Muskogee, Oklahoma, on said routes and so as to authorize air transportation to Fayetteville, Arkansas, as an intermediate point on segment 1 of route No. 9.

2. Whether the public convenience and necessity require the amendment of the certificate of public convenience and necessity held by Central Airlines, Inc. for route No. 81 so as to authorize air transportation (a) between the intermediate point Muskogee, Oklahoma, on segment 2 of said route and the terminal point Little Rock, Arkansas, via the intermediate points Fayetteville, Fort Smith and Hot Springs, Arkansas, (b) between the terminal point Kansas City, Missouri, and the intermediate point Fayetteville on segment 2 of route No. 81 via the intermediate points Joplin, Missouri, Fayetteville, Arkansas, and Fort Smith, Arkansas, and (c) between the intermediate point Muskogee, Oklahoma, on segment 2 of route No. 81, and the intermediate point Fort Smith, Arkansas.

3. Whether the public convenience and necessity require the amendment of the certificate of public convenience and necessity held by Trans-Texas Airways for route No. 82 so as to authorize air transportation between Little Rock, Arkansas, an intermediate point on said route, and the terminal point Tulsa, Oklahoma, via the intermediate points Fort Smith and Fayetteville, Arkansas.

4. Whether each of the above-named air carriers is fit, willing and able properly to perform the air transportation to be authorized and to conform to the provisions of the act and the rules, regulations and requirements of the Board thereunder.

For further details of the issues involved in this proceeding, interested persons are referred to the applications, the prehearing conference report, and the consolidation orders, Nos. E-7546 and E-7680, comprised in the record of this proceeding on file with the Civil Aeronautics Board.

Notice is further given that any person, other than a party of record, desiring to be heard in this proceeding must file with the Board on or before November 25, 1953, a statement setting forth the propositions of fact or law which he desires to advance.

Dated at Washington, D. C., November 13, 1953.

[SEAL] FRANCIS W. BROWN,
*Chief Examiner.*

[F. R. Doc. 53-9738; Filed, Nov. 18, 1953; 8:49 a. m.]

[Docket No. 6204]

NORTHEAST AIRLINES, INC.

NOTICE OF HEARING

In the matter of an investigation to determine whether the certificate of public convenience and necessity for route No. 27 held by Northeast Airlines, Inc., should be altered, amended, or modified so as to eliminate therefrom authority to serve the intermediate point Provincetown, Massachusetts.

Notice is hereby given pursuant to the Civil Aeronautics Act of 1938, as amended, that hearing in the above-entitled proceeding is assigned to be held on January 6, 1954, at 10:00 a. m., e. s. t., in Room E-210, Temporary Building No. 5, Sixteenth Street and Constitution Avenue NW., Washington, D. C., before Examiner Joseph L. Fitzmaurice.

Dated at Washington, D. C., November 16, 1953.

[SEAL] FRANCIS W. BROWN,
*Chief Examiner.*

[Docket No. SA-285]

ACCIDENT OCCURRING AT STANDIFORD FIELD, LOUISVILLE, KY.

NOTICE OF HEARING

In the matter of investigation of accident involving aircraft of United States registry #N 66534, which occurred at Standiford Field, Louisville, Kentucky, on September 28, 1953.

Notice is hereby given, pursuant to the Civil Aeronautics Act of 1938, as amended, particularly section 702 of said act, in the above-entitled proceeding that hearing is hereby assigned to be held on Monday, November 23, 1953, at 9:00 a. m. (local time) in the Kentucky Hotel, Fifth and Walnut Street, Louisville, Kentucky.

Dated at Washington, D. C., November 13, 1953.

[SEAL] ROBERT W. CHRISP,
*Presiding Officer.*

## FEDERAL POWER COMMISSION

[Docket No. G-2010]

NORTHERN NATURAL GAS CO.

NOTICE OF EXTENSION OF TIME

NOVEMBER 13, 1953.

Upon consideration of the motion of Northern Natural Gas Company, filed November 9, 1953, for an extension of time in the above-designated matter;

Notice is hereby given that an extension of time from October 27, 1953 to and including November 30, 1953, is granted within which Northern Natural Gas Company shall complete construction of all facilities authorized by the Commission's order issued July 30, 1953, and shall place said facilities in operation. Paragraph (C) (1) of said order is amended accordingly.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 53-9726; Filed, Nov. 18, 1953; 8:46 a. m.]

[Docket No. G-2075]

TRANSCONTINENTAL GAS PIPE LINE CORP.

ORDER FIXING DATE FOR RESUMPTION OF HEARING

On July 15, 1953, the hearing in this proceeding was recessed to a date to be thereafter fixed by order of the Commission.

The Commission finds: Good cause exists and the public interest requires that the proceeding be set for further hearing as hereinafter ordered.

The Commission orders: The public hearing in this proceeding be resumed on November 30, 1953, at 10:00 a. m. in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C.

Adopted: November 12, 1953.

Issued: November 13, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 53-9727; Filed, Nov. 18, 1953; 8:46 a. m.]

[Docket No. G-2187]

CITIES SERVICE GAS CO.

ORDER DENYING REQUEST FOR SHORTENED PROCEDURE AND FIXING DATE OF HEARING

Cities Service Gas Company (Applicant), a Delaware corporation with its principal place of business in Oklahoma City, Oklahoma, filed an application on June 15, 1953, which was supplemented on July 13, 1953, for (1) a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act authorizing the construction and operation of certain natural-gas transmission pipe-line facilities heretofore constructed by Applicant as substitute facilities to render service in the area of Mulvane and Derby, Sedgwick County, Kansas, all as more fully described in said application, and (2) an order, pursuant to section 7 (b) of the Natural Gas Act, authorizing and approving the abandonment of certain natural gas transmission facilities described in said application which heretofore were used by Applicant to render service in the Mulvane and Derby, Kansas area.

Applicant has requested that its application be disposed of pursuant to the provisions of § 1.32(b) (18 CFR 1.32(b)) of the Commission's rules of practice and procedure. Due notice of the filing of the application has been given, including publication in the FEDERAL REGISTER on July 9, 1953 (18 F. R. 4037). Although no formal protest to the application has been filed, the Commission has been informed that discontinuance of service by Applicant to certain customers as a result of the abandonment of facilities by Applicant has been protested. The application indicates that as a result of the construction of new facilities and the abandonment of old facilities by Applicant, service to a number of domestic customers dependent upon Applicant's system for natural-gas service has been discontinued.

The Commission finds: This proceeding is not a proper one for disposition under the provisions of § 1.32(b) (18 CFR 1.32(b)) of the Commission's rules of practice and procedure.

The Commission orders:

(A) The request that the proceeding be disposed of under the provisions of § 1.32(b) (18 CFR 1.32(b)) of the Commission's rules of practice and procedure be and the same is hereby denied.

(B) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure a hearing be held on November 30, 1953, at 10:00 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by the application.

(C) Interested State commissions may participate as provided by §§ 1.8

and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Adopted: November 12, 1953.

Issued: November 13, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 53-9728; Filed, Nov. 18, 1953; 8:47 a. m.]

[Docket No. G-2236]

OHIO FUEL GAS CO.

ORDER FIXING DATE OF HEARING

On September 1, 1953, the Ohio Fuel Gas Company (Applicant), an Ohio corporation having its principal place of business at Columbus, Ohio, filed an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and continued operation of certain natural-gas transmission pipeline facilities, subject to the jurisdiction of the Commission, all as more fully described in said application on file with the Commission and open to public inspection.

The Commission finds: This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure. Applicant having requested that its application be heard under the aforesaid rule for noncontested proceedings, and no request to be heard, protest or petition having been filed subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER on September 23, 1953 (18 F. R. 5669).

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on November 30, 1953, at 9:30 a. m., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, forthwith dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Adopted: November 12, 1953.

Issued: November 13, 1953.

By the Commission.

[Docket No. G-2241]

TEXAS GAS TRANSMISSION CORP.

ORDER FIXING DATE OF HEARING

Texas Gas Transmission Corporation (Applicant), a Delaware corporation having its principal place of business in Owensboro, Kentucky, filed on September 4, 1953, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of a sales meter run near Merigold, Mississippi, for the purpose of delivery and sale of natural gas to Mississippi Valley Gas Company for resale to Mississippi Power & Light Company for use in the latter's Delta Steam-Electric Generating Plant near Cleveland, Mississippi, all as more fully described in said application on file with the Commission and open to public inspection.

Applicant has requested that its application be heard under the shortened procedure provided by § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, and no request to be heard, protest, or petition has been filed subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER on October 15, 1953 (18 F. R. 6578).

The Commission finds: This proceeding is a proper one for disposition under the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on November 30, 1953, at 9:30 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, forthwith dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State Commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.3 (f)) of the said rules of practice and procedure.

Adopted: November 12, 1953.

Issued: November 13, 1953.

By the Commission.

[Docket No. G-2266]

EL PASO NATURAL GAS CO.

ORDER FIXING DATE OF HEARING

El Paso Natural Gas Company (Applicant), a Delaware corporation with its principal office in El Paso, Texas, on October 5, 1953, filed application with the Federal Power Commission for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act authorizing the construction and operation of approximately 7 miles of 8¾-inch pipeline in Pinal County, Arizona, extending from Applicant's existing Magma pipeline at a point in Section 4, Township 9 South, Range 16 East in a southwesterly direction, to a point in Section 29, Township 9 South, Range 17 East, together with necessary metering and regulating equipment, for the transportation and sale of natural gas subject to the jurisdiction of the Commission, as described in the application on file with the Commission, and open to public inspection,

The Commission finds: This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, Applicant having requested that its application be heard under the shortened procedure provided by the aforesaid rule for noncontested proceedings, and no request to be heard, protest, or petition having been filed subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER on October 24, 1953 (18 F. R. 6763).

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on November 24, 1953 at 9:30 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by the application: *Provided, however,* That the Commission may after a noncontested hearing, forthwith dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure

(B) Interested State Commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.3 (f)) of the said rules of practice and procedure.

Adopted: November 12, 1953.

Issued: November 13, 1953.

[Docket No. G-1915]

SOUTH GEORGIA NATURAL GAS CO.

ORDER REOPENING PROCEEDINGS AND FIXING DATE OF HEARING

The Commission, having considered the record and pleadings in this matter, and the representation of counsel for Applicant that the date hereinafter fixed for further hearing is the earliest date at which Applicant would be prepared to proceed, finds: It is appropriate and in the public interest to reopen this proceeding to permit each of the parties hereto to introduce such further evidence as it deems appropriate on all issues respecting South Georgia Natural Gas Company's application for a certificate of public convenience and necessity.

The Commission orders:

(A) The hearing in this matter be and the same hereby is reopened for the purpose stated above.

(B) Pursuant to the authority contained in and by virtue of the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a further hearing be held commencing on January 18, 1954, at 10:00 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matter and issues hereinbefore stated.

(C) South Georgia Natural Gas Company, on or before January 5, 1954, shall serve upon all parties copies of the testimony and exhibits it proposes to offer at the reopened hearing, including five (5) copies upon Commission Staff Counsel

(D) All interveners in this proceeding may participate in such further hearing in accordance with leave granted by the Commission.

(E) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted November 4, 1953.

Issued November 13, 1953.

By the Commission.

[Docket No. G-2312]

EAST TENNESSEE NATURAL GAS CO.

ORDER SUSPENDING REVISED TARIFF SHEETS AND FIXING DATE OF HEARING THEREON

On October 14, 1953, East Tennessee Natural Gas Company (East Tennessee) tendered for filing, pursuant to section 4 of the Natural Gas Act, First Revised Sheets Nos. 4, 5, 7, and 8 of East Tennessee FPC Gas Tariff, Second Revised Volume No. 1, proposed to take effect November 15, 1953.

East Tennessee, by said filing, proposes to increase the rate in its G-1 Rate Schedule from 45 cents per Mcf to 53.5 cents per Mcf, and to increase the rate in its G-2 Rate Schedule from $3.25 per Mcf per month of billing demand to $4.00 per Mcf per month of billing demand, and an increase in the commodity charge from 23 cents per Mcf to 25.5 cents per Mcf.

In addition, by said filing, East Tennessee proposes to change the availability of its Rate Schedules G-1 and G-2 so that Rate Schedule G-1 shall apply to those purchasers using less than 1,000 Mcf in any one day, rather than 3,000 Mcf.

The proposed rate increase, which would increase East Tennessee's revenues for the year ended August 31, 1953, by $501,728 is based in large part on a proposed increase in the cost of gas purchased from its supplier, Tennessee Gas Transmission Company. The supplier's proposed rate increase has been suspended by order of the Commission issued September 24, 1953, at Docket No. G-2252. Further, the method employed by East Tennessee to determine the allocation of costs between those sales subject to the jurisdiction of the Commission and other sales does not appear to be justified. In addition, the proposed reduction in the volume of gas pertaining to the availability of the G-1 rate schedule may not be justified.

Accordingly, East Tennessee's proposed change in the availability of its G-1 rate schedule and rate increase in its G-1 and G-2 Rate Schedules may be unjust, unreasonable, unduly discriminatory or preferential, and may place an undue burden upon ultimate consumers of natural gas.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing pursuant to section 4 of the Natural Gas Act, concerning the lawfulness of the rates, charges, classifications and services contained in East Tennessee's FPC Gas Tariff, Second Revised Volume No. 1, as proposed to be amended by First Revised Sheets Nos. 4, 5, 7, and 8, and that said tariff sheets be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority contained in section 4 of the Natural Gas Act, a public hearing be held commencing on February 1, 1954, at 10:00 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the lawfulness of the rates, charges, classifications and services contained in East Tennessee's FPC Gas Tariff, Second Revised Volume No. 1, as proposed to be amended by First Revised Sheets Nos. 4, 5, 7, and 8.

(B) Pending such hearing and decision thereon, First Revised Sheets Nos. 4, 5, 7, and 8 be and the same are hereby suspended, and their use deferred until April 15, 1954, unless otherwise ordered by the Commission, and until such further time as said tariff sheets may be made effective in the manner prescribed by the Natural Gas Act.

(C) At the hearing, the parties, including Commission Staff Counsel, may reserve cross-examination until after East Tennessee has presented and completed its case-in-chief.

(D) East Tennessee, on or before January 4, 1954, shall serve upon all parties, copies of all exhibits proposed to be offered by it at the hearing, including 5 copies upon Commission Staff Counsel.

(E) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted: November 12, 1953.

Issued: November 13, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

## HOUSING AND HOME FINANCE AGENCY

### Public Housing Administration

DESIGNATION OF ACTING COMMISSIONER

CENTRAL OFFICE ORGANIZATION AND FINAL DELEGATIONS OF AUTHORITY

Section II *Central Office organization and final delegations of authority to Central Office officials,* is amended as follows:

Paragraph 1g is amended as follows:

g. *Designation of Acting Commissioner.* The Commissioner hereby designates the Special Assistant Commissioner to serve as Acting Commissioner in his absence. The Special Assistant Commissioner is authorized to exercise all the powers, duties, and functions, while so acting, that are vested in the Commissioner. In the absence of the Special Assistant Commissioner such person as the Commissioner shall designate shall serve as Acting Commissioner and shall exercise all the powers, duties and functions, while so acting, that are vested in the Commissioner.

Date approved: November 10, 1953.

CHARLES E. SLUSSER, *Commissioner.*

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28651]

LIQUID CAUSTIC SODA FROM HUNTSVILLE AND REDSTONE ARSENAL, ALA., TO TUSCOLA, ILL.

APPLICATION FOR RELIEF

NOVEMBER 16, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Liquid caustic soda, in tank-car loads.

From: Huntsville and Redstone Arsenal, Ala.

To: Tuscola, Ill.

Grounds for relief: Rail competition, circuitous routes, to apply rates constructed on the basis of the short line distance formula, and additional destination.

Schedules filed containing proposed rates; C. A. Spaninger, Agent, I. C. C. No. 1351, supp. 37.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

[F. R. Doc. 53-9744; Filed, Nov. 18, 1953; 8:49 a. m.]

[4th Sec. Application 28652]

SODA ASH FROM LOUISIANA AND TEXAS TO SOUTH CAROLINA, GEORGIA AND FLORIDA

APPLICATION FOR RELIEF

NOVEMBER 16, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1167, and Agent F. C. Kratzmeir's tariffs Nos. 3906 and 3967.

Commodities involved: Soda ash, carloads.

From: Baton Rouge, Lake Charles and certain other points in Louisiana, Velasco, and other points in Texas.

To: Charleston and Georgetown, S. C., and points in Georgia and Florida.

Grounds for relief: Competition with water carriers and market competition.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 28653]

SWEET POTATOES FROM LOUISIANA TO HUNTINGTON, W. VA.

APPLICATION FOR RELIEF

NOVEMBER 16, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedule listed below.

Commodities involved: Sweet potatoes or yams, carloads.

From: Points in Louisiana.

To: Huntington, W. Va.

Grounds for relief: Rail competition, circuity, to apply rates constructed on the basis of the short line distance formula, and additional destination.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3931, supp. 11.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

## SECURITIES AND EXCHANGE COMMISSION

[File No. 54-212]

DERBY GAS & ELECTRIC CORP. ET AL.

SUPPLEMENTAL ORDER APPROVING AMENDMENT TO PLAN IN RESPECT OF ISSUANCE AND SALE OF NOTE AND USE OF PROCEEDS TO RETIRE BONDS

NOVEMBER 12, 1953.

The Commission, by order dated October 9, 1953, having approved a plan, as amended, filed under section 11 (e) of the Public Utility Holding Company Act of 1935 ("act") by Derby Gas & Electric Corporation ("Derby"), a registered holding company, and its subsidiary companies, The Derby Gas and Electric Company ("Derby Company"), The Wallingford Gas Light Company ("Wallingford"), The Danbury and Bethel Gas and Electric Light Company ("Danbury"), and Derby Gas and Electric Corporation of Connecticut ("Derby of Connecticut"), providing for the merger of Derby, Derby Company, Wallingford, and Danbury, into and with Derby of Connecticut the name of which is to be changed to The Housatonic Public Service Company ("Housatonic"); the Commission having applied to the United States District Court for the District of Connecticut for enforcement of the plan; the plan providing, among other things, for the issuance and sale by Housatonic to The Equitable Life Assurance Society of the United States of $150,000 principal amount of additional First Mortgage Debentures and the use of proceeds, together with other necessary funds, to retire the outstanding $150,000 principal amount of Danbury bonds maturing December 1, 1953; and

Applicants having filed, pursuant to sections 11 (e) and 6 (b) of the act an amendment to said plan providing for the issuance and sale by Derby of a note for $150,000 and the use of proceeds thereof to retire the said $150,000 of Danbury bonds, which said note is to be assumed by Housatonic and paid, in whole or in substantial part, with funds received by it from the issuance and sale of the $150,000 of additional First Mortgage Debentures provided for by the plan; and

The Commission finding that the proposed amendment to the plan does not make any substantial change in the plan, or affect in any substantial respect the rights of stockholders or other persons affected by the plan, and that the applicable provisions of the act and the rules and regulations thereunder have been satisfied, and the Commission observing no basis for adverse findings, and deeming it appropriate in the public interest and in the interest of investors and consumers that the plan as modified by said amendment be approved forthwith:

*It is ordered*, Pursuant to sections 11 (e), 6 (b), and other applicable provisions of the act and the rules and regulations promulgated thereunder that said plan, as so modified, be, and it hereby is approved forthwith, subject to the terms, conditions, and reservations of jurisdiction specified in the Commission's order herein dated October 9, 1953.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

[File Nos. 70-3127, 70-3128]

DUQUESNE LIGHT CO. AND STANDARD POWER AND LIGHT CORPORATION

SUPPLEMENTAL ORDER RELEASING JURISDICTION WITH RESPECT TO CERTAIN FEES AND EXPENSES

NOVEMBER 13, 1953

In the matter of Duquesne Light Company, File No. 70-3127; Standard Power and Light Corporation, File No. 70-3128.

The Commission by order dated September 8, 1953, having granted and permitted to become effective amended applications-declarations filed pursuant to the Public Utility Holding Company Act of 1935 by Duquesne Light Company ("Duquesne") (File No. 70-3127), a public utility subsidiary of Philadelphia

Company, a registered holding company and a subsidiary of Standard Gas and Electric Company, which, in turn, is a subsidiary of Standard Power and Light Corporation ("Standard Power"), both also registered holding companies, and by Standard Power (File No. 70-3128), regarding (a) the issue and sale by Duquesne, pursuant to Rule U-50, of 150,000 additional shares of Common Stock, par value $50 per share, 100,000 shares of --- Percent Preferred Stock, par value $10 per share, and $12,000,000 principal amount of 3⅝ Percent First Mortgage Bonds, Series due September 1, 1983; and (b) the sale by Standard Power, pursuant to Rule U-50, of 34,739 shares of the outstanding Common Stock of Duquesne, owned by Standard Power, simultaneously with the proposed sale by Duquesne of additional shares of its Common Stock, and

The Commission in its aforesaid order dated September 8, 1953, having reserved jurisdiction with respect to the results of competitive bidding under Rule U-50 and with respect to all fees and expenses, and applicants-declarants having submitted the aforesaid Duquesne Common Stock and bonds to competitive bidding, and Duquesne having postponed indefinitely the proposed issue and sale of preferred stock; and

The Commission by orders dated September 15, 1953, and September 23, 1953, having released jurisdiction over the results of the competitive bidding with respect to the issue and sale of the Duquesne Common Stock and bonds but having continued its jurisdiction over all fees and expenses; and

Duquesne and Standard Power having on November 2, 1953, requested the Commission to release jurisdiction with respect to the fees and expenses, other than fees and expenses for accounting and legal services, incurred in connection with the issue and sale by Duquesne of its Common Stock and bonds and the sale by Standard Power of the shares of Common Stock of Duquesne owned by Standard Power, and said fees and expenses having been estimated and allocated by applicants-declarants as follows:

| | Common stock | | Bonds—Duquesne | Total |
|---|---|---|---|---|
| | Duquesne | Standard Power | | |
| Securities and Exchange Commission filing fee | $450 | $104.22 | $1,248 | $1,802.22 |
| Federal and State stamp taxes | 1,650 | 277.91 | 13,200 | 15,127.91 |
| Pennsylvania stock excise taxes | 3,000 | | | 3,000.00 |
| Printing | 9,744 | 2,256.00 | 17,000 | 29,000.00 |
| Engraving | 4,000 | | 7,000 | 11,000.00 |
| Transfer agent and registrar fees | 1,500 | | | 1,500.00 |
| Trustee's charges including authentication | | | 9,500 | 9,500.00 |
| Qualifying under securities laws of various States | 2,030 | 470.00 | 2,250 | 4,750.00 |
| Listing on stock exchanges | 2,000 | | 1,500 | 3,500.00 |
| Miscellaneous expenses | 1,502 | 1,015.87 | 2,302 | 4,819.87 |
| Total | 25,876 | 4,124.00 | 54,000 | 84,000.00 |

The Commission finding that said estimated fees and expenses are not unreasonable, provided they do not exceed the foregoing amounts and it appearing to the Commission that the jurisdiction heretofore reserved with respect thereto should be released:

*It is ordered*, That the jurisdiction heretofore reserved with respect to the above fees and expenses be, and the same hereby is, released, effective forthwith.

*It is further ordered*, That the jurisdiction heretofore reserved herein, other than as expressly released, be, and the same hereby is, continued.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

Pursuant to sections 8 and 9 of the Plant Quarantine Act of 1912, as amended (7 U. S. C. 161, 162), § 301.52–2 of the regulations supplemental to notice of quarantine No. 52 relating to the pink bollworm (7 CFR, 1952 Supp., 301.52–2; 18 F. R. 6348), is hereby amended by adding to the lightly infested areas specified therein the parishes of Claiborne, Lincoln, and Union, in Louisiana, and the counties of Bryan, Carter, Coal, Murray, Okmulgee, and Pittsburg, in Oklahoma.

Inspection of trash from gins in the aforesaid parishes and counties has disclosed the presence therein of pink bollworm infestation. Cottonseed is now moving from the gins in these localities. Consequently, it is essential that immediate action be taken to prevent the interstate movement of infested cottonseed that may spread the pink bollworm to uninfested localities. Accordingly, pursuant to section 4 of the Administrative Procedure Act (5 U. S. C. 1003), it is found upon good cause that notice and other public procedure with respect to this amendment are impracticable and contrary to the public interest, and good cause is found for the issuance of this amendment effective less than 30 days after its publication in the FEDERAL REGISTER.

*Effective date.* This amendment shall be effective November 20, 1953.

(Secs. 8 and 9, 37 Stat. 318, as amended; 7 U. S. C. 161, 162)

Done at Washington, D. C., this 16th day of November 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

## TITLE 9—ANIMALS AND ANIMAL PRODUCTS

### Chapter I—Bureau of Animal Industry, Department of Agriculture

**Subchapter D—Exportation and Importation of Animals and Animal Products**

[B. A. I. Order 379, Amdt. 3]

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS

HORSES; IMPORTATION FROM CANADA

On October 24, 1953, there was published in the FEDERAL REGISTER (18 F. R. 6758) a notice of proposed rule making concerning an amendment of § 92.24 of the regulations governing the importation of certain animals and poultry and certain animal and poultry products (9 CFR, 1952 Supp., Part 92, as amended). After due consideration of all relevant material submitted in connection with the notice, the Secretary of Agriculture, pursuant to the authority vested in him by section 2 of the act of Congress approved February 2, 1903, as amended (21 U. S. C. 111), hereby amends said § 92.24, to read as follows:

§ 92.24 *Horses from Canada.* (a) All horses from Canada shall be inspected as provided in § 92.8: *Provided, however,* That the Chief of Bureau may waive inspection of such horses at the port of entry or provide for their inspection at some other point when he finds that such action may be taken without endangering the livestock industry of the United States.

(b) When so ordered by the Chief of Bureau, horses from Canada shall be accompanied by a certificate issued or endorsed by a salaried veterinarian of the Canadian government showing that said horses have been inspected on the premises of origin in Canada and found free from evidence of any contagious, infectious, or communicable disease and, as far as it has been possible to determine, they have not been exposed to any such disease common to animals of their kind, and that said horses have been mallein tested with negative results within 30 days preceding their offer for entry.

(c) Any horse from Canada may be detained at the port of entry and there subjected to such tests as may be required by the Chief of Bureau to determine freedom from disease.

The foregoing amendment gives to the Chief of the Bureau of Animal Industry of this Department authority to waive inspection of horses from Canada or provide for their inspection at some point other than the port of entry, when he finds that such action may be taken without endangering the livestock industry of the United States. The amendment is in the nature of a relief of restrictions, and should be made effective promptly to be of maximum benefit to persons subject to the restrictions contained in said § 92.24 of the regulations. Accordingly, under section 4 of the Administrative Procedure Act (5 U. S. C. 1003), it may be made effective less than 30 days after publication in the FEDERAL REGISTER.

The foregoing amendment shall become effective upon issuance.

(Sec. 2, 32 Stat. 792, as amended; 21 U. S. C. 111)

Done at Washington, D. C., this 16th day of November 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

[F. R. Doc. 53-9771; Filed, Nov. 19, 1953; 8:49 a. m.]

## TITLE 14—CIVIL AVIATION

### Chapter I—Civil Aeronautics Board

[Supp. 18]

PART 3—AIRPLANE AIRWORTHINESS; NORMAL, UTILITY, AND ACROBATIC CATEGORIES

ANTI-COLLISION LIGHTS

High intensity anti-collision lights are available for use on aircraft. Although such lights are not now required by the Civil Air Regulations, Part 4b prescribes standards for anti-collision lights and their installation on transport category airplanes to avoid confusion in air navigation. Part 3 does not contain these standards. Therefore, recommended standards consistent with those specified in § 4b.637 are hereby adopted for the installation of anti-collision lights on airplanes certificated under Part 3.

§ 3.700–3 *Anti-collision light (CAA policies which apply to § 3.700 (a)).* Anti-collision lights, when installed, should be of the rotating beacon type installed on top of the fuselage or tail in such a location that the light would not be detrimental to the crew's vision and would not detract from the conspicuity of the position lights. The color of the anti-collision light should be aviation red in accordance with the specifications of § 3.703. The arrangement of the anti-collision light, i. e., number of light sources, beam width, speed of rotation, etc., should be such as to give an effective flash frequency of not less than 40 and not more than 100 cycles per minute, with an on-off ratio not less than 1:75

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 603, 52 Stat. 1009, 49 U. S. C. 553)

These policies shall become effective December 15, 1953.

[SEAL] S. A. KEMP,
*Acting Administrator of Civil Aeronautics.*

## Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 48]

### PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

1. The low frequency range procedures prescribed in § 609.6 are amended to read in part:

LOW FREQUENCY RANGE PROCEDURES

When an LFR instrument approach is conducted at the below named airport(s), it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airport(s). Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

| City and State; airport name, elevation; class of facility; frequency; identification, procedure No. | Initial approach to facility | | | Procedure turn: ( ) side of final approach course (outbound and inbound); altitudes; limiting distances | Minimum altitude over facility on final approach course (ft.) | Course and distance facility to airport | Ceiling and visibility minimums | | | If visual contact not established at authorized landing minimums after passing facility within distance specified below, or if landing not accomplished; remarks |
|---|---|---|---|---|---|---|---|---|---|---|
| | From— | Course and distance | Minimum altitude (ft.) | | | | Condition | Type aircraft: 75 m. p. h. or less | Type aircraft: More than 75 m. p. h. | |

4. The instrument landing system procedures prescribed in § 609.11 are amended to read in part:

INSTRUMENT LANDING SYSTEM PROCEDURES

When an ILS instrument approach is conducted at the below named airports, it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airport(s). Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

| City and State; airport name; elevation; Localizer; frequency and identification; LMM; frequency and identification; LOM; frequency and identification; procedure No. | Transition to ILS | | | | Procedure turn: (X) side of final approach course (outbound and inbound); altitudes; limiting distances | Minimum altitude at glide slope interception inbound (ft.) | Altitude of glide slope and distance to approach end of runway | | Ceiling and visibility minimums | | | If visual contact not established upon descent to authorized landing minimums, or if landing not accomplished, remarks |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | From— | To— | Course and distance | Minimum altitude (ft.) | | | At outer marker. | At middle marker. | Conditions | Type of aircraft: 75 m. p. h. or less | Type of aircraft: More than 75 m. p. h. | |

5. The ground controlled approach procedures prescribed in § 609.13 are amended to read in part:

GROUND CONTROLLED APPROACH SYSTEM PROCEDURES

When a GCA instrument approach is conducted at the below named airport(s), it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airport(s). Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the ground controller. From initial contact with GCA to final authorized landing minimums, the instructions of the GCA controller are mandatory except when (A) visual reference with the ground is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach.

| City and State; airport name, elevation; GCA transmitting and guarding frequencies | Radar terminal area maneuvering altitudes by sectors and limiting distances | Runway No. | Condition | Ceiling and visibility minimums: Precision approach (PAR): 75 m. p. h. or less | Precision approach (PAR): More than 75 m. p. h. | Surveillance approach (ASR): 75 m. p. h. or less | Surveillance approach (ASR): More than 75 m. p. h. | Except when the ground controller may direct otherwise prior to final approach, A missed approach procedure shall be executed as provided below when: (A) communication on final approach is lost for more than 5 seconds; (B) directed by ground controller, (C) visual reference is not established upon descent to the authorized landing minimums or (d) landing is not accomplished; remarks |

## TITLE 10—ATOMIC ENERGY

### Chapter I—Atomic Energy Commission

PART 40—CONTROL OF SOURCE MATERIAL

PART 50—CONTROL OF FACILITIES FOR THE PRODUCTION OF FISSIONABLE MATERIAL

MISCELLANEOUS AMENDMENTS

Title 10, Chapter 1, Parts 40 and 50, Code of Federal Regulations, entitled "Control of Source Material" and "Control of Facilities for the Production of Fissionable Material", respectively, are hereby amended in the following respects, effective January 1, 1954:

1. Section 40.62 (a), reading:

(a) Transfers, deliveries and receipts of possession of (but not title to) source material by contractors and agents of the Commission in the authorized course of their business for the Commission;

is changed to read:

(a) Transfers, deliveries and receipts of possession of (but not title to) source material by contractors and agents of the Commission, or its subcontractors in any tier, in the authorized course of their business for the Commission;

2. Section 40.62 (c), reading:

(c) "Transfers, deliveries and receipts of possession of and title to a quantity of refined source material which contains less than one pound of uranium, thorium, or any combination thereof, from or to any one person during any single calendar month, to the extent that the transaction consists of either:

(1) Transfer to or receipt of possession or title by a licensed dispensing pharmacist solely for the compounding of medicinals for delivery to consumers, or

(2) Transfer to or receipt of possession or title by a physician or consumer for medicinal purposes only, and not for resale, or

(3) Transfer to or receipt of possession or title by an educational institution or hospital for educational or medical purposes only, and not for resale.

is changed to read:

(c) Transfers, deliveries and receipts of possession of and title to a quantity of refined source material which contains not more than three pounds of uranium, thorium or any combination thereof, from or to any one person during any single calendar year, to the extent that the transaction consists of either:

(1) Transfer to or receipt of possession or title by a licensed dispensing pharmacist solely for the compounding of medicinals for delivery to consumers, or

(2) Transfer to or receipt of possession or title by a physician or consumer for medicinal purposes only, and not for resale, or

(3) Transfer to or receipt of possession or title by an educational institution or hospital for educational or medical purposes only, and not for resale, or

(4) Transfer to or receipt of possession or title by a commercial, industrial, or hospital analytical laboratory, or a Federal, state or other governmental analytical laboratory, for analytical purposes only, and not for resale.

3. Sections 40.20 *Applications for licenses*, 40.51 *Petitions*, and 40.52 *Communications* are amended by deleting "P. O. (or Post Office) Box 30, Ansonia Station, New York 23, N. Y." as it appears in each of the said sections, and substituting therefor "Washington 25, D. C., Attention: Licensing Controls Branch," thereby causing these sections as amended to read:

§ 40.20 *Applications for licenses.* Applications for licenses to transfer or deliver, receive possession of or title to, or export source material shall be filed with the United States Atomic Energy Commission, Washington 25, D. C., Attention: Licensing Controls Branch. Applications should be filed on Form AEC-2, copies of which are available at the above address. When it is impracticable to use this form, applications may be made by letter or telegram, giving the information required by Form AEC-2.

§ 40.51 *Petitions.* Petitions for relief from any restriction imposed under the regulations in this part may be made by filing a letter, in duplicate, with the United States Atomic Energy Commission, Washington 25, D. C., Attention: Licensing Controls Branch, stating the reasons why the petition should be granted.

§ 40.52 *Communications.* All communications concerning the regulations of this part or any license issued under them should be addressed to the United

States Atomic Energy Commission, Washington 25, D. C., Attention: Licensing Controls Branch.

4. Section 50.62 *Communications* is amended by deleting "Director of Production" as it appears therein and substituting therefor "Licensing Controls Branch," thereby causing the section as amended to read:

§ 50.62 *Communications.* All communications concerning the regulations in this part or any license issued under them should be addressed to the United States Atomic Energy Commission, Washington 25, D. C., Attention: Licensing Controls Branch.

(60 Stat. 755–775; 42 U. S. C. 1801–1819)

Dated at Washington, D. C., this 12th day of November 1953.

By order of the Commission.

WALTER J. WILLIAMS,
*Deputy General Manager.*

[F. R. Doc. 53-9754; Filed, Nov. 19, 1953; 8:45 a. m.]

## TITLE 26—INTERNAL REVENUE

### Chapter I—Internal Revenue Service, Department of the Treasury

#### Subchapter C—Miscellaneous Excise Taxes

[T. D 6051; Regs. 3]

PART 182—INDUSTRIAL ALCOHOL

SPECIALLY DENATURED ALCOHOL FORMULA NO. 29

*Correction*

In F. R. Doc. 53-9588, appearing at page 7191 of the issue for Friday, November 13, 1953, the headings for the document should read as set forth above.

## TITLE 39—POSTAL SERVICE

### Chapter I—Post Office Department

PART 36—UNMAILABLE MATTER

PART 52—RURAL DELIVERY

MAILING OF PISTOLS, REVOLVERS, AND OTHER FIREARMS; MANUFACTURE AND SALE OF BOXES

In § 36.12 *Mailing of pistols, revolvers, and other firearms* make the following changes:

1. Amend the second sentence of paragraph (a) (1) by inserting, immediately after the word "Navy," the words "Air Force," and by striking out the words "Officers' Reserve Corps," and by inserting in lieu thereof the words "Organized Reserve Corps,".

2. Amend paragraph (d) by inserting, immediately after the word "Navy," the words "Air Force," and by striking out the words "Officers' Reserve Corps," and by inserting in lieu thereof the words "Organized Reserve Corps,".

3. Amend paragraph (j) by inserting, immediately after the word "Navy," the words "Air Force," and by striking out the words "Officers' Reserve Corps," and by inserting in lieu thereof the words "Organized Reserve Corps".

(R. S. 161, 396, secs. 304, 309, 42 Stat. 24, 25, 62 Stat. 782, as amended; 5 U. S. C. 22, 369, 18 U. S. C. 1715)

4. In § 52.80 *Manufacture and sale of boxes* amend paragraph (c) by adding the following concern to the list of companies shown therein: Conco Engineering Works, Mendota, Ill.

(R. S. 161, 396, secs. 304, 309, 42 Stat. 24, 25; 5 U. S. C. 22, 369)

[SEAL] ROSS RIZLEY,
*Solicitor.*

[F. R. Doc. 53-9764; Filed, Nov. 19, 1953; 8:47 a. m.]

PART 107—RAILWAY POST OFFICES

PART 114—TREATMENT OF MAILS: POSTAGE REFUNDS: INTERNATIONAL REPLY COUPONS: DISPOSITION OF FOREIGN DEAD MATTER

SALE OF STAMPS IN RAILWAY POST OFFICES; FOREIGN DEAD AND UNDELIVERABLE MATTER

1. Section 107.24 *Sale of stams in railway post offices* is rescinded.

(R. S. 161, 396, secs. 304, 309, 42 Stat. 24, 25; 5 U. S. C. 22, 369)

2. In § 114.26 *Foreign dead and undeliverable matter,* amend paragraph (e) to read as follows:

(e) *From Canada and Mexico.* Undeliverable and unclaimed articles from Canada and Mexico, bearing neither requests for their return nor the names or addresses of senders, shall be dispatched to the dead letter branch at Boston, Mass.; New York, N. Y.; Chicago, Ill.; San Francisco, Calif.; or Washington, D. C., as provided in § 45.5 of this chapter.

(R. S. 161, 396, 393, secs. 304, 309, 42 Stat. 24, 25, 48 Stat. 943; 5 U. S. C. 22, 369, 372)

[SEAL] ROSS RIZLEY,
*Solicitor.*

[F. R. Doc. 53-9765; Filed Nov. 19, 1953; 8:48 a. m.]

## TITLE 43—PUBLIC LANDS: INTERIOR

### Chapter I—Bureau of Land Management, Department of the Interior

#### Appendix—Public Land Orders

[Public Land Order 924]

ARIZONA

ABOLISHING THE CROOK NATIONAL FOREST AND TRANSFERRING ITS LANDS TO THE TONTO, CORONADO AND GILA NATIONAL FORESTS, CORRECTION

NOVEMBER 16, 1953.

The land description in Federal Register Document 53-9133 appearing on pages 6823-24 of the issue for October 29, 1953, so far as such description relates to land in T. 4 W., R. 30 E., Gila and Salt River Meridian (unsurveyed), should read as follows:

GILA AND SALT RIVER MERIDIAN

T. 4 S., R. 30 E., unsurveyed.

WILLIAM PINCUS,
*Assistant Director.*

[F. R. Doc. 53-9768; Filed, Nov. 19, 1953; 8:49 a. m.]

## TITLE 47—TELECOMMUNICATION

### Chapter I—Federal Communications Commission

[Docket No. 10585]

PART 3—RADIO BROADCAST SERVICES

STANDARDS OF GOOD ENGINEERING PRACTICE CONCERNING STANDARD BROADCAST STATIONS

In the matter of amendment of the Standards of Good Engineering Practice Concerning Standard Broadcast Stations; Docket No. 10585.

1. The Commission has under consideration its notice of proposed rule making (FCC 53-856), issued July 10, 1953, and published in the FEDERAL REGISTER on July 17, 1953 (18 F. R. 4200), which proposes to add to the Standards of Good Engineering Practice Concerning Standard Broadcast Stations a curve—designated as Figure 8[1]—representing values of effective field, at 1 mile for 1 kilowatt for simple omnidirectional antennas as a function of antenna height. It was also proposed to make certain revisions in the Standards to provide for the use of the proposed Figure 8.

2. The Clear Channel Broadcasting Service filed comments supporting the proposed amendments. However, it was urged that "for 1" be substituted for the word "per" appearing in line 4 of the proposed rule and so that the rule would reflect the wording of Figure 8. The Association of Federal Communications Consulting Engineers filed a statement,[2] in which it suggested the same change in phraseology as that urged by the Clear Channel Broadcasting Service and further, that the title of Figure 8 be changed to agree with the text of the rule. No oppositions were filed.

3. The suggested changes in phraseology have been incorporated in the rule adopted herein and Figure 8 has been redesigned, with no change in the curves to make its use easier.

4. Authority for the adoption of the amendments herein is contained in section 4 (i), 303 (f) and 303 (r) of the Communications Act of 1934, as amended.

5. In view of the foregoing: *It is ordered,* That effective 30 days from publication in the FEDERAL REGISTER, the Standards of Good Engineering Practice Concerning Standard Broadcast Stations are amended as set forth below.

(Sec. 4, 48 Stat. 1066 as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303)

Adopted: November 12, 1953.

Released: November 13, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[1] Filed as part of the original document.

[2] In its statement, the Association requested that the date for filing comments be extended to receive their views. The comments of the Association are hereby accepted and are made a part of this docket.

1. Delete the paragraph immediately preceding Table III in section 1 and substitute therefor the following:

For the purpose of estimating the coverage and the interfering effects of stations in the absence of field intensity measurements, use shall be made of Figure 8 which describes the estimated effective field for one kilowatt power input of simple vertical omnidirectional antennas of various heights with ground systems of at least 120 one quarter wavelength radials. Certain approximations, based on the curve or other appropriate theory, may be made when other than such antennas and ground systems are employed, but in any event the effective field to be employed shall not be less than given in the following:

2. Insert in the Standards new Figure 8 "Effective field at one mile for one kilowatt."

[F. R. Doc. 53-9790; Filed, Nov. 19, 1953; 8:57 a. m.]

[Docket No. 10723]

PART 8—STATIONS ON SHIPBOARD IN THE MARITIME SERVICE

DEFERMENT OF AUTOMATIC KEYER REQUIREMENT FOR CERTAIN LIFEBOAT NON-PORTABLE RADIO EQUIPMENT

In the matter of amendment of Part 8 of the Commission's rules to defer the automatic keyer requirement for certain lifeboat non-portable radio equipment contained in § 8.559; Docket No. 10723.

1. In response to a request by the American Merchant Marine Institute (AMMI), a notice of proposed rule making in the above-entitled matter was issued on October 15, 1953 (FCC 53-1346) and published in the FEDERAL REGISTER on October 21, 1953 (18 F. R. 6684). The period for filing comments has now expired.

2. The only comment filed was that of AMMI. The Institute suggested that the proposed deferment until November 19, 1954 of the requirement for an automatic keying device for lifeboat non-portable radio equipment not be limited (as proposed) to equipment to which the provisions of the 1948 Safety Convention were not applicable. It points out that the practical considerations leading to deferment of the requirement are equally applicable to ships subject to the provisions of the Safety Convention as well as those not subject to the Convention. It further points out that although the provisions of Chapter IV, Regulation 13, of the Convention setting forth detailed requirements for lifeboat non-portable radio equipment contain no authority for deferment beyond November 19, 1953, of the automatic keyer requirement, such authority may be found in Regulation 1, Chapter III, of the Convention.

3. It is true that the basic requirement of the Safety Convention for lifeboat non-portable radio equipment originates in Regulation 25 of Chapter III, and further true that Regulation 1 of Chapter III provides (with certain exceptions not here relevant) for "substantial compliance" by existing ships with the requirements of Chapter III. If, however, the interpretation advanced by the AMMI were unqualifiedly accepted, it would render meaningless various provisions of Regulation 13, Chapter IV, which themselves contain specific limitations on the extent to which lifeboat non-portable radio requirements may be deferred, modified or applied. (See Regulations 13 (a), (b), (c), and (e) of Chapter IV.) Accordingly, it is the opinion of the Commission that the provisions of Regulation 1 of Chapter III of the Convention do not enable it to enlarge upon the provisions of Regulation 13 of Chapter IV by providing deferment of the requirement for an automatic keying device beyond November 19, 1953. Therefore, the rules amendment herein ordered finalized provides deferment beyond that date solely for equipment to which the Safety Convention provisions are not applicable.

4. Since it is urgent that ship owners be furnished a guide for action in this matter, compliance with the provisions of section 4 (c) of the Administrative Procedure Act is found to be impracticable: *It is ordered, therefore,* That, effective immediately, and pursuant to the provisions of sections 303 (c), (r), 355 and 356 of the Communications Act of 1934, as amended, Part 8 of the Commission's rules is amended as set forth below.

(Secs. 303, 355, 356, 48 Stat. 1082, as amended, 50 Stat. 193, 194; 47 U. S. C. 303, 355, 356)

Adopted: November 12, 1953.

Released: November 13, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

Section 8.559 is amended by revising the item relating to § 8.558 (a) (4) under the respective column headings "*Requirement*" and "*Date*" to read as follows:

Section 8.558 (a) (4): Transmitter requirements regarding an automatic keying device for operating on 500 kc and, if radio equipment installed on or after November 19, 1952, also for operation on 8364 kc.

For equipment required to be provided by reason of the provisions of the Safety Convention. November 19, 1953.

For equipment required by law to be provided but not so required under any provisions of the Safety Convention. November 19, 1954.

[F. R. Doc. 53-9791; Filed, Nov. 19, 1953; 8:55 a. m.]

[Docket No. 10593]

PART 10—PUBLIC SAFETY RADIO SERVICES

FREQUENCIES AVAILABLE TO THE SPECIAL EMERGENCY RADIO SERVICE

In the matter of amendment of § 10.462 (c) of Part 10, Public Safety Radio Services; Docket No. 10593.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 12th day of November 1953:

The Commission having under consideration the notice of proposed rule making in the above-entitled matter which contemplates amendment of § 10.462 (c) of Part 10, Public Safety Radio Services, to the extent that the frequency 3190 kc would be deleted from the frequencies available for use of radio stations in the Special Emergency Radio Service and a new frequency of 3201 kc would be substituted therefor, and note 9 relating to 3190 kc and to 2726 kc would be deleted;

It appearing that, in accordance with the requirements of section 4a of the Administrative Procedure Act, general notice of proposed rule making in the above-entitled matter, which made provision for the submission of written comments by interested parties, was published in the FEDERAL REGISTER on July 29, 1953 (18 F. R. 4438), and that the period allowed for the filing of comment has expired;

It further appearing that, although the proposed amendment was given the publicity required by the Administrative Procedure Act and generally accorded to all proposed rule changes, no comment with respect thereto was received in the Commission;

It further appearing that authority for the aforesaid amendment is contained in sections 4 (i), 30 (c) and (r) of the Communications Act of 1934, as amended;

*It is ordered,* That § 10.462 (e) is amended as follows:

1. Delete limitation note 9 following the frequency 2726 kc;

2. Delete the frequency 3190 kc and limitation note 9 thereto appended;

3. Add the frequency 3201 kc.

*It is further ordered,* That this amendment shall become effective on the 13th day of December 1953.

(Sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303)

Released: November 13, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9792; Filed, Nov. 19, 1953; 8:55 a. m.]

# PROPOSED RULE MAKING

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

### [ 7 CFR Part 922 ]

[Docket No. AO-250]

HANDLING OF VALENCIA ORANGES GROWN IN ARIZONA AND CALIFORNIA

NOTICE OF HEARING WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND ORDER

Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.) and in accordance with the applicable rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders (7 CFR 900.1 et seq.), notice is hereby given of a public hearing to be held in Room 330, Federal Building, 312 North Spring Street, Los Angeles, California, beginning at 10:00 a. m., P. s. t., December 7, 1953, with respect to a proposed marketing agreement and order regulating the handling of Valencia oranges grown in the State of Arizona or the State of California. The proposed marketing agreement and order have not received the approval of the Secretary of Agriculture.

The public hearing is for the purpose of receiving evidence with respect to the economic and marketing conditions which relate to the provisions of the proposed marketing agreement and order hereinafter set forth, to proposed revisions, in such provisions, and to any appropriate modifications thereof.

Sunkist Growers, Incorporated, a cooperative association of orange growers in California and Arizona, submitted, and requested a hearing on, the proposed marketing agreement and order, the provisions of which are as follows:

DEFINITIONS

§ 922.1 *Secretary.* "Secretary" means the Secretary of Agriculture of the United States or any officer or employee of the United States Department of Agriculture who is, or who may hereafter be authorized to exercise the powers and perform the duties of the Secretary of Agriculture of the United States.

§ 922.2 *Act.* "Act" means Public Act No. 10, 73d Congress (May 12, 1933), as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937 as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.).

§ 922.3 *Person.* "Person" means an individual, partnership, corporation, association, or any other business unit.

§ 922.4 *Production area.* "Production area" means the States of California and Arizona.

§ 922.5 *Oranges.* "Oranges" means those oranges belonging to the genus Citrus, species sinensis (Linnaeus) Osbeck, commonly known as Valencias, and which are grown in the production area.

§ 922.6 *Fiscal year.* "Fiscal year" means the twelve-month period ending December 31 of each year.

§ 922.7 *Committee.* "Committee" means the Valencia Orange Administrative Committee established pursuant to § 922.20.

§ 922.8 *Grower.* "Grower" and "producer" are synonymous and means any person who produces oranges for market.

§ 922.9 *Handler.* "Handler" means any person who handles oranges.

§ 922.10 *Handle.* "Handle" means to buy, sell, consign, transport, or ship oranges (except as a common or contract carrier of oranges owned by another person), or in any other way to place oranges in the current of commerce, between the State of California and any point outside thereof in the continental United States, Alaska, or Canada, or within the State of California, or between the State of Arizona and any point outside thereof in the continental United States, Alaska, or Canada, or within the State of Arizona. The term "handle" does not include (a) the sale of oranges on the tree; (b) the transportation of oranges to a packinghouse for the purpose of having such oranges prepared for market and such preparation for market; (c) the storage of oranges within the production area under such rules and regulations as the committee, with the approval of the Secretary, may prescribe; or (d) the sale of oranges at retail by a person in his capacity as such retailer.

§ 922.11 *Oranges available for current shipment.* "Oranges available for current shipment" means all oranges as measured by the total tree crop.

§ 922.12 *Tree crop.* "Tree crop" means the total quantity of oranges on the trees as determined by the committee.

§ 922.13 *Early maturity oranges.* "Early maturity oranges" means any oranges that have reached maturity, as measured by applicable State laws, in advance of general maturity in the same prorate district.

§ 922.14 *General maturity.* "General maturity" shall have been reached in any prorate district at such time as the committee determines that allotment shall be distributed to all handlers in such prorate district.

§ 922.15 *Box.* "Box" means a standard two-compartment orange box, as defined in section 828.83 of the Agricultural Code of California, of a capacity of approximately 77 pounds of oranges, or the equivalent thereof.

§ 922.16 *Central marketing organization.* "Central marketing organization" means any organization which markets oranges for more than one handler pursuant to a written contract between such organization and each such handler.

§ 922.17 *Carload.* "Carload" means a quantity of oranges equivalent to 462 packed boxes of oranges.

§ 922.18 *Export.* "Export" means shipments of oranges to points outside the continental United States, Canada, and Alaska.

ADMINISTRATIVE BODY

§ 922.20 *Establishment and membership.* There is hereby established a Valencia Orange Administrative Committee consisting of eleven members; for each of whom there shall be an alternate member who shall be nominated and selected in the same manner and who shall have the same qualifications as the member for whom each is an alternate. Six of the members and their respective alternates shall be growers who shall not be handlers, or employees of handlers, or employees of central marketing organizations. Four of the members and their respective alternates shall be handlers, or employees of handlers, or employees of central marketing organizations. One member of the committee and an alternate of such member shall be nominated as provided in paragraph (f) of § 922.22. The six members of the committee who shall be growers and who shall not be handlers, or employees of handlers, or employees of central marketing organizations are hereinafter referred to as "grower" members of the committee and the four members who shall be handlers, or employees of handlers, or employees of central marketing organizations are hereinafter referred to as "handler" members of the committee.

§ 922.21 *Term of office.* The term of office of each initial member and alternate member of the committee shall begin on May 1, 1954, and shall terminate on December 31, 1955. The term of office of each subsequent member and alternate member of the committee shall be for a period of two years, and such terms shall begin on January 1 of each even-numbered year: *Provided*, That such members and alternates shall serve in such capacities for the portion of the term of office for which they are selected and qualify and until their respective successors are selected and have qualified.

§ 922.22 *Nominations.* (a) The time and manner of nominating members and alternate members of the committee shall be prescribed by the Secretary.

(b) Any cooperative marketing organization, or the growers affiliated therewith, which handled more than 50 percent of the total volume of oranges during the fiscal year in which nominations for members and alternate members of the committee are submitted shall nominate not less than six growers for three grower members; not less than six growers for three alternate grower members; not less than four handlers, or employees of handlers, or employees of central marketing organizations, or any combination thereof, for two handler members; and not less than four handlers, or employees of handlers, or employees of central marketing organizations, or any combination thereof for two alternate handler members of the committee.

(c) All cooperative marketing organizations which market oranges and which are not qualified under paragraph (b) of this section, or the growers affiliated therewith, shall nominate not less than two growers for one grower member; not less than two growers for one alternate grower member; not less than two handlers, or employees of handlers, or employees of central marketing organizations, or any combination thereof, for one handler member; and not less than two handlers, or employees of handlers, or employees of central marketing organizations, or any combination thereof, for one alternate handler member of the committee.

(d) All growers who are not affiliated with a cooperative marketing organization which markets oranges shall nominate not less than four growers for two grower members; not less than four growers for two alternate grower members; not less than two handlers, or employees of handlers, or employees of central marketing organizations, or any combination thereof, for one handler member; and not less than two handlers, or employees of handlers, or employees of central marketing organizations, or any combination thereof, for one alternate handler member of the committee.

(e) When voting for nominees, each grower shall be entitled to cast one vote which shall be cast on behalf of himself, his agents, subsidiaries, affiliates, and representatives. The votes of cooperative marketing organizations voting pursuant to paragraph (c) of this section shall be weighted in accordance with the volume of oranges handled during the fiscal year in which such nominations are made.

(f) The members of the committee selected by the Secretary pursuant to § 922.23 shall meet on a date designated by the Secretary and, by a concurring vote of at least six members, shall nominate two persons for a member and two persons for an alternate member of the committee, which persons shall not be growers or handlers, or employees, agents, or representatives of a grower or handler (other than a charitable or educational institution which is a grower or handler), or of a central marketing organization.

§ 922.23 *Selection.* From the nominations made pursuant to § 922.22 (b) the Secretary shall select three grower members of the committee and an alternate to each of such grower members; also two handler members of the committee and an alternate to each of such handler members. From the nominations made pursuant to § 922.22 (c) the Secretary shall select one grower member of the committee and an alternate to such grower member; also one handler member of the committee and an alternate to such handler member. From the nominations made pursuant to § 922.22 (d) the Secretary shall select two grower members of the committee and an alternate to each of such grower members; also one handler member of the committee and an alternate to such handler member. From the nominations made pursuant to § 922.22 (f) the Secretary shall select one member of the committee and an alternate to such member.

§ 922.24 *Failure to nominate.* If nominations are not made within the time and in the manner specified by the Secretary pursuant to § 922.22 (a), the Secretary may, without regard to nominations, select the members and alternate members of the committee on the basis of the representation provided for in § 922.23.

§ 922.25 *Acceptance.* Any person selected by the Secretary as a member or as an alternate member of the committee shall qualify by filing a written acceptance with the Secretary within ten days after being notified of such selection.

§ 922.26 *Vacancies.* To fill any vacancy occasioned by the failure of any person selected as a member or as an alternate member of the committee to qualify or in the event of death, removal, resignation, or disqualification of any member or alternate member of the committee, a successor to the unexpired term of such member or alternate member of the committee shall be selected by the Secretary from nominations made in the manner specified in § 922.22. If the names of nominees to fill any such vacancy are not made available to the Secretary within fifteen days after such vacancy occurs the Secretary may fill such vacancy without regard to nominations, which selection shall be made on the basis of representation provided for in § 922.23.

§ 922.27 *Alternate members.* An alternate member of the committee, during the absence or at the request of the member for whom he is an alternate, shall act in the place and stead of such member: *Provided*, That a member may designate an alternate member other than his own alternate member to serve in the place and stead of such member, if the alternate member so designated was selected from the same group which was authorized to nominate the member. In the event of the death, removal, resignation, or disqualification of a member, his alternate shall act for him until a successor for such member is selected and has qualified.

§ 922.28 *Powers.* The committee shall have the following powers:

(a) To administer the provisions of this part in accordance with its terms;

(b) To make and adopt rules and regulations to effectuate the terms and provisions of this part;

(c) To receive, investigate, and report to the Secretary complaints of violations of the provisions of this part; and

(d) To recommend to the Secretary amendments to this part.

§ 922.29 *Duties.* The committee shall have the following duties:

(a) To select a chairman and such other officers as may be necessary, and to define the duties of such officers;

(b) To appoint such employees, agents, and representatives as it may deem necessary, and to determine the compensation and to define the duties of each;

(c) To submit to the Secretary at the beginning of each fiscal year a budget for such fiscal year, including a report in explanation of the items appearing therein and a recommendation as to the rate of assessment for such fiscal year;

(d) To keep minutes, books, and records which will reflect all of the acts and transactions of the committee and which shall be subject to examination by the Secretary;

(e) To prepare a monthly statement of the financial operations of the committee and to make copies of each such statement available to growers and handlers for examination at the office of the committee;

(f) To cause its books to be audited by a certified public accountant at least once each fiscal year, and at such other times as the Secretary may request;

(g) To act as intermediary between the Secretary and any grower or handler;

(h) To provide an adequate system for determining the total quantity of oranges available for current shipment, and to make such determinations, including determinations by grade, size, and maturity conditions, as it may deem necessary, or as may be prescribed by the Secretary, in connection with the administration of this part;

(i) To investigate the growing, handling, and marketing conditions with respect to oranges, and to assemble data in connection therewith;

(j) To submit to the Secretary such available information, including verified reports, as he may request;

(k) To notify producers and handlers of meetings of the committee to consider recommendations for regulation;

(l) To consult with such representatives of growers or groups of growers as may be deemed necessary and to pay the travel expenses incurred by such representatives in attending committee meetings at the request of the committee: *Provided*, That the committee shall not pay the travel expenses of more than three such representatives in connection with any one meeting of the committee; and

(m) To investigate compliance with the provisions of this part.

§ 922.30 *Procedure.* (a) A majority of the committee shall constitute a quorum and any action of the committee shall require at least six concurring votes.

(b) The committee may vote by telegraph, telephone, or other means of communication; and any votes so cast shall be confirmed promptly in writing: *Provided*, That if an assembled meeting is held, all votes shall be cast in person.

§ 922.31 *Expenses and compensation.* The members of the committee, and their respective alternates when acting as members, shall be reimbursed for expenses necessarily incurred by them in the performance of their duties under this part and shall receive compensation at a rate to be determined by the com-

mittee, which rate shall not exceed $10 per day or portion thereof spent in performing such duties.

§ 922.32 *Annual review and meeting.* The committee shall, prior to December 15 of each fiscal year, prepare and mail an annual report to the Secretary and to each handler and grower of record. This annual report shall contain at least: (a) A complete review, by prorate districts, of the regulatory operations during the fiscal year, as conducted under the marketing policy established pursuant to § 922.50 (a); (b) an appraisal of the effect of such regulatory operations upon the competitive status of the Valencia orange industry; (c) recommendations for changes in the program; and (d) notice of the time and place of an open meeting, to be held prior to January 31, to review the whole record of the operations of this part.

EXPENSES AND ASSESSMENTS

§ 922.40 *Expenses.* The committee is authorized to incur such expenses as the Secretary finds may be necessary to enable the committee to exercise its powers and perform its duties in accordance with the provisions of this part during each fiscal year.

§ 922.41 *Assessments.* (a) Each person who first handles oranges shall, with respect to the oranges so handled by him, pay to the committee, upon demand, such person's pro rata share of the expenses which the Secretary finds are necessary during each fiscal year. Each such person's share of such expenses shall be equal to the ratio between the total quantity of such oranges handled by him as the first handler thereof during the applicable fiscal year, and the total quantity of such oranges so handled by all persons during the same fiscal year. The payment of assessments for the maintenance and functioning of the committee may be required under this part throughout the period it is in effect irrespective of whether particular provisions thereof are suspended or become inoperative.

(b) The Secretary shall fix the rate of assessment to be paid by each such person. At any time during or after the fiscal year, the Secretary may increase the rate of assessment in order to secure sufficient funds to cover any later finding by the Secretary relative to the expense which may be incurred. Such increase shall be applied to all oranges handled during the applicable fiscal year. In order to provide funds for the administration of the provisions of this part, the committee may accept the payment of assessments in advance, and may borrow money in any amount not to exceed 10 percent of the estimated expenses set forth in its budget for the then current fiscal year.

(c) The committee may, with the approval of the Secretary, maintain a suit in its own name, or in the names of its members, to enforce the payment of assessments levied under this section.

§ 922.42 *Accounting.* (a) If, at the end of a fiscal year, the assessments collected are in excess of the expenses incurred, each person entitled to a proportionate refund of the excess assessments shall be credited with such refund against the operations of the following fiscal year. Any handler may demand payment of such a refund, and the refund shall be paid to him: *Provided*, That any sum paid by a person in excess of his pro rata share of the expenses during any fiscal year may be applied by the committee at the end of such fiscal year to any outstanding obligations due the committee from such person.

(b) All funds received by the committee pursuant to the provisions of this part shall be used solely for the purposes specified in this part, and shall be accounted for in the manner provided in this part. The Secretary may, at any time, require the committee and its members to account for all receipts and disbursements.

REGULATION

§ 922.50 *Marketing policy.* (a) Prior to the recommendation for regulation for each prorate district, the committee shall submit to the Secretary its marketing policy for the ensuing season. Such marketing policy shall contain the following information: (1) The available crop of oranges in the prorate district, including estimated quality and composition of sizes; (2) the estimated utilization of the crop, showing the quantity and percentages of the crop that will be marketed in domestic, export, and by-product channels, together with quantities otherwise to be disposed of; (3) a schedule of estimated weekly shipments to be recommended to the Secretary during the ensuing season; (4) available supplies of competitive oranges in all producing areas of the United States; (5) level and trend of consumer income; (6) estimated supplies of competitive citrus commodities; and (7) any other pertinent factors bearing on the marketing of oranges. In the event that it becomes advisable to substantially modify such marketing policy the committee shall submit to the Secretary a revised marketing policy setting forth the information as required in this paragraph.

(b) All meetings of the committee held for the purpose of formulating such marketing policies shall be open to growers and handlers. The committee shall give notice to growers by publication of notice of such meetings in such newspapers as they deem appropriate and shall advise all handlers by mail of such meetings.

(c) The committee shall transmit a copy of each marketing policy report or revision thereof to the Secretary and to each grower and handler who files a request therefor. Copies of all such reports shall be maintained in the office of the committee where they shall be available for examination by growers and handlers.

§ 922.51 *Recommendations for volume regulation.* (a) The committee may recommend to the Secretary the total quantity of oranges which it deems advisable to be handled during the next succeeding week in each prorate district. If, for any reason, the committee recommends the issuance of volume regulation but fails to recommend to the Secretary the total quantity of oranges which it deems advisable to be handled during the next succeeding week in each prorate district, reports representing the respective views of the committee members with respect to its failure to act shall be submitted promptly to the Secretary.

(b) In making its recommendations, the committee shall give due consideration to the following factors: (1) Market prices for oranges, including market prices by grades and sizes; (2) supply of oranges on track at, and enroute to, the principal markets; (3) supply, maturity, and condition of oranges in the area of production, including the grade and size composition thereof; (4) market prices and supplies of citrus fruits from California, Arizona, and competitive producing areas, and supplies of other competitive fruits; (5) trend and level in consumer income; and (6) other relevant factors.

(c) At any time during a week for which the Secretary, pursuant to § 922.52, has fixed the quantity of oranges which may be handled, the committee may, if such action is deemed advisable, recommend to the Secretary that such quantity be increased for such week. Any such recommendation, together with the committee's reasons for such recommendation, shall be submitted promptly to the Secretary.

§ 922.52 *Issuance of volume regulation.* Whenever the Secretary shall find, from the recommendations and information submitted by the committee, or from other available information, that to limit the quantity of oranges which may be handled in each prorate district during a specified week will tend to effectuate the declared policy of the act, he shall fix such quantity. The quantity so fixed may be increased by the Secretary at any time during such week.

§ 922.53 *Prorate bases.* (a) Each person who has oranges available for current shipment shall submit to the committee, at such time and in such manner as may be designated by the committee, and upon forms made available by it, a written application for a prorate base and for allotments as provided in this part.

(b) Such application shall be substantiated in such manner and shall be supported by such evidence as the committee may require, and shall include at least (1) the name and address of the producer or duly authorized agent, if any, for each grove or portion thereof, the fruit of which is included in the quantity of oranges available for current shipment by the applicant; (2) an accurate description of the location of each such grove or portion thereof, including the number of acres contained therein; and (3) an estimate of the total quantity of oranges available for current shipment by the applicant in terms of a unit of measure designated by the committee.

(c) Such application shall include only such oranges available for current shipment which the applicant controls (1) by a bona fide written contract giving the applicant authority to handle

such oranges, or (2) by having legal title or possession thereof, or (3) by having executed a bona fide written agreement to purchase such oranges. If an applicant controls oranges pursuant to subparagraph (1) or (3) of this paragraph, he shall submit a copy of each type of such contract to the committee, together with a statement that no other types of contracts are used, and shall maintain a file of all original contracts evidencing such control which shall be subject to examination by the committee.

(d) If the quantity of oranges available for current shipment by any person is increased or decreased by the acquisition or loss of the control required by paragraph (c) of this section, such person shall submit promptly a report thereon to the committee upon forms made available by it, which report shall be verified in such manner as the committee may require.

(e) If any person gains or loses control of oranges as required by paragraph (c) of this section, there shall be a corresponding increase or decrease in the quantity of oranges available for current shipment by such person. If it is determined by the committee that any person who has lost control of oranges as required by paragraph (c) of this section has handled a quantity of such oranges less than the quantity that could have been handled under the allotments issued thereon, the quantity of oranges available for current shipment by such person shall be adjusted by deducting therefrom, over such period as may be determined by the committee, a quantity of oranges equivalent to the quantity upon which allotments were issued but which were not utilized thereon.

(f) The committee shall determine the accuracy of the information submitted pursuant to this section. Whenever the committee finds that there is an error, omission, or inaccuracy in any such information, it shall correct the same and shall give the person who submitted such a report a reasonable opportunity to discuss with the committee the factors considered in making the correction. If it is determined that an error, omission, or inaccuracy has resulted in the establishment of a smaller or a larger quantity of oranges available for current shipment than that to which a person was entitled under this part, such quantity shall be increased or decreased, over such period as may be determined by the committee, by an amount necessary to correct the error, omission, or inaccuracy.

(g) Each week during the marketing season the committee shall compute the total quantity of oranges available for current shipment by each person who has applied for a prorate base and for allotments in each prorate district, and shall transmit a report thereon to the Secretary. Such report shall constitute the basis for a recommendation by the committee for a prorate base for each person. Such computations and reports shall be prepared and submitted prior to the time when the recommended prorate bases are to become applicable.

(h) Upon the basis of the recommendations and reports of the committee, or from other available information, the Secretary shall fix a prorate base for each person who is entitled thereto in each prorate district. Such prorate base shall represent the ratio between the total quantity of oranges available for current shipment in each such district by each person and the total quantity of oranges available for current shipments in each such district by all such persons. The Secretary shall notify the committee of the prorate base fixed for each person and the committee shall notify each such person of the prorate base fixed for him.

§ 922.54 *Allotments.* Whenever the Secretary has fixed the quantity of oranges which may be handled during any week in a prorate district, and has fixed prorate bases for persons entitled thereto, the committee shall calculate the quantity of oranges which may be handled by each such person during such week. The said quantity shall be the allotment of each such person and shall be in an amount equivalent to the product of the prorate base for each such person in each such prorate district and the total quantity of oranges grown in each such prorate district and fixed by the Secretary as the total quantity of oranges which may be handled during such week. The committee shall give reasonable notice to each person of the allotment computed for him pursuant to this part.

§ 922.55 *Overshipments.* During any week for which the Secretary has fixed the total quantity of oranges which may be handled, any person when not required to reduce the quantity of oranges which he may handle during such week, as provided in this section, or whose total allotment is not required for the repayment of an allotment loan, may handle in addition to his allotment an amount of such oranges equivalent to 10 percent of his allotment, or 462 packed boxes of oranges or the equivalent thereof, whichever is greater. The quantity of oranges so handled in excess of each such person's allotment (but not exceeding an amount equivalent to the excess shipments permitted under this section) shall be deducted from each such person's allotment for the next week. If such person's allotment for such week is in an amount less than the excess shipments permitted under this section, the remaining quantity shall be deducted from succeeding weekly allotments issued to each such person until such excess has been entirely offset: *Provided*, That no overshipment incurred during one season shall be deducted from allotments issued during the following season. The provisions of this section shall not apply to any person who, during any week, has not received an allotment under this subpart for such week.

§ 922.56 *Undershipments.* If any person handles during any week a quantity of oranges, covered by a regulation issued pursuant to § 922.52, in an amount less than his allotment of oranges for such week, he may handle, in addition to his allotment for the next week only, a quantity of such oranges equivalent to such undershipment.

§ 922.57 *Allotment loans.* (a) A person to whom allotments have been issued, whether under the provisions of early maturity, short life, or general maturity, may lend such allotments to other persons within the same prorate district to whom allotments have also been issued: *Provided*, That allotments issued under the short life provisions of this subpart may be loaned only to other persons to whom such allotments have also been issued. Such loans shall be confirmed to the committee by both parties thereto within 48 hours after any such agreement has been entered into, and such agreements shall include a date for the repayment of such allotments to the lender during the then current marketing season. If, on the date of repayment specified in the loan agreement, the borrower has insufficient allotment to repay such loan, he shall repay such loan as soon after the repayment date as he has allotments available to him for that purpose: *Provided*, That no loans made during one season shall be required to be repaid from allotments issued during the following season.

(b) The committee may act on behalf of persons desiring to arrange allotment loans. In each case, the committee shall confirm all such transactions immediately after the completion thereof by memorandum addressed to the parties concerned, which memorandum shall be deemed to satisfy the requirements of paragraph (a) of this section as to a confirmation of the loan agreement to the committee.

(c) An allotment shall be loaned, pursuant to paragraph (a) of this section for use only during the week for which such allotment was issued. Persons securing repayment of an allotment loan may use such allotment only during the week in which the repayment is made.

(d) No allotment which has been loaned may again be loaned by the borrower, or by the lender after the repayment thereof.

§ 922.58 *Assignment of allotment certificates.* In connection with all handling of oranges other than shipments by rail car, each handler who first handles oranges shall at the time of handling issue to the consignee thereof, or his agent, an assignment of allotment certificate covering each quantity of oranges so handled. Such assignment of the allotment certificate shall be on such forms and shall be issued in such manner as prescribed by the committee and shall contain such information as the committee may require.

§ 922.59 *Priority of allotments.* During any week in which a person receives an allotment, and has the right to handle a quantity of oranges in addition to the quantity represented by his allotment, by reason of (a) an undershipment of an allotment, pursuant to § 922.56; or (b) the repayment of a loaned allotment, pursuant to § 922.57; or (c) a borrowed allotment, pursuant to § 922.57; and such person handles a quantity of oranges which is less than the total quantity of such oranges which such person may handle during such week, the amount of such oranges han-

dled shall first apply to such person's current weekly allotment (or to that portion which is not used pursuant to § 922.55 or § 922.57). The remainder, if any, shall be applied in the following order: second, to any undershipment of allotments pursuant to § 922.56; third, to any allotment repaid to him, pursuant to § 922.57; fourth, to any allotment borrowed, pursuant to § 922.57.

§ 922.60 *Early maturity allotments.* Notwithstanding the provisions of § 922.54 the committee may, prior to the reaching of general maturity, issue special allotments for the handling of oranges of early maturity. Handlers controlling oranges of early maturity may apply to the committee for such allotments on forms prescribed by the committee and shall furnish to the committee such information as it may require. On the basis of all available information and after consideration of all of the factors enumerated in § 922.51 (b) the committee shall determine the extent to which early maturity allotment shall be granted. Total early maturity allotments approved by the committee for each prorate district shall be distributed to all handlers who qualify therefor in proportion to the quantity requested by each handler in his application: *Provided, however,* That early maturity allotments issued to any handler prior to the reaching of general maturity shall not permit the handling of a larger share of the oranges available for current shipment controlled by such handler than the share of oranges available for current shipment in the prorate district estimated to be allotted to all handlers in the utilization schedule established by the committee at the beginning of the season. Early maturity allotments may be loaned only to handlers to whom early maturity allotments have been granted. Upon the reaching of general maturity, allotments issued for early maturity oranges shall be offset or repaid by reducing the oranges available for current shipment of each handler who has received early maturity allotments by the quantity of oranges for which early maturity allotments were issued him, plus his proportionate share of the quantity of oranges that will be used for by-products or elimination in his prorate district. Such proportionate share shall be based upon the utilization schedule established by the committee at the beginning of the season. The committee shall, with the approval of the Secretary, adopt procedural rules and regulations to effectuate the provisions of this part. Allotments withheld, issued, and allocated, and averages computed hereunder shall be on a prorate district basis.

§ 922.61 *Short life allotments.* Notwithstanding the provisions of § 922.54 the committee shall withhold from the allotment of handlers on a uniform proportionate basis for all handlers, an amount sufficient to permit handlers controlling oranges of short life to handle during the normal marketing period of such short life oranges as large a proportion of oranges as the average which will be handled by all handlers. Handlers controlling oranges of short life may apply for such withheld allotment, and such application shall be made on forms supplied by the committee and shall be accompanied by information necessary to permit the committee to determine the validity of such applicant's claim to allotment. The committee shall determine, on the basis of all available information, the extent to which a handler needs allotment under the provisions of this section and pursuant to such determination shall allocate such allotment to such handler at a uniform weekly rate, insofar as practicable, during the normal marketing period of his short life oranges. Such determination and allotment issued pursuant thereto shall not permit a handler to receive more allotment proportionately than the average allotment to be issued to all handlers of oranges. After a handler of short life oranges has received allotment sufficient to make the total allotment issued to him equal proportionately to the average allotment to be issued to all handlers of oranges, allotment thereafter due such handler of short life oranges shall be allocated to handlers from whom allotment has been withheld. Short life allotments may be used only in the handling of short life oranges. The committee shall, with the approval of the Secretary, adopt procedural rules and regulations to effecuate the provisions of this part. Allotments withheld, issued, and allocated, and averages computed under this part shall be on a prorate district basis.

§ 922.62 *Information to central marketing organizations.* The committee shall give any central marketing organization, upon its request, the same notice with respect to prorate bases and allotments applicable to each handler for whom it markets oranges as is given to such handler.

§ 922.63 *Recommendations for size regulation.* (a) Whenever the committee finds that the supply and demand conditions for sizes of oranges make it advisable to regulate the handling of sizes of oranges during any period, it shall recommend to the Secretary the sizes of oranges grown in each prorate district which it deems advisable to be handled during said period. The committee shall promptly submit such findings and recommendations, together with supporting information to the Secretary.

(b) In making its recommendations the committee shall give due consideration to the factors referred to in § 922.51 (b).

§ 922.64 *Issuance of size regulation.* Whenever the Secretary shall find, from the findings, recommendations, and information submitted by the committee, or from other available information, that to limit the handling of oranges by sizes would tend to effectuate the declared policy of the act, he shall fix the sizes of oranges grown in each such prorate district which may be handled during the specified period. The committee shall be informed immediately of any such regulation issued by the Secretary, and the committee shall promptly give adequate notice thereof to all handlers.

§ 922.65 *Exemptions from size regulation.* In the event oranges are regulated pursuant to § 922.64, the committee shall issue one or more exemption certificates to any producer who furnishes evidence satisfactory to the committee that he will be prevented by reason of such regulation from having as large a proportion of oranges handled as the average proportion of oranges which may be handled by all other producers in the same prorate district. Such exemption certificate shall permit the respective producer to whom the certificate is issued to handle or have handled a percentage of his oranges equal to the percentage determined as aforesaid. Shipments of oranges under exemption certificates issued pursuant to this section shall be subject to and limited by such regulations as may be effective under § 922.52 at the time of the respective shipment. The committee shall adopt, with the approval of the Secretary, procedural rules by which such exemption certificates will be issued to producers. Such exemption certificates may be transferred to handlers when accompanied by oranges covered by such certificates.

§ 922.66 *Prorate districts.* For purposes of administration of this part and in recognition of the fact that there are general differences in maturity and keeping quality of oranges between certain geographical sections of the production area, the production area shall be divided in three prorate districts as follows:

(a) District 1 shall include that portion of the State of California north of the 35th Parallel.

(b) District 2 shall include that portion of the State of California which is south of the 35th Parallel, but shall exclude Imperial County and that portion of Riverside County, California, situated south and east of White Water, California.

(c) District 3 shall include the State of Arizona, Imperial County, California, and that portion of Riverside County, California, situated south and east of White Water, California.

§ 922.67 *Oranges not subject to regulation.* Except as otherwise provided in this section nothing contained in this subpart shall be construed to authorize any limitation of the right of any person to handle oranges (a) for consumption by charitable institutions or for distribution by relief agencies; (b) for commercial processing into products, including juice; (c) for export; (d) for shipment by parcel post or by express; or (e) in such minimum quantities or type of shipments as the committee may, with the approval of the Secretary, prescribe. No assessment shall be levied pursuant to § 922.41 on oranges disposed of for the purposes specified in this section. The committee shall prescribe, with the approval of the Secretary, such rules, regulations, and safeguards as it may deem necessary to prevent oranges shipped under the provisions of this section from entering into commercial channels of trade contrary to or in violation of this subpart.

REPORTS

§ 922.70 *Weekly report.* On or before such day of each week as may be designated by the committee, each handler shall report to the committee, in such manner as may be designated and on forms made available by it, the following information with respect to the total of all oranges disposed of by each such handler during the immediately preceding week: (a) The total quantity handled; (b) the total quantity disposed of for manufacture into by-products, showing the identity of each by-product processor involved and the quantity of each; (c) the total quantity disposed of for export, showing the destination and quantity of each such disposition; (d) the total quantity shipped for disposition to persons on relief, including quantity donated for charitable purposes, and shipments by parcel post or express, showing the destination and quantity of each such shipment; and (e) the total quantity disposed of otherwise, showing manner and quantity of each such disposition.

§ 922.71 *Manifest report.* Each handler shall furnish to the committee information regarding the size of oranges in each standard packed box or its equivalent handled by such handler whether such shipments were destined to points in the United States and Alaska or to Canada and shall mail or deliver such information to said committee or its duly authorized representative within 24 hours after shipment is made in such manner as the committee shall prescribe and upon forms prepared by it.

§ 922.72 *Other reports.* Upon request of the committee, made with the approval of the Secretary, every person subject to regulation under this part shall furnish to the committee, in such manner and at such times as it may prescribe, such other information as will enable the committee to perform its duties under this part.

MISCELLANEOUS PROVISIONS

§ 922.80 *Compliance.* Except as provided in this part, no person shall handle oranges during any week in which a regulation issued by the Secretary pursuant to § 922.52 is in effect, unless such oranges are, or have been, handled pursuant to an allotment therefor, or unless such person is otherwise permitted to handle such oranges under the provisions of this part; and no person shall handle oranges except in conformity with the provisions of this part and the regulations issued under this part.

§ 922.81 *Right of the Secretary.* The members of the committee (including successors and alternates), and any agents, employees, or representatives thereof, shall be subject to removal or suspension by the Secretary at any time. Each and every regulation, decision, determination, or other act of the committee shall be subject to the continuing right of the Secretary to disapprove of the same at any time. Upon such disapproval, the disapproved action of the committee shall be deemed null and void, except as to acts done in reliance thereon or in compliance therewith prior to such disapproval by the Secretary. If the committee, for any reason, fails to perform its duties or exercise its powers under this part, the Secretary may designate another agency to perform such duties and exercise such powers.

§ 922.82 *Effective time.* The provisions of this part shall become effective at such time as the Secretary may declare above his signature to this part, and shall continue in force until terminated in one of the ways specified in § 922.83.

§ 922.83 *Termination.* (a) The Secretary may at any time terminate the provisions of this part by giving at least one day's notice by means of a press release or in any other manner which he may determine.

(b) The Secretary shall terminate or suspend the operation of any and all of the provisions of this part whenever he finds that such provisions do not tend to effectuate the declared policy of the act.

(c) (1) The Secretary shall terminate the provisions of this part at the end of any fiscal year, whenever he finds that continuance is not favored by producers; but such termination shall be effected only if announced on or before December 15 of the then current fiscal year.

(2) To determine whether continuance is favored by producers, the required percentages set forth in the act with respect to producer approval of the issuance of a marketing agreement and order regulating the handling of citrus fruits produced in any area producing what is known as California citrus fruits (approval by three-fourths of the producers who, during a representative period, determined by the Secretary, have been engaged, within the production area, in the production of Valencia oranges for market; or by producers who, during such representative period, have produced for market at least two-thirds of the volume of Valencia oranges produced within the production area for market) shall be used. In the event that a referendum is utilized to aid in making this determination, such required percentages for continuance shall be held to be complied with if, of the total number of producers, or the total volume of Valencia oranges produced for market, as the case may be, represented in such referendum, the percentage favoring continuance is equal to or in excess of the percentage required.

(3) The Secretary shall, during the 1955–56 fiscal year and prior to November 15, 1956, conduct a referendum to ascertain whether continuance of this part is favored by the producers. The Secretary shall conduct such a referendum prior to November 15 of each even-numbered year thereafter.

(d) The provisions of this part shall, in any event, terminate whenever the provisions of the act authorizing them cease to be in effect.

§ 922.84 *Proceedings after termination.* (a) Upon the termination of the provisions of this part, the committee shall, for the purpose of liquidating the affairs of the committee, continue as trustees of all the funds and property then in its possesion or under its control, including claims for any funds unpaid or property not delivered at the time of such termination.

(b) The said trustees shall (1) continue in such capacity until discharged by the Secretary; (2) from time to time account for all receipts and disbursements and deliver all property on hand, together with all books and records of the committee and of the trustees, to such person as the Secretary may direct; and (3) upon the request of the Secretary execute such assignments or other instruments necessary or appropriate to vest in such person full title and right to all of the funds, property, and claims vested in the committee or the trustees pursuant thereto.

(c) Any person to whom funds, property, or claims have been transferred or delivered, pursuant to this section, shall be subject to the same obligation imposed upon the committee and upon the trustees.

§ 922.85 *Effect of termination or amendment.* Unless otherwise expressly provided by the Secretary, the termination of this part or of any regulation issued pursuant to this part, or the issuance of any amendment to either thereof, shall not (a) affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provision of this part or any regulation issued under this part, or (b) release or extinguish any violation of this part or of any regulation issued under this part, or (c) affect or impair any rights or remedies of the Secretary or of any other person with respect to any such violation.

§ 922.86 *Duration of immunities.* The benefits, privileges, and immunities conferred upon any person by virtue of this part shall cease upon its termination, except with respect to acts done under and during the existence of this part.

§ 922.87 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States, or name any bureau or division in the United States Department of Agriculture, to act as his agent or representative in connection with any of the provisions of this part.

§ 922.88 *Derogation.* Nothing contained in this part is, or shall be construed to be, in derogation or in modification of the rights of the Secretary or of the United States (a) to exercise any powers granted by the act or otherwise, or (b) in accordance with such powers, to act in the premises whenever such action is deemed advisable.

§ 922.89 *Personal liability.* No member or alternate member of the committee and no employee or agent of the committee shall be held personally responsible, either individually or jointly with others, in any way whatsoever, to any person for errors in judgment, mistakes, or other acts, either of commission or omission, as such member, alternate, employee, or agent, except for acts of dishonesty, willful misconduct, or gross negligence.

§ 922.90 *Separability.* If any provision of this part is declared invalid or the applicability thereof to any person, circumstance, or thing is held invalid, the validity of the remainder of this part or the applicability thereof to any other person, circumstance, or thing shall not be affected thereby.

Mutual Orange Distributors, a cooperative association of orange growers in California and Arizona, has proposed that a provision be added authorizing regulation by internal quality.

The Fruit and Vegetable Branch, Production and Marketing Administration, has proposed the following addition to the proposal submitted by Sunkist Growers, Incorporated:

1. Add to § 922.29 the following new paragraph:

(n) With the approval of the Secretary, to readjust the representation of producer members or handler members of the Valencia Orange Administrative Committee nominated pursuant to § 922.22 (c) and (d), respectively. Any such changes shall be based, insofar as practicable, upon the proportionate amounts of Valencia oranges handled by the respective types of marketing organizations.

2. Add the following to the marketing agreement:

§ 922.91 *Counterparts.* This agreement may be executed in multiple counterparts, and, when one counterpart is signed by the Secretary, all such counterparts shall constitute, when taken together, one and the same instrument as if all signatures were contained in one original.

§ 922.92 *Additional parties.* After the effective date hereof, any handler may become a party to this agreement if a counterpart thereof is executed by him and delivered to the Secretary. This agreement shall take effect as to such new contracting party at the time such counterpart is delivered to the Secretary, and the benefits, privileges, and immunities conferred by this agreement shall then be effective as to such new contracting party.

§ 922.93 *Order with marketing agreement.* Each contracting handler hereby requests the Secretary to issue, pursuant to the act, an order regulating the handling of oranges by all handlers in the same manner as is provided herein.

Copies of this notice of hearing may be obtained from the offices of the Hearing Clerk, United States Department of Agriculture, Room 1353, South Building, Washington, D. C., or the Field Representative, Fruit and Vegetable Branch, Production and Marketing Administration, Room 1605, 1031 South Broadway, Los Angeles, California.

(48 Stat. 31, as amended; 7 U. S. C. 601 et seq.)

Done at Washington, D. C., this 17th day of November 1953.

[SEAL] ROY W. LENNARTSON,
*Assistant Administrator.*

## DEPARTMENT OF COMMERCE

### Civil Aeronautics Administration

### [ 14 CFR Parts 20, 21, 22, 25, 26, 27, 33, 34, 35, 51 ]

IDENTIFICATION CARDS

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that, pursuant to authority delegated in §§ 20.58, 21.45, 22.32, 25.86, 26.37, 27.23, 33.46, 34.20, 35.21, and 51.6 of this title, the Administrator of Civil Aeronautics contemplates adopting the following rules to supplement those sections. The rules specify airman identification cards and other identification cards which are acceptable to the Administrator. They also prescribe the form of, and the manner of applying for, airman identification cards. All interested persons who desire to submit written data, views, or arguments for consideration by the Administrator in connection with the proposed rules shall send them to the Civil Aeronautics Administration, Office of Aviation Safety, Washington 25, D. C., within 30 days after publication of this notice in the FEDERAL REGISTER. The rules which the Administrator proposes to adopt would read:

§ 20.58–1 *Airman identification card (CAA rules which apply to § 20.58).* An Airman Identification Card, Form ACA–2135, is acceptable to the Administrator and may be used to meet the requirements of § 20.58.

§ 20.58–2 *Other identification cards acceptable to the Administrator (CAA rules which apply to § 20.58).* Identification cards which are acceptable in lieu of Form ACA–2135 to meet the requirements of § 20.58 are as follows:

(a) Aircrewman Identification Card, Form ACA–2116.1, issued by CAA.

(b) Crew Member Certificate, Form ACA–2116.1, issued by CAA.

NOTE: This certificate is a current revision of the Aircrewman Identification Card.

(c) Current identification cards issued to members on active duty or on reserve status by:

(1) U. S. Army.
(2) U. S. Navy.
(3) U. S. Air Force.
(4) U. S. Marine Corps.
(5) U. S. Coast Guard.
(6) U. S. Merchant Marine.
(7) National Guard.
(8) Civil Air Patrol.

NOTE: While these cards are acceptable on the same terms and conditions as the airman identification card for meeting the airman identification requirements, they are not acceptable documentary evidence of place and date of birth, or citizenship, for the issuance of the airman identification card.

§ 20.58–3 *Application (CAA rules which apply to § 20.58).* An applicant for an airman identification card shall comply with the following procedure:

(a) *Application.* The applicant shall apply in person to an Aviation Safety Agent, or an Aviation Safety District Office.

(b) *Form.* Application for Airman Identification Card, Form ACA–2134, shall be completed in single copy, typed or printed in ink, and contain precise information on each item.

(c) *Proof of identity.* The applicant shall furnish proof of his identity. The agent may exercise his discretion in the method by which he identifies the applicant. Identification of the applicant may be established by one or more of the following means:

(1) Airman Identification Card, Form ACA–935, issued by the CAA to the applicant during World War II.

(2) The agent's knowledge of the applicant's identity.

(3) The applicant's identification by a person known to the agent.

(4) Combinations of identification cards and licenses held by the applicant.

(5) Comparison of the applicant's signature with that on other cards and licenses held by him.

(d) *Proof of place and date of birth.* (1) The applicant shall furnish satisfactory documentary evidence of his place and date of birth which shall consist of one or more of the following:

(i) Airman Identification Card, Form ACA–935, issued by CAA during World War II. (If he held this card and lost it, he may write to CAA, Airman Records Branch, Washington 25, D. C., and obtain confirmation that it was issued to him and the information it contained.)

(ii) Birth certificate. (When the applicant's birth certificate does not contain the exact name now used by him, he shall explain the difference on the application form.)

(iii) Baptismal record, if it contains the full name and place and date of birth.

(iv) Naturalization papers, if place and date of birth are shown.

(v) Passport, expired or current.

(vi) Aircrewman Identification Card, or Crew Member Certificate, Form ACA–2116.1.

(vii) Affidavit from attending physician, either parent, brother, sister, or other relative.

(viii) Statement from any state or Federal Government agency which has the applicant's birth certification on file.

(ix) Statement from any military, state, municipal, local, or Federal Government agency which has established, by investigation or otherwise, the applicant's place and date of birth.

(2) Applicants who cannot furnish any of the documents listed in subparagraph (1) (i) through (ix) of this paragraph may present affidavits from acquaintances who have personal knowledge of the applicant's place and date of birth.

NOTE: Military identification cards, service records, discharge papers, drivers' licenses, and the like are not acceptable documentary evidence of place and date of birth. While these items, including the identification cards which are acceptable in lieu of the airman identification card, may be used to aid in the identification of the applicant, they are not acceptable documentary evidence because they do not contain information on the nature of proof which may have been required for their issuance. CAA desires to have documentary evidence on file for all airman identification cards issued.

(e) *Evidence of citizenship.* The applicant shall present documentary evidence of his citizenship. There are no citizenship requirements for the issuance of an airman identification card other than furnishing evidence of the citizenship claimed. This evidence may consist of one or more of the following:

(1) Any item listed in paragraph (d) of this section if citizenship is claimed in the country of birth.

(2) Naturalization papers.

(3) Currently valid passport.

(4) Statement from an appropriate official of a foreign government that the applicant is a citizen of that country.

(5) Civil Aeronautics Board waiver of citizenship requirements for the issuance of an airman certificate to stateless or other persons.

(6) Certified statements from persons, courts, or agencies in authority on cases of derivative citizenship, uncompleted naturalization, or other complex citizenship status. Such statements must contain information on the current status of the applicant's citizenship.

(f) *Photographs.* The applicant shall furnish photographs which conform to the following specifications:

(1) Two photographs taken from the same negative.

(2) One-inch square, full face, head only.

(3) Taken within the past twelve months.

(4) No specified background.

(5) Readily recognizable as photographs of applicant.

(g) *Fingerprints.* The applicant shall be fingerprinted only by an Aviation Safety Agent or other CAA employee authorized by the agent.

(h) *Reissuance of lost card.* An applicant who has lost his Airman Identification Card, Form ACA–2135, may obtain another by:

(1) Writing to the CAA Airman Records Branch, W–253, Washington 25, D. C., and explaining the circumstances of the loss, and requesting a letter verifying that such card had been issued, and

(2) Presenting the letter to an Aviation Safety Agent who will accept it as meeting all of the documentary evidence requirements, and

(3) Furnishing two photographs as required for original issuance.

§ 21.45–1 *Airman identification card (CAA rules which apply to § 21.45).* See § 20.58–1 of this subchapter.

§ 21.45–2 *Other identification cards acceptable to the Administrator (CAA rules which apply to § 21.45).* See § 20.58–2 of this subchapter.

§ 21.45–3 *Application (CAA rules which apply to § 21.45).* See § 20.58–3 of this subchapter.

§ 22.32–1 *Airman identification card (CAA rules which apply to § 22.32 (g)).* See § 20.58–1 of this subchapter.

§ 22.32–2 *Other identification cards acceptable to the Administrator (CAA rules which apply to § 22.32 (g)).* See § 20.58–2 of this subchapter.

§ 22.32–3 *Application (CAA rules which apply to § 22.32 (g)).* See § 20.58–3 of this subchapter.

§ 25.86–1 *Airman identification card (CAA rules which apply to § 25.86).* See § 20.58–1 of this subchapter.

§ 25.86–2 *Other identification cards acceptable to the Administrator (CAA rules which apply to § 25.86).* See § 20.58–2 of this subchapter.

§ 25.86–3 *Application (CAA rules which apply to § 25.86).* See § 20.58–3 of this subchapter.

§ 26.37–1 *Airman identification card (CAA rules which apply to § 26.37).* See § 20.58–1 of this subchapter.

§ 26.37–2 *Other identification cards acceptable to the Administrator (CAA rules which apply to § 26.37).* See § 20.58–2 of this subchapter.

§ 26.37–3 *Application (CAA rules which apply to § 26.37).* See § 20.58–3 of this subchapter.

§ 27.23–1 *Airman identification card (CAA rules which apply to § 21.45).* See § 20.58–1 of this subchapter.

§ 27.23–2 *Other identification cards acceptable to the Administrator (CAA rules which apply to § 21.45).* See § 20.58–2 of this subchapter.

§ 27.23–3 *Application (CAA rules which apply to § 21.45).* See § 20.58–3 of this subchapter.

§ 33.46–1 *Airman identification card (CAA rules which apply to § 33.46).* See § 20.58–1 of this subchapter.

§ 33.46–2 *Other identification cards acceptable to the Administrator (CAA rules which apply to § 33.46).* See § 20.58–2 of this subchapter.

§ 33.46–3 *Application (CAA rules which apply to § 33.46).* See § 20.58–3 of this subchapter.

§ 34.20–1 *Airman identification card (CAA rules which apply to § 34.20).* See § 20.58–1 of this subchapter.

§ 34.20–2 *Other identification cards acceptable to the Administrator (CAA rules which apply to § 34.20).* See § 20.58–2 of this subchapter.

§ 34.20–3 *Application (CAA rules which apply to § 34.20).* See § 20.58–3 of this subchapter.

§ 35.21–1 *Airman identification card (CAA rules which apply to § 35.21).* See § 20.58–1 of this subchapter.

§ 35.21–2 *Other identification cards acceptable to the Administrator (CAA rules which apply to § 35.21).* See § 20.58–2 of this subchapter.

§ 35.21–3 *Application (CAA rules which apply to § 35.21).* See § 20.58–3 of this subchapter.

§ 51.6–1 *Airman identification card (CAA rules which apply to § 51.6).* See § 20.58–1 of this subchapter.

§ 51.6–2 *Other identification cards acceptable to the Administrator (CAA rules which apply to § 51.6).* See § 20.58–2 of this subchapter.

§ 51.6–3 *Application (CAA rules which apply to § 51.6).* See § 20.58–3 of this subchapter.

## FEDERAL COMMUNICATIONS COMMISSION

### [ 47 CFR Parts 1, 13 ]

[Docket No. 10751]

DISCONTINUANCE OF ISSUANCE OF AIRCRAFT RADIOTELEPHONE OPERATOR AUTHORIZATIONS

NOTICE OF PROPOSED RULE MAKING

In the matter of discontinuance of the issuance of Aircraft Radiotelephone Operator Authorizations and the amendments of Parts 0, 1, and 13 of the Commission's rules; Docket No. 10751.

Notice is hereby given of proposed rule making in the above-entitled matter.

The Aircraft Radiotelephone Operator Authorization was established in 1946 and has been available, without examination, through certain flight examiners who are authorized by the Commission to issue it. The aircraft authorization was adopted in response to a need at that time for a quicker method of obtaining an operator authorization than that applicable to the restricted radiotelephone operator permit, which included the same operating authority, but required a written examination. Subsequently, the examination for the restricted permit was abolished and the permit can now be obtained by mail from the Commission's field offices. Also, the Commission, effective November 15, 1953, has ordered that Restricted Radiotelephone Operator Permits be issued for the lifetime of the permittee, subject to suspension, and has provided a simple application form and more expeditious issuing procedure.

As a result of the foregoing changes, the Restricted Radiotelephone Operator Permit has become substantially equivalent to the Aircraft Radiotelephone Operator Authorization not only from the standpoint of the operating authority, but also the convenience to applicants in obtaining it. To continue both constitutes, therefore, an unnecessary duplication. Accordingly, the purpose of this notice is to propose the discontinuance of the Aircraft Radiotelephone Operator Authorization.

The proposed amendments, which are set forth below, are issued pursuant to the authority contained in sections 4 (i), 303 (l) and (r) of the Communications Act of 1934, as amended.

Any interested person may file with the Commission, on or before December 18, 1953, a written statement or brief in support of, or in opposition to, the proposed amendments. Comments or briefs

in reply to the original comments or briefs may be filed within ten (10) days from the last day for filing the original comments or briefs. The Commission will consider all comments, briefs, and statements before taking final action.

In accordance with § 1.764 of the Commission's rules relating to practice and procedure, an original and 14 copies of all statements, briefs, or comments should be furnished to the Commission.

Adopted: November 12, 1953.

Released: November 13, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

1. Section 1.329 (a) is amended, effective February 1, 1954, to read as follows:

§ 1.329 *Application for radio operator license.* (a) Application for a new, renewed, replacement or duplicate commercial radio operator license or for an endorsement thereon, or for a verification card, shall be filed on FCC Form No. 756, entitled "Application for Commercial Radio Operator License or Permit": *Provided*, That application for a new restricted radiotelephone operator permit may be filed on FCC Form No. 753–1, entitled "Application for Restricted Radiotelephone Operator Permit by Declaration".

2. Section 13.2 (c) (1) (ii) is amended by adding the following footnote:

[1] By Commission order dated ---------- and effective February 1, 1954 issuance of the Aircraft Radiotelephone Operator Authorization was discontinued. Outstanding licenses of this class remain valid until expiration according to the respective terms thereof.

3. Section 0.213 (d) is deleted effective February 1, 1954.

[F. R. Doc. 53-9788; Filed, Nov. 19, 1953; 8:54 a. m.]

## [ 47 CFR Part 16 ]

[Docket No. 10750]

TAXICAB RADIO SERVICE; SPECIAL LIMITATIONS

NOTICE OF PROPOSED RULE MAKING

In the matter of amendment of Part 16, Land Transportation Radio Services, to make changes in the Taxicab Radio Service; Docket No. 10750.

1. Notice is hereby given of proposed rule making in the above-entitled matter.

2. In response to requests from representatives of the taxicab industry the Commission proposes to amend its rules governing the Taxicab Radio Service to permit the use of frequencies normally assigned only for Base Station use in vehicles operated by taxicab supervisory personnel having a requirement for direct communication with taxicabs; and to revise the marking requirements for radio-equipped vehicles operated by taxicab supervisory personnel.

3. The proposed amendments are set forth below. They are issued under authority of sections 4 (i) and 303 of the Communications Act of 1934, as amended.

4. Any interested party who is of the opinion that the proposed amendments should not be adopted or should not be adopted in the form set forth herein may file with the Commission on or before December 21, 1953, a written statement or brief setting forth his comments. Comments in support of the proposed amendment also may be filed on or before the same date. Comments or briefs in reply to the original comments may be filed within 10 days from the last day for filing said original comments or briefs. The Commission will consider all such comments that are submitted before taking action in this matter, and if any comments appear to warrant the holding of a hearing or oral argument, notice of the time and place of such hearing or oral argument will be given.

5. In accordance with the provisions of § 1.784 of the Commission's rules and regulations, an original and 14 copies of all statements, briefs, or comments shall be furnished the Commission.

Adopted: November 12, 1953.

Released: November 13, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

Delete the present title and text of § 16.403 *Limitation on installation of mobile units*, and substitute the following:

§ 16.403 *Special limitations.* (a) All mobile units authorized in the Taxicab Radio Service shall be permanently installed in motor vehicles, and such installation shall be made only in vehicles used (1) for the carriage of passengers for hire, (2) by supervisory personnel in the discharge of their official duties, or (3) for the towing or repair of disabled motor vehicles of the licensee.

(b) Use of Mobile Station facilities by supervisory personnel shall be limited as follows:

(1) Communications addressed to other mobile units shall relate directly to safety of life or property, routing or rerouting of taxicabs to avoid hazards or abnormal traffic conditions, or enforcement of public laws and company instructions; and

(2) Communications addressed to the licensee's Base Station shall relate directly to safety of life or property or supervisory control of motor vehicles of the licensee.

(c) Each radio-equipped vehicle which is used by supervisory personnel in the discharge of their official duties shall be conspicuously and permanently marked with the name under which the licensee conducts his taxicab business.

(d) Mobile units installed in vehicles used by supervisory personnel in the discharge of their official duties may be authorized, upon application, to operate on Base Station frequencies.

[F. R. Doc. 53-9789; Filed, Nov. 19, 1953; 8:55 a. m.]

## SECURITIES AND EXCHANGE COMMISSION

## [ 17 CFR Part 249 ]

FORMS FOR ANNUAL AND OTHER REPORTS OF ISSUERS HAVING SECURITIES REGISTERED ON NATIONAL SECURITIES EXCHANGES

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the Securities and Exchange Commission has under consideration a proposed revision of Form 8–K[1] (17 CFR 249.308). This form is used for current reports pursuant to sections 13 and 15 (d) of the Securities Exchange Act of 1934.

The revision of this form is a part of the Commission's program for an overall review of its rules, regulations and forms under the various statutes administered by it. This program has for its purpose the elemination of duplication and the simplification of the Commission's requirements wherever practicable without prejudice to the public interest or the protection of investors.

The proposed revision of Form 8–K would limit the requirements of the form to matters of such material importance to security holders as require a report on a current basis.

All interested persons are invited to submit data, views and comments on the above-mentioned proposal in writing to the Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C., on or before December 14, 1953.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

NOVEMBER 12, 1953.

[F. R. Doc. 53-9766; Filed, Nov. 19, 1953; 8:48 a. m.]

## [ 17 CFR Part 249 ]

FORMS FOR ANNUAL AND OTHER REPORTS OF ISSUERS HAVING SECURITIES REGISTERED ON NATIONAL SECURITIES EXCHANGES

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the Securities and Exchange Commission has under consideration a proposed revision of Form 10–K[1] (17 CFR 249.310[1]. This form is the one most generally used for annual reports pursuant to sections 13 and 15 (d) of the Securities Exchange Act of 1934.

The Commission is engaged in a comprehensive review of the rules, regulations, forms and procedures adopted under the various statutes administered by it. It is attempting to eliminate duplication and to simplify its requirements wherever practicable without prejudice to the public interest or the protection of investors.

A principal purpose of the proposed revision of Form 10–K is to conform its requirements, so far as is practicable,

[1] Filed as part of the original document.

with the corresponding requirements of Schedule 14A of the Commission's proxy rules and to provide for the substitution of proxy statements filed under those rules for most of the information required by the items of Form 10–K. In addition, the proposed revision would permit financial statements contained in such proxy statements, or in accompanying annual reports to security holders, to be incorporated by reference in satisfaction or partial satisfaction of the requirements of Form 10–K as to financial statements where such statements substantially meet the requirements of that form.

The proposed new form also provides that registrants which file reports with the Federal Power Commission may substitute their reports to that Commission for the informational requirements of, and, subject to certain conditions, for the financial statements required by, Form 10–K.

All interested persons are invited to submit data, views and comments on the above-mentioned proposal in writing to the Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C., on or before December 14, 1953.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

NOVEMBER 12, 1953.

# NOTICES

## DEPARTMENT OF THE TREASURY

### Fiscal Service, Bureau of the Public Debt

[1953 Dept. Circ. 935]

2½ PERCENT TREASURY BONDS OF 1958

OFFERING OF BONDS; ADDITIONAL ISSUE

NOVEMBER 18, 1953.

I. *Offering of bonds.* 1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions, at par and accrued interest, from the people of the United States for bonds of the United States, designated 2½ percent Treasury Bonds of 1958, in exchange for 2⅛ percent Treasury Notes of Series A–1953, maturing December 1, 1953. The amount of the offering under this circular will be limited to the amount of maturing notes tendered in exchange and accepted.

2. In addition to the offering under this circular, holders of the maturing notes are offered the privilege of exchanging all or any part of such notes for 1⅞ percent Treasury Notes of Series B–1954, which offering is set forth in Department Circular No. 936, issued simultaneously with this circular.

II. *Description of bonds.* 1. The bonds now offered will be an addition to and will form a part of the series of 2½ percent Treasury Bonds of 1958 issued pursuant to Department Circular No. 920, dated February 2, 1953, will be freely interchangeable therewith, and are identical in all respects therewith except that interest on the bonds to be issued under this circular will accrue from June 15, 1953. Subject to the provision for the accrual of interest from June 15, 1953, on the bonds now offered, the bonds are described in the following quotation from Department Circular No. 920:

1. The bonds will be dated February 15, 1953, and will bear interest from that date at the rate of 2½ percent per annum, payable on a semiannual basis on June 15 and December 15 in each year until the principal amount becomes payable. They will mature December 15, 1958, and will not be subject to call for redemption prior to maturity.

2. The income derived from the bonds shall be subject to all taxes now or hereafter imposed under the Internal Revenue Code, or laws amendatory or supplementary thereto. The bonds shall be subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but shall be exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The bonds will be acceptable to secure deposits of public moneys.

4. Bearer bonds with interest coupons attached, and bonds registered as to principal and interest, will be issued in denominations of $500, $1,000, $5,000, $10,000, $100,000, and $1,000,000. Provision will be made for the interchange of bonds of different denominations and of coupon and registered bonds, and for the transfer of registered bonds, under rules and regulations prescribed by the Secretary of the Treasury.

5. The bonds will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States bonds.

III. *Subscription and allotment.* 1. Subscriptions will be received at the Federal Reserve Banks and Branches and at the Office of the Treasurer of the United States, Washington. Banking institutions generally may submit subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies.

2. The Secretary of the Treasury reserves the right to reject or reduce any subscription, to close the books as to any or all subscriptions at any time without notice, and to allot less than the amount of bonds applied for; and any action he may take in these respects shall be final. Subject to these reservations, all subscriptions will be allotted in full. Allotment notices will be sent out promptly upon allotment.

IV. *Payment.* 1. Payment at par and accrued interest from June 15, 1953, to December 1, 1953 ($11.54372 per $1,000) for bonds allotted hereunder must be made on or before December 1, 1953, or on later allotment. Payment of the principal amount may be made only in Treasury Notes of Series A–1953, maturing December 1, 1953, which will be accepted at par and should accompany the subscription. Payment of accrued interest on the bonds should be made when the subscription is tendered. Final interest due on December 1 on notes surrendered will be paid by payment of December 1, 1953, coupons, which should be detached by holders before presentation of the notes.

V. *General provisions.* 1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective Districts, to issue allotment notices, to receive payment for bonds allotted, to make delivery of bonds on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive bonds.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

[SEAL] G. M. HUMPHREY,
*Secretary of the Treasury.*

[F. R. Doc. 53-9778; Filed, Nov. 19, 1953; 8:51 a. m.]

[1953 Dept. Circ. 936]

1⅞ PERCENT TREASURY NOTES OF SERIES B–1954

OFFERING OF NOTES

NOVEMBER 18, 1953.

I. *Offering of notes.* 1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions, at par, from the people of the United States for notes of the United States, designated 1⅞ percent Treasury Notes of Series B–1954, in exchange for Treasury Notes of Series A–1953, maturing December 1, 1953.

2. In addition to the offering under this circular, holders of the maturing notes are offered the privilege of exchanging all or any part of such notes for 2½ percent Treasury Bonds of 1958, which offering is set forth in Department Circular No. 935, issued simultaneously with this circular.

II. *Description of notes.* 1. The notes will be dated December 1, 1953, and will bear interest from that date at the rate of 1⅞ percent per annum, payable on a semiannual basis on June 15 and December 15, 1954. They will mature December 15, 1954, and will not be subject to call for redemption prior to maturity.

2. The income derived from the notes shall be subject to all taxes now or hereafter imposed under the Internal Revenue Code, or laws amendatory or supplementary thereto. The notes shall be subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but shall be exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The notes will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

4. Bearer notes with interest coupons attached will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. The notes will not be issued in registered form.

5. The notes will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States notes.

III. *Subscription and allotment.* 1. Subscriptions will be received at the Federal Reserve Banks and Branches and at the Office of the Treasurer of the United States, Washington. Banking institutions generally may submit subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies.

2. The Secretary of the Treasury reserves the right to reject or reduce any subscription, to close the books as to any or all subscriptions at any time without notice, and to allot less than the amount of notes applied for; and any action he may take in these respects shall be final. Subject to these reservations, all subscriptions will be allotted in full. Allotment notices will be sent out promptly upon allotment.

IV. *Payment.* 1. Payment at par for notes allotted hereunder must be made on or before December 1, 1953, or on later allotment, and may be made only in Treasury Notes of Series A–1953, maturing December 1, 1953, which will be accepted at par, and should accompany the subscription.

V. *General provisions.* 1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective Districts, to issue allotment notices, to receive payment for notes allotted, to make delivery of notes on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive notes.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

[SEAL] G. M. HUMPHREY,
*Secretary of the Treasury.*

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

NEVADA GRAZING DISTRICT NO. 5

PROCEDURE FOR ADVISORY BOARD ELECTIONS

NOVEMBER 4, 1953.

Pursuant to authority delegated to me by order of the Secretary of the Interior on September 14, 1953, 18 F. R. 5631, new procedures as hereinafter specified are hereby prescribed for the conduct of periodic advisory board elections, for Nevada Grazing District No. 5, including number of advisers to be elected and designation of term of office, and to alter, amend or revise such procedures, notwithstanding the provisions of 43 CFR 161.12:

1. *Elections; time; and place.* For the purpose of stimulating district-wide interest and participation in advisory board elections, an election will be held each three-year period, at which time the entire membership of the board will be elected. The District Range Manager will give notice of the time and place or places of holding an election in one or more newspapers of general circulation in the district, by posting in the office of the Regional Administrator and in the office of the Range Manager, and by posting in such public places as is necessary to give the matter proper publicity. No election shall be held to be invalid by reason of failure to give any of the foregoing notices unless it shall be made to appear that there was failure to give substantial notice.

2. *Nominations.* The electors, assembled at the place or places of election, will select from the qualified electors of the precinct one or more candidates for each position to be filled. The candidates selected must be qualified to represent the precinct and class of livestock for which they are selected. Nominations will be made by qualified electors in the precinct.

3. *Advisers to be elected; term of office.* Candidates will be selected to fill each position on the District Advisory Board not to exceed twelve including one free-use. Each member will serve for a period of three years.

4. *Elections; results; ties; judges' certificate.* At the time and places designated by the District Range Manager for holding the election, the election judges will check the eligibility of each voter as the vote is cast, by comparing the name with the registration list. Ballot boxes will be opened by the judges in the presence of the Range Manager or his representative and the votes counted. In the case of a tie vote, a choice by lot shall be made by the judges. As soon as the ballots have been counted the judges shall prepare a certificate of returns under their hands, stating the number of votes cast, the number of excess, unused or spoiled ballots, and in both words and figures, the number of votes received by each candidate.

The certificate, together with the ballots and the registration list of voters, shall be enclosed and sealed and forthwith delivered to the representative of the Bureau of Land Management in charge of the election.

L. T. HOFFMAN,
*Regional Administrator.*

### Bureau of Reclamation

COLORADO RIVER STORAGE AND YUMA PROJECTS, ARIZONA

ORDER OF REVOCATION

DECEMBER 5, 1952.

Pursuant to the authority delegated by Departmental Order No. 2515 of April 7, 1949 (14 F. R. 1937), I hereby revoke Departmental Orders of July 2, 1902, January 31, 1903, September 8, 1903, June 4, 1930, and October 16, 1931, insofar as said orders affect the following described lands; provided, however, that such revocation shall not affect the withdrawal of any other lands by said orders or affect any other orders withdrawing or reserving the land hereinafter described.

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 11 N., R. 18 W.,
Secs. 1, 2 and 3, all.
T. 12 N., R. 18 W.,
Secs. 4 to 9, incl., 16 to 18, incl., 20, 21, and 28, all.
T. 13 N., R. 18 W.,
That portion lying within 6 miles of the Colorado River.
T. 13 N., R. 19 W.,
Secs. 4 to 29, incl., all.
T. 13 N., R. 20 W.,
Secs. 1, 2, 3, 11, 12, and 13, all.
T. 14 N., R. 20 W.,
Secs. 3, 10, 15, 22, 34, and 35, all.
T. 15 N., R. 20 W.,
Secs. 4 to 9, incl., 16 to 21, incl., 28, 29, and 30, all.
T. 15 N., R. 20½ W.,
Secs. 1, 12, 13, and 24, all.
T. 16 N., R. 20½ W.,
Secs. 1, 2, 3, 22 to 27, incl., 35, and 36, all.
T. 16½ N., R. 20½ W.,
All fractional township.
T. 17 N., R. 21 W.,
Secs. 4, 14, 15, 23, 26, and 35, all.
T. 18 N., R. 21 W.,
Secs. 5, 6, 8, 17, and 20, all.
T. 19 N., R. 21 W.,
Secs. 4 to 9, incl., 16 to 21, incl., and 28 to 33, incl., all.
T. 20 N., R. 21 W.,
Secs. 31, 32, and 33, all.
T. 19 N., R. 22 W.,
Secs. 1, 12, 13, 24, and 25, all.
T. 20 N., R. 22 W.,
Sec. 36, all.

The above area aggregates approximately 85,490 acres.

G. W. LINEWEAVER,
*Assistant Commissioner.*

NOVEMBER 16, 1953.

I concur. The records of the Bureau of Land Management will be noted accordingly.

The topography of the lands is rolling with gravelly hills crossed by numerous gullies. Cover consists of desert plants, principally greasewood. The highest use of the lands is for grazing. It is not likely that they will be classified for any other use, but any application that is filed will be considered on its merits.

This order shall not otherwise become effective to change the status of the described lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall become subject to application, petition, location and selection under the applicable public land laws, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable laws, and the 91-day preference right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284) as amended.

Information showing the periods during which, and the conditions under which veterans and others may file applications for these lands may be obtained on request from the Manager, Land and Survey Office, Bureau of Land Management, Phoenix, Arizona.

WILLIAM PINCUS,
*Assistant Director,*
*Bureau of Land Management.*

## CIVIL AERONAUTICS BOARD

[Docket No. 5476]

TACA INTERNATIONAL AIRLINES, S. A.

NOTICE OF HEARING

In the matter of the application of TACA International Airlines, S. A. for renewal of its foreign air carrier permit authorizing it to engage in foreign air transportation with respect to persons, property and mail between the terminal point San Salvador, El Salvador, the intermediate points Guatemala City, Guatemala and Belize, British Honduras, and the terminal point New Orleans, Louisiana.

Notice is hereby given pursuant to section 402 of the Civil Aeronautics Act of 1938, as amended, that a hearing in the above-entitled proceeding is assigned to be held on December 1, 1953, at 10:00 a. m., e. s. t., in Room E–210, Temporary Building No. 5, Sixteenth Street and Constitution Avenue, Washington, D. C., before Examiner Joseph L. Fitzmaurice.

Without limiting the scope of the issues presented by the application, particular attention will be directed to the following matters:

1. Whether the foreign air transportation proposed by the applicant is in the public interest;

2. Whether the applicant is fit, willing and able properly to perform such air transportation and to conform to the provisions of the act and the rules, regulations and requirements of the Board thereunder;

3. Whether the control relationships, found by the Board to have existed in its decision of February 11, 1949, 10 C. A. B. 130, 133–135 (1949) changed, and, if so, in what respects;

4. Whether in the event of continuing control of the applicant by Waterman Steamship Corporation and/or subsidiaries or affiliates thereof, such continuing control is in the public interest;

5. With respect to the matters referred to in (3) and (4) above, in the event of renewal of the applicant's permit, what terms, conditions, and limitations, if any, are required, additional to or supplemental to the terms, conditions, and relationships, presently contained in TACA's foreign air carrier permit;

6. Whether section 408 of the act is applicable to the relationships existing between the applicant and any other persons; and

7. If section 408 is applicable, whether the renewal requested is in the public interest.

Notice is further given that any person, other than a party of record, desiring to be heard in this proceeding must file with the Board on or before December 1, 1953, a statement setting forth the matters of fact or law, raised by the application which he desires to present.

For further details of the service proposed interested persons are referred to the application on file with the Civil Aeronautics Board.

Dated at Washington, D. C., this 17th day of November 1953.

[SEAL] FRANCIS W. BROWN,
*Chief Examiner.*

[F. R. Doc. 53-9794; Filed, Nov. 19, 1953; 8:56 a. m.]

## FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 8796, 10753, 10754, 10755]

KTRH BROADCASTING CO. ET AL.

ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of KTRH Broadcasting Company, Houston, Texas, Docket No. 8796, File No. BPCT–308; Houston Area Television Company, Houston, Texas, Docket No. 10753, File No. BPCT–1585; Houston Television Company, Inc., Houston, Texas, Docket No. 10754, File No. BPCT–1723; TV Broadcasting Company of Houston, Houston, Texas, Docket No. 10755, File No. BPCT–1753; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 12th day of November 1953;

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 13 in Houston, Texas; and

It appearing, that the above-entitled applications are mutually exclusive in that operation by more than one applicant would result in mutually destructive interference; and

It further appearing, that pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-named applicants were advised by letters of the fact that their applications were mutually exclusive, of the necessity for a hearing and of all objections to their applications; and were given an opportunity to reply; and

It further appearing, that upon due consideration of the above-entitled applications, the amendments filed thereto, and the replies to the above letters, the Commission finds that under section 309 (b) of the Communications Act of 1934, as amended a hearing is mandatory; that Houston Area Television Company and TV Broadcasting Company of Houston are legally, financially and technically qualified to construct, own and operate a television broadcast station; and that KTRH Broadcasting Company and Houston Television Company, Inc., are legally and financially qualified to construct, own and operate a television broadcast station and are technically so qualified except as to the matters referred to in issue "1" below.

*It is ordered,* That pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding to commence at 10:00 a. m. on the 11th day of December 1953 in Washington, D. C., upon the following issues:

1. To determine whether the installations of the stations proposed by KTRH Broadcasting Company and Houston Television Company, Inc., in their above-entitled applications would constitute hazards to air navigation.

2. To determine on a comparative basis which of the operations proposed in the above-entitled applications would best serve the public interest, convenience and necessity in the light of the record made with respect to the significant differences among the applications as to:

(a) The background and experience of each of the above-named applicants having a hearing on its ability to own and operate the proposed television station.

(b) The proposals of each of the above-named applicants with respect to the management and operation of the proposed station.

(c) The programming service proposed in each of the above-entitled applications.

*It is further ordered*, That the issues in the above-entitled proceeding may be enlarged by the Examiner, on his own motion or on petition properly filed by a party to the proceeding and upon sufficient allegations of fact in support thereof, by the addition of the following issue: To determine whether the funds available to the applicant will give reasonable assurance that the proposals set forth in the application will be effectuated.

Released: November 16, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[Docket Nos. 10461, 10462, 10463, 10464]

SOUTH CENTRAL BROADCASTING CORP. ET AL.

MEMORANDUM OPINION AND ORDER ENLARGING ISSUES

In re applications of South Central Broadcasting Corporation, Evansville, Indiana, Docket No. 10461, File No. BPCT-707; Evansville Television, Inc., Evansville, Indiana, Docket No. 10462, File No. BPCT-934; On The Air, Inc., Evansville, Indiana, Docket No. 10463, File No. BPCT-991; WFBM, Inc., Evansville, Indiana, Docket No. 10464, File No. BPCT-1131; for television construction permits (Channel 7).

1. I have before me a joint petition for enlargement of issues relating to South Central Broadcasting Corporation, filed by Evansville Television, Inc., On the Air, Inc., and WFBM, Inc., on October 29, 1953. Filing of the petition was suggested by me, during a hearing conference, as a possible means of enlarging the issues to permit inquiry into South Central's ability to effectuate its proposals, as to which the other applicants expressed doubt, and as the more feasible method of complying with the procedure outlined by the Commission in its Memorandum Opinion and Order released on October 7, 1953.[1]

2. Asserting that as a result of the denial (by the Examiner and the Commission) of South Central's petition to amend its application through increasing by $28,814 the amount to be spent for "studio technical equipment," it cannot be determined from which South Central funds the equipment described in the proposed amendment would be obtained, petitioners say that "serious doubt" is cast "upon the financial ability of South Central Broadcasting Corporation to effectuate the proposals set forth in its application." They request me (1) to enlarge the issues by including the following issue: "to determine whether the funds available to South Central Broadcasting Corporation will give reasonable assurance that the proposals set forth in its application will be effectuated"; and (2) "having added the issue, to order the South Central Broadcasting Corporation to submit to Petitioners its estimated budget for the first year's operation, including therein salaries of personnel in engineering, programing, sales, news and special events, advertising and promotion, and general administration; general administration expenses and programing expenses, such as cost of talent, news service, music license fees, film costs; and all other matters included within its 'Cost of Operation' estimate." In support of (2) petitioners point to the new procedure published by the Commission on October 14 (FCC 53-1419) requiring applicants in hearing matters to furnish information of the type desired by them.[2] They maintain that its production "would greatly facilitate the conduct of the hearing, and eliminate the necessity of last minute preparation of exhibits under cross-examination," and that "having examined the material in advance, counsel would be able to cross-examine only upon those factors which appear unrealistic"; on the other hand, they contend, if South Central were not directed to submit the data, "counsel would be required at the time of the hearing to ask general questions concerning its 'Cost of Operation,' requesting information on all facets of that problem, which would of necessity prolong the hearing."

[1] Like the other applicants, South Central has been found financially qualified. This said the Commission in its October 7 opinion, was a prima facie determination that an applicant had sufficient funds to effectuate its proposals, and in the absence of evidence to the contrary, would support a finding that the applicant is qualified in this regard. But, continued the Commission: "the hearing issues will be so written that the Examiner will have discretionary authority to admit evidence designed to controvert this determination. Upon a reasonable showing that probative evidence can be adduced to controvert the presumption raised by the Commission's initial determination in this regard, such evidence may be admitted on the Examiner's own motion or on petition by one of the parties. The hearing issues in this proceeding are being modified to conform to the procedure outlined above * * *".

[2] By its terms, the October 14 ruling applies to future matters.

3. Pursuant to extension duly granted, on November 10, South Central filed an opposition to the joint petition, called "Motion to Dismiss Joint Petition for Enlargement of Issues Relating to South Central Broadcasting Corporation." It declares that petitioners are guilty of an "unintelligible" non-sequitur in concluding that because the amendment was denied the source of funds for the equipment and the ability of South Central to effectuate its proposals are uncertain. South Central "alleges that its application indicates on its face that there are sufficient funds to purchase this $28,000 worth of equipment," and "that since it can obtain the portable sync generator and the film camera and processing equipment from funds contained in the application, the petition to enlarge issues should be dismissed." And because, South Central continues, "the applicant can obtain this equipment from the funds contained in the application, the request for South Central's estimated budget for the first year should be dismissed." Dismissal is also sought because the allegations of the petition are not "sufficiently particularized," but are part of a fishing expedition designed to delay the case.

4. The allegations of the petition are sufficient to warrant the admission of evidence to controvert the prima facie determination implicit in the Commission's finding that South Central is financially qualified. With the inability of South Central to amend its application so as to embrace a substantial amount of equipment, around which some of the applicant's programs are centered, I am of the opinion, in view of its uncertain nature, that inquiry should be permitted into South Central's ability to procure this equipment and effectuate its proposals. I am therefore enlarging the issues in conformity with the Commission's delegation of authority.

5. I have taken into account South Central's charge that the allegations in the joint petition are too general to warrant the relief requested. I am somewhat in agreement with South Central's complaint on this head. In suggesting that a petition be filed rather than that the Examiner act on his own motion, I expected the facts to be set out in greater detail than petitioners apparently found convenient. South Central, however, is similarly at fault in its motion to dismiss when it says merely that its application on its face indicates sufficient funds to buy the equipment.[3] In any event, meager though the petition is, I think it points up the uncertainty in South Central's case well enough to withstand demurrer.

6. I believe that the request for information should also be granted. Whether South Central will be able to underwrite the purchase or otherwise secure the equipment in question can be probed through analysis of the data sought, and hearing time saved by reducing the necessity for aimless exploration on cross-examination. Although, as noted above, the October 14 public notice expressly deals with future proceedings, its obvious value should not be confined, and under the authority of § 1.873 [4] (47 CFR 1.873) I am applying its teaching here.

7. Note is also taken of South Central's statement that petitioners are deliberately delaying the proceeding. That ancient bogie—"fishing expedition"—is no longer as effective as it once was in stifling investigation. If the data sought are relevant and material, and their production will not unduly prolong the case, when measured against their value, they should be furnished. By this standard, South Central should supply the information. I am not so naive as to believe that petitioners are primarily interested in smoothing the way for South Central, but I feel that their request is sufficiently based on practicality to warrant honoring it even though they may not burn with the zeal of disinterested inquiry.

8. *Accordingly it is ordered*, This 13th day of November 1953, (1) that the joint petition filed on October 29, 1953, is granted, and that the issues are enlarged by the addition of the following issue:

(e) To determine whether the funds available to South Central Broadcasting Corporation will give reasonable assurance that the proposals set forth in the application will be effectuated;

and (2) that South Central Broadcasting Corporation is directed, within 10 days of the receipt of this order, to submit to petitioners (as well as counsel for the Broadcast Bureau and to the Examiner) its estimated budget for the first year's operation, including salaries and personnel in engineering, programing, sales, news and special events, advertising and promotion, and general administration; general administration and programing expenses, such as cost of talent, news service, music license fees, film costs; and all other matters included within its "Cost of Operation" estimate.

*It is further ordered*, That South Central's Motion to Dismiss, filed on November 10, 1953, is denied.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9782; Filed, Nov. 19, 1953; 8:52 a. m.]

[3] By letter dated November 10, 1953, South Central transmitted its "Proposal No. 1," a revised listing of its proposed technical equipment, and states that while the dollar total in the application is $199,641.20, the "cost of equipment, etc. under the revised listing is less than $205,000." South Central supplies no cost itemization for equipment to be purchased from sources other than its principal supplier, giving instead bulk figures.

[4] "*Further evidence during hearing.* At any stage of a hearing, the presiding officer may call for further evidence upon any issue and may require such evidence to be submitted by any party to the proceeding."

---

FRONTIER BROADCASTING CO. (KFBC)

ORDER CONTINUING HEARING

In re application of Frontier Broadcasting Co. (KFBC), Cheyenne, Wyoming, Docket No. 10480, File No. BMP-5864; for modification of construction permit.

The Commission having the above-entitled proceeding under consideration;

It appearing, that the applicant, on November 13, 1953, filed a petition to dismiss the above-entitled application and that a hearing will not be necessary if the petition is granted;

*It is ordered*, This 13th day of November 1953, that the hearing now scheduled for November 17, 1953, is continued without date pending action by the Commission upon the applicant's petition to dismiss.

[Docket No. 10747]

AMERICAN BROADCASTING CORP.

ORDER DESIGNATING APPLICATION FOR HEARING ON STATED ISSUES

In re application of American Broadcasting Corporation, Lexington, Kentucky, Docket No. 10747, File No. BPCT-1140; for construction permit for a new television station.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 12th day of November 1953;

The Commission having under consideration the above-entitled application, requesting a construction permit for a new television broadcast station to operate on Channel 27 in Lexington, Kentucky; and

It appearing, that pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-named applicant was advised by letter of the fact that its application was mutually exclusive with the application of J. E. West and C. H. Bingham d/b as West-Bingham Television Company (BPCT-1137), of the necessity for a hearing and of all objections to its application; and was given an opportunity to reply; and

It further appearing, that the competing application of J. E. West and C. H. Bingham, d/b as West-Bingham Television Company (BPCT-1137) was dismissed on November 10, 1953, pursuant to the request of said applicant; and

It further appearing, that the applicant is legally, technically, financially and otherwise qualified to construct, own and operate the television broadcast station proposed in its above-entitled application, but that the said application may cause adverse effects upon the Federal Communications Commission's Monitoring Station at Lexington, Kentucky, and the applicant was so advised by the above-mentioned letter; and

It further appearing, that upon due consideration of the above-entitled application, the amendments filed thereto, and the reply to the above letter, the Commission is unable to conclude that the public interest, convenience, or necessity would be served by the granting of the above-entitled application and accordingly, finds that under section 309 (b) of the Communications Act of 1934, as amended, a hearing is mandatory;

*It is ordered*, That pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-entitled application is designated for hearing to commence at 10:00 a. m. on the 11th day of December 1953 in Washington, D. C., upon the following issues:

1. To determine the effects of the construction and operation proposed in the above-entitled application upon the functions of the Federal Communications Commission's Monitoring Station at Lexington, Kentucky.

2. To determine, in the light of the record made with respect to the above issue, whether the granting of the above-entitled application would serve the public interest, convenience or necessity.

Released: November 13, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[Docket Nos. 10748, 10749]

WILMINGTON BROADCASTING SERVICE AND PORT BROADCASTING CO.

ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of Jack Siegel, Robert E. Wasdon, Joseph B. Matthews and William Manrov, d b as Wilmington Broadcasting Service, Wilmington, North Carolina; Docket No. 10748, File No. BP-7930; Charles M. Morgan, tr as Port Broadcasting Company, Wilmington, North Carolina, Docket No. 10749, File No. BP-8798; for construction permits.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 12th day of November 1953;

The Commission having under consideration the applications for construction permits of Jack Siegel, Robert E. Wasdon, Joseph B. Matthews and William Manrov, d b as Wilmington Broadcasting Service and Charles M. Morgan, tr as Port Broadcasting Company, to operate on 1230 kilocycles, 250 watts, unlimited time, at Wilmington, North Carolina.

It appearing, that the applicant Jack Siegel, Robert E. Wasdon, Joseph B. Matthews and William Manrov, d b as Wilmington Broadcasting Service is legally, and technically qualified to operate the proposed station, and that the applicant Charles M. Morgan, tr as Port Broadcasting Company is legally, technically, financially and otherwise qualified to operate the proposed station, but that the operation of both stations as proposed would result in mutually prohibitive interference with each other, and operation of either station would cause interference to and receive interference from Station WFAI, Fayetteville, North Carolina; and

It further appearing, that pursuant to section 309 (b) of the Communications Act of 1934, as amended, the subject applicants were advised by letters dated August 5, 1953, of the aforementioned deficiencies and that the Commission was unable to conclude that a grant of either application would be in the public interest; and

It further appearing, that replies were received from Charles M. Morgan, tr as Port Broadcasting Company and Rollins Broadcasting, Inc., licensee of Station WFAI, to the Commission's letters of August 5, 1953, and that the applicant, Jack Siegel, Robert E. Wasdon, Joseph B. Matthews and William Manrov d b as Wilmington Broadcasting Service failed to reply to said letter; and

It further appearing, that, the Commission, after consideration of the replies, is still of the opinion that a hearing is necessary on both applications.

*It is ordered*, That, pursuant to section 309 (b) of the Communications Act of 1934, as amended, the said applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent order, upon the following issues:

1. To determine the financial qualifications of the applicant partnership, Wilmington Broadcasting Service, and its partners, Jack Siegel, Robert E. Wasdon, Joseph B. Matthews and William Manrov to construct and operate the proposed station.

2. To determine the areas and populations which may be expected to gain or lose primary service from the operation of the proposed stations, and the availability of other primary service to such areas and populations.

3. To determine the type and character of program service proposed to be rendered and whether it would meet the requirements of the populations and areas proposed to be served.

4. To determine whether the operation of the proposed stations would involve objectionable interference with Station WFAI, Fayetteville, North Carolina, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other primary service to such areas and populations and the nature and character of the program service now being rendered by Station WFAI to such areas and populations.

5. To determine, on a comparative basis, which of the operations proposed in the above-entitled applications would best serve the public interest, convenience or necessity in the light of the evidence adduced under the foregoing issues and the record made with respect to the significant differences between the applicants as to:

(a) The background and experience of each of the above-named applicants to own and operate the proposed station.

(b) The proposals of each of the above-named applicants with respect to the management and operation of the proposed stations.

(c) The programming service proposed in each of the above-mentioned applications.

*It is further ordered*, That, the Rollins Broadcasting, Inc., licensee of Station WFAI, Fayetteville, North Carolina, is made a party to this proceeding.

Released: November 16, 1953

[Docket Nos. 10756, 10757]

INTERSTATE BROADCASTING CORP. AND UNITED BROADCASTING CO.

ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of Interstate Broadcasting Corporation, Ogden, Utah, Docket No. 10756, File No. BPCT-1463; United Broadcasting Company, Ogden, Utah, Docket No. 10757, File No. BPCT-1637; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 12th day of November 1953;

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 9 in Ogden, Utah; and

It appearing, that the above-entitled applications are mutually exclusive in that operation by more than one applicant would result in mutually destructive interference; and

It further appearing, that pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-named applicants were advised by letters of the fact that their applications were mutually exclusive, of the necessity for a hearing and of all objections to their applications; and were given an opportunity to reply; and

It further appearing, that upon due consideration of the above-entitled applications, the amendments filed thereto, and the replies to the above letters, as amended, a hearing is mandatory; that Interstate Broadcasting Corporation is legally and financial qualified to construct, own and operate a television broadcast station and is technically so qualified except as to the matter referred to in issue "5" below; and that United Broadcasting Company is legally qualified to construct, own and operate a television broadcast station and is technically so qualified except as to the matters referred to in issues "2" to "5", inclusive, set forth below;

*It is ordered*, That pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding to commence at 10:00 a. m. on the 11th day of December 1953 in Washington, D. C., upon the following issues:

1. To determine whether United Broadcasting Company is financially qualified to construct, own and operate its proposed television broadcast station.

2. To determine the precise geographic coordinates of the antenna proposed by United Broadcasting Company.

3. To determine the rated power (aural) of the transmitter proposed by United Broadcasting Company.

4. To determine the power gain of the antenna system proposed by United Broadcasting Company and the effect thereof on the calculated effective radiated power.

5. To determine whether the installation of either of the stations proposed in the above-entitled applications would constitute a hazard to air navigation.

6. To determine on a comparative basis which of the operations proposed in the above-entitled applications would better serve the public interest, convenience and necessity in the light of the record made with respect to the significant differences between the applications as to:

(a) The background and experience of each of the above-named applicants having a bearing on its ability to own and operate the proposed television station.

(b) The proposals of each of the above-named applicants with respect to the management and operation of the proposed station.

(c) The programming service proposed in each of the above-entitled applications.

*It is further ordered*, That the issues in the above-entitled proceeding may be enlarged by the Examiner, on his own motion or on petition properly filed by a party to the proceeding and upon sufficient allegations of fact in support thereof, by the addition of the following issue: To determine whether the funds available to Interstate Broadcasting Corporation will give reasonable assurance that the proposals set forth in its application will be effectuated.

Released: November 16, 1953.

[Docket No. E-6531]

OHIO EDISON CO.

NOTICE OF APPLICATION

NOVEMBER 13, 1953.

Take notice that on November 12, 1953, an application was filed with the Federal Power Commission, pursuant to section 203 of the Federal Power Act, by Ohio Edison Company (hereinafter called Ohio Edison), a corporation organized under the laws of the State of Ohio and doing business in said State with its principal business office in Akron, Ohio, seeking an order authorizing the merger or consolidation of Ohio Edison's facilities with a certain 0.7 mile transmission line now owned by Cleveland Electric Illuminating Company (hereinafter called Cleveland Illuminating), an Ohio corporation with its principal business office in Cleveland, Ohio. Ohio Edison proposes to purchase from Cleveland Illuminating for $76,500 of 0.7 of a mile of a 138 kv transmission line and related rights; all as more fully appears in the application on file with the Commission.

Any person desiring to be heard, or to make any protest with reference to said application, should on or before the 3d day of December 1953, file with the Federal Power Commission, Washington 25, D. C., a petition or protest in accordance with the Commission's rules of practice and procedure. The application is on

file with the Commission for public inspection.

## FEDERAL TRADE COMMISSION

[File No. 451]

SYNTHETIC SOIL CONDITIONER INDUSTRY

SCHEDULED TRADE PRACTICE CONFERENCE

Notice is hereby given that a trade practice conference for the Synthetic Soil Conditioner Industry will be held by the Federal Trade Commission at 10 a. m., December 10, 1953, in Room 332 of the offices of the Commission, Pennsylvania Avenue at Sixth St. NW., Washington, D. C.

The proceedings are being held to consider proposals for rules designed to eliminate and prevent unfair methods of competition, unfair or deceptive acts or practices, and other trade abuses which violate laws administered by the Commission.

Products of the industry have been defined as comprising any synthetic organic chemical substance which, when added to the soil, is designed to substantially improve, or is represented as substantially improving, the resistance of soil aggregates to the slaking action of water, increasing the water and air permeability of the soil, improving the resistance of the surface to crusting, improving the ease of cultivation, and/or otherwise favorably modifying the structural or other physical properties of the soil. All persons, firms, corporations, and organizations engaged in producing or marketing such industry products are cordially invited to attend and participate in the scheduled trade practice conference.

Issued: November 17, 1953.

By direction of the Commission.

[SEAL] WILLIAM P. GLENDENING, Jr., *Acting Secretary.*

## GENERAL SERVICES ADMINISTRATION

PRESIDENT OF VIRGIN ISLANDS CORPORATION

DELEGATION OF AUTHORITY WITH RESPECT TO DISPOSAL OF HOTEL IN VIRGIN ISLANDS

1. Pursuant to authority vested in me by the Federal Property and Administrative Services Act of 1949, as amended, I hereby authorize the President of the Virgin Islands Corporation to determine whether the Bluebeard's Castle Hotel, together with pertinent hotel realty and personalty, located in St. Thomas, Virgin Islands, is required by any Federal agency and, if not, to dispose thereof by negotiated sale or otherwise.

2. An explanatory statement shall be prepared and submitted to the appropriate committees of Congress, as required by said act, at least thirty days before consummation of any negotiated disposal of the property. A copy of such statement shall be furnished this Administration.

3. This delegation of authority is effective immediately.

Dated: November 16, 1953.

## UNITED STATES TARIFF COMMISSION

[Investigation Nos. 28, 29]

SAFETY PINS AND STRAIGHT (DRESSMAKERS' OR COMMON) PINS

POSTPONEMENT OF PUBLIC HEARINGS

The Tariff Commission ordered that the public hearings in the investigations instituted under section 7 of the Trade Agreements Extension Act of 1951, as amended, and section 332 of the Tariff Act of 1930, with respect to safety pins, heretofore scheduled for January 12, 1954 (18 F. R. 6978), and straight (dressmakers' or common) pins, heretofore scheduled for January 13, 1954 (18 F. R. 6979), be postponed to 10 a. m., March 23 and March 24, 1954, respectively.

The hearings will be held in the Hearing Room, Tariff Commission Building, Eighth and E Streets NW., Washington, D. C.

*Request to appear.* Parties desiring to appear, to produce evidence, and to be heard at the public hearings should file request in writing with the Secretary, United States Tariff Commission, Washington 25, D. C., in advance of the date of the hearings.

I certify that the above action was taken by the Tariff Commission on the 13th day of November 1953.

Issued: November 16, 1953

GIORGIO AND EDILIA VERGA LATTES

AMENDMENT TO NOTICE OF INTENTION TO RETURN VESTED PROPERTY

Notice of Intention to Return Vested Property was published on November 7, 1952 (17 F. R. 10129), wherein property hereinafter described was ordered returned to Bice Ottolenghi ved. Lattes and Edilia Verga ved. Lattes. Subsequent to the publication of the Notice, this Office was advised that Bice Ottolenghi ved. Lattes died and left as her sole surviving heir, her son Giorgio Lattes. Consequently, the Notice of Intention to Return Vested Property, which was published on November 7, 1952 (17 F. R. 10129), is amended to read as follows:

Pursuant to section 32 (f) of the Trading with the Enemy Act, as amended, notice is hereby given of intention to return, on or after 30 days from the date of the publication hereof, the following property, subject to any increase or decrease resulting from the administration thereof prior to return, and after adequate provision for taxes and conservatory expenses:

*Claimant, Claim No., Property, and Location*

Giorgio Lattes, Edilia Verga ved. Lattes, Rome, Italy; Claim No. 39655; $196.77 in the Treasury of the United States and stock of the De Nobili Cigar Company, a New York corporation, consisting of 35 shares, third preferred capital stock, par value $25 per share, Certificate No. 157, and 14 shares common capital stock, par value $50 per share, Certificate No. 104, presently in custody of Safekeeping Department, Federal Reserve Bank of New York, at New York City; one-fourth thereof to Giorgio Lattes and three-fourths thereof to Edilia Verga ved. Lattes.

Executed at Washington, D. C., on November 10, 1953.

For the Attorney General.

[SEAL] PAUL V. MYRON, *Deputy Director, Office of Alien Property.*

PART 601—GRAINS AND RELATED COMMODITIES

SUBPART—1952-CROP CORN RESEAL LOAN PROGRAM

STORAGE AND TRACK-LOADING PAYMENTS

Supplement 3, Corn, 18 F. R. 3058, to the 1952 CCC Grain Price Support Bulletin 1 (17 F. R. 3521 and 18 F. R. 3303), is hereby amended as follows:

Section 601.1630 is amended by changing paragraph (b) *Track-loading payments* to paragraph (c) *Track-loading payments* and adding a new paragraph (b) to provide for storage payments on resealed corn which is redeemed by the producer. The new paragraph (b) reads as follows:

§ 601.1630 *Storage and track-loading payments*— * * *

(b) *Storage payment on redeemed corn.* (1) A producer who redeems corn on or after July 31, 1954, will receive a storage payment for the quantity of corn redeemed computed at the rate of 13 cents per bushel.

(2) A producer who redeems corn prior to July 31, 1954, will receive a prorated storage payment computed at the rate of $\frac{1}{25}$ of a cent per bushel per day beginning on October 1, 1953, and ending on the date of redemption, but not to exceed 13 cents per bushel on the quantity redeemed: *Provided*, That no such prorated payment will be made in any case where redemption follows demand by the President, CCC for repayment of the loan, if such demand is due to the fact that the corn was damaged, abandoned or otherwise impaired due to negligence on the part of the producer.

(3) Notwithstanding anything to the contrary in the foregoing provisions of this paragraph no storage payment will be made where the producer has made any false representations in the loan documents or in obtaining the loan, or where there has been conversion on the part of the producer.

(Sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. Sup. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 101, 401, 63 Stat. 1051; 15 U. S. C. Sup. 714c, 7 U. S. C. Sup. 1421, 1441)

Issued this 17th day of November 1953.

[SEAL] HOWARD H. GORDON,
*President,*
*Commodity Credit Corporation.*

[1952 C. C. C. Grain Price Support Bulletin 1, Amdt. 1 to Supp. 3, Wheat]

PART 601—GRAINS AND RELATED COMMODITIES

SUBPART—1952-CROP WHEAT RESEAL LOAN PROGRAM

STORAGE AND TRACK-LOADING PAYMENTS; SUPPORT RATES

Supplement 3, Wheat, 18 F. R. 3817, to the 1952 CCC Grain Price Support Bulletin 1 (17 F. R. 3521 and 18 F. R. 3303), is hereby amended as follows:

1 Section 601.1730 is amended by adding a new subparagraph (3) to paragraph (a) to provide for storage payments on resealed wheat which is redeemed by the producer, such added subparagraph reading as follows:

§ 601.1730 *Storage and track-loading payments*—(a) *Storage payment.* • • •

(3) (i) A producer who redeems wheat on or after April 30, 1954, will receive a storage payment for the quantity of wheat redeemed computed at the following rate per bushel: Area II, 14 cents per bushel; Area III, 15 cents per bushel.

(ii) A producer who redeems wheat prior to April 30, 1954, will receive a prorated storage payment computed at the rate of 1/30 of a cent per bushel per day in both areas II and III beginning on July 1, 1953, and ending on the date of redemption, but not to exceed 13 cents per bushel on the quantity redeemed; provided that no such prorated payment will be made in any case where redemption follows demand by the President, CCC for repayment of the loan, if such demand is due to the fact that the wheat was damaged, abandoned or otherwise impaired due to negligence on the part of the producer.

(iii) Notwithstanding anything to the contrary in the foregoing provisions of this subparagraph, no storage payment will be made where the producer has made any false representations in the loan documents or in obtaining the loan, or where there has been conversion on the part of the producer.

2. Paragraph (a) (2) of § 601.1730 is corrected by inserting "per day" in the second sentence so that such subparagraph reads as follows:

(2) If the wheat is delivered to CCC prior to April 30, 1954, upon request by the producer and with the approval of CCC, or in the case of loss assumed by CCC under the loan program, the amount of the storage payment will be prorated depending upon the length of time the wheat was in store, provided delivery was not made as a result of a demand for repayment due to any fraudulent representation on the part of the producer, or the fact that the wheat was damaged, abandoned, or otherwise impaired due to negligence on the part of the producer. The prorated storage payment will be computed at the rate of 1/30 of a cent per bushel per day in both Area II and Area III beginning on July 1, 1953, and ending on the date delivery is accomplished or ending on the final date of delivery as specified in the delivery instructions issued to the producer by the county committee, whichever is earlier, but not to exceed 13 cents per bushel on the quantity delivered under the reseal program. In the case of losses assumed by CCC, the period for computing the storage payment shall end on the date of the loss.

3. Section 601.1732 is amended to correct the reference, "Supplement 1, and any amendments thereto" to "Supplement 2 and any amendments thereto", so that the amended section reads as follows:

§ 601.1732 *Support rates.* The support rate for an extended farm-storage loan shall remain the same as for the original loan. The support rate for wheat covered by a purchase agreement placed under a farm-storage loan shall be the same as the support rate established for the wheat in § 601.1711 of 1952 CCC Grain Price Support Bulletin 1, Supplement 2, Wheat and any amendments thereto.

(Sec. 4, 62 Stat. 1070 as amended; 15 U. S. C. Sup., 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 101, 401, 63 Stat. 1051, 1054; 15 U. S. C. Sup. 714c, 7 U. S. C. Sup. 1441, 1421)

Issued this 17th day of November 1953.

[1952 C. C. C. Grain Price Support Bulletin 1, Amdt. 2 to Supp. 2, Oats]

PART 601—GRAINS AND RELATED COMMODITIES

SUBPART—1952-CROP OATS RESEAL LOAN PROGRAM

STORAGE AND TRACK-LOADING PAYMENTS

Supplement 2, Oats, 18 F. R. 2911, and 3705, to the 1952 CCC Grain Price Support Bulletin 1, (17 F. R. 3521 and 18 F. R. 3303), is hereby amended as follows:

Section 601.1830 is amended by adding a new subparagraph (3) to paragraph (a) to provide for storage payments on resealed oats which are redeemed by the producer, such added subparagraph reading as follows:

§ 601.1830 *Storage and track-loading payments*—(a) *Storage payments.* • • •

(3) (i) A producer who redeems oats on or after April 30, 1954, will receive a storage payment for the quantity of oats redeemed computed at the rate of 10 cents per bushel.

(ii) A producer who redeems oats prior to April 30, 1954, will receive a prorated storage payment computed at the rate of 1/30 of a cent per bushel per day beginning on July 1, 1953, and ending on the date of redemption, but not to exceed 10 cents per bushel on the quantity redeemed; provided that no such prorated payment will be made in any case where redemption follows demand by the President, CCC for repayment of the loan, if such demand is due to the fact that the oats were damaged, abandoned or otherwise impaired due to negligence on the part of the producer.

(iii) Notwithstanding anything to the contrary in the foregoing provisions of this subparagraph, no storage payment will be made where the producer has made any false representations in the loan documents or in obtaining the loan, or where there has been conversion on the part of the producer.

(Sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. Sup. 714b. Interprets or applies sec. 5, 62 Stat. 1072, secs. 301, 401, 63 Stat. 1053, 15 U. S. C. Sup. 714c, 7 U. S. C. Sup. 1447, 1421)

## TITLE 7—AGRICULTURE

### Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

[Navel Orange Reg. 5]

PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

§ 914.305 *Navel Orange Regulation 5*—(a) *findings.* (1) Pursuant to the marketing agreement and Order No. 14 (13 F. R. 5638), regulating the handling of navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Navel Orange Administrative Committee, established under the said marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. The Navel Orange Administrative Committee held an open meeting on November 19, 1953, after giving due notice thereof, to consider supply and market conditions for navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such navel oranges; it is neces-

sary. In order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date hereof.

(b) *Order.* (1) The quantity of navel oranges grown in Arizona and designated part of California which may be handled during the period beginning at 12:01 a. m., P. s. t., November 22, 1953, and ending at 12:01 a. m., P. s. t., November 29, 1953, is hereby fixed as follows:

(i) District 1: 815.01 carloads;

(ii) District 2: Unlimited movement;

(iii) District 3: 125 carloads;

(iv) District 4: 65 carloads.

(2) The prorate base of each handler who has made application therefor, as provided in the said marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached hereto and made a part hereof by this reference.

(3) As used in this section "handler," "handler," "carloads," "prorate base," "District 1," "District 2," "District 3," and "District 4" shall have the same meaning as when used in said marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 20th day of November 1953.

[SEAL] S. R. SMITH,
*Director,*
*Fruit and Vegetable Branch.*

[Orange Reg. 244]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.647 *Orange Regulation 244*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of Temple oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions this section effective not later than November 23, 1953. Shipments of Temple oranges, grown in the State of Florida, are presently subject to regulation by grades, pursuant to the amended marketing agreement and order, and will so continue until November 23, 1953; the recommendation and supporting information for continued regulation subsequent to November 22 was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on November 17, such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time hereof are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Temple oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of Temple oranges; and compliance with this section will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., e. s. t., November 23, 1953, and ending at 12:01 a. m., e. s. t., November 30, 1953, no handler shall ship:

(i) Any Temple oranges grown in the State of Florida, which do not grade at least U. S. Fancy.

(ii) During the period beginning at 12:01 a. m., e. s. t., November 30, 1953, and ending at 12:01 e. s. t., July 31, 1954, no handler shall ship:

(i) Any Temple oranges grown in the State of Florida, which do not grade at least U. S. No. 2.

(3) As used in this section, the terms "handler," "ship," and "Growers Administrative Committee" shall each have the same meaning as when used in said amended marketing agreement and order; and the terms "U. S. Fancy," and "U. S. No. 2" shall have the same meaning as when used in the revised United States Standards for Florida Oranges (§ 51.302 of this title).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 18th day of November 1953.

[SEAL] S. R. SMITH,

[Tangerine Reg. 140]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.648 *Tangerine Regulation 140*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of tangerines, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than November 23, 1953. Shipments of tangerines, grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, and will so continue until November 23, 1953; the recommendation and supporting information for continued regulation subsequent to November 22 was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on November 17; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such tangerines; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of tangerines; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., e. s. t., November 23, 1953, and ending at 12:01 a. m., e. s. t., November 30, 1953, no handler shall ship:

(i) Any tangerines, grown in the State of Florida, that do not grade at least U. S. No. 1; or

(ii) Any tangerines, grown in the State of Florida, which are of a size smaller than the size that will pack 176 tangerines, packed in accordance with the requirements of a standard pack, in a half-standard box (inside dimensions $9\frac{1}{2} \times 9\frac{1}{2} \times 19\frac{1}{8}$ inches; capacity 1,726 cubic inches).

(2) As used in this section, "handler," "ship," and "Growers Administrative Committee" shall have the same meaning as when used in said amended marketing agreement and order; and "U. S. No. 1" and "standard pack" shall have the same meaning as when used in the United States Standards for Tangerines (§ 51.416 of this title).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 18th day of November 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

[F. R. Doc. 53-9847; Filed, Nov. 20, 1953; 8:55 a. m.]

[Lemon Reg. 512]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATION OF SHIPMENTS

§ 953.619 *Lemon Regulation 512*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified in this section was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on November 18, 1953; such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., November 22, 1953, and ending at 12:01 a. m., P. s. t., November 29, 1953, is hereby fixed as follows:

(i) District 1: 18 carloads;

(ii) District 2: 220 carloads;

(iii) District 3: 12 carloads.

(2) The prorate base of each handler who has made application therefor, as provided in the said amended marketing agreement and order, is hereby fixed in accordance with the prorate base

schedule which is attached to Lemon Regulation 511 (18 F. R. 7229) and made a part hereof by this reference.

(3) As used in this section, "handled," "handler," "carloads," "prorate base," "District 1," "District 2," and "District 3," shall have the same meaning as when used in the said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 19th day of November 1953.

[SEAL] S. R. SMITH,
*Director,*
*Fruit and Vegetable Branch.*

---

PART 997—FILBERTS GROWN IN OREGON AND WASHINGTON

CHANGES IN SALABLE, SURPLUS, AND WITHHOLDING PERCENTAGES

Upon the basis of the recommendation of the Filbert Control Board, the administrative agency for operations under the marketing agreement and order (7 CFR, 1952 Rev., Part 997) regulating the handling of filberts grown in Oregon and Washington, effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and other available information, it is hereby found and determined that the existing regulation (18 F. R. 5727) fixing the salable, surplus, and withholding percentages for filberts at 95 percent, 5 percent, and 5 percent, respectively, should be amended to provide for salable, surplus, and withholding percentages for the fiscal year beginning August 1, 1953, at 100 percent, 0 percent, and 0 percent, respectively. Therefore, it is hereby ordered that § 997.203 be, and it is hereby amended, to read as follows:

§ 997.203 *Salable, surplus, and withholding percentages for merchantable inshell filberts.* For the fiscal year beginning August 1, 1953, the salable percentage of merchantable inshell filberts shall be 100 percent, the surplus percentage shall be 0 percent and the withholding percentage shall be 0 percent.

It is hereby found and determined that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and to postpone the effective date of this document later than the date of its publication in the FEDERAL REGISTER. The existing regulation for the 1953–54 fiscal year was fixed on the basis of an estimate of merchantable filbert production which is substantially greater than the presently indicated merchantable production based on the latest crop information. As a result of this situation, it now appears that the entire production of merchantable filberts for the 1953–54 fiscal year will be below the quantity required to meet the estimated trade demand. This trade demand is of such character as to require that all of said merchantable filberts be made available to meet demand as promptly as is practicable. Further, the effect of this action will be to benefit the persons affected thereby in that it will serve to relieve them of existing restrictions. No preparation for this regulation will be necessary which cannot be completed prior to its effective date. Therefore, good cause exists for not giving preliminary notice, engaging in rule making procedure, and postponing the effective date of this document later than the date of its publication in the FEDERAL REGISTER. (See section 4c of the Administrative Procedure Act; 5 U. S. C. 1001 et seq.)

(Sec. 5, 48 Stat. 31, as amended; 7 U. S. C. and Sup. 608c)

Issued at Washington, D. C., this 18th day of November 1953, to become effective upon publication of this document in the FEDERAL REGISTER.

[SEAL] S. R. SMITH,
*Director,*
*Fruit and Vegetable Branch.*

[F. R. Doc. 53-9848; Filed, Nov. 20, 1953; 8:55 a. m.]

# TITLE 21—FOOD AND DRUGS

## Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

PART 141—TESTS AND METHODS OF ASSAY FOR ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

PART 146—CERTIFICATION OF BATCHES OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

MISCELLANEOUS AMENDMENTS

By virtue of the authority vested in the Secretary by the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended by 61 Stat. 11, 63 Stat. 409, 67 Stat. 389; sec. 701, 52 Stat. 1055; 21 U. S. C. 357, 371; 67 Stat. 18), the regulations for tests and methods of assay for antibiotic and antibiotic-containing drugs (21 CFR, 1952 Supp., Part 141) and certification of batches of antibiotic and antibiotic-containing drugs (21 CFR, 1952 Supp., Part 146) are amended as indicated below:

1. Part 141 is amended by adding the following new sections:

§ 141.418 *Zinc bacitracin (bacitracin zinc salt)*—(a) *Potency.* Proceed as directed in § 141.401 (a) (1), except prepare the sample as follows: Suspend an accurately weighed sample of approximately 100 milligrams in 5 milliliters of distilled water. Add 0.5 milliliter of 3 *N* HCl, stir until the sample is dissolved, and transfer to a 100-milliliter volumetric flash and make to volume with distilled water. Dilute an aliquot of this solution to 1.0 unit per milliliter (estimated) with 1-percent phosphate buffer.

(b) *Toxicity.* Administer orally, by means of a cannula or other suitable device, to each of 5 mice within the weight range of 18–25 grams, 0.5 milliliter of a water suspension of the drug containing 4,000 units per milliliter. If no animal dies within 48 hours, the sample is nontoxic. If one or more animals die within 48 hours, repeat the test with 5 unused mice weighing 20 grams (±0.5 gram each); if all animals survive the repeat test, the sample is nontoxic.

(c) *Moisture.* Proceed as directed in § 141.5 (a).

(d) *pH.* Prepare a saturated solution, using approximately 100 milligrams of the sample per milliliter, and proceed as directed in § 141.5 (b).

(e) *Zinc content*—(1) *Reagents*—(i) *8-hydroxyquinoline.* Dissolve 5.0 grams of 8-hydroxyquinoline in 12 milliliters of acetic acid. Dilute to 100 milliliters with distilled water and filter if not clear. Do not use this solution if it is 2 weeks old.

(ii) *Ammonium acetate solution (approximately 2 N).* Dissolve 150–160 grams of ammonium acetate in 1 liter of distilled water and filter if not clear.

(iii) *10-percent acetic acid.* Add 1 part of acetic acid to 9 parts of water.

(2) *Procedure.* Accurately weigh approximately 500 milligrams of the sample in a 400-milliliter beaker. Dissolve the sample in 5 milliliters of 10-percent acetic acid and dilute to about 100 milliliters with distilled water. Heat the solution to 70° C.–90° C. and then add 10 milliliters of the 8-hydroxyquinoline reagent. Slowly add the ammonium acetate solution until a pH of 4.9–5.1 is reached (usually about 20 milliliters is required). Heat just below the boiling point for 2–5 minutes and then allow to cool for 30–60 minutes. Filter through a tared Gooch crucible, wash the precipitate thoroughly with distilled water, and dry to constant weight at 130° C.–140° C. Calculate the percentage of zinc content as follows:

$$\text{Percent zinc} = \frac{\text{weight of precipitate} \times 18.49}{\text{weight of sample in milligrams}}$$

§ 141.419 *Bacitracin-neomycin-polymyxin troches, zinc bacitracin-neomycin-polymyxin troches*—(a) *Potency*—(1) *Content of bacitracin or zinc bacitracin.* Proceed as directed in § 141.403 (a), except if it is zinc bacitracin add 0.1 milliliter of 3 *N* HCl per 1,000 units when preparing the initial stock solution. The content of bacitracin or zinc bacitracin is satisfactory if the drug contains not less than 85 percent of the number of units per troche that it is represented to contain.

(2) *Neomycin content.* Proceed as directed in § 141.410 (a) (1) (ii). The content of neomycin is satisfactory if the drug contains not less than 85 percent of the number of milligrams of activity that it is represented to contain.

(3) *Polymyxin content.* Proceed as directed in § 141.112 (a) (1) (ii), except calculate from the quantity of neomycin found (using the method prescribed in subparagraph (2) of this paragraph) the quantity of neomycin that would be present when the sample is diluted to contain 100 units of polymyxin (labeled potency) per milliliter. Prepare the polymyxin standard curve by adding this calculated quantity of neomycin to each concentration of polymyxin used for the curve. Use this standard curve to calculate the polymyxin content of the sample. Its content of polymyxin is satisfactory if it contains not less than 85 percent of the number of units per troche that it is represented to contain.

(b) *Moisture.* Proceed as directed in § 141.5 (a).

2. In § 146.403 *Bacitracin tablets* • • •, subparagraph (1) (iii) of paragraph (c) *Labeling* is amended by changing the semicolon at the end thereof to a comma and adding the following clause: "except that the blank may be filled in with the date which is 18 months after the month during which the batch was certified if the person who requests certification has submitted to the Commissioner results of tests and assays showing that after having been stored for such period of time such drug as prepared by him complies with the standards prescribed by paragraph (a) of this section;"

3. Part 146 is amended by adding the following new sections:

§ 146.418 *Zinc bacitracin (bacitracin zinc salt)*—(a) *Standards of identity, strength, quality, and purity.* Zinc bacitracin is the zinc salt of a kind of bacitracin or a mixture of two or more such salts. It is so purified and dried that:

(1) Its potency is not less than 40 units per milligram.

(2) It is nontoxic.

(3) Its moisture content is not more than 5 percent.

(4) Its pH is not less than 6.0 and not more than 7.5.

(5) Its zinc content is not more than 10 percent by weight on a moisture-free basis.

(b) *Packaging.* In all cases the immediate containers shall be tight containers as defined by the U. S. P. The composition of the immediate containers shall be such as will not cause any change in the strength, quality, or purity of the contents beyond any limit therefor in applicable standards, except that minor changes so caused that are normal and unavoidable in good packaging, storage, and distribution practice shall be disregarded.

(c) *Labeling.* Each package of zinc bacitracin shall bear on its outside wrapper or container and the immediate container:

(1) The batch mark.

(2) The number of units of bacitracin activity per milligram of zinc bacitracin and the number of grams of the drug in the immediate container.

(3) The statement "Expiration date ------," the blank being filled in with the date which is 24 months after the month during which the batch was certified.

(4) The statement "For use only in the manufacture of nonparenteral drugs."

(5) The statement "Caution: Federal law prohibits dispensing without prescription."

(d) *Request for certification; samples.* (1) In addition to complying with the requirements of § 146.2, a person who requests certification of a batch shall submit with his request a statement showing the batch mark, the number of packages of each size in the batch, the number of units of bacitracin activity per milligram of zinc bacitracin, the zinc content, and the total number of grams of zinc bacitracin in each package. Such request shall be accompanied or followed by the results of tests and assays made by him on the batch for potency, toxicity, moisture, pH, and zinc content.

(2) Such person shall also submit with his request an accurately representative sample of the batch, consisting of 5 packages each containing approximately 1.0 gram taken from a different part of such batch, and each shall be packaged in accordance with the requirements of paragraph (b) of this section.

(e) *Fees.* The fee for the services rendered with respect to each batch under the regulations in this part shall be:

(1) $4.00 for each immediate container in the sample submitted in accordance wih paragraph (d) (2) of this section.

(2) If the Commissioner considers that investigations other than the examination of such immediate containers are necessary to determine whether or not such batch complies with the requirements of § 146.3 for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d).

§ 146.419 *Bacitracin-neomycin-polymyxin troches, zinc bacitracin-neomycin-polymyxin troches*—(a) *Standards of identity, strength, quality, and purity.* Bacitracin-neomycin-polymyxin troches and zinc bacitracin-neomycin-polymyxin troches are troches composed of bacitracin or zinc bacitracin, neomycin, and polymyxin B with one or more suitable and harmless diluents, binders, lubricants, colorings, and flavorings. The potency of each troche is not less than 200 units of bacitracin or zinc bacitracin, 5.0 milligram of neomycin, and 2,000 units of polymyxin B. Its moisture content is not more than 5 percent. The bacitracin used conforms to the standards prescribed therefor by § 146.401 (a) except § 146.401 (a) (1), (2), and (4), but its potency is not less than 30 units per milligram. The zinc bacitracin used conforms to the standards prescribed therefor by § 146.418 (a). The neomycin used conforms to the standards prescribed therefor by § 146.410 (a) (2). The polymyxin B used conforms to the standards prescribed therefor by § 146.107 (a). Each other substance used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(b) *Packaging.* It shall be packaged in accordance with the requirements prescribed by § 146.403 (b).

(c) *Labeling.* Each package shall bear on its label or labeling, as hereinafter indicated, the following:

(1) On the outside wrapper or container and the immediate container:

(i) The batch mark.

(ii) The number of units of bacitracin or zinc bacitracin, the number of milligrams of neomycin, and the number of units of polymyxin B in each troche of the batch.

(iii) The statement "Expiration date ----------," the blank being filled in with the date which is 12 months after the month during which the batch was certified.

(2) On the outside wrapper or container:

(i) The statement "Caution: Federal law prohibits dispensing without prescription."

(ii) If it is packaged for dispensing, a reference specifically identifying a readily available medical publication containing information (including contraindications and possible sensitization) adequate for the use of such drug by practitioners licensed by law to administer it; or a reference to a brochure or other printed matter containing such information, and a statement that such brochure or other printed matter will be sent on request: *Provided, however,* That this reference may be omitted if the information is contained in a circular or other labeling within or attached to the package.

(d) *Request for certification; samples.* (1) In addition to complying with the

requirements of § 146.2, a person who requests certification of a batch shall submit with his request a statement showing the batch mark, the number of packages of each size in such batch, the batch mark and (unless they were previously submitted) the dates on which the latest assays of the bacitracin or zinc bacitracin, neomycin, and polymyxin B used in making such batch were completed, the potency of each troche, the quantity of each ingredient used in making the batch, the date on which the latest assay of the drug comprising such batch was completed, and a statement that each ingredient used in making the batch conforms to the requirements prescribed therefor by this section.

(2) Except as otherwise provided in subparagraph (4) of this paragraph, such person shall submit in connection with his request results of the tests and assays listed after each of the following, made by him on an accurately representative sample of:

(i) The batch: average potency of bacitracin or zinc bacitracin, neomycin, and polymyxin per troche, and average moisture.

(ii) The bacitracin used in making the batch; potency, toxicity, moisture, and pH.

(iii) The zinc bacitracin used in making the batch; potency, toxicity, moisture, pH, and zinc content.

(iv) The neomycin used in making the batch; potency, toxicity, moisture, and pH.

(v) The polymyxin used in making the batch; potency and toxicity.

(3) Except as otherwise provided by subparagraph (4) of this paragraph, such person shall submit in connection with his request, in the quantities hereinafter indicated, accurately representative samples of the following:

(i) The batch: 1 troche for each 5,000 troches in the batch, but in no case less than 40 troches or more than 100 troches, collected by taking single troches at such intervals throughout the entire time of tableting that the quantities tableted during the intervals are approximately equal.

(ii) The bacitracin used in making the batch; 6 packages, each containing approximately equal portions of not less than 0.5 gram, packaged in accordance with the requirements of § 146.401 (b).

(iii) The zinc bacitracin used in making the batch; 5 packages, each containing approximately equal portions of not less than 1.0 gram, packaged in accordance with the requirements of § 146.418 (b).

(iv) The neomycin used in making the batch; 5 packages, each containing approximately equal portions of not less than 0.5 gram.

(v) The polymyxin used in making the batch; 5 packages, each containing approximately equal portions of not less than 0.5 gram.

(vi) In case of an initial request for certification, each other ingredient used in making the batch; 1 package of each, containing approximately 5 grams.

(4) No result referred to in subparagraph (2) (ii), (iii), (iv), and (v) of this paragraph, and no samples referred to in subparagraph (3) (ii), (iii), (iv), and (v) of this paragraph, is required if such result or sample has been previously submitted.

(e) *Fees.* The fee for the services rendered with respect to each batch under the regulations in this part shall be:

(1) $1.00 for each troche in the sample submitted in accordance with paragraph (d) (3) (i) of this section; $4.00 for each package in the samples submitted in accordance with paragraph (d) (3) (ii), (iii), (iv), (v), and (vi) of this section.

(2) If the Commissioner considers that investigations, other than examination of such troches and packages are necessary to determine whether or not such batch complies with the requirements of § 146.3 for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d).

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371)

Notice and public procedure are not necessary prerequisites to the promulgation of this order, and I so find, since it was drawn in collaboration with interested members of the affected industry and since it would be against public interest to delay providing for the amendments set forth above.

This order shall become effective upon publication in the FEDERAL REGISTER, since both the public and the affected industry will benefit by the earliest effective date, and I so find.

Dated: November 17, 1953.

[SEAL] OVETA CULP HOBBY, *Secretary.*

[F. R. Doc. 53-9843; Filed, Nov. 20, 1953; 8:54 a. m.]

# TITLE 31—MONEY AND FINANCE: TREASURY

## Chapter V—Foreign Assets Control, Department of the Treasury

### PART 500—FOREIGN ASSETS CONTROL REGULATIONS

### AMENDMENT OF REGULATIONS RELATING TO IMPORTATIONS

The Foreign Assets Control Regulations, 31 CFR 500.101–500.808, are hereby amended by the amendment of § 500.204 (a) (2) and (a) (3) and by the amendment of § 500.536 (c) and the addition of subdivision (v) to § 500.536 (d) (1).

The principal effect of the amendment of § 500.204 is to make certain changes in the lists of commodities dealings in which are prohibited except under license. Attention is specifically directed to § 500.204 (a) (2) as it relates to aniseed, aniseed oil, eggs and egg products, fur skins, gallnuts, jade, menthol, and silk (tussah). Attention is specifically directed to § 500.204 (a) (3) as it relates to camphor, camphor oil, cane webbing, and hardwood manufactures.

The amendment of § 500.536 makes the provisions of the general license contained in that section applicable to goods of Chinese type thereafter imported, the German origin of which is properly certified by the Government of the Federal Republic of Germany. Goods so certified may be purchased, financed, and imported without any specific Foreign Assets Control license.

§ 500.204 *Importation of and dealings in certain merchandise.* (a) Except as specifically authorized by the Secretary of the Treasury (or any person, agency, or instrumentality designated by him) by means of regulations, or rulings, instructions, licenses, or otherwise, no person subject to the jurisdiction of the United States may purchase, transport, import, or otherwise deal in or export in any transaction with respect to any merchandise outside the United States if such merchandise is:

* * * * *

(2) Merchandise specified in this subparagraph, however processed, unless such merchandise is imported directly from a country named as excepted for that type of merchandise:

| *Type of merchandise* | *Exceptions* |
|---|---|
| (i) All merchandise, not elsewhere specified in this paragraph, if prior to Dec. 17, 1950, imports thereof into the United States were chiefly of Chinese origin within the meaning of this chapter, and | None. |

| *Type of merchandise* | *Exceptions* |
|---|---|
| (ii) All of the following specified types of merchandise: | |
| Aniseed | Mexico, Spain, Turkey. |
| Aniseed oil | None. |
| Antiques, Chinese type (other than Chinese porcelain which qualifies within the provisions of par. 1811 of the Tariff Act of 1930 and which is decorated with the armorial bearings, crests, monograms, cyphers, or badges of European or American families or societies or bearing motifs based thereon, or with European or American political, memorial, or Masonic scenes or devices or with European or American figures, ships, or other scenes, or with motifs or inscriptions in English, Latin, or any other European language). | None. |
| Bamboo, split | None. |
| Beverages, Chinese type | None. |
| Braids, straw | Italy, Japan. |
| Bristles, hog, Asiatic (other than Indian), including such bristles in knots or other processed condition. | None. |
| Bristles, hog, dyed, including such bristles in knots or other processed condition. | None. |
| Carpet wool, Tibetan type (including Nepalese type) | None. |
| Cashmere | Iran. |
| Cassia | Associated States of Cambodia, Laos and Vietnam (formerly known as Indo-China) Indonesia. |
| Cassia oil | None. |
| Drugs, Chinese type | None. |
| Eggs, poultry: | |
| Whole in the shell, other than chicken | None. |
| Whole, dried | None. |
| Albumen, dried | None. |
| Yolks, dried | None. |
| Firecrackers | None. |
| Floor coverings, grass and straw, including seagrass mats and squares. | Japan. |
| Foodstuffs, Chinese type | None. |
| Fur skins: | |
| Goat and kid | Argentina, Ethiopia (including Eritrea), Iran, Iraq. |
| Kolinsky | Republic of Korea. |
| Weasel | Canada. |
| Gallnuts, including tannic acid, other than Aleppo | None. |
| Ginger root, candied or otherwise prepared or preserved | None. |
| Hair, human: | |
| Raw, Asiatic | None. |
| Nets and netting | None. |
| Hats, unfinished: | |
| Manila Hemp (Abaca) | None. |
| Palm leaf | Mexico, Philippines. |
| Straw | Brazil, Dominican Republic, Italy, Japan, Philippines. |
| (Unfinished hats of the following types are not included: Lindu, Lintao, Macorra, Panama, Pandan, Raffia, Toquilla, and Yeddo.) | |
| Jade stones, cut but not set and suitable for use in jewelry | None. |
| Medicines, prepared, Chinese type | None. |
| Menthol, natural and synthetic | Brazil. |
| Musk | None. |
| Silk, tussah | None. |
| Sophora Japonica, including Rutin | None. |
| Tea, Chinese type | Formosa. |
| Tung oil | Argentina, Brazil, Paraguay. |
| Walnuts | France, Iran, Italy, Turkey. |
| Wood: | |
| Agar Agar. | |
| Antimony. | |
| Bamboo: | |
| Bags, baskets and other manufactures excluding furniture. | |
| Poles and sticks. | |
| Bismuth. | |
| Camphor, natural and synthetic. | |
| Camphor oil, natural and synthetic. | |
| Cane webbing. | |
| Carpet wool. | |
| Carpets. | |
| Chinaware. | |
| Citronella oil. | |
| Cotton manufactures: | |
| Embroideries and laces. | |
| Embroidered and lace articles. | |
| Handkerchiefs. | |
| Wearing apparel. | |
| Cotton waste. | |
| Earthenware. | |
| Feathers and down, Asiatic. | |
| Hair, animal. | |
| Hardwood manufactures, including furniture other than bentwood furniture. | |
| Hats, paper. | |
| Hides, buffalo, including India water buffalo. | |
| Ivory manufactures. | |
| Linen manufactures: | |
| Handkerchiefs. | |
| Embroideries and laces. | |
| Embroidered and lace articles. | |
| Other articles excluding wearing apparel. | |
| Molybdenum. | |
| Quicksilver. | |
| Ramie. | |
| Rugs. | |
| Seagrass and straw manufactures, excluding floor covering. | |
| Sesame, oil and seed. | |
| Shoes, leather-soled with non-leather uppers. | |
| Silk: | |
| Raw and manufactures. | |
| Waste. | |
| Skins, deer and goat. | |
| Stones, semiprecious and manufactures thereof excluding jewelry. | |
| Tapestries (including needlework tapestries). | |
| Tapioca (including tapioca flour). | |
| Tin: | |
| Alloys. | |
| Bars, blocks and pigs. | |
| Ore. | |
| Tungsten ores and concentrates. | |

(3) Merchandise specified in this subparagraph, howsoever processed, if such merchandise is or has been located in or transported from or through Hong Kong, Macao, or any country not in the authorized trade territory.

§ 500.536 *Certain transactions with respect to merchandise affected by § 500.204.* * * *

(c) The purchase outside the United States for importation into the United States of merchandise specified in § 500.204 (other than merchandise to which § 500.204 (a) (1) is applicable) and the importation of such merchandise into the United States (including transactions listed in paragraph (a) of this section) are authorized if the merchandise is shipped to the United States directly or on a through bill of lading from the Federal Republic of Germany, Hong Kong, Japan, Taiwan (Formosa) or the Republic of Korea, provided that there is presented to the collector of customs in connection with such importation the original of an appropriate certificate of origin as defined in paragraph (d) of this section.

(d) A certificate of origin is appropriate for the purposes of this section only if

(1) It is a certificate of origin which

* * * * *

(v) In the case of merchandise shipped from the Federal Republic of Germany, is issued by the Federal Ministry of Economics of the Federal Republic of Germany (or its Federal Agency for Commodity Trade) and relates to merchandise exported from Germany after November 20, 1953.

(Sec. 5, 40 Stat. 415, as amended; 50 U. S. C. App. 5; E. O. 9193, July 6, 1942, 7 F. R. 5205; 3 CFR, 1943 Cum. Supp. E. O. 9389, Aug. 20, 1948, 13 F. R. 4891; 3 CFR, 1948 Supp.)

[SEAL] A. N. OVERBY, *Acting Secretary of the Treasury.*

# TITLE 14—CIVIL AVIATION

## Chapter I—Civil Aeronautics Board

### Subchapter A—Civil Air Regulations

[Supp. 1]

## PART 18—MAINTENANCE, REPAIR, AND ALTERATION OF AIRFRAMES, POWERPLANTS, PROPELLERS, AND APPLIANCES

### CAA RULES, INTERPRETATIONS, AND POLICIES

The rules, interpretations, and policies of the Administrator contained in this supplement, implement the provisions of Part 18 published on April 5, 1952, in 17 F. R. 2975, and made effective by the Civil Aeronautics Board on June 15, 1952. The rules are made effective without delay in the interest of aviation safety. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act is impracticable and contrary to the public interest, and therefore is not required.

All rules of the Civil Aeronautics Board published in Part 18 are repeated here for the guidance of the public. The following rules, interpretations, and policies, which supersede all rules, interpretations, and policies previously promulgated by the Administrator of Civil Aeronautics under Part 18, are hereby adopted:

APPLICABILITY AND DEFINITIONS

Sec.
18.0 Applicability of this part.
18.1 Definitions.
18.1-1 Major alterations (CAA interpretations which apply to § 18.1 (a) (15)).
18.1-2 Procedures for handling typical major alterations (CAA policies which apply to § 18.1 (a) (15)).
18.1-3 Major repairs (CAA interpretations which apply to § 18.1 (a) (16)).
18.1-4 Minor alterations (CAA interpretations which apply to § 18.1 (a) (18)).
18.1-5 Minor repair (CAA interpretations which apply to § 18.1 (a) (19)).
18.1-6 Preventive maintenance (CAA interpretations which apply to § 18.1 (a) (22)).

GENERAL

18.10 Persons authorized to perform maintenance, preventive maintenance, repairs, and alterations.
18.10-1 Persons authorized to perform maintenance, repairs, and alterations (CAA interpretations which apply to § 18.10 (a)).
18.11 Persons authorized to approve maintenance, repairs, and alterations.
18.11-1 Return to service (CAA interpretations which apply to § 18.11).
18.11-2 Contacting CAA representative prior to alteration (CAA policies which apply to § 18.11).
18.12 Flight tests.
18.12-1 Flight tests (CAA interpretations which apply to § 18.12).
18.12-2 Flight test after component replacement (CAA policies which apply to § 18.12).
18.13 Aircraft operating limitations.
18.13-1 Aircraft operating limitations (CAA policies which apply to § 18.13).

MAINTENANCE, REPAIR, AND ALTERATION RECORDS

18.20 Required records and entries.
18.20-1 Flight time in aircraft record (CAA interpretations which apply to § 18.20).
18.21 Content of repair and alteration records.
18.21-1 Scope of repair and alteration records (CAA interpretations which apply to § 18.21 (a)).
18.22 Form and disposition of major repair or major alteration records.
18.22-1 Procedure for certificated mechanics (CAA rules which apply to § 18.22).
18.22-2 Procedure for certificated repair stations and manufacturers (CAA rules which apply to § 18.22).
18.23 Provisions for air carrier records.

PERFORMANCE RULES

18.30 Standard of performance; general.
18.30-1 Standard of performance (CAA interpretations which apply to § 18.30).
18.30-2 Wood aircraft structures (CAA policies which apply to § 18.30).
18.30-3 Fabric covering (CAA policies which apply to § 18.30).
18.30-4 Metal aircraft structures (CAA policies which apply to § 18.30).
18.30-5 Control cables and terminals (CAA policies which apply to § 18.30).
18.30-6 Bolts, screws, and miscellaneous fasteners (CAA policies which apply to § 18.30).
18.30-7 Corrosion protection, cleaners, and paint removers (CAA policies which apply to § 18.30).
18.30-8 Identification and inspection of material (CAA policies which apply to § 18.30).
18.30-9 Aircraft equipment (CAA policies which apply to § 18.30).
18.30-10 Windshields and enclosures (CAA policies which apply to § 18.30).
18.30-11 Hydraulic systems (CAA policies which apply to § 18.30).
18.30-12 Electrical systems (CAA policies which apply to § 18.30).
18.30-13 Instruments (CAA policies which apply to § 18.30).
18.30-14 Engine and fuel systems (CAA policies which apply to § 18.30).
18.30-15 Propellers (CAA policies which apply to § 18.30).
18.30-16 Weight and balance control (CAA policies which apply to § 18.30).
18.30-17 Procedures and guiding comments covering typical major alterations and modifications (CAA policies which apply to § 18.30).

AUTHORITY: §§ 18.0 to 18.30-17 issued under sec. 205, 52 Stat. 984 as amended; 49 U. S. C. 425. Interpret or apply secs. 601, 605, 52 Stat 1007, 1010, as amended; 49 U. S. C. 551, 555.

### APPLICABILITY AND DEFINITIONS

§ 18.0 *Applicability of this part.* This part establishes rules for the performance of maintenance, repair, and alteration of aircraft for which airworthiness certificates have been issued by the Administrator, or any component thereof.[1]

18.1 *Definitions.* (a) As used in this part terms are defined as follows:

(1) *Aircraft.* An aircraft shall mean any contrivance now known or hereafter invented, used, or designed for navigation of or flight in the air, including airframe, powerplant, propeller, and appliances.

(2) *Aircraft engine.* An aircraft engine shall mean an engine used, or intended to be used, for propulsion of aircraft and includes all parts, appurtenances, and accessories thereof other than propellers.

(3) *Airframe.* Airframe shall mean any and all kinds of fuselages, booms, nacelles, cowlings, fairings, empennages, nacelle surfaces, and landing gear, and all parts, accessories, or controls, of whatever description, appertaining thereto, but not including powerplants and propellers.

(4) *Alteration.* An alteration shall mean any appreciable change in the design of an airframe, powerplant, propeller, or appliance.

(5) *Appliances.* Appliances shall mean instruments, equipment, apparatus, parts, appurtenances, or accessories of whatever description, which are used or are capable of being or intended to be used, in the navigation, operation, or control of aircraft in flight (including communication equipment), electronic devices, and any other mechanism or mechanisms installed in or attached to aircraft during flight, but excluding parachutes), and which are not a part or parts of airframes, powerplants, or propellers.

(6) *Appropriately certificated air carrier.* An appropriately certificated air carrier shall mean an air carrier holding an air carrier operating certificate, and which is required either by its operating certificate or by operations specifications approved by the Administrator, to provide for a continuous airworthiness maintenance and inspection program to be performed by the carrier in accordance with its maintenance manual.

(7) *Approved.* Approved, when used either alone or as modifying such words as aircraft, airframe, powerplant, propeller, appliance, method, or technique, shall mean approved by the Administrator of Civil Aeronautics in accordance with the applicable requirements of this subchapter.

(8) *Authorized representative of the Administrator.* An authorized representative of the Administrator shall mean any employee of the Civil Aeronautics Administration or any private person, authorized by the Administrator to perform particular duties of the Administrator under the provisions of this part.

(9) *Certificated mechanic.* A certificated mechanic shall mean an individual holding a valid mechanic certificate with appropriate ratings issued by the Administrator.

(10) *Certificated repair station.* A certificated repair station shall mean a facility for the maintenance, repair, and alteration of airframes, powerplants, propellers, or appliances, holding a valid repair station certificate with appropriate ratings issued by the Administrator.

(11) *Certificated repairman.* A certificated repairman shall mean an individual holding a valid repairman certificate issued in accordance with Subpart B of Part 24 of this subchapter.

(12) *Component.* A component shall mean a constituent part of an aircraft.

(13) *Instrument.* An instrument shall mean a device utilizing internal mechanism to indicate visually or aurally the attitude, altitude, performance, or operation of an aircraft or any component thereof, and shall include electronic instrumentation and devices for the automatic control of navigation of the aircraft in flight.

(14) *Maintenance.* Maintenance which includes preventive maintenance shall mean the inspection, overhaul, repair, upkeep, and preservation of airframes, powerplants, propellers, and appliances, including the replacement of parts.

(15) *Major alteration.* A major alteration of an aircraft or any component thereof shall mean:

(i) An alteration which might cause an appreciable change in its weight, balance, structural strength, performance, power-

[1] The Administrator publishes Civil Aeronautics Manual 18 which lists operations considered to be maintenance, preventive maintenance, minor and major repairs, and alterations, and sets forth acceptable procedures, methods, and practices under the provisions of this part. This manual may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

plant operation, flight characteristics, or other qualities affecting airworthiness, or

(ii) An alteration which is not accomplished in accordance with accepted practices or cannot be performed by means of elementary operations.

(16) *Major repair.* A major repair to an aircraft or any component thereof shall mean:

(i) A repair which, if improperly accomplished, would adversely affect the structural strength, performance, flight characteristics, powerplant operation, or other qualities affecting airworthiness, or

(ii) A repair which is not accomplished in accordance with accepted practices or cannot be performed by means of elementary operations.

(17) *Manufacturer.* A manufacturer shall mean any person who:

(i) Holds a type or production certificate for and manufactures an aircraft, aircraft engine, propeller, or appliance, or

(ii) Manufactures an approved appliance in accordance with a specification issued by the Administrator.

(18) *Minor alteration.* A minor alteration to an aircraft or any component thereof shall mean an alteration other than a major alteration.

(19) *Minor repair.* A minor repair shall mean any repair other than a major repair.

(20) *Person.* Person shall mean any individual, firm, copartnership, corporation, company, association, joint-stock association, or body politic, and includes any trustee, receiver, assignee, or other similar representative thereof.

(21) *Powerplant.* Powerplant shall mean aircraft engine and its component parts, and other parts necessary to properly install such engine in an aircraft, but not the propeller (if used).

(22) *Preventive maintenance.* Preventive maintenance shall mean simple or minor preservation operations and the replacement of small standard parts not involving complex assembly operations.[2]

(23) *Propeller.* Propeller shall mean a device for propelling an aircraft through the air having blades mounted on a power-driven shaft, which when rotated produces by its action on the air a thrust approximately parallel to the longitudinal axis of the aircraft, and shall also include control components normally supplied by the manufacturer of the propeller. It shall also include a system of rotating airfoils which serve either to counteract the effect of the main rotor torque of a rotorcraft or to maneuver a rotorcraft about 1 or more of its 3 principal axes.

(24) *Repair.* Repair shall mean the restoration of an airframe, powerplant, propeller, or appliance to a condition for safe operation after damage or deterioration.

(25) *Type.* Type shall mean all aircraft of the same basic design, including all modifications thereto.

§ 18.1-1 *Major alterations (CAA interpretations which apply to § 18.1 (a) (15)).* Changes of the following types to an airframe, powerplant, propeller, or appliance, when not listed in the specifications issued by the Civil Aeronautics Administration, are considered aircraft major alterations.

(a) *Airframe major alterations.* (1) Major changes to the basic design or external configuration of any structural component such as:

Wings.
Tail surfaces.
Fuselage.
Engine mounts.
Control system.
Landing gear.
Hull or floats.
Elements of components (spars, ribs, fittings, shock absorbers, bracing, cowlings, fairings, balance weights, etc.) of an airframe.
Hydraulic and electrical actuating system of components.
Rotor blades.

(2) Changes in equipment where the cumulative weight change of all such alterations since the aircraft was reweighed or the weight and balance data recomputed exceed two percent of the certificated empty weight of aircraft under 12,500 pounds gross weight or ½ of one percent of the certificated maximum landing weight on aircraft over 12,500 pounds gross weight and or the empty weight center of gravity location exceeds ½ of one percent of M. A. C.

(3) Changes to the basic design of the fuel, oil, cooling, heating, cabin pressurization, electrical, hydraulic, deicing, and exhaust systems.

(4) Modifications to the wing or to fixed or movable control surfaces which affect flutter and vibration characteristics.

(5) Installation or modification of any system affecting the structural airworthiness, flight behavior, or control of the aircraft.

(b) *Powerplant major alterations.* Changes such as the following are considered major powerplant alterations:

(1) Installation of a type of engine different from that approved for the aircraft.

(2) Conversion of an aircraft engine from one approved model to another, involving any changes in compression ratio, propeller reduction gear, impeller gear ratios or the substitution of major engine parts which requires extensive rework and testing of the engine. (See § 13.30-14 (a) (9) for details of identification of converted engines.)

(3) Modification of the engine by replacing aircraft engine structural parts with other than those supplied by the original manufacturer or otherwise specifically approved by the Civil Aeronautics Administration.[1]

(4) Installation of an accessory which has not been approved for the engine.

(5) Removal of accessories that are listed as required equipment on the aircraft or engine specification.

(6) Changes to the basic design of the engine mount.

(7) Installation of structural parts such as engine mount attachment bolts or engine attachment bolts, other than the type of parts approved for the installation.

(8) Conversions of any sort for the purpose of using fuel of rating or grade other than that called for in the engine specification.

(c) *Propeller major alterations.* Changes such as the following, when not authorized in the propeller specifications issued by the Civil Aeronautics Administration,[2] are considered major propeller alterations:

(1) Changes in blade design.

(2) Changes in hub design.

(3) Changes in governor or control design.

(4) Installation of a propeller governor or feathering system.

(5) Installation of propeller de-icing system.

(6) Installation of parts not approved for the propeller.

(7) Any changes in the design of a balance propeller or its controls.

(d) *Appliance major alterations.* Changes to the basic design not made in accordance with "Administrator of Civil Aeronautics" approved recommendations of the appliance manufacturer or in accordance with a CAA Airworthiness Directive are considered to be major appliance alterations.

§ 18.1-2 *Procedures for handling certain typical major alterations or modifications (CAA policies which apply to § 18.1 (a) (15)).* Procedures for handling certain typical alterations or modifications are discussed in detail in § 18.30-17.

§ 18.1-3 *Major repairs (CAA interpretations which apply to § 18.1 (a) 16).* Repairs of the following types to an airframe, powerplant, propeller, or appliance are considered to be major repairs:

(a) *Airframe major repairs.* (1) All repairs involving the strengthening, reinforcing, splicing and manufacturing of primary structural members or their replacement, when replacement is by fabrication such as riveting or welding, are considered airframe major repairs. The following are examples of such members:

Box beams.
Monocoque or semimonocoque wings or control surfaces.
Wing stringers or chord members.
Repairs involving the substitution of materials.
Spars.
Spar flanges.
Members of truss-type beams.
Thin sheet webs of beams.
Keel and chine members of boat hulls or floats.
Corrugated sheet compression members which act as flange material of wings or tail surfaces.
Wing main ribs and compression members.
Wing or tail surface brace struts.
Engine mounts.
Fuselage longerons.
Members of the side truss, horizontal truss, or bulkheads.
Main seat support braces and brackets.
Landing gear brace struts.
Axles.
Wheels.
Skis, and ski pedestals.
Parts of the control system such as control columns, pedals, shafts, brackets, or horns.

(2) The repair of damaged areas in metal or plywood stressed covering exceeding six inches in any direction; the repair of portions of skin sheets by making additional seams; splicing of skin sheets.

(3) Repair of three or more adjacent wing or control surface ribs or leading

[1] The Administrator will publish, as part of Civil Aeronautics Manual 18, the various operations constituting preventive maintenance of the several types of aircraft.

[2] Changes as above require extensive proof tests as specified in Part 13 of the Civil Air Regulations.

[2] Changes such as outlined above usually involve proof testing of the propeller or governor in accordance with Part 14 of the Civil Air Regulations.

edge of wings and control surfaces, between such adjacent ribs.

(4) Repair of fabric covering involving a greater area than required to repair two adjacent ribs; replacement of fabric on fabric covered components such as wings, fuselages, stabilizers, and control surfaces.

(5) Rebuilding, including rebottoming, of removable or integral fuel tanks, and oil tanks.

(b) *Powerplant major repairs.* Repairs such as the following are considered powerplant major repairs:

(1) Any maintenance operation requiring (i) the separation or disassembly of a crankcase or crankshaft of an engine equipped with an integral supercharger and or propeller reduction gearing; (ii) disassembly of a nonfloat type carburetor or fuel injection unit used with such engines; or, (iii) top overhaul of such engines.

(2) Special repairs to structural engine parts by welding, plating, metalizing or other methods. (See § 18.30–14 (a) (10) through (12) for details.)

(c) *Propeller major repairs.* Repairs of the following types are considered to be major propeller repairs:

(1) Any repairs to or straightening of steel blades.

(2) Repairing or machining of steel hubs.

(3) Shortening of blades.

(4) Retipping of wood propellers.

(5) Replacement of outer laminations on fixed pitch wood propellers.

(6) Repairing elongated bolt holes in the hub of fixed pitch wood propellers.

(7) Inlay work on wood blades.

(8) All repairs to composition blades.

(9) Replacement of tip fabric.

(10) Replacement of plastic covering.

(11) Repair of propeller governors.

(12) Repair of balance propellers of rotocraft.

(13) Overhaul of controllable pitch propellers (see § 18.30–15 (c) (1)).

(14) Repairs to deep dents, cuts, scars, nicks, etc., and straightening of aluminum blades, such as described in § 18.30–15 (b) (3) (iii).

(15) The repair or replacement of internal elements of blades.

(d) *Appliance major repairs.* Repairs to appliances which are complex repair operations requiring the use of skilled techniques and or special tools and test equipment not available to a mechanic working outside of an appliance shop are considered to be a major repair. Major repairs to appliances include, but are not limited to the following:

(1) *Instruments.* All repairs to instruments.

(2) *Electronics equipment.* Adjusting and calibration of VOR, ILS or DME equipment.

(3) *Electrical equipment.* Rewinding of any electrical accessory field coil.

(4) *Hydraulic accessories.* Complete disassembly of complex hydraulic power valves.

(5) *Mechanical accessories.* (i) Pressure type carburetor overhaul. (ii) Overhaul of pressure type fuel, oil or hydraulic pumps.

§ 18.1–4 *Minor alterations (CAA interpretations which apply to § 18.1 (a) (18)).* Changes such as the following to an airframe, powerplant, propeller, or appliance are considered minor aircraft alterations:

(a) *Airframe minor alterations.* Changes such as listed below are considered to be airframe minor alterations:

(1) *Optional equipment on aircraft specification.* The installation or removal of specific items of optional equipment listed in the aircraft specification[3] when such installation is made in accordance with the manufacturer's instructions.

(2) *Equipment of equal or less weight.* The installation or removal of equipment of equal or less weight and in the same location as that listed as optional equipment in the aircraft specification.

(3) *Changes to improve service life.* Changes of a minor nature may be made to structural and nonstructural elements for the purpose of improving the service life or reducing maintenance costs, provided the cumulative weight changes of all such alterations since the aircraft was reweighed or the weight and balance data recomputed do not exceed two percent of the certificated weight empty on aircraft under 12 500 pounds gross weight, or one-half of 1 percent of the certificated maximum landing weight on aircraft over 12,500 pounds gross weight and provided the empty weight center of gravity location does not exceed one-half of 1 percent of MAC.

(b) *Powerplant minor alterations.* Any powerplant alteration other than listed as a major alteration under § 18.1–(1) (b) is considered to be a minor powerplant alteration. The following are examples of powerplant minor alterations:

(1) Alterations to supporting brackets or braces of units of the powerplant which do not adversely affect the structural integrity of such parts.

(2) Changes to the cowling which do not affect engine cooling, such as revisions to mounting bracket attachments.

(3) The alteration or conversion of an aircraft engine by simple substitution of parts of different design or addition of CAA approved parts in accordance with approved practices and in conformity to the engine manufacturer's or CAA instructions.

(c) *Propeller minor alterations.* Any propeller alteration other than defined as a major alteration under § 18.1–1 (c) is considered to be a minor propeller alteration. The following are examples of minor propeller alterations:

(1) Initial installation of a propeller spinner.

(2) Changes to the basic design of, or the relocating of brackets or braces of the propeller controls.

(3) Changes to the basic design of propeller control rods or cables.

(d) *Appliance minor alterations.* Changes to the basic design made in accordance with the "Administrator of Civil Aeronautics" approved recommendations of the appliance manufacturer, or in accordance with a CAA Airworthiness Directive are considered to be minor appliance alterations.

§ 18.1–5 *Minor repairs (CAA interpretation which apply to § 18.1 (a) (19)).* Repairs of the following types to an airframe, powerplant, propeller, or appliance are considered to be minor repairs:

(a) *Airframe minor repairs*—(1) *Nonstructural members.* Repairs to nonstructural members which may affect the airworthiness of an aircraft, such as:

Cowlings.
Wing and control surface fairings.
Electrical installations.
Windshields.

(2) *Tanks.* Patching and repairing of leaks in nonintegral fuel, oil, hydraulic, and de-icer fluid tanks.

(3) *Ribs, leading and trailing edges, tip strips.* The repair of: Not more than two adjacent wing or control surface ribs of a conventional type (wood or metal); the leading edge of wing and control surfaces between two adjacent wing or control surface ribs; the trailing edge of wings, control surfaces, and flaps; the wing and control surface tip strips.

(4) *Fabric covering.* Patching of fabric involving replacement of fabric covering of surfaces when such replacement is of an area not greater than that required to repair two adjacent ribs.

(5) *Metal or plywood stressed covering.* The patching of holes in metal or plywood stressed covering not to exceed 6 inches in any direction when ribs, stringers, bulkheads, and reinforcements are not directly affected.

(6) *Replacement of components.* Replacement of components or complete units such as listed below with parts supplied by the original manufacturer or manufactured in accordance with approved drawings:

Wings.[4]
Replaceable wing tips.[4]
Control surfaces[4] (fixed and movable) and control cables.
Wing or control surface bracing (struts or wires).
Floats.
Landing gears.
Tail wheel assemblies.
Engine mounts (prefabricated and bolted on, not to be welded on).
Fuel and oil system accessories.
Hydraulic system accessories.
Fuel and oil tanks.
Powerplant controls.
Propeller controls.
Appliances such as: Instruments, hydraulic or electrical actuating units of components, cabin heaters, radio units, auto-pilots.

(b) *Powerplant minor repairs.* Any powerplant repair other than listed under § 18.1–3 as a major repair, or under § 18.1–6 as preventive maintenance, is considered to be a minor repair. The following are examples of powerplant minor repairs:

(1) *Engine top overhauls.* Engines which have neither an integral supercharger nor integral propeller reduction gearing, consisting of the following:

(i) Removal of cylinders.

(ii) Grinding valves and removing carbon.

(iii) Fitting new rings.

[3] Copies of aircraft specifications may be obtained from CAA, Office of Aviation Information, Washington 25, D. C.

[4] See § 18.12–2 regarding flight test after component replacement.

(iv) Adjustments of valve gear or replacement of parts in valve mechanism outside of the crank case.

(2) *Engine complete overhauls.* Complete overhauls of engines which have neither an integral supercharger nor integral propeller reduction gearing.

(3) *Replacement of components.* The replacement of components not a part of the basic structure of the engine, such as carburetors, magnetos, ignition harnesses, on engines of any horsepower.

(4) *Replacement of accessories.* The replacement of components such as generators, starters, fuel pumps, vacuum pumps, hydraulic pumps, and oil coolers on engines of any horsepower.

(c) *Propeller minor repairs.* Repairs such as the following to propellers are considered to be propeller minor repairs:

(1) Repairing dents, cuts, scars, scratches, nicks, leading edge pitting of aluminum blades, provided removal or treatment does not materially affect the strength, weight, balance, or performance of the propeller. (See § 18.30–15 (b) (3) (iii).)

(2) Repairing dents, cuts, scars, scratches, nicks, and small cracks parallel to the grain of wood blades. (See § 18.30–15 (b) (2) (i).)

(3) Removal and installation of propellers.

(4) Assembly and disassembly of ground adjustable propellers.

(5) Balancing of fixed pitch and ground adjustable propellers.

(6) Refinishing of wood propellers.

(d) *Appliance minor repairs.* Any repair to an appliance which would not be defined as a major appliance repair under § 18.1–1 (d) or preventive maintenance under § 18.1–6 is considered to be a minor appliance repair.

§ 18.1–6 *Preventive maintenance (CAA interpretations which apply to § 18.1 (a) (22)).* The following are considered to be typical preventive maintenance operations:

Removal, installation, and repair of landing gear tires.
Replacing of elastic shock absorber cords on landing gear.
Servicing landing gear shock struts by adding oil and or air.
Servicing landing gear wheel bearings, such as cleaning and greasing.
Replacing defective safety wiring or cotter keys.
Any lubrication not requiring disassembly other than removal of nonstructural cover plates, cowlings, fairings, etc.
Making simple fabric patches not requiring rib stitching or the removal of structural parts or control surfaces.
Replenishing hydraulic fluid in hydraulic reservoir.
Refinishing decorative coating of fuselage, wings, and tail group surfaces (excluding balanced control surfaces), fairings, cowling, landing gear, cabin or cockpit interior not requiring removal or disassembly of any primary structure or operation system such as hydraulic or fuel system.
Applying preservative or protective material to components where no disassembly of primary structure or operation systems is involved, such as seaplane preservation (parts, tube to control cables, etc.), anti-corrosive paint to structures or components where such coating is not prohibited or is not contrary to good practices.
Cabin or cockpit interior work (repairing upholstery and decorative furnishings) which does not require disassembly of any primary structure or operation system or interfere with an operating system or affect primary structure of the aircraft.
Small simple repairs to fairings, nonstructural cover plates, cowlings, such as drilling stop holes (section 18.30), small patches and reinforcements not making any change to contour where such change would interfere with proper air flow.
Replacing of side windows where such work does not interfere with structure or any operating system such as controls, electrical equipment, etc.
Replacing of safety belts.
Replacing of seats or seat parts wth replacement parts approved for the aircraft, not involving disassembly of any primary structure or operating system.
Trouble shooting and repairing broken circuits in landing light wiring circuits.
Replacing of bulbs, reflectors, and lenses of position and landing lights.
Replacing of wheels and skis where no weight and balance computation is involved.
Replacing of any cowling not requiring removal of the propeller or any disconnecting of flight controls.
Replacing or cleaning and setting of spark plug gap clearance.
Replacing of any hose connection except hydraulic connections.
Replacing prefabricated fuel lines.
Cleaning fuel and oil strainers.
Replacing of batteries and checking fluid level and specific gravity.

GENERAL

§ 18.10 *Persons authorized to perform maintenance, preventive maintenance, repairs, and alterations.*[3] No person shall perform maintenance, preventive maintenance, repairs, or alterations on civil aircraft of United States registry except as provided as follows:

(a) A certificated mechanic or a person who works under the direct supervision of such mechanic may perform maintenance, repairs, and alterations on aircraft or aircraft components including related appliances, appropriate to his rating, but excluding major repairs and alterations to propellers and all repairs and alterations to instruments.

(b) An appropriately rated repair station may perform maintenance, repairs, and alterations on aircraft or aircraft components, including propellers and appliances, as provided in Part 52 of this subchapter.

(c) A certificated pilot may perform, on aircraft owned or operated by him, except aircraft used in air carrier service, such preventive maintenance as may be authorized by the Administrator.

(d) A manufacturer shall be subject to the requirements of paragraphs (a) and (b) of this section, except that he may rebuild or alter:

(1) Any product manufactured by him under a type or production certificate, or

(2) Any product manufactured by him and approved under the terms of a Technical Standard Order or Product and Process Specification issued by the Administrator.

(e) An appropriately certificated air carrier may perform maintenance, repairs, and alterations on aircraft or aircraft components, including propellers and appliances, as provided for in its continuous airworthiness maintenance and inspection program and its maintenance manual.

§ 18.10–1 *Persons authorized to perform maintenance, repairs, and alterations (CAA interpretations which apply to § 18.10 (a)).* Direct supervision means that the supervising mechanic personally maintains such observation of the work being performed as is necessary to insure that the work is being performed properly, and the supervising mechanic is readily available in person for consultation with the person performing the work.

§ 18.11 *Persons authorized to approve maintenance, repairs, and alterations*—(a) *Maintenance, minor repairs, and minor alterations.* No airframe, powerplant, propeller, or appliance which has undergone maintenance, minor repair, or minor alteration may be approved and returned to service except by one of the following:

(1) An appropriately rated certificated mechanic, or

(2) An appropriately rated certificated repair station, or

(3) An appropriately certificated air carrier, or

(4) A manufacturer, if the product has been rebuilt or altered by the manufacturer under the provisions of § 18.10 (d).

(b) *Major repairs and major alterations.* No airframe, powerplant, propeller, or appliance, which has undergone any major repair or major alteration shall be returned to service until such repair or alteration has been examined, inspected, and approved as airworthy by one of the following:

(1) An authorized representative of the Administrator, or

(2) An appropriately rated certificated repair station, if the work has been performed by such repair station in accordance with a manual, specification, or other technical data aproved by the Administrator,[4] or

(3) A manufacturer, if the product has been rebuilt or altered by the manufacturer under the provisions of § 18.10 (d) and in accordance with a manual, specification, or other technical data approved by the Administrator,[4] or

(4) An appropriately certificated air carrier, if the work has been performed by such air carrier in accordance with a manual specification, or other technical data approved by the Administrator.[4]

§ 18.11–1 *Return to service (CAA interpretations which apply to § 18.11).* An airframe, powerplant, propeller, or appliance which has undergone maintenance, repair or alteration is considered returned to service when it has been determined airworthy by a person author-

[3] The Communications Act of 1934, as amended, and the rules and regulations of the Federal Communications Commission require that all transmitter adjustments or tests during or coincident with the installation, servicing, or maintenance of a radio station licensed by the Federal Communications Commission which may affect the proper operations of such station shall be made by or under the immediate supervision and responsibility of a person holding a first- or second-class radio operator license issued by the Federal Communications Commission, either radiotelephone or radiotelegraph as may be appropriate for the class of station concerned, who shall be responsible for the proper functioning of the station equipment.

[4] Major repairs and major alterations whose design has not previously been approved by the Administrator may require the submittal of technical data and or flight tests in order to establish compliance with the applicable airworthiness provisions. Examples of such major alterations for which it would be desirable to contact a representative of the Administrator prior to accomplishment of the alteration are given in Civil Aeronautics Manual 18.

ized to approve maintenance, repairs or alterations under § 18.11, and:

(a) Appropriate aircraft record entries have been made and approved by a person authorized under § 18.11 (a).

(b) The repair and alteration form authorized or furnished by the Administrator has been properly executed and approved by a person authorized under § 18.11 (b).

§ 18.11–2 *Contacting CAA representative prior to alteration (CAA policies which apply to § 18.11).* Before the following major alterations are undertaken, they should be discussed with a representative of the Administrator who is authorized to approve them.

(a) Major changes to the basic design of the wings or control surfaces.

(b) Changes which may affect the aerodynamic characteristics, flight behavior, or control of the aircraft.

(c) Major alterations of any primary structure that require structural substantiation.

(d) Installation of a fuel tank in a wing which was not designed to contain a fuel tank.

(e) Replacing of fabic covering of a wing with metal covering.

(f) Installation of an engine and propeller other than listed in the aircraft specification.

(g) Installation of a propeller model not listed on the pertinent CAA aircraft specification.

(h) Converting from landing gear with tail wheel to a tricycle-type landing gear, such installation not listed on the CAA aircraft specification.

(i) Previously unapproved changes to engine adjustments and settings having an effect on power output, such as changes in carburetor settings and ignition timing.

(j) Changes to air intake, air scoop, or carburetor heat valve which may alter intake air flow, affect fuel metering, or change mixture distribution pattern.

(k) Changes to exhaust system which may increase back pressure and thereby decrease power output or reduce reliability.

(l) Changes reducing strength of power-plant components, such as adding openings in cowl or engine mount structure, cutting down edge distances on mounting flanges, increasing exhaust system overhang on exhaust parts, etc.

(m) Change in location or direction of motion of powerplant controls.

(n) Changes which might adversely influence the aerodynamic effect of the powerplant, such as adding or changing cowl flaps, increasing size of air inlets or outlets, or change in shape of cowling protuberances, etc.

(o) Powerplant changes which result in a change in c. g. range.

(p) Changes affecting cooling of engine, such as baffle changes, addition of holes in cowling and baffle parts, placing of obstructions in air flow path, or restricting air inlet or outlet openings. Exhaust system changes which cause an increase in back pressure usually have an adverse effect on engine cooling.

(q) Changes adversely affecting fuel flow to the engine, such as adding restrictions in the form of fittings, larger lines, finer mesh screens, or valve substitutions; altering flow characteristics by changes in fuel tank vents or relocation of fuel system components.

§ 18.12 *Flight tests.* No aircraft which has undergone any major repair or major alteration shall be operated when carrying passengers or being operated for hire, unless such aircraft has thereafter been test flown by a person holding a pilot certificate of at least private grade with appropriate ratings for such aircraft. The pilot shall make a written notation in the aircraft repair and alteration records to the effect that he has flown such aircraft and has found the flight operation to be satisfactory.[5]

§ 18.12–1 *Flight tests (CAA interpretations which apply to § 18.12).* (a) Any aircraft which has undergone a major repair or a major alteration must be given a flight test before it can be used for the carriage of passengers or be operated for hire. The purpose of the flight test is to confirm that the major alteration or major repair involved has had no adverse effect on the performance or flight characteristics of the aircraft. In order to accomplish this objective, it is necessary that the pilot conducting the flight test possess sufficient aeronautical background and experience to analyze the operation of airframes, powerplants, propellers, and appliances. Specifically, the pilot should be competent to analyze and report on the following:

(1) Engine operation, power output, engine temperature, and engine smoothness.

(2) Control response, performance, and proper rigging.

(3) The proper operation of appliances.

(4) Proper operation of propellers and their controls.

The pilot should also have sufficient experience so as to be familiar with any operational feature peculiar to the particular type of aircraft he is planning to test.

(b) The notation in the aircraft records referred to in § 18.12 must not be made until the pilot has satisfied himself that any discrepancy found as a result of the test flight has been corrected.

§ 18.12–2 *Flight test after component replacement (CAA policies which apply to § 18.12).* In addition to requiring the flight test of an aircraft which has undergone a major repair or major alterations, the aircraft should be test flown prior to returning it to service after such minor repairs as replacement of wings, wing tips, and control surfaces. A notation should be made in the aircraft records by the pilot after completion of a satisfactory flight test.

§ 18.13 *Aircraft operating limitations.* When a major repair or major alteration results in any change in the aircraft operating limitations or data contained in the approved airplane flight manual, appropriate amendments to the aircraft operating limitations shall be made in the form and manner approved by the Administrator.

§ 18.13–1 *Aircraft operating limitations (CAA policies which apply to § 18.13).* (a) Aircraft operating limitations are prescribed or approved by the CAA for each aircraft as part of the airworthiness certificate. Major repairs or alterations to the aircraft may render all or some of the operating limitations inapplicable. It is the responsibility of the person or agency authorized by § 18.11 (b) to approve and return to service aircraft which have been repaired or altered, to determine whether any of the operating limitations have been affected.

(b) The CAA has incorporated in the appropriate aircraft specifications the prescribed operating limitations for many of the common major aircraft alterations. In event the repair or alteration is not covered by an applicable CAA specification, the required limitations will be prescribed at the time the repair or alteration is submitted for approval. (See § 18.11 (b), footnote 4.)

(c) Prior to returning the aircraft to service, it should carry or display current operating limitations as set forth in § 43.10–1 of CAA Manual 43.

MAINTENANCE, REPAIR, AND ALTERATION RECORDS

§ 18.20 *Required records and entries.* A permanent record of every maintenance (excepting preventive maintenance), repair, rebuilding, or alteration of any airframe, powerplant, propeller, or appliance shall be maintained by the owner (or in the case of an aircraft by the registered owner) in a logbook or other permanent record satisfactory to the Administrator, which shall contain at least the information specified in § 18.21. Entries in such records shall be made or caused to be made by the individual, repair station, air carrier, or manufacturer performing the work.

§ 18.20–1 *Flight time in aircraft record (CAA interpretations which apply to § 18.20.* A certificated mechanic performing a periodic inspection must make an entry of the inspection in the aircraft record. Such entry, to be complete, must reflect the flight time or tachometer reading at the time of the inspection.

§ 18.21 *Content of repair and alteration records.* The record of all maintenance, repair, rebuilding, and alteration of any airframe, powerplant, propeller, or appliance or the installation or removal of an appliance shall contain the information set forth in paragraphs (a) through (d) of this section.

(a) An adequate description of the work performed.

(b) The date of completion of the work performed.

(c) The name of the individual, repair station, manufacturer, or air carrier performing the work.

(d) The signature, and if a certificated mechanic or certificated repairman the certificate number, of the person approving as airworthy the work performed and authorizing the return of the aircraft or component to service.

§ 18.21–1 *Scope of repair and alteration records (CAA interpretations which apply to § 18.21 (a)).* (a) Section 18.21 (a) requires that the repair and alteration records contain an adequate description of the work performed. In lieu of describing in detail the work performed, reference may be made to data previously approved by the Administrator. In all cases, the entry should identify the type of work performed and the component repaired or altered. An example of such an entry could be: "Spliced rear spar, left wing outboard of strut fitting in accordance with figure 2–3 of CAM 18."

(b) The replacement of components, except those described in § 18.1–6 (preventive maintenance), with new, rebuilt or repaired components of similar design is a minor repair. An entry of this replacement should be made in the permanent record referred to in § 18.20. When the component was rebuilt or repaired by a certificated repair station or the manufacturer of the component and installed by another person, the installing agency should include in the description required by paragraph (a) of § 18.21 a statement identifying the repair station or manufacturer performing the work. An example of such an entry would be as follows:

Installed left landing gear assembly which was rebuilt by Aircraft Services, Repair Station No. 0001. A description of the repair is on file at that agency under job number 386 dated June 1, 1953.

(c) The information to make an entry such as the above example would be obtained from the maintenance release furnished by the repair station or manufacturer repairing the component. The maintenance release is prepared by the repair station or manufacturer in accordance with the procedure set forth in § 18.22–2. The CAA considers such an entry to relieve the person installing the component of responsibility in connection with airworthiness of the repair but not the installation of the component.

§ 18.22 *Form and disposition of major repair or major alteration records.* All major repairs and major alterations to an airframe, powerplant, propeller, or appliance shall be entered on a form acceptable to the Administrator. Such form shall be executed in duplicate and shall be disposed of in such manner as, from time to time, may be prescribed by the Administrator.

§ 18.22–1 *Procedure for certificated mechanics (CAA rules which apply to § 18.22).*—(a) *Procedure.* The form and disposition of major repair and major alteration records for repairs or alterations accomplished by certificated mechanics shall be as follows:

(1) Form ACA–337 (Revised April 1952), Major Repair and Alteration Form shall be used to record all major repairs and major alterations.

(2) The Form ACA–337 shall be executed in accordance with the instructions contained in Appendix A.

(3) The Form ACA–337 shall be executed in duplicate. After the repair or alteration has been examined, inspected, and approved or rejected, the original of the Form ACA–337 shall be given to the aircraft owner for retention as part of the permanent record referred to in § 18.20. The copy will be retained by the CAA.

§ 18.22–2 *Procedure for certificated repair stations and manufacturers (CAA rules which apply to § 18.22).*—(a) *Procedure.* The form and disposition of the major repair and major alteration records for repair and alteration accomplished by certificated repair stations and manufacturers shall be as follows:

(i) *Major alterations.* (i) All major alterations shall be entered on Form ACA–337, Major Repair and Alteration Form.

(ii) The Form ACA–337 shall be executed in accordance with the instructions contained in Appendix (a).

(iii) The form shall be executed in duplicate. The altering agency may prepare extra copies for their record; however, it is not mandatory. The original of the Form ACA–337 shall be given the aircraft owner for retention as part of the permanent record referred to in § 18.20. The copy shall be forwarded to the local CAA office within 48 hours of the time the aircraft, airframe, powerplant, propeller, or appliance is approved for return to service.

(2) *Major repairs.* (i) The Administrator will accept in lieu of Form ACA–337 for major repairs made only in accordance with a manual or specification approved by the Administrator, the customer's work order upon which repairs are recorded by the repair station or manufacturer. The original copy of the work order shall be furnished the owner or purchaser and the duplicate copy shall be retained at least two years by the repair station or manufacturer. The owner of the aircraft shall be furnished an official maintenance release for retention as part of the aircraft permanent record required by § 18.20. Where the repair is made on a component or accessory not yet identified with an aircraft, the release shall remain with the component or accessory until it is installed in an aircraft. At that time, the installing agency will make the maintenance release available to the owner for incorporation in the permanent aircraft record required by § 18.20.

(ii) The repair station or manufacturer may use a maintenance release of its own design provided the release incorporates the information set forth in subdivision (iii) of this subparagraph and is signed by an authorized representative of the repair station or manufacturer.

(iii) Maintenance release: The release[6] shall contain the identity of the aircraft or component. In the case of an aircraft, it will consist of at least the following: make of aircraft, model, serial number, nationality and registration mark, and location of repair. When the repair is to a spare component such as a wing, landing gear, propeller, powerplant, or appliance, the identification will include manufacturer's name, name of component, model and serial number, if any. The following statement shall also be included:

The aircraft and/or component identified above was repaired and inspected in accordance with current Civil Air Regulations and was found airworthy for return to service.

Pertinent details of the repair are on file at this agency under work order No. -----

Date -----

(Address)

§ 18.23 *Provisions for air carrier records.* Required records and entries may be replaced, in the case of maintenance, repairs, or alterations to appropriately certificated air carrier aircraft, by a suitable system of recording maintenance, repairs, alterations, and signatures of responsible personnel: *Provided*, That the information specified in § 18.21 is furnished.

PERFORMANCE RULES

§ 18.30 *Standard of performance: general.* All maintenance, repairs, and alterations shall be accomplished in accordance with methods, techniques, and practices approved by or acceptable to the Administrator.

(a) *Maintenance and repair.* All maintenance and repair shall be accomplished in such a manner and the materials used shall be of such quality and strength that the condition of the part of the aircraft on which such work has been performed shall, with regard to aerodynamic and mechanical function, structural strength, resistance to vibration and deterioration, and other qualities affecting airworthiness, be at least equivalent to its original or properly altered condition.

(b) *Alterations.* All alterations shall be so designed and accomplished that the altered airframe, powerplant, propeller, or appliance will comply with the airworthiness requirements for the airframe, powerplant, propeller, or appliance.

NOTE: Specific record or reporting requirements subsequently prescribed will be subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

§ 18.30–1 *Standard of performance (CAA interpretations which apply to § 18.30.*—(a) *General.* All maintenance, repairs and alterations must be accomplished with the use of such tools, equipment, and test apparatus as are necessary to insure their completion in accordance with good accepted industry practices. Where special equipment or test apparatus is recommended by the manufacturer of the article involved, such equipment or apparatus, or equivalent acceptable to the Administrator must be used.

(b) *Methods, techniques and practices set forth in air carrier manuals for the performance of approved continuous airworthiness maintenance and inspection programs.* The maintenance manual or applicable maintenance portions of the air carrier manual required by Civil Air Regulations Parts 40, 41, and 42 for the maintenance of air carrier aircraft will, unless the air carrier is otherwise notified by the Administrator, constitute acceptable methods, techniques and practices for the performance of approved continuous airworthiness maintenance and inspection programs.

[5] The objectives of the flight test and the technical qualifications which should be possessed by the test pilot will be found in Civil Aeronautics Manual 18. (Also see footnote 4, *supra*, concerning major alteration which may require additional flight testing to determine compliance with the applicable airworthiness requirements.)

[6] The maintenance release may be combined with the "customer's work order" to provide one document so long as it contains the required information.

[6] Only those persons specifically authorized by the repair station or manufacturer management shall be permitted to sign the release.

§ 18.30–2 *Wood aircraft structures*[1]—*(CAA policies which apply to § 18.30)*—(a) *Materials.* Three forms of wood are commonly used in aircraft: solid wood, plywood, and laminated wood. Although several kinds of modified wood are sometimes used for special purposes, these three forms constitute the bulk of all wood aircraft construction materials.

(1) *Quality of wood.* All wood and plywood used in the repair of aircraft structures should be of aircraft quality. Table 2–1 lists the permissible variations in characteristics and properties of aircraft wood.

(2) *Species substitution.* The species used to repair a part should be the same as that of the original whenever possible; however, permissible substitutes are given in table 2–1.

(3) *Effects of shrinkage.* (i) When the moisture content of a piece of wood is lowered, its dimensions decrease. The dimensional change is greatest in a tangential direction (across the fibers and parallel to the growth rings), somewhat less in a radial direction (across the fibers and perpendicular to the growth rings), and is negligible in a longitudinal direction (parallel to the fibers).

(ii) These dimensional changes can have several detrimental effects upon a wood structure such as loosening of fittings and wire bracing, and checking or splitting of wood members.

(iii) A few suggestions for minimizing these shrinkage effects are:

(*a*) Use of bushings that are slightly short so that when the wood member shrinks, the bushings do not protrude and the fittings may be tightened firmly against the member.

(*b*) Gradual dropping off of plywood face plates either by feathering or by shaping as shown in figure 2–1.

(4) *Replacement of drain holes and skin stiffeners.* Whenever repairs are made that require replacing a portion that included drain holes, skin stiffeners, or any other items, the repaired portion should be provided with similar drain holes, skin stiffeners, or items of the same dimensions in the same location. Reinforcing, under skin repairs, that interferes with the flow of water from some source, such as inspection holes, should be provided with drain holes at the lowest points.

(5) *Flutter precautions.* When repairing control surfaces, especially on high-performance airplanes, care should be exercised that the repairs do not involve the addition of weight aft of the hinge line. Such a procedure may adversely disturb the dynamic and static balance of the surface to a degree which would induce flutter. As a general rule it will be required to repair control surfaces in such a manner that the structure is identical to the original so that the weight distribution and resulting mass balance are not affected in any way.

(6) *Glues and gluing.* Satisfactory glue joints in aircraft will develop the full strength of wood under all conditions of stress. To produce this result the gluing operation must be carefully controlled so as to obtain a continuous, thin, uniform film of solid glue in the joint with adequate adhesion to both surfaces of the wood. Some of the more important conditions involve:

Properly prepared wood surfaces.
Glue of good quality, properly prepared.
Good gluing technique.

(i) *Preparation of wood surfaces for gluing.* (*a*) It is recommended that no more than 8 hours be permitted to elapse between final surfacing and gluing. The gluing surfaces should be machined smooth and true with planers, jointers or special miter saws. Planer marks, chipped or loosened grain, and other surface irregularities should not be permitted. Sandpaper should never be used to smooth soft wood surfaces that are to be glued. Satisfactorily sawed surfaces should approach well-planed surfaces in uniformity, smoothness, and freedom from crushed fibers.

(*b*) Tooth-planing, or other means of roughening smooth, well-planed surfaces of normal wood before gluing, is not recommended. Such treatment of well-planed wood surfaces may result in local irregularities and objectionable rounding of edges. While sanding of planed surfaces is not recommended for soft woods, sanding is a valuable aid in improving the gluing characteristics of some hard plywood surfaces; wood that has been compressed through exposure to high pressures and temperatures; resin-impregnated wood (impreg and compreg); and laminated paper plastic (papreg).

(*c*) Wood surfaces for gluing should be free from oil, wax, varnish, shellac, lacquer, enamel, dope, sealers, paint, dust, dirt, old glue, crayon marks, and other extraneous materials.

(*d*) Wetting tests are useful as a means of detecting the presence of wax. Drops of water placed on the surface of wax-coated wood do not spread or wet the wood. At present, preliminary gluing tests appear to be the only positive means of actually determining the gluing characteristics of plywood surfaces.

(ii) *Glues.* Glues used in aircraft repair fall into two general groups: Casein glues, and resin glues. Any glue that meets the performance requirements of applicable United States Military specifications or has been previously accepted by the CAA, is satisfactory for use in certificated civil aircraft. In all cases glues are to be used strictly in accordance with the glue manufacturers' recommendations.

(*a*) *Casein glues.* Casein glues are probably more widely used than any of the resin glues in wood aircraft repair work. The forms, characteristics, and properties of water-resistant casein glues have remained substantially the same for many years except for the addition of preservatives. Casein glues for use in aircraft should contain suitable preservatives such as the chlorinated phenols and their sodium salts, to increase their resistance to organic deterioration under high humidity exposures. Most casein glues are sold in powder form ready to be mixed with water at ordinary room temperatures.

(*b*) *Synthetic resin glues.* (*1*) Synthetic resin glues for wood are outstanding in that they retain their strength and durability under moist conditions and even after exposure to water. The best-known and most commonly used synthetic resin glues are the phenol-formaldehyde, resorcinol-formaldehyde, and urea-formaldehyde types. Materials, such as walnut-shell flour or wood flour, are often added by the glue manufacturer to the resin glues to give better working characteristics and joint-forming properties. Table 2–2 has been prepared as an aid in the selection of cold-setting synthetic resin glues. It has been derived largely from the glue manufacturers' directions and instructions, the experience of the users of glues, and such test results as are available. This list is incomplete and subject to change as some brands of glues are discontinued, others modified, and new glues developed and marketed. The inclusion of any glue in this list does not constitute an endorsement on the part of any Government agency nor does it assure that it will meet applicable specifications.

(*2*) The glues listed in this table are the room temperature setting type. The suitable curing temperatures for the urea-formaldehyde type vary from 70° to 75° F., and for the resorcinol glues from 70° F. up. The strength of the joint cannot be depended upon if assembled and cured at temperatures below 70° F.

(*c*) *Mixing of resin glues.* Liquid resin glues may come ready for use or in a form which requires only the addition of a hardener. In all cases the mixing, glue consistency, assembly time, etc., should comply with the glue manufacturers' recommendations and instructions. Cold-setting, synthetic-resin glues, when prepared for use, are usually sharply limited in working life, and care should be taken to discard the glue and clean the equipment before the end of the working-life period. In very warm weather it may be found advisable to keep the glue pot in a bath of cool water, approximately 70° F., to prolong the working life of the mixture.

(iii) *Gluing technique*—(*a*) *Spreading of glue.* To make a satisfactory glue joint, glue should be spread evenly on both of the surfaces to be joined. It is recommended that a clean brush be used and care taken to see that all surfaces are covered. The spreading of glue on but one of the two surfaces is not recommended.

(*b*) *Assembly time in gluing.* (*1*) Where pieces of wood are coated and exposed freely to the air, a much more rapid change in consistency of the glue occurs than where the pieces are laid together as soon as the spreading has been done. The condition of free exposure is conveniently referred to as "open assembly" and the other as "closed assembly."

(*2*) When cold-setting glues are coated on wood parts and left exposed to the atmosphere (open assembly), the time for complete assembly is appreciably reduced compared with closed assembly periods. Assembly times and gluing pressures should be as recommended by the glue manufacturer.

(*3*) The pressing time for casein and resin glue joints should, in general, be 7 hours or more. Other types of glue require various times and temperatures for curing. Glue joints increase in strength mainly as a result of drying; hence, where it is convenient to do so, it is better to maintain pressure from one day to the next. The longer pressing periods are desirable, as this enables the joints to reach a higher proportion of their final strength before being disturbed.

(*c*) *Gluing pressure.* (*1*) Pressure is used to squeeze the glue out into a thin continuous film between the wood layers, to force air from the joint, to bring the wood surfaces into intimate contact with the glue, and to hold them in this position during the setting of the glue.

(*2*) Pressure should be applied to the joint before the glue becomes too thick to flow and is accomplished by means of clamps, presses, or other mechanical devices.

(*3*) Nonuniform gluing pressure commonly results in weak and strong areas in the same joint. The amount of pressure required to produce strong joints in aircraft assembly operations may vary from 125 to 150 pounds per square inch for softwoods and 150 to 200 pounds per square inch for hardwoods. Insufficient pressure or poorly machined wood surfaces usually result in thick glue lines which indicate a weak joint and should be carefully guarded against.

(*d*) *Method of applying pressure.* (*1*) The methods employed in applying pressure to joints in aircraft gluing operations range from the use of brads, nails, screws, and clamps to the use of hydraulic and electric power presses. Hand nailing is used rather extensively in the gluing of ribs and in the application of plywood skins to the wing, control surfaces, and fuselage frames.

(*2*) On small joints such as found in wood ribs, the pressure is usually applied only by nailing the joint gussets in place after spreading the glue. Since small nails must be used to avoid splitting, the gussets must be comparatively large in area to compensate for the relative lack of pressure. At least 4 nails per square inch should be used and in no event should nails be more than three-fourths inch apart. Small brass screws may also be used advantageously where the particular parts to be glued are relatively small and do not allow application of pressure by means of clamps.

(*3*) Spar splices should always be clamped by means of cabinet-makers' parallel clamps or similar types. Handsprung clamps should be used in conjunction with softwood only. Due to their limited pressure area, they must be applied with a pressure distributing strip or block at least twice as thick as the member to be pressed.

(*b*) *Scarf joints*—(*1*) *General.* The scarf joint is the most satisfactory method of making a joint in the grain direction between two solid wood members. Both parts should be cut accurately because the strength of the joint depends upon maximum contact between the surfaces being glued.

(*2*) *Grain direction.* The scarf cut should be made in the general direction of the grain slope as shown in figure 2–2. (See figure for note concerning allowable deviation from grain direction.)

(*c*) *Spars*—(*1*) *Splicing of spars.* (i) A spar may be spliced at any point except under wing attachment fittings, landing gear fittings, engine-mount fittings, or lift and interplane strut fittings. These fittings should not overlap any part of the splice. Splicing under minor fittings such as drag wire, antidrag wire or compression strut fittings is acceptable under the following conditions:

(ii) The reinforcing plates of the splice should not interfere with the proper attachment or alinement of the fittings. The locations of pulley support brackets, bellcrank support brackets or control surface support brackets should not be altered.

(iii) The reinforcing plate may overlap drag or antidrag wire or compression strut fittings if the reinforcing plates are on the front face of the front spar or on the rear face of the rear spar. In such cases it will be necessary to install slightly longer bolts. The inside reinforcing plate should not overlap drag strut fittings unless such overlapping does not require sufficient shortening of compression struts or changes in drag truss geometry to prevent adjustment for proper rigging. Even though takeup is sufficient, it may be necessary to change the angles on the fittings. Splices should be spaced so that they do not overlap. Acceptable methods of splicing the various types of spars are shown in figures 2–3 through 2–6. Reinforcing plates must be used as indicated on all scarf repairs to spars and the slopes of scarfs shown are minimum slopes.

(*2*) *Splicing of box spar webs.* The method of splicing plywood webs is shown in figure 2–7. Plywood webs should always be spliced and reinforced with the same type of plywood. Solid wood should never be used to replace plywood webs as plywood is stronger in shear than solid wood of the same thickness due to the variation in grain direction of the individual plies. The face grain of plywood replacement webs and reinforcing plates should be in the same direction as the original member to insure that the new web will have the required strength.

(*3*) *Replacing solid-type spars with laminated type.* Solid spruce spars may be replaced with laminated ones or vice versa, provided the material is of the same high quality. External plywood reinforcement should always be replaced with plywood as in the original structure.

(*4*) *Longitudinal cracks and local damage.* Cracked spars (except box spars) may be repaired by gluing plates of spruce or plywood of sufficient thickness to develop the longitudinal shear strength of the spar to both sides of it. Such plates should extend well beyond the termination of the cracks as shown in figure 2–8. A method of repairing small local damage to either the top or bottom side of a spar is also shown in this figure.

(i) *Longitudinal cracking of wood wing spars in airplanes operating in arid regions.* (*a*) Airplanes having wood spars and being operated in arid regions may develop longitudinal spar cracks in the vicinity of the plywood reinforcing plates. These cracks result from the tendency of the spar to shrink when drying takes place. Plywood resists this tendency and causes a cross-grain tensile failure in the basic spar. Cracks start under the plywood plates, usually, but not necessarily, at a bolt hole or cutout and spread in each direction until, in most cases, they extend a short distance beyond the ends of the plates where the resistance to spar shrinkage disappears. Other factors which have been found conducive to the formation of cracks due to spar shrinkage in the region of plywood plates are poor protective finishes, large cutouts, and metal fittings which utilize two lines of large diameter bolts.

(*b*) The presence of cracks does not necessarily mean that the spar must be discarded. If the crack is not too long or too close to either edge and can be reinforced properly, it will probably be more economical and satisfactory to effect a repair than to install a new spar or section. However, a generally acceptable procedure suitable for all airplane models cannot be described here. In such instances, it is recommended that the manufacturer or the Civil Aeronautics Administration be contacted for specific instructions before making repairs not in accordance with the manufacturer's approved instructions or the recommendations of this manual, because of the possibility of strength deficiencies.

(*5*) *Elongated holes.* In cases of elongated bolt holes in a spar or cracks in the vicinity of bolt holes, a new section of spar should be spliced in or the spar replaced entirely, unless the method of repair is specifically approved by a representative of the Civil Aeronautics Administration. In many cases it has been found advantageous to laminate the new section of the spar (using aircraft plywood for the outer faces), particularly if the spar roots are being replaced.

(*d*) *Ribs*—(*1*) *General.* Complete ribs should be made from a manufacturer's approved drawing or from a drawing made by the repair agency and certified by the manufacturer as correct, except that the original rib may be used as a pattern in making the new rib if it is not too seriously damaged to permit comparison. Wood ribs should not be attached to wood spars by nails driven through the rib cap strips, as this weakens the rib materially. The attachment should be by means of glue, with cement-coated, barbed or spiraled nails driven through the vertical rib members on each side of the spar. The drawing or pattern should be retained by the repair agency for use by the aviation safety agent in making his inspection.

(*2*) *Repairs of wood structures at a joint, between joints, at trailing edges, or at spars.* Acceptable methods of re-

[1] Complete information on the general design and fabrication of wood aircraft structures may be found in ANC–18, "Design of Wood Aircraft Structures," and ANC–19, "Wood Aircraft Inspection and Fabrication," copies of which may be obtained for $1.00 and $1.25, respectively, from the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

pairing damaged ribs are shown in figure 2–9.

(3) *Compression ribs.* Acceptable methods of repairing damaged compression ribs are shown in figure 2–10. (A) illustrates the repair of a compression rib of the "I" section type, i. e., wide, shallow cap strips, a center plywood web, with a rectangular compression member on each side of the web. The rib is assumed to be cracked through cap strips, web member, and compression member. Cut the compression member as shown in (D), remove, and replace the shortest section, adding the reinforcing blocks as also shown in (D). Cut and replace the aft portion of the cap strips, reinforcing as shown in figure 2–9, except that the reinforcing blocks are split in the vertical direction to straddle the center web. The plywood side plates, as indicated in (A), are glued on. These plates are added to reinforce the damaged web. (B) illustrates a compression rib of the type that is basically a standard rib with rectangular compression members added to one side and a plywood web to the other side. The method used in this repair is essentially the same as in (A) except that the plywood reinforcing plate shown solid black in section B–B is continued the full distance between spars. (C) illustrates a compression rib of the "I" type with a rectangular vertical member each side of the web. The method of repair is essentially the same as in (A) except that the plywood reinforcing plates on each side shown in solid black in section C–C are continued, as in (C), the full distance between spars.

(e) *Plywood skin*—(1) *General.* Extensive repairs to damaged stressed skin plywood structures should be made in accordance with specific recommendations from the manufacturer. It is recommended that repairs be made by replacing the entire panel from one structural member to the next if damage is very extensive. When damaged plywood skin is repaired, the adjacent internal structure should be carefully inspected for possible hidden damage. Any defective frame members should be repaired prior to making skin repairs.

(i) *Types of patches.* Four types of patches—the surface or overlay patch, the splayed patch, the plug patch, and the scarf patch—are acceptable for repairing plywood skins. Surface patches should not be used on skins over one-eighth-inch thick. Splayed patches should not be used on skins over one-tenth-inch thick. There are no skin thickness limitations for the use of scarf patches and plug patches.

(ii) *Determination of single or double curvature.* Much of the outside surface of plywood aircraft is curved. On such areas, plywood used for repairs to the skin must be similarly curved. Curved skins are either of single curvature or of double (compound) curvature. A simple test to determine which type of curvature exists may be made by laying a sheet of heavy paper on the surface in question. If the sheet can be made to fit the surface without wrinkling, the surface is either flat or has single curvature. If, however, the sheet cannot be made to fit the surface without wrinkling, the surface is of double curvature.

(iii) *Repairs to single curvature skin.* (*a*) Repairs to skins of single curvature may usually be formed from flat plywood, either by bending it dry or after soaking it in hot water. The degree of curvature to which a piece of plywood can be bent will depend upon the direction of the grain and the thickness. Table 2–3 is presented as a guide in determining which process of bending should be used for the curvature being considered.

(*b*) Plywood after softening may be bent on a cold ventilated form or it may be bent over the leading edge near the part being patched if space permits. In either method it should be allowed to dry completely on the form. When bending plywood over a leading edge, drying may be hastened by laying a piece of coarse burlap over the leading edge before using it as a bending form. A fan to circulate the air over the bent piece will speed the drying. In bending pieces of small radii or to speed up the bending of a large number of parts of the same curvature, it may be necessary to use a heated bending form. The surface temperature of this form may be as high as 149° C. (300° F.), if necessary, without danger of damage to the plywood. The plywood should be left on the form, however, only long enough to dry to room conditions.

(iv) *Repairs to double curvature skin.* The molded plywood necessary for a repair to a damaged plywood skin of double curvature cannot be made from flat plywood unless the area to be repaired is very small or is of exceedingly slight double curvature; therefore, molded plywood of the proper curvature must be on hand before the repair can be made. If molded plywood of the proper curvature is available, the repair may be made following the recommended procedures.

(2) *Splayed patch.* Small holes with largest dimensions not over 15 times the skin thickness, in skins not more than one-tenth-inch in thickness, may be repaired by using a circular splayed patch as illustrated in figure 2–11. The term splayed is used to denote that the edges of the patch are tapered but the slope is steeper than is allowed in scarfing operations. The following steps should be taken in making a splayed patch:

(i) Lay out the patch according to figure 2–11. Center the dividers as near to the damage as is possible or tack a small piece of plywood over the hole for a center point and draw two circles, the inner one to be the size of the hole and the outer one marking the limits of the taper. The difference between the radii is 5T (5 times the thickness of the skin). If one leg of the dividers has been sharpened to a chisel edge, the dividers may be used to cut the inner circle completely through.

(ii) Taper the hole evenly to the outer circle with a chisel, knife, or rasp.

(iii) Prepare a circular tapered patch to fit the prepared hole, and glue the patch into place with face grain direction matching that of the original surface.

(iv) Use waxed paper between the patch and a plywood pressure plate cut to the exact size of the patch. This prevents extruded glue from binding patch and plate together. Center the plate carefully over the patch.

(v) Apply pressure. As there is no reinforcing behind this patch, care must be used so that pressure is not great enough to crack the skin. On horizontal surfaces, weights or sandbags will be sufficient. On vertical surfaces apply hand clamps lightly but snugly. On patches too far in for the use of standard hand clamps, jaws of greater length may be improvised.

(vi) Fill, sand, and refinish the patch.

(3) *Surface patch.* Plywood skins that are damaged between or along framing members may be repaired by surface of overlay patches as shown in figure 2–13. The damaged skin should be trimmed to a rectangular or triangular shape and the corners rounded. The radius of rounded corners should be at least five times the skin thickness. Surface patches should be covered with fabric before finishing. Fabric should overlap the original skin at least 2 inches. Surface patches located entirely aft of the 10 percent chord line or which wrap around the leading edge and terminate aft of the 10 percent chord line are permissible. Patches located entirely aft of the 10 percent chord line should have their forward edges beveled to 4 times the skin thickness. Surface patches may have as much as a 50-inch perimeter and may cover as much as 1 frame (or rib) space. The face grain direction should be the same as the original skin.

(4) *Scarf patch*—(i) *General.* (*a*) A properly prepared and inserted scarf patch is the best repair for damaged plywood skins. It is the preferred type for most skin repairs. Figure 2–14 shows the details and dimensions to be used when installing typical scarf skin patches when the back of the skin is accessible. Figure 2–15 should be followed when the back of the skin is not accessible. The scarf slope of 1 in 12 shown in both figures is the steepest slope permitted for all species of plywood. If the radius of curvature of the skin at all points on the trimmed opening is greater than 100 times the skin thickness, a scarf patch may be installed.

(*b*) Scarf cuts in plywood may be made by hand plane, spoke shave, scraper or accurate sandpaper block. Rasped surfaces, except at the corners of scarf patches, and sawed surfaces are not recommended as they are likely to be rough or inaccurate.

(*c*) Nail strip gluing is often the only method available for gluing scarf joints in plywood when used in repair work; therefore it is essential that all scarf joints in plywood be backed with plywood or solid wood to provide adequate nail-holding capacity. The face grain direction of the plywood patch should be the same as that of the original skin.

(ii) *Scarf patches (back of skin accessible).* (*a*) When the back of a damaged plywood skin is accessible (such as a fuselage skin), it should be repaired with scarf patches following the details shown in figure 2–14. Whenever possible the edge of the patch should be supported as shown in section C–C. When the damage follows or extends to a framing member, however, the scarf may be supported as shown in section B–B.

(*b*) Damages that do not exceed 25 times the skin thickness in diameter after being trimmed to a circular shape, and if the trimmed opening is not nearer than 15 times the skin thickness to a framing member, may be repaired as shown in figure 2–14, section D—D. The backing block is especially shaped from solid wood and fitted to the inside surface of the skin, and is temporarily held in place with nails. A hole, the exact size of the inside circle of the scarf patch, is made in the block and is centered over the trimmed area of damage. The block is removed after the glue on the patch has set, and leaves a flush surface to the repaired skin.
